About Peninsula College

Equal Opportunity Information
Peninsula College provides equal opportunity in education and employment and does not discriminate on the basis of race, color, national origin, age, disability, sex, sexual orientation, marital status, creed, religion, or status as a veteran of war.

Coordination of compliance is the responsibility of the following:

Hanan Zawideh, Vice President of Human Resources, Diversity, Equity, & Inclusion
1502 E. Lauridsen Boulevard
Port Angeles, WA 98362
(360) 417-6212

Peninsula College tiene un compromiso con el concepto y la práctica de la igualdad de oportunidades en educación y empleo y no discrimina por motivos de raza, color, nacionalidad, edad, presencia de alguna discapacidad, sexo, orientación sexual, estado civil, credo, religión, o condición de veterano de guerra.

La coordinación de cumplimiento ha sido designada a la persona que se menciona a continuación:

Hanan Zawideh, Vicepresidenta, de Recursos Humanos, Diversidad, Equidad, & Inclusión
1502 E. Lauridsen Boulevard
Port Angeles, WA 98362
(360) 452-6212

To receive the following information in an alternative format, contact Access Services at: ssd@pencol.edu, or (360) 417-6373.

Our Mission, Core Themes, and Guiding Principles
Peninsula College educates diverse populations of learners through community-engaged programs and services that advance student equity and success.

Statement of Mission
Peninsula College educates diverse populations of learners through community-engaged programs and services that advance student equity and success.

Core Themes

• Advancing Student Success - Support students in achieving their educational goals
• Achieving Academic Excellence - Provide engaging, high quality academic and professional-technical programs
• Fostering Equity and Inclusion - Eliminate systemic disparities in educational outcomes
• Strengthening Communities - Strengthens the economic and cultural vitality of its service region and beyond

Guiding Principles
The college community is guided by the following principles:

• The teaching/learning process is at the center of the mission of Peninsula College.
• Members of the campus community will treat each other with mutual respect and dignity.
• Members of the campus community will be open and honest in their communications.
• Members of the campus community will promote a positive work environment and avoid adversarial relationships.
Each member of the campus community will act ethically and with integrity.
The campus will engage in collaborative decision-making processes.

Peninsula College Board of Trustees
Dr. Michael Maxwell, Chair
Dr. Joe Floyd, Vice Chair
Dr. Claire Roney, Member
Celeste Schoenthaler, Member
Glenn Ellis, Jr., Member

About Peninsula College
At Peninsula College, our unique environment encourages you to explore new possibilities. We’re innovative and student centered with excellent faculty and small classes. Our learning facilities feature striking architecture and classrooms with advanced instructional technology and equipment. We offer international learning experiences and are actively involved in our local community. What’s more, we provide many extracurricular opportunities: champion athletic teams, student clubs and activities, and an array of cultural and fine arts events throughout the year.

The Olympic Peninsula provides an extraordinary setting for Peninsula College. The surrounding mountains, forests, and the ocean provide you with opportunities to participate in outdoor learning and recreational experiences that are unequalled at other college locations in Washington.

The services and activities of Port Angeles, the largest city on the North Olympic Peninsula, are easily accessible, and students and community members alike enjoy the opportunity to work together on projects and special festivals that involve both groups.

Major cities, such as Seattle, Portland, and Victoria, British Columbia, are only a few hours away, while major Native American museums and a United Nations World Heritage Site—Olympic National Park—are practically at our doorstep.

Areas of Study
When you have a clear college plan, you’re more likely to achieve your academic goals and save yourself time and money in the process. With this in mind, we’ve adopted a Guided Pathways approach to help you complete programs faster.

By grouping courses together in a clear path, you’re able to make the most efficient use of your time, whether you’re working toward a career immediately after graduation or transferring to a university to continue your education. Advisors will work closely with you to identify your path, keep you on it, and help you graduate sooner.

With a particular focus on low-income, first-generation students and students of color, Washington’s state-wide Guided Pathways efforts aim to help more of our students earn credentials to prepare them to enter careers in higher-paying, high-demand fields.

Under Guided Pathways you’ll choose a program from within seven Areas of Study: Arts & Communications, Business & Management, Healthcare, Information Technology, Math & Science, Skilled Trades, and Social Sciences & Education.

Opportunities in the Arts and Sciences
If you’re pursuing a transfer degree, you’re in the right place! At PC, you’ll find many exciting opportunities to
explore and develop passions for a full range of academic and artistic pursuits. Each year student talents are celebrated through a week-long Student Arts Week, which showcases craftsmanship in a variety of areas, from acting to music to art and more. Included in the events are concerts by the PC Instrumental Jazz and Vocal Ensembles, poetry and prose readings, a special student art show, a Junk Art Welding show, and an end-of-term concert by the music department.

Peninsula College Honors students work independently with faculty mentors on capstone projects that the students present each spring to the campus and community at the spring Honors Symposium. In addition, Honors students sponsor events and activities through Lyceum, the Honors Club.

Our journalism students work on a prize-winning student newspaper, The Buccaneer. They also regularly attend conferences to learn more about the art of journalism.

Students and community members can contribute original writing, photographs, music, and works of art to Peninsula College’s award-winning literary arts magazine, Tidepools. Cash prizes are awarded to first, second, and third-place winners. All of the contributors are honored with a reception in the spring and give several readings in our local communities.

Numerous research and travel opportunities are available to our science students, who study and work in Keegan Hall, our Science and Technology Building. Research opportunities abound on the Peninsula. Outstanding outdoor resources, such as Olympic National Park and state and national forests, encourage scientific inquiry and lead to exciting projects. But this is only the start; many more opportunities exist and are waiting to be explored.

Under Guided Pathways, students interested in pursuing an Arts and Sciences transfer degree can choose an Area of Study in Arts & Communications, Social Science & Education, or Math & Science.

Honors Program
If you’re looking for a one-of-a-kind experience designed for highly motivated students who seek to be engaged in an intensive learning process, our Honors Program is for you. You’ll make connections among ideas while developing critical thinking skills as you pursue an Associate of Arts or Associate of Science degree. You’ll apply your mastery of knowledge to the design and completion of a comprehensive capstone project. You may work with a faculty mentor on a project the faculty member is conducting, or develop a project that is uniquely your own.

The World Is Your Classroom
At Peninsula College, learning is not confined to enclosed classrooms or the lecture hall. Instead, the entire campus and the Olympic Peninsula become teaching laboratories as students and faculty move outdoors to take full advantage of all that our unique area has to offer.

You might find a class meeting in the middle of the college plaza on a bright sunny day, or see our incredible PC Jazz Ensemble performing in front of the Pirate Union Building (PUB). It’s not unusual to find small groups of students and their instructors taking a field trip to the nearby ocean, Olympic National Park, or the rain forest to discover and study native marine life, fauna, and flora in their natural habitats.

You can even spend one or more quarters studying in another country if you choose or take language and cultural classes from visiting professors from other countries. At Peninsula College, we have developed a unique educational experience carefully designed for the success of each student.

Our Setting
The Olympic Peninsula provides an extraordinary setting for Peninsula College. The surrounding mountains, forests, and the ocean provide you with opportunities to participate in outdoor learning and recreational experiences that are unequalled at other college locations in Washington.
The services and activities of Port Angeles, the largest city on the North Olympic Peninsula of Washington State, are easily accessible, and students and community members alike enjoy the opportunity to work together on projects and special festivals that involve both groups.

Major cities, such as Seattle, Portland, and Victoria, British Columbia, are only a few hours away, while major Native American museums and a United Nations World Heritage Site—Olympic National Park—are practically at our doorstep.

Locations

Port Angeles
Peninsula College’s main campus is located in the city of Port Angeles on 75 acres in the foothills of the Olympic Mountains. Twenty-five buildings provide facilities for students who attend PC from all over the United States and the world.

PC Forks
Our West End location is located in the heart of the Olympic Peninsula in central Forks, Washington. The site offers academic, professional, and technical, Basic Education for Adults (Transitional Studies) and ESL (English as a Second Language) courses, as well as a full range of student support services. A learning center is staffed to provide academic or technical support to students enrolled in online or face-to-face classes.

PC Port Townsend
Peninsula College at Port Townsend is located in the beautiful park setting of historic Fort Worden. Our award-winning small campus and caring staff can help students work toward their academic goals.

Onsite classes, as well as online and Zoom courses, make it possible for East Jefferson County residents to fulfill the requirements for a Peninsula College two-year degree, one-year certificate, or short-term certificate.

Our History
Peninsula College celebrated its 60th Anniversary during the 2021-2022 academic year. The college was founded in 1961 because a group of local citizens wanted to be able to continue their educations without having to travel great distances to college centers in Bremerton or across Puget Sound. The first classes were held in a small building on the Port Angeles High School campus, but the number of students who enrolled in the college quickly became more than the available facilities could accommodate, and plans were soon underway to build a permanent campus elsewhere in the city.

