

# Honors Program

If you're looking for a one-of-a-kind experience designed for highly motivated students who seek to be engaged in an intensive learning process, our Honors Program is for you. You'll make connections among ideas while developing critical thinking skills as you pursue an Associate in Arts or Associate in Science degree. You'll apply your mastery of knowledge to the design and completion of a comprehensive capstone project. You may work with a faculty mentor on a project the faculty member is conducting, or develop a project that is uniquely your own.
