## **CONST 136: Building Permits and Codes**

## Credits 3

## **Quarter Offered Winter**

Learn building codes and standards applicable to building construction and the inspection process. The class will focus on a variety of local jurisdictions and differences in the permit and inspection process. Students will study the basic building codes necessary for carpentry, plumbing, electrical, and heating, ventilation and cooling (HVAC) as well as where to locate advanced code requirements. This class may include students from multiple sections.

## **Course Outcomes**

Explain guidelines for obtaining a building permit and map out the process from application through to final inspection

Identify the correct type of building permit required for a specific construction project

Demonstrate the process for obtaining a building permit by successfully completing the application process

Demonstrate the process of preparing for and scheduling for an inspection

Describe commonly used building codes and their use in a construction project