Construction of the new campus began in 1964, and a year later the first classes were held on the present PC site with additional classes being offered all across our district. Today, the main campus spreads out over 75 acres of land in the foothills of the Olympic Mountains, overlooking the city of Port Angeles and its busy, international harbor.

Our facilities include a Student Services Center; Maier Performance Hall; Allied Health and Early Childhood Education Building; Arts and Humanities Building; a new Science and Technology Building and ʔaʔxʷustəƞáwt’ex House of Learning Peninsula College Longhouse; Library/Media Center; computer labs; a lecture hall; and a student union building, known as the Pirate Union Building, or PUB. The PUB houses a theater, art gallery, Pirate Cove Cafe, Bookaneer bookstore, lounge area, Internet café, performance areas, Esports alcove, and student government offices.

Maier Hall is the largest building on campus, with 62,950 square feet. The intimate 130-seat performance hall is the centerpiece of the facility. Outfitted with the latest in sound and lighting equipment, it has been physically shaped to provide superb acoustics and ideal conditions for music, lectures, or poetry readings. Completely equipped art and ceramic studios and spacious music practice and rehearsal rooms allow students to fully explore all of the arts and discover their talents. Rounding out the facility are classrooms, a Transitional Studies Center, faculty offices, and a learning lab area that includes computer, math, English, and foreign language labs.
The 56,000 square-foot Keegan Hall Science and Technology Building contains a lecture hall, 13 labs, five classrooms, faculty offices, and two conference rooms in two separate wings—a Science Wing and a Technology Wing.

Situated between Maier Hall and Keegan Hall is a signature art and water sculpture that invites students and visitors alike to sit in a relaxing atmosphere that echoes the natural environment of the Olympic Peninsula. Seven of the most prominent mountain peaks in the Olympic Mountain range have been recreated in aluminum and mounted on basalt columns that are situated in water pools. The effect is an oasis of calm and reflection in the middle of a busy campus.

Standing in a grove of cedar trees on the south end of campus, ʔaʔkʷústaʔnáwtxʷ House of Learning, Peninsula College Longhouse was the first longhouse in the nation built on a community college campus. The vision of a Longhouse as a center for cultural expression and educational achievement for all students and community members has been woven together by Peninsula College and the six local tribes: Hoh River Chalat', Quileute, Makah, Port Gamble S'Klallam, Jamestown S'Klallam, and Lower Elwha Klallam.

In 2007, leaders from the six local tribes and the College opened ʔaʔkʷ ústaʔnáwtxʷ House of Learning, Peninsula College Longhouse with a cedar bark ribbon-cutting ceremony. This ceremony was the culmination of more than two years of planning and construction and honored important tribal and community relationships.

In fall 2010, tribal leaders, elders, and youth from all six tribal nations and community members joined Peninsula College to witness and celebrate the historic raising of a 20-foot Welcome Pole at the entrance to the Longhouse. The Welcome Pole was carved on campus by Jamestown S'Klallam master carver, Jeff Monson, from a pole graciously donated by the Lower Elwha Tribe. The college celebrated the tenth anniversary of the ʔaʔkʷ ústaʔnáwtxʷ House of Learning, Peninsula College Longhouse in 2017 and 2018 with an artist retrospective and a celebration honoring the tribes and those instrumental in its construction.

The 26,680 square-foot library is a centrally located campus resource with a smart classroom, individual and group study areas, conference rooms, print and electronic collections, and research workstations. Students are able to engage in reading, studying, and collaborative learning.

In 2015 Peninsula College celebrated the grand reopening of our Forks location in a new, state-of-the-art-facility.

In 2016, the college opened a newly renovated building on the Fort Worden campus in Port Townsend. In 2017, the new Allied Health and Early Childhood Development Building opened on the Port Angeles campus.

The Allied Health and Early Childhood Education Building is the College's newest building and houses the instructional programs of Nursing, Medical Assisting, Medical Office Assisting, Phlebotomy, Nursing Assistant, and Early Childhood Education. The building features state-of-the-art smart classrooms and clinical lab spaces designed to provide a learning environment that mirrors the earning environment. The building’s Community Demand Lab is a flexible space that can accommodate rotational instructional programs to meet immediate and future community demand.

The Childcare Center is also housed in the building as part of the Early Childhood Education program and includes four classrooms, a full kitchen and an outdoor playground. The Center is designed to serve up to 28 infants and toddlers and 40 preschoolers.

Our Student Body
At Peninsula College there is no “typical” student. Our vibrant, diverse student body comes from all over the United States and 16 different countries. And like you, they come for a variety of educational purposes. Some students are recent high school graduates who want to pursue a transfer degree, some are returning to school to earn their Bachelor in Applied Science at Peninsula College, some are Running Start students. Still others are returning for career retraining, to brush up on their job skills, to complete high school, to take ELA (English Language Acquisition) courses, and to learn how to work with computers. But no matter why they are here, they all want the same thing—a quality education at a price they can afford.
Once our students arrive at Peninsula College, they quickly discover that college is more than just books. It’s also a time to explore, to experiment with new interests, and even to discover hidden talents, such as writing or drama. In fact, once our students venture into unfamiliar areas, they often discover their own passion for learning.

**Pirate Athletics and Student Life**

The Peninsula College Athletic Program, winners of twelve Northwest Athletic Conference (NWAC) championships and twenty-four league championships over the last thirteen years, features men’s and women’s soccer, men’s and women’s basketball, and esports. We take great pride in offering a university-quality athletic experience at the community college level. With the tremendous support of our community and the Peninsula College Foundation, we offer the maximum amount of scholarships allowed by the Northwest Athletic Conference.

The NWAC is made up of community colleges from Washington, Oregon, Idaho, and British Columbia. Peninsula plays in the North Division. Our mission is to create a transformative experience for student athletes that is focused on building character, promoting high academic achievement and community service, winning championships, and moving our athletes on to the next level. Our vision is to provide a program for student athletes that is committed to excellence in every arena.

Off the field, Peninsula College athletes participate in community service projects and play a significant role in the development of young players through the Peninsula Soccer Academy and Peninsula Basketball Camps, as well as engagement in elementary, middle school and high school mentorship programs and school clinics.

With the 2019-2020 addition of the fastest-growing sport in college athletics, esports, Peninsula College now has a fifth athletic program that will strive to provide the same student athlete experience as soccer and basketball. Our esports teams participate mostly in the National Junior College Athletic Association Esports conference.

**Student Life**

At Peninsula College there is no “typical” student. Our vibrant, diverse student body comes from all over the United States and more than fifteen different countries. And, like you, they come for a variety of educational purposes. Some are recent high school graduates who want to pursue a transfer degree, some are returning to school to earn their Bachelor in Applied Science at Peninsula College, some are Running Start students. Still others are returning for career retraining, to brush up on their job skills, to get their GED®, to take ESL (English as a Second Language) courses or to learn how to work with computers. But no matter why they are here, they all want the same thing—a quality education at a price they can afford.

Once our students arrive at Peninsula College, they quickly discover that college is more than just books. It’s also a time to explore, to experiment with new interests, and even to discover hidden talents, such as writing, drama, music, art, recreation or even serving in student leadership roles or joining clubs. In fact, once our students venture into unfamiliar areas, they often discover a passion for learning.

**Opportunities in the Arts and Sciences**

If you’re pursuing a transfer degree you’ll find many exciting opportunities to explore and develop passions for a full range of academic and artistic pursuits. Each year student talents are celebrated through a week-long Student Arts Week, which showcases craftsmanship in a variety of areas, from acting to music to art and more. Included in the events are concerts by the PC Instrumental Jazz and Vocal Ensembles, poetry and prose readings, a special student art show, a Junk Art Welding show, and an end-of-term concert by the music department.

Our journalism students work on a prize-winning student newspaper, The Buccaneer. They also regularly attend conferences to learn more about the art of journalism.
Students and community members can contribute original writing, photographs, music, and works of art to Peninsula College’s award-winning literary arts magazine, Tidepools. In 2014, Tidepools also introduced a Kindle version of the magazine. Cash prizes are awarded to first, second, and third place winners. All of the contributors are honored with a reception in the spring and give several readings in our local communities.

Numerous research and travel opportunities are available to our science students, who study and work in Keegan Hall, our Science and Technology Building. Research opportunities abound on the Peninsula. Outstanding outdoor resources, such as Olympic National Park and state and national forests, encourage scientific inquiry and lead to exciting projects. But this is only the start; many more opportunities exist and are waiting to be explored.

Under Guided Pathways, students interested in pursuing an Arts and Sciences transfer degree can choose an Area of Study in Arts & Communications, Social Science & Education, or Math & Science.

