Program Description

Peninsula College’s Digital Storytelling & 3D Design Short Term Program prepares students for jobs related to the digital media, web content development and 3D design. Students will learn interactive multimedia, digital literacy and how to develop media for engagement, education, and entertainment for augmented reality, immersive environments, transformative design, and interactive interfaces. Emphasis will be placed on the esthetics, structured storylines, and success with graphics, video and 3D design software.

Program Code: DMWDSC01

Program Outcomes

- Research, identify goals, and analyze objectives of interactive digital storytelling to develop successful engagement in online promotion and virtual learning environments
- Create multimedia and 3D objects, curate, and produce collaborative, immersive digital storytelling projects
- Demonstrate cooperative project management and persuasive design creation with a professional online portfolio and social media marketing

Catalog #	Course Title	Credits
