

ENVS 290 : Research Topics in Environmental Science

Credits 1-5

Quarter Offered Occasionally

Students serve as active members on research teams working to advance knowledge in environmental science. Depending upon the project, students will participate in hypothesis formation, experimental design, data collection, analysis, and determination of conclusions. This class may include students from multiple sections. (Elective)

Prerequisites

Prerequisites determined by instructor

Course Outcomes

Use the scientific method to advance the state of knowledge, delineate avenues and apply that method to derive conclusions, and develop assessment methods for evaluation.