Honors Program
If you're looking for a one-of-a-kind experience designed for highly motivated students who seek to be engaged in an intensive learning process, our Honors Program is for you. You'll make connections among ideas while developing critical thinking skills as you pursue an Associate in Arts or Associate in Science degree. You’ll apply your mastery of knowledge to the design and completion of a comprehensive capstone project. You may work with a faculty mentor on a project the faculty member is conducting, or develop a project that is uniquely your own.

Commitment to Diversity
As a public institution committed to lifelong learning, we recognize the changing communities we serve. Our goal is to seek, involve, and value diverse peoples—their contributions, perspectives, and potentials—and to nurture those threads of common experience and desire that unify differences. To this end, we are committed to cultural and personal diversity and to valuing individual differences. Through positive effort and attention, we work to integrate diversity throughout the college.

Peninsula College provides equal opportunity in education and employment and does not discriminate on the basis of race, color, national origin, age, disability, sex, sexual orientation, marital status, creed, religion, or status as a veteran of war.

Coordination of compliance is the responsibility of the following:

Hanan Zawideh, Vice President of Human Resources, Diversity, Equity, Inclusion
1502 E. Lauridsen Boulevard
Port Angeles, WA 98362
(360) 417-6212

Peninsula College tiene un compromiso con el concepto y la práctica de la igualdad de oportunidades en educación y empleo y no discrimina por motivos de raza, color, nacionalidad, edad, presencia de alguna discapacidad, sexo, orientación sexual, estado civil, credo, religión, o condición de veterano de guerra.

La coordinación de cumplimiento ha sido designada a la persona que se menciona a continuación:

Hanan Zawideh, Vicepresidente de Recursos Humanos, Diversidad, Equidad, Inclusión
1502 E. Lauridsen Boulevard
Port Angeles, WA 98362
(360) 417-6212

To receive the following information in an alternative format, contact Access Services at: ssd@pencol.edu, or (360) 417-6373.
Accreditation
Peninsula College is accredited by the Northwest Commission on Colleges and Universities (NWCCU). Accreditation to award the associate and baccalaureate degree was last affirmed in 2018.

The post-secondary accreditation process involves a comprehensive self-study and an on-site evaluation by a team appointed by the NWCCU. The evaluation team is comprised of practitioners at peer institutions outside the state of Washington. The evaluation team produces a written report and summary of commendations and recommendations.

Accreditation of an institution of higher education by the Northwest Commission on Colleges and Universities indicates that it meets or exceeds criteria for the assessment of institutional quality evaluated through a peer review process. An accredited college or university is one which has available the necessary resources to achieve its stated purposes through appropriate educational programs, is substantially doing so, and gives reasonable evidence that it will continue to do so in the foreseeable future. Institutional integrity is also addressed through accreditation.

Accreditation by the Northwest Commission on Colleges and Universities is not partial but applies to the institution as a whole. As such, it is not a guarantee of every course of program offered, or the competence of individual graduates. Rather, it provides reasonable assurance about the quality of opportunities available to students who attend the institution.

Inquiries regarding PC's accredited status should be directed to PC's administrative staff or by contacting:

Northwest Commission on Colleges and Universities
8060 165th Avenue N.E., Suite 100
Redmond, WA 98052
(425) 558-4224
nwccu.org

Educational Opportunities
An emphasis on quality instruction is the common denominator for our course offerings. Classes are small with a student-to-teacher ratio that is approximately 1:16.

Instructors are selected for their teaching abilities as well as their expertise in subject specialties.

Peninsula College students have an impressive record of success in continued college studies and in careers. In addition, annual studies show that most students who have completed Peninsula College's professional technical education programs are now working in their chosen career fields.

Degree Programs
We offer degrees in Arts and Sciences Transfer, Professional Technical Education, and Bachelors of Applied Science.

Arts & Sciences Transfer Education
Peninsula College awards five associate degrees designed for transfer to baccalaureate institutions awarding Bachelor of Arts or Bachelor of Science degrees. These include:

- Associate in Arts, Direct Transfer Agreement (AA-DTA)
- Associate in Business, Direct Transfer Agreement/Major Related Program (DTA/MRP)
- Associate in Computer Science, Direct Transfer Agreement/Major Related Program (DTA/MRP)
- Associate in Nursing, Direct Transfer Agreement/Major Related Program (DTA/MRP)
- Associate in Science, Transfer Track 1 (AS-T)
In addition students may receive an Honors degree in the Associate in Arts, Direct Transfer Agreement (AA-DTA) or Associate in Science, Transfer Track 1 (AS-T).

An individual holding an associate transfer degree who is admitted to a Washington state public baccalaureate institution is considered to have completed the lower division or general education requirements for that institution.

Professional Technical Education
The Associate in Applied Science (AAS), the Associate in Applied Science–Transfer (AAS-T), and Associate in Nursing, Direct Transfer Agreement/Major Related Program (DTA/MRP) degrees are awarded to students completing an instructional program designed to prepare them for entry into a specific occupation. Professional technical education programs in which associate degrees and certificates are offered are listed below. See specific programs for degree options.

- Addiction Studies
- Administrative Office Systems
- Automotive Technology
- Business Administration
- Construction Technology
- Criminal Justice
- Cybersecurity & Computer Forensics
- Early Childhood Education
- Emergency Medical Technician
- Entrepreneurship
- Family Life Education
- Emergency Management
- Hospitality and Ecotourism
- Information Technology - Systems Administration
- Medical Assisting
- Medical Office Assisting
- Multimedia Communications
- Natural Resources
- Nursing
- Nursing Assistant
- Paralegal
- Phlebotomy
- Welding

Bachelor of Applied Science
Our Bachelor of Applied Science in Management (BAS) program builds on an existing two year degree, adding upper division coursework in applied management, resulting in a practical, application oriented, four-year degree. The BAS program prepares its graduates for management positions and career advancement in a wide range of fields found on the Olympic Peninsula and elsewhere, and can be completed 100% online.

Our BAS degree also prepares you to continue your education in master's programs, such as the University of Washington, Washington State, and other university Master of Business Administration (MBA) programs. We offer specializations in Entrepreneurship and Marketing, Human Resources Management, Information Technology Management, and Tribal Management specializations. We also offer a BAS in Behavioral Healthcare.

Certificates
One-year-or-less certificate programs are offered in Addiction Studies, Administrative Office Systems, Automotive Technology, Business Administration, Commercial Driver's License, Construction Technology,
Criminal Justice, Early Childhood Education, Entrepreneurship, Hospitality & Event Planning, Medical Assisting, Medical Office Assisting, Multimedia Communications, Natural Resources, Nursing Assisting, Phlebotomy, and Welding.

**eLearning**

eLearning at Peninsula College provides expanded learning opportunities through the use of online instruction and web conferencing. These methods allow you to customize a flexible schedule that will meet your individual needs and open educational opportunities to those who are unable to attend all classes in person. The eLearning department supports all Peninsula College classes with online technology as well as other emerging technologies as they become available. These emerging technologies support learning for everyone and not just those separated by distance.

For additional information and current course offerings visit pencol.edu.

**Basic Education for Adults (Transitional Studies)**

Adults with or without a high school diploma may enroll in a variety of classes designed to increase their skill levels in basic education, including reading, writing, and mathematics. Students may work individually or in small groups to acquire the skills needed to reach their educational and occupational goals.

We offer “brush-up” classes for those with a high school diploma who want to review skills prior to transitioning to college-level classes.

Adults 18 and over may complete coursework and competency-based activities to complete a high school diploma from Peninsula College.

Individuals 16 years of age or older who have not completed high school may attend basic skills classes to prepare for the General Educational Development (GED®) test. Instruction focuses on the subject areas covered on this high school equivalency exam.

Students between the ages of 16-18 must have a signed release from a Washington state high school before they take the official GED® test.

Classes in English as a Second Language are offered to individuals who want to improve their career and college readiness. Instruction is designed to help them acquire academic skills in understanding, speaking, reading, and writing English.

We also offer Integrated Basic Education and Skills Training (I-BEST), which allows students to begin a workforce education career pathway program while improving their basic English, reading, writing, and/or math skills. Peninsula College offers a variety of I-BEST programs including Construction Technology, Early Childhood Education, Medical Assisting, Medical Office Assisting, Welding, and others.

For information on the above Transitional Studies programs and class locations, call (360) 417-6380.

**Complete Your High School Education**

We offer Adult High School Diplomas where students can earn college credit while completing a Peninsula College High School Diploma. This program is for adults 19 years of age or older who did not complete high school. They'll earn a valid diploma which meets State of Washington requirements.

An individual 21 years or older who completes an associate degree may ask for a state high school diploma from the college upon written request. Individuals under this category are not eligible for funding provided for K-12 students. These students are not required to complete the State Board of Education's graduation requirements.

