IT-BAS 470 : Business Management in Information Technology Capstone

Credits 5
Quarter Offered Spring
Integrates the knowledge and skills learned in the IT-BAS program, culminating in a project that synthesizes learning and experiences. Students address a real-world problem or explore a topic of interest in depth. This course encourages critical thinking, problem-solving, and creativity. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas
Prerequisites
Information Technology Management BAS Program Admittance; Completion of at least 30 credits of IT-BAS courses
Course Outcomes
Conduct research and analyze a real-world problem in the field to assess and propose solutions.
Develop solutions to address real-world problems.
Develop, plan, and produce a capstone project that identifies the needs of a real work context.
Present project findings to an intended audience through a format appropriate to both the audience and the project's purpose, as well as reflecting real work presentations.
