

# IT 260 : Introduction to Unix/Linux Systems Administration

**Credits** 5

**Quarter Offered** Winter

An introduction to the Unix/Linux operating system and Unix/Linux system administration. Prepares student for CompTIA Linux+ Part A exam. This class may include students from multiple sections.

**Course Outcomes**

Analyze problems and design Linux/UNIX solutions using shell command files and scripts.

Describe how Linux/UNIX supports processes, memory management, input/output, and the file system.

Describe the functions of an operating system.

Describe the main Linux/UNIX system administration tasks.

Employ common Linux/UNIX shell features including I/O redirection, piping, command substitution, and simple job control.

Explain shell-specific facilities including the use of environmental and local variables, and the built-in programming language.

Set up a Linux/UNIX environment.

Use common and advanced Linux/UNIX utilities.