A student enrolled through Running Start who completes an associate degree may be awarded a state high school diploma from the college upon written request from the student. These students are not required to complete the State Board of Education's graduation requirements.
We also offer the High School+ (HS+) program which is designed for adult learners, 18 years of age and older, who are interested in acquiring their high school diploma. HS+ classes prepare students for college and career pathways while fulfilling the high school diploma requirements of Washington State.

Credits earned in HS+ courses count toward a high school diploma may be used as dual high school/college credits.

Students have the potential to use life experience to earn high school credit and credit is awarded based on competency rather than seat time. Opportunities through this program are also available for students aged 16 years and older. For more information, contact the Transitional Studies Department at (360) 417-6380.

High School Programs (Dual Credit)
Running Start
Created by the Washington State Legislature, Running Start is a program providing academically qualified students with the opportunity to simultaneously earn high school and college credits.

To qualify for Running Start, you must be a high school junior or senior, under the age of 21, and qualify at college-level in English or math through an approved placement method.

If you qualify you may choose to take a combination of high school and college courses or enroll exclusively in college courses. All college-level courses (numbered 100 or above) successfully completed may be applied toward degrees at Peninsula College. Therefore, it is possible for high school students who begin Running Start as juniors to graduate from high school with two years of college already completed.

College credits earned through Running Start are usually transferable to colleges and universities in and out of the State of Washington. Information on the transferability of credits is available from an educational planner in the Student Development Center as well as from the respective college or university to which you wish to transfer.

Running Start students will be responsible for the cost of books, supplies, transportation, and fees. Tuition is covered up to 15 credits per quarter as long as the combined course load between the college and high school stays below 1.2 FTE (full-time equivalency). Students with combined high school and college schedules that exceed 1.2 FTE during any college quarter must pay college tuition on the additional credits. Please note, waivers may be available for students who qualify for the free or reduced lunch program through their school district.

For more information regarding Running Start, contact RunningStart@pencol.edu or (360) 417-6341, toll free in Washington at 1 (877) 452-9277, ext. 6341.

Career and Technical Education (CTE) Dual Credit Program
Our CTE Dual Credit Program is a dual credit opportunity for high school students to gain Peninsula College credit for specially designed courses taken at their high school. To find out if your school participates in the program, contact the Student Services Office at (360) 417-6340.

Upward Bound
Upward Bound is a federally-funded TRIO educational program designed to develop the knowledge and skills necessary for students to earn a two- or four-year college or technical degree. High school students from low-income and first-generation families may be eligible for services. The goal of Upward Bound is to increase the rate at which participants complete high school and graduate from college. Students may receive a stipend for participation.

Upward Bound services include the following:

- Academic instruction and tutoring in reading, writing, math, study skills, and other subjects necessary for success in education beyond high school
- Running Start early preparation
- Access to professional college and transfer advising
- FREE six-week summer program that includes:
  - 4-5 weeks of academic courses with the potential to earn college and/or high school credit
  - Tours of colleges
- Career development experiences
- Culturally appropriate learning and activities
- One-to-one assistance in college and scholarship applications
- Academic, financial, and personal counseling
- Exposure to academic programs and cultural events
- Leadership development
- Early career assessments, planning, and exploration
- Information on postsecondary educational opportunities
- Assistance in preparing for college entrance exams (PSAT, SAT, ACT, Accuplacer)

Peninsula College’s Upward Bound program is 100% funded through a U.S. Department of Education grant. For information, contact: Upward Bound Office at (360) 417-7971 or toll free at 1 (877) 452-9277, ext. 7971.

Admission to the College

Requirements to Attend
Peninsula College has an open-door admissions policy for almost all of our programs of study. For most students, the admissions process is not competitive. It is simply a matter of collecting your information and confirming your intent to enroll.

For most programs, we are able to admit anyone who:

- Can benefit from the courses of the College; and
- Would not, by presence or conduct, create a disruptive atmosphere counter to the purposes of the College; and
- Is 18 years of age or older, or who:
  - is a high school graduate, or equivalent, or
  - qualifies under provisions of a student enrollment options program, such as Running Start, a successor program, or other local enrollment options programs.

(Additional admissions criteria may apply to persons under the age of 18.)

PLACEMENT INTO ENGLISH AND MATH

All incoming degree- and certificate-seeking students are evaluated for English and math placement before registering in courses except for:

- students who completed college-level work at a regionally accredited college or university, including English and math with a GPA of at least 2.0, or
- students who have an approved placement reciprocity agreement through another Washington State Community or Technical College, or
- students who are pursuing short-term certificates that do not require mathematics or English prerequisites.

Placement in English and math courses may be completed in a variety of ways. You may hear these placement methods called "multiple measures", which refers to a range of means by which students can be placed in math or English courses. You can find a list of the multiple measures options at the Assessment and Placement Center or on the College website.
READMISSION TO THE COLLEGE

If you have been away from Peninsula College, not enrolling in classes for 4 quarters (including Summer), you will need to reapply. Reapplying includes:

- Filling out an abbreviated reapplication form online, stating the quarter you wish to return
- Submit any transcripts or test scores for any classes you have taken at another institution while away
- Consider applying for financial aid using the FAFSA at the same time so any eligible funding is awarded

Please Note: If you are completing a degree, you will be required to complete the requirements in effect at the time of your readmission.

The College reserves the right to deny entrance to specific programs if students do not meet any specific program requirements.

Admission to Peninsula College does not guarantee someone can enroll in all courses or be admitted to all professional technical education programs. Any specific admission requirements for programs of student can be found in this catalog.

Non-Degree Enrollments

Peninsula College welcomes non-degree-seeking students; any person wishing to enroll at Peninsula College must submit an application. Applications may be submitted as described in this catalog.

Peninsula College may enroll a student who:

- Is competent to profit from the curricular offering of the College.
- Would not, by presence or conduct, create a disruptive atmosphere within the College inconsistent with the purposes of the institution.
- Is 18 years of age or older, or who:
  - is aged 16 years or older and meets the provisions of Title II of the Workforce Innovation and Opportunity Act. Individuals admitted in these classes will be allowed to continue as long as they demonstrate, through academic progress, an ability to benefit; or
  - is enrolled in a Peninsula College-sponsored youth program; or
  - is enrolled in a basic education or noncredit class with approval from the appropriate dean; or
  - has completed the College’s underage enrollment process with appropriate administrator approvals.

We may accept students who are under age 18 who are approved on exception by the admissions area. Those who do not have a high school diploma or equivalent will be enrolled only as non-degree and non-certificate-seeking students. Enrolling as an underage student does not constitute full admission to the College or any program of study and does not assure registration in future quarters. Also, it is not the College’s intent to replace or duplicate the functions of the local public schools.

The authority to make underage enrollment exceptions resides with the Vice President for Student Services or designee(s). Students must supply all required documentation for approval to be considered. Contact the Student Services Office at (360) 417-6340 for more information.

Admission and Registration Procedures

Admission Procedures

Procedures for admission are published on our website at pencol.edu. Pirate Central, our student services hub for many of your services, can be reached at (360) 417-6340 for questions.

Official transcripts from each college you have attended must be mailed or sent electronically through verifiable means to Pirate Central for consideration of transfer credit. It is your responsibility to contact other schools and request that transcripts and testing scores be forwarded in a timely manner. All transcripts become the property of the college.
Prior to the quarter applied for, Pirate Central will notify each new applicant who has completed the admissions process about times for placement testing, orientation, and advising. Only after those steps are completed may you register for classes. For more information, email Pirate Central at SServices@pencol.edu or call (360) 417-6340.

Registration Procedures
Check the College website at pencol.edu for the searchable quarterly schedule of courses and details on the process to register in classes each quarter.

The College gives priority registration to veterans and continuing degree- and certificate-seeking students with the most credits. This allows those most in need of specific courses for graduation to have the best opportunity to add required classes. You may register in the time period assigned to you or any time thereafter up to the last date of registration for a given quarter.

Note that you are not guaranteed enrollment in any specific course or program, so the earlier you register for your classes, the better your odds of adding the courses you need.

Continuing degree- or certificate-seeking students can view their registration appointment times for the next quarter through the online student portal. Before registration starts, there is a period for mandatory advising each quarter. Mandatory advising is designed to help students achieve their training and education goals as quickly and efficiently as possible.

Note that you must be officially enrolled by the second day of the quarter to attend your classes.

Under the Washington Administration Code (WAC 131-12-010) and the policies of the State Board for Community and Technical Colleges, the College reserves the right to deny admission to, or cancel the registration of, any individual whose enrollment is inconsistent with the best interests of the student, other students, or the established policies of Peninsula College.

Financial Resources

Financial Aid—Grants, Work-Study, Scholarships, and Loans
Peninsula College participates in a variety of federal and state grants, work-study, and loan programs. These programs are designed to assist you in paying for your educational expenses. For more information, visit pencol.edu/financial.

