ANTH 275 : Archaeology Field School (Irchester)

Credits 5

Quarter Offered Summer

Students will participate in a two-week archaeological field school facilitated by the University of Leicester, at the Romano-British site of Irchester in the United Kingdom. During which time students will develop a variety of hands-on techniques, including but not limited to excavation, recording, and post-excavation analysis. This class may include students from multiple sections. (Elective)

Prerequisites

ENGL& 101, ANTH& 204 or ANTH& 206

Course Outcomes

Explain the key characteristics of modern methodological excavation techniques.

Demonstrate common collection and recording/documentation practices.

Demonstrate and practice workplace safety in and around archaeological sites.

Examine ethical and legal issues concerning the excavation of artifacts and/or human remains.

Demonstrate familiarization with various forms of material cultural common to Romano-British sites.

Define terms, phrases, and abbreviations commonly used by professonial archaeologists.

Demonstrate proper use of common archaeological tools and instruments such as shovel, spade, trowel, measuring tape, auto-level, and total station.