There are four main ways to apply for financial assistance:

• Free Application for Federal Student Aid (FAFSA)
• Washington Application for State Financial Aid (WASFA) (for Washington residents who cannot file the FAFSA)
• Scholarships through the College and other institutions
• Emergency grant funds for qualifying students

All degree- and certificate-seeking students should file either the FAFSA, or if not eligible to file the FAFSA, the WASFA. Even if you believe you are not eligible for need-based funds, having filed the FAFSA (or WASFA) may make you eligible for certain emergency funds. Also, if you apply for aid, your financial situation and eligibility can be quickly re-evaluated if you experience significant changes in income.

Eligibility for the following aid programs will be evaluated when you complete the financial aid application process:

1. Federal Pell Grant
2. Federal SEOG (Supplemental Educational Opportunity Grant)
3. Washington College Grant (formerly Washington State Need Grant)
4. Opportunity Grant
5. WA College Bound Scholarship
6. WA Passport to Careers for Foster and Homeless Youth Program
7. Peninsula College Grant
8. Need-Based Tuition-Waiver
9. Work-Study
10. Federal Subsidized Direct Loan
11. Federal Unsubsidized Direct Loan
12. PLUS (Parent Loan for Undergraduate Students)

The College seeks to provide students with as much grant money as possible, since grants do not have to be repaid. No student is ever required to take out loans, which must be repaid. For more information on financial aid funding, contact financialaid@pencol.edu.

- Ethical commitment: Peninsula College does not and will not provide any commission, bonus, or other incentive payment based directly or indirectly on success in securing enrollments or financial aid to any persons or entities engaged in any student recruiting or admission activities or in making decisions regarding the award of student financial assistance. This ethical commitment shall not apply to the recruitment of foreign students residing in foreign countries who are not eligible to receive Federal student assistance.

Federal and State Financial Aid Eligibility Requirements
To be eligible for financial aid, you must meet the following requirements:

1. Have a high school diploma or GED® certificate, be enrolled in an eligible pathway program, or meet Ability-To-Benefit guidelines
2. Be admitted to the College
3. Plan to complete a college degree or certificate at the College and enroll in required classes for that degree or certificate (note that not all certificates are eligible for financial aid funding)
4. Be enrolled in at least six credits to be eligible for Direct Loan Program, Peninsula College Grant, Tuition Waiver, or Work-Study funds
5. Demonstrate financial need for most types of financial aid, but not all
6. Make satisfactory academic progress and meet minimum Pace of Progression requirements
7. Not be in default on a student loan received at any college attended (affects only federal financial aid)
8. Not owe a repayment of grant funds at any college attended (affects only federal financial aid)
9. For federal aid, be a U.S. citizen, a permanent resident of the United States, or other eligible person (persons who do not meet these criteria but who are Washington residents should file the WASFA for state aid rather than the FAFSA)
10. Submit your FAFSA or WASFA and turn in any required documents in a timely fashion by the College’s published dates or as requested by the Financial Aid Office

For a comprehensive list of FAFSA eligibility requirements, go to studentaid.gov/understand-aid/eligibility.

If you are a Washington resident who is not eligible to file the FAFSA, you may be able to file the WASFA to be considered for Washington state financial aid. Go to wsac.wa.gov/wasfa for more information.

Scholarships
Information about scholarship opportunities is posted in the Financial Aid Office and at pencol.edu. There are many other websites with scholarship information, though some of those sites are less precise than others. One of the free sites recommended by financial aid administrators in Washington is theWashBoard.org.

Opportunity Grant
The Opportunity Grant can provide funding for tuition and fees, books, and supplies for qualified adults for up to 45 credits in selected programs. For more information and the application process, visit pencol.edu/additional-financial-resources/opportunity-grant.
Worker Retraining
If you have experienced a major change in your employment circumstances in the last 48 months, including becoming a displaced homemaker, undergoing military separation, or becoming unemployed, you may qualify for Worker Retraining funding. Worker Retraining applications are available on the College’s website, pencol.edu/worker-retraining or can be obtained by calling (360) 417-6263.

Basic Food Employment and Training (BFET)
The BFET Program can provide support and assistance with tuition, books, and other support services for eligible students in professional technical programs who are receiving Basic Food through the Department of Social and Health Services (DSHS). For more information, contact the DSHS Programs Coordinator at (360) 417-6505 or call toll free (877) 452-9277, ext. 6505.

WorkFirst
The WorkFirst program supports students who are current recipients of the Temporary Assistance for Needy Families (TANF) program through the State Department of Social and Health Services (DSHS) and who are taking classes to improve their work skills and increase their wage-earning capacity. For information and eligibility requirements, contact the DSHS Programs Coordinator at (360) 417-6351 or call toll-free (877) 452-9277, ext. 6351.

Tuition and Fees
Current tuition and fee information is published on the College website at pencol.edu and is available at the Student Services Office, (360) 417-6340, on the Port Angeles campus, and at the College's Forks and Port Townsend campuses.

International Student Applications
Contact the Peninsula College International Student Programs Office for more information:

(360) 417-6491
international@pencol.edu

Peninsula College
1502 E. Lauridsen Blvd. #A7
Port Angeles, WA 98362 U.S.A.

All international students must submit the following:

- A completed International Student Application Form and Payment Authorization Form
- Translated official copies of all applicable scholastic records (transcripts from high schools, previous colleges, or language schools)
- Proof of finances (notarized Affidavit of Support, or an official bank letter, government or sponsor’s statement confirming the availability of sufficient funds for at least one year of study and living costs at Peninsula College)
- A nonrefundable application fee paid in U.S. dollars

For complete application/fee requirements visit pencol.edu/programs/international-student-programs.

Proof of English-language proficiency demonstrated in one of the following ways:

- 500 or higher in TOEFL
- IELTS 5.5 (no band lower than 5.0)
- 92 or higher on the Peninsula College ESL Compass Placement Test
- Two years of U.S. high school study, with a minimum GPA of 2.0
- Successful completion of the Advanced Level of the IELS Program at Peninsula College or any accredited ESL program in the United States
Transferring from the academic program of an accredited U.S. college or university with a minimum GPA of 2.0

Note: If your TOEFL scores are lower than 500, you will be accepted conditionally, and you will be required to take IELS classes. If your TOEFL scores are between 450 and 499, you may be allowed to take a college class, such as music, physical education, or math, that do not require heavy reading or writing assignments along with your IESL courses.

English Requirements for Intensive English Language Studies (IELS) Program
There is no English proficiency requirement.

Note: Students who apply without TOEFL scores will be automatically accepted into the IESL program.

Students transferring from another institution within the United States will need to submit the following documents in addition to the regular admission requirements:

A copy of I-94 and visa
A copy of passport (pages containing photo and demographic information)
Copies of all previous I-20s International Student Transfer Form (signed by current foreign student advisor)

Academic Policies & Procedures

Enrollment Requirements
You must be officially enrolled by the first day of the course except for open enrollment programs such as Transitional Studies.

Credits & Credit Load
The academic year is divided into three quarters of approximately eleven weeks each. There is also a summer quarter of approximately seven weeks. Peninsula College uses the following schedule to determine credit load status for students:

- Full Time: 12 or more credits
- Three Quarter Time: 9-11 Credits
- Half Time: 6-8 credits
- Less than Half Time: 1-5 credits

Students who plan on completing their pathway within two years should enroll in 15 credits per quarter. Please consult with your program advisor to determine the best way to meet your specific academic and career goals.

Registration Changes
Peninsula College requires all students to register for classes by the second day of each quarter. Changes to your courses (adding or dropping) should therefore be made before the start of the quarter. Course changes can be made on the College website at pencol.edu through ctcLink or by filling out the student add/drop form. The forms are available online or through the Student Services Office.

Withdrawal from Courses
You may withdraw from courses by the end of the eighth week of the fall, winter, or spring quarter, or by the last instructional day of a summer term. For regularly scheduled classes that run a full quarter, if a class is dropped during the first two weeks, no grade will appear on your transcript.
If you drop a course after the first two weeks of a quarter, but by the end of the eighth week, a grade of W, which does not affect your grade point average, will be entered on your transcript. Individuals who drop classes after the first two weeks must contact Pirate Central at SServices@pencol.edu or calling (360) 417-6340 to officially withdraw and receive a W grade.

If you need to withdraw from a class after the eighth-week deadline of a quarter due to circumstances beyond your control, you may request an administrative withdrawal using the online form on the pencol.edu website.

Informing the instructor that you are dropping the class does not create an official withdrawal.

If you receive any form of financial assistance for attending college, talk to the office or agency that is handling the funding before you drop any classes. Doing so will help you avoid situations where you might have to repay funds you received, since dropping classes might change your eligibility.

**Refund of Tuition and Course Fees**

A full refund of tuition and course fees will be made to a student who:

- Withdraws from a credit course prior to the sixth instructional day of the quarter for which registration and course fees were applied
- Withdraws prior to the first seminar or class session of self-support courses
- Is enrolled in any class canceled by the College

Fifty percent of tuition only (not fees) will be refunded to a student who withdraws from the College on or after the sixth day of instruction, but within twenty calendar days including the first scheduled day of the quarter.

Note: The refund policy may differ for condensed quarters, Summer quarters, and early or late starting classes. Contact the Student Services Office at SServices@pencol.edu or (360) 417-6340 for more information.

**Nonattendance**

Student attendance and participation is crucial to academic success.

At the beginning of a quarter, to accommodate students waiting for space to register for a course, instructors may initiate a withdrawal for nonattendance. A student who fails to attend at least 50% of a face-to-face class or fails to log in for at least 50% of online class activity during the first week of the quarter may be administratively withdrawn from the course by the instructor notifying the Student Services Office. However, students should not count on instructors dropping them for nonattendance: students who are not attending are responsible for dropping themselves.

Students who plan to remain enrolled but have attendance difficulties during the first week of the quarter should contact their instructors immediately to avoid being dropped for nonattendance.

At the end of a quarter, the instructor has the option to assign a V grade to a student who stopped attending or failed to attend class. When a V grade is issued, no grade points are calculated, the grade is not computed in the student’s GPA, and no credits are earned. Again, students must not assume the instructor will assign a V grade. Students are responsible for dropping themselves.

**Grading**

The following grades were implemented winter quarter 2012 and revised fall quarter 2018. The college uses both numerical and certain letter grades.

**Numerical**

Instructors may report decimal grades from 1.0 to 4.0 in 0.1 increments. The following is a recommended decimal grade/letter grade conversion chart:

- A 3.9 to 4.0
- A- 3.5 to 3.8
- B+ 3.2 to 3.4
- B 2.9 to 3.1
A grade point average (GPA) is determined by dividing the total number of grade points earned by the total number of credit hours that were attempted for a decimal grade. At the end of each quarter, a student can confidentially access their grades and credits earned online and can order transcripts through National Student Clearinghouse.

Letter
The following symbols may be used to designate a grade for coursework, but are not assigned grade points and do not affect the GPA:

P  Passing (2.00 of higher GPA)
S  Satisfactory (1.00-1.99 GPA)
W  Withdrawal
I  Incomplete
N  Audit
U  Unsatisfactory
V  Discontinued attendance
R  Repeated course
Z  Continuous enrollment
*  No grade reported/invalid grade

See detailed descriptions of grading symbols on the College website at pencol.edu.

Incomplete Grades
The grade of I, designating incomplete, must be initiated by the student. The I grade is at the instructor’s discretion and requires the agreement of the instructor that you have completed a sufficient amount and quality of work to complete the course without significant further instruction, and that you cannot complete course requirements during the quarter due to circumstances beyond your control.

The instructor must fill out an electronic contract form that contains the specific requirements to be completed, the time allowed for completion, and the grade to be assigned if the contract is not completed. Copies of the contract are retained by the instructor and the student. The contract goes to Pirate Central at the time grades are recorded at the end of a term.

If the requirements are completed in the allowed time for completion (which is a maximum of one year), the instructor will assign the student the grade earned in the class. If the work requirements are not completed in the allowed time for completion, the grade to be assigned if the contract is not completed will be put on your transcript by Pirate Central.

An individual receiving veteran’s benefits or federal or state financial aid who fails to make up an I grade within a designated time may risk partial loss or termination of benefits or funding. All students who are receiving funding of any sort should consult with their funding source before taking an I grade, since doing so may affect funding eligibility.

Passing and Unsatisfactory Grades
You may request to enroll in certain courses on a pass or no-pass basis. If you select the option of having a Pass (P), Satisfactory (S), or Unsatisfactory (U) grade for specific course work, you should request this from your instructor at the beginning of the quarter. Remember that U grades do not earn credit.

The P grade is defined as 2.0 quality work or better, while an S grade is defined as 1.0 quality work, or equivalent to the decimal range of 1.0 - 1.9.
While the number of passing and satisfactory (P and S) grades is not limited at Peninsula College, transfer students are cautioned that baccalaureate institutions may impose limits or restrictions on the acceptance of P and S graded credit. If you plan to transfer to a baccalaureate institution, you should determine that school’s policy regarding the acceptance of P and S courses before electing the P option.

Repeated Courses, Grade Forgiveness Petition

Repeats
A course may be repeated two times for a total of three enrollments. The lower grade(s) will remain on the transcript. However, only the highest grade earned in the repeated course will be used in computing grade point averages. Credit is granted only once for a repeated course.

Pirate Central will detect repeated courses and code your transcript accordingly. A letter "R" will appear after a course that has been repeated. If you repeated a course but it was not coded as a repeat on your transcript, contact Pirate Central at Services@pencol.edu or call (360) 417-6340.

A “repeatable course” is designed to allow students to enroll in the course multiple times for credit, up to a designated credit limit or number of repetitions. The course description for such a course indicates that the course is repeatable for credit. Within stated limits, credits and grades for these repeatable courses will count toward graduation requirements and GPA.

Grade Forgiveness
A returning student who has not been enrolled for a period of two or more years at Peninsula College may petition to have previously earned Peninsula College grades of less than 1.4 disregarded in computing grade point averages. However, if such a request is approved, all grades will still remain on the transcript and academic credit will be removed. The form and process for this request may be obtained through Pirate Central by calling (360) 417-6340, emailing Services@pencol.edu or obtaining the form on the College website at pencol.edu.

If you plan to transfer to a baccalaureate university or to another two-year college, the destination school may or may not honor Peninsula College’s grade forgiveness. Check with the destination school for its policy.

Academic Progress and Honors

The purpose of Academic Progress is to identify and alert students with low academic achievement and to help them improve their academic performance.

• You must earn a grade point average (GPA) of 2.0 or above to be in good academic standing. Otherwise, the college will place you progressively on alert, probation, or suspension.
• Alert: A student whose cumulative GPA falls below 2.0 will be placed on academic alert.
• Probation: A student on academic alert who fails to earn a cumulative GPA of at least 2.0 at the end of the subsequent quarter of enrollment will be placed on academic probation. If you are in this situation you must meet regularly with a success navigator until your cumulative GPA is 2.0 or better. If during this time your quarterly GPA continues to be below 2.0, you will be subject to academic suspension.
• Level I suspension: A student on academic probation who fails to earn a quarterly grade point average of at least 2.0 in the next quarter of enrollment will be placed on academic suspension. Students may appeal for immediate reinstatement.
• Level II suspension: If the student fails to meet the terms of reinstatement from Level I suspension, then the student is suspended from enrollment at the college for 12 months and may not appeal.

Certain vocational program students, international students, veterans, and students receiving financial aid may have different and/or additional academic standard requirements and appeal processes.

Audit
Auditors are expected to attend and participate in classes regularly, but examinations are not required and are at the instructor’s discretion. Auditors are required to meet course prerequisites or otherwise have instructor permission. You will not receive a grade or earn credit for an audited class.

Regular, Non-Senior Auditors
Non-senior auditors pay the same tuition as if they were taking the class for credit.
Senior Auditors
After the fifth day of instruction an individual who is a Washington state resident, and is at least 60 years of age by the first day of instruction of the quarter, may enroll as an auditor in certain courses on a space-available basis. Students enrolling under this waiver shall register for no more than two courses per quarter. For approved senior audits, no tuition will be charged, although some fees may be assessed. Written approval of the instructor is required. (See RCW 28B.15.540 and WAC 131-28-080.)

Senior auditors may sit in from the start of the class with the instructor's permission, since they have to wait to add the class pending confirmation of available space. Senior auditors should contact Pirate Central before the first class meeting at Services@pencol.edu or call (360) 417-6340 to learn more about the process.

Nonattendance
Student attendance and participation is crucial to academic success.

At the beginning of a quarter, to accommodate students waiting for space to register for a course, instructors may initiate a withdrawal for nonattendance. A student who fails to attend at least 50% of a face-to-face class or fails to log in for at least 50% of online class activity during the first week of the quarter may be administratively withdrawn from the course by the instructor notifying the Student Services Office. However, students should not count on instructors dropping them for nonattendance: students who are not attending are responsible for dropping themselves.

Students who plan to remain enrolled but have attendance difficulties during the first week of the quarter should contact their instructors immediately to avoid being dropped for nonattendance.

At the end of a quarter, an instructor may, at the instructor's option, assign a V grade to a student who stopped attending or failed to attend class. When a V grade is issued, no grade points are calculated, the grade is not computed in the student's GPA, and no credits are earned. Again, students must not assume the instructor will assign a V grade. Students are responsible for dropping themselves.

Passing and Unsatisfactory Grades
You may request to enroll in certain courses on a pass or no-pass basis. If you select the option of having a Pass (P), Satisfactory (S), or Unsatisfactory (U) grade for specific course work, you should request this from your instructor at the beginning of the quarter. Remember that U grades do not earn credit.

The P grade is defined as 2.0 quality work or better, while an S grade is defined as 1.0 quality work, or equivalent to the decimal range of 1.0 - 1.9.

While the number of passing and satisfactory (P and S) grades is not limited at Peninsula College, transfer students are cautioned that baccalaureate institutions may impose limits or restrictions on the acceptance of P and S graded credit. If you plan to transfer to a baccalaureate institution, you should determine that school's policy regarding the acceptance of P and S courses before electing the P option.

Plagiarism/Cheating
Plagiarism and/or cheating are not tolerated by Peninsula College. An individual who cheats or plagiarizes the works of others is at risk of receiving a failing grade for the course in which such action takes place. In addition, plagiarism and/or cheating are violations of the Student Code of Conduct and such actions may result in an official sanction by the Conduct Officer.

Quarterly and Graduation Honors

President's List, Honor Roll

Eligibility for quarterly honors is as follows:

- Enroll in and complete at least 12 credits in a quarter in courses numbered 100 or above for which decimal grade points are assigned
- Receive no Incomplete grades
- President’s List: quarterly grade point average (GPA) no less than 3.9
• Honor Roll: quarterly GPA of 3.6 - 3.84

President’s Medal for Scholarly Excellence at graduation:
• Complete a degree with at least 45 college-level credits at Peninsula College
• College-level cumulative GPA of 3.85 or higher

Transferring to and from Peninsula College

Transferring to Peninsula College
Peninsula College reserves the right to determine which classes are acceptable for transfer. Authority for acceptance of credits is the responsibility of Enrollment Services.

The decision to grant transfer credit is based upon several factors:

• The program of study the student plan to study
• For college-level courses completed with a D or 1.0 GPA. Below college level courses are not transferrable, but may be used for placement.
• An official transcript from the granting institution is required to be evaluated and transferred.
• The length of time since the classes were taken (for example, Intro to Computer Science taken in 1990 would not transfer into the AAS in Computer Science)
• Peninsula College does not grant credit for religion or theology courses that are sectarian in nature.

To have credits transferred, send your previous colleges’ official transcripts to Peninsula College either by mail, electronic means or delivered to Enrollment Services in a sealed envelope directly from the other college. The Enrollment Specialist will then review and complete an official evaluation that will determine what credit may be granted toward graduation requirements.

Advanced Placement (AP)

The Advanced Placement (AP) program consists of college-level courses and exams for high school students. The college follows statewide guidelines in awarding credit for AP exams. AP exams without comparable PC course offerings will be eligible for elective credit. Students who apply for AP credit must request that official AP scores be sent directly from the College Board to the PC Enrollment Services Office. AP credit is considered transferred-in credit and credit is posted on the student’s academic transcript at the time of acceptance. Acceptable scores and course equivalencies are available in Enrollment Services.

International Baccalaureate (IB)

The International Baccalaureate program consists of college-level courses and exams for high school students. The college follows statewide guidelines in awarding credit for IB exams. Students who apply for IB credit must request that official IB scores be sent directly from International Baccalaureate to Peninsula College Enrollment Services office. IB credit is considered transferred-in credit and a notation is posted on the student’s academic transcript at the time of acceptance. Acceptable scores and course equivalencies are available in Enrollment Services.

Career and Technical Education (CTE)

Dual Credit Students who complete approved high school CTE Dual Credit courses with a grade of “B” or better will receive academic credit. All CTE Dual Credit courses accepted for credit will be transcribed with the grade earned in the student’s high school course. Courses are only transcribed within the academic year the student completes the course work. Note: PC credit is awarded for CTE Dual Credit courses based on agreements between the college and local high schools to assist students in earning PC degrees and certificates. Award of the credit at PC does not guarantee or imply that other institutions will accept it as transfer credit.

Reciprocity Policy
In accordance with the Washington Community and Technical College (CTC) Inter-College Reciprocity Policy, Peninsula College offers reciprocity to students transferring within the CTC system who are pursuing the Direct Transfer Agreement (DTA) degree or the Associate in Science-Transfer (AS-T) degree.

**High School/Dual Credit Transferring non-US Transcripts**

Non-US transcripts must first be evaluated by a professional evaluator for foreign credentials.

**CLEP**

PC awards credits for College Level Examination Program (CLEP) exams that meet the subject and score criteria agreed upon by the college departments that oversee each appropriate discipline. Acceptable scores and course equivalencies are published on WCC's website. Students who apply for CLEP credit must request that official CLEP scores be sent directly from the College Board to the PC Enrollment Services Office. CLEP is considered transferred-in credit and is posted on the student’s academic record at the time of graduation. CLEP credits may not transfer to other colleges and universities. It is the student's responsibility to contact transfer institutions regarding the acceptance of these credits.

**Military Training**

PC values the training, knowledge, and experience provided to our military servicepersons. Anyone who has served in a branch of the United States armed services and who is enrolled at PC is eligible to have military training evaluated for college credit (RCW 28B.10.057).

PC will make every effort to award credit for military training where possible. The following procedure is intended to clarify requirements, processes, and timelines for awarding credit. Students receiving veteran education benefits, active-duty tuition assistance or who desire evaluation of military training are required to complete the following:

- Declare intent to complete a program of study offered at PC
- Provide an official Joint Services Transcript (JST), from the Community College of the Air Force (CCAF), or from any other college/university attended.
- Submit all transcripts for evaluation within three terms of admission to the program or be decertified for benefits.

**Transferring from Peninsula College**

Peninsula College has set its general education requirements for the associate degrees (Direct Transfer Agreement/Major Related Programs) to conform with guidelines of the Washington Intercollege Relations Commission (ICRC) for direct transfer of degree credits. Washington baccalaureate colleges and universities accept these guidelines or have separate agreements with Peninsula College. Students entering those institutions with Associate of Arts (AA) degrees from Peninsula College are considered to be in their junior year and to have completed the general education requirements at those baccalaureate institutions.

Students should meet with a transfer advisor as early as possible to begin transfer planning. Visit pencol.edu/transfer to begin that process.

Individuals who plan to transfer from Peninsula College to a baccalaureate college or university are expected to meet the entrance requirements of that institution at the time of their transfer. You should obtain the current catalog from the institution to which you plan to transfer and study that school's entrance requirements, as well as reviewing suggested freshman- and sophomore-level courses in your major field of interest.

Institutions differ in the treatment of credits earned at Peninsula College with pass (P) or satisfactory (S) grades for courses in a major program of study. For example, they may compute a P grade as a C or D (a 2.0 or 1.0) and the College's S as a D (1.0) grade. In the same way, a receiving institution may consider an I (Incomplete) grade to be an F (0.0). Consult with the school you are transferring to.

Your advising appointment will help you understand the transfer credit process. For new students, advising appointments are made through Pirate Central by calling (360) 417-6340 or emailing SServices@pencol.edu.
If you make last-minute changes in your major area of study or in your choice of baccalaureate institutions, that may create challenges for a timely transfer of credits. Therefore, such changes should be discussed with your advisor as early as possible.

Peninsula College courses numbered below 100 are not transferable to other institutions. Courses with titles containing the word “technical” or “technology” may not be transferable to all baccalaureate institutions. You should work with your advisor before planning to transfer courses that are specialized components of professional technical education programs that are listed by the ICRC as “restricted subject area” courses. Associate in Applied Science–Transfer degrees transfer to some colleges. Work with your advisor to identify transferring options.

You may earn more than 90 credits at Peninsula College, but the total number of credits accepted for transfer will be determined by the institution that you are transferring to.

Students who have completed the "Washington 45" requirements may be able to transfer and apply a maximum of 45 quarter credits toward general education requirements at any other public and most private higher education institutions in the state. For more information about "Washington 45," see sbctc.edu/colleges-staff/programs-services/transfer/washington-45.aspx. The list of courses in "Washington 45" does not replace the Direct Transfer Agreement, Associate of Science Tracks I and II, or any Major Related Program agreement, nor will it guarantee admission to a four-year, baccalaureate institution.

Military and Prior Learning Credits

Academic Credit for Prior Learning
Peninsula College accepts equivalency credit awarded by approved testing methods which reflect previous training, private study, work completed at other institutions, or other bona fide qualifications that indicate the student has knowledge or abilities equivalent to those learned by taking a course.

Methods of assessment include but are not limited to:

- Credit by Testing (AP, CAPE, CI, CLEP, DSST, IB, DSST, etc. See the College website at pencol.edu for a full listing)
- Credit by Extra-institutional learning (Military and Industry Training)
- Credit by Challenge Exam
- Credit by Prior Experiential Learning (Portfolio)

No more than 25% of required credits for a degree or certificate may be satisfied by credits granted for prior learning. Credit for approved equivalency is posted to your transcript with a pass (P) grade which does not affect the GPA.

For more information regarding Academic Credit for Prior Learning visit pencol.edu, email SServices@pencol.edu or call (360) 417-6340.

Military Credits
When military courses are directly related to your program of study at Peninsula College, it is possible for credit to be awarded toward a specific degree or certificate. However, some such courses might not be applicable to a program’s graduation requirements, and in that case no credit would be awarded. Official documentation of military courses and requests for evaluation of credit are submitted to Pirate Central via email at SServices@pencol.edu or by calling (360) 417-6340.

Advanced Placement Credit
Peninsula College awards advanced standing to entering students based upon levels of performance on the advanced placement (AP) examinations administered by the College Entrance Examination Board. AP scores are related to specific course equivalencies in a crosswalk approved by the Washington State Board for Community and Technical Colleges. An official transcript of the AP scores must be received from the College Board to receive credit. For more information regarding advanced placement credit contact the Student Services Office at SServices@pencol.edu or call (360) 417-6340.
Graduation and Commencement Requirements

Requirements for Graduation from Peninsula College

Degrees

- GPA requirements:
  - 2.0 or above cumulative GPA
  - The cumulative GPA will be calculated from college-level courses (numbered 100 or above)
- Credit requirements:
  - 90 or more credits meeting requirements for a specific degree
  - Credits required for a certificate are typically about half that of a degree, but vary depending on the program of study
- Residency requirements (credits that must be taken at Peninsula College)
  - 30 credits or one third of the required credits for the degree or certificate, whichever is less
  - A specific program may require a capstone sequence, requiring more credits to be earned in residence
  - Credits earned through articulation agreements and advanced placements do not satisfy residency requirements
- You must apply for your degree or certificate before you register for your last quarter of study: go to pencol.edu

Certificates

- GPA requirements:
  - 2.0 or above GPA
  - The GPA will be calculated from college-level courses required in the certificate

High School Completion
The minimum requirement for a high school diploma is that the final course must be completed at Peninsula College.

Commencement
Commencement is an annual ceremony to honor graduates and projected graduates with family, friends, faculty, and others present. Commencement does not confirm successful degree or certificate completion, rather it recognizes completion and projected completion in an upcoming term.

The event is typically held each June. Individuals who will be within ten credits of completing graduation requirements by the end of a spring quarter may take part in commencement exercises for that spring, or they may elect to attend the next year’s commencement.

Graduation Requirements Checklist
Current graduation checklists for degrees or certificates are available on the College website at pencol.edu or from the Student Services Office at Services@pencol.edu or call (360) 417-6340.

The checklist lists the course requirements necessary to complete your degree or certificate. The graduation list you need to follow is set at the time of entry into your program of study. Checklists can change annually.

If you need to leave the College for two or more quarters, you may be required to graduate under the newest checklist of requirements when you enroll again. Also, in some cases you may have an option to graduate under a newer checklist even if you have been enrolled continuously. At the point of graduation, you must meet all the requirements in a single checklist; you cannot “mix and match” requirements from different checklists. Consult with your advisor for more information.
Transcripts
Your transcript is the official record of grades and credits earned in courses during the quarters you have been enrolled. You send official transcripts to give your record to other schools, employers, and so forth. An official transcript is signed by a certified school official, either with the College seal placed over the signature, or by use of an acceptable electronic means of confirming a transcript is the official record from the College.

Your transcript is not released without a request from you, or in rare cases, upon receipt of a legal order. A fee is charged for official transcripts.

Official transcripts are ordered through the College’s online self-services at National Student Clearinghouse, which can be accessed via the College website, pencol.edu. Contact the Student Services Office at SServises@pencol.edu or call (360) 417-6340 for more information.

Unofficial transcripts are also available on the College website at pencol.edu. Students should check their transcripts after each quarter’s grades are posted to ensure accuracy. Report any discrepancies to the Student Services Office.

Student Services

Advising Services
Student Services Advisors are available to provide academic advising to all new, international, athlete, and Running Start students. They are also available to advise continuing students when their faculty advisor is not available.

Peninsula College connects students to advisors based on their Area of Study. Advisors help with creating class schedules to meet the career and academic goals of the student, the creation of a degree plan, referrals to on and off-campus resources, and assist with transfer planning.

Appointments to meet with Student Services Advisors are made by contacting the Student Services Office at sservices@pencol.edu or (360) 417-6340; toll-free in Washington (877) 452-9277, ext. 6340; video phone (360) 406-4759.

Counseling Services
Mental Health Counselors provide short-term personal counseling and assist with referrals to college services, community agencies, and other professionals. You may request an appointment by contacting the Student Services Office at sservices@pencol.edu or (360) 417-6340; toll free in Washington (877) 452-9277, ext. 6340; video phone at (360) 406-4759.

Multicultural and Inclusion Student Services
Multicultural Services provides support to diverse student populations attending Peninsula College. Our staff offers academic advising, transfer planning, referrals to on and off-campus resources, and assistance with financial aid forms. Contact diversity@pencol.edu or (360) 417-6345 or toll-free in Washington (877) 452-9277, ext. 6345 for information.

International Student Programs
International Student and Faculty Services (ISFS) at Peninsula College provides services to international students attending the college. Our multilingual staff is always ready to provide information and help on academic concerns, immigration procedures, transcript evaluation, housing, student life, and transferring. The ISFS office also provides assistance to U.S. students who wish to study abroad. Contact ISFS at (360) 417-6491 or international@pencol.edu for information or assistance.
Access Services (formerly SSD)
Peninsula College is committed to providing reasonable accommodations to qualified students with disabilities. We uphold and value the law regarding Americans with Disabilities Act of 1990 (ADA), Americans with Disabilities Act Amendments Act of 2008 (ADAAA), and Sections 504 and 508 of the Rehabilitation Act of 1973, prohibiting discrimination on the basis of disability in education.

A variety of accommodations are available to students that qualify for Access Services.

Visit pencol.edu/services/services-students-disabilities-ssd for information on how to qualify for accommodations, or email Access Services at ssd@pencol.edu or (360) 417-6373.

Career Services
Peninsula College offers courses, workshops, assessments, and advising to assist students who are interested in exploring a career pathway, major, or degree. In addition, our website connects you with more information on career or major exploration, as well as tools and resources for job seekers and students. If you would like to meet with an advisor to discuss career exploration call (360) 417-6340 to make an appointment.

Assessment, Placement, and Testing Services
Placement scores and other measures are used to ensure accurate placement in courses.

We offer a variety of certification exams, test proctoring, and mathematics and English placement options.

Previous educational experience, ACT/SAT scores, some high school transcripts, Smarter Balance test scores, Advanced Placement (AP) exams, and college transcripts from a regionally accredited institution are some alternative placement options.

Placement testing may be waived if you have satisfactorily completed one or more quarters of college-level work that includes English and mathematics classes completed with a grade of 2.0 or above.

Testing Services include:
- ACCUPLACER
- Accommodated testing
- Online, remote testing for certain tests
- Automotive Service Excellence (ASE) exam
- GED® exam and other Pearson VUE certification exams
- National Center for Competency Testing (NCCT)
- CASTLE exams
- Correspondence test proctoring
- TEAS exam (for students applying to the Nursing Program)

For information on tests, placement options, and applicable fees visit pencol.edu/admissions/testing-center, call (360) 417-6346 or toll-free (877) 452-9277, ext. 6346, or email testing@pencol.edu.

Veterans Services
Peninsula College recognizes and appreciates all who have served in the United States Armed Forces. If you are a veteran, or a survivor or dependent of a veteran working toward a degree or certificate, you may be eligible for veterans’ educational benefits. To determine eligibility and apply for benefits, visit benefits.va.gov/gibill.

Veterans Services provides guidance to veterans, their dependents, active military, and reservists regarding education benefits. Prospective and continuing student veterans and other eligible individuals can get information on the college website at pencol.edu or meet with the veteran advisor who can assist with the new
student process, educational planning questions, and provide referrals to campus, local, regional, and state resources. The Peninsula College Veterans Center is located in the J building. The Center houses the veteran advisor and space for studying, programs, and connecting with other veterans.

Check with Veterans Services to obtain information about a possible tuition waiver. Veterans, as well as children and spouses of totally disabled, POW/MIA, or deceased eligible veterans or National Guard members, may apply.

If you have questions, contact Veterans Services at veterans@pencol.edu or (360) 417-6224, or call toll-free (877) 452-9277, ext. 6224, or contact us by video phone at (360) 406-4759.

**Services Members Opportunity Colleges**

Peninsula College is an institutional member of Service Members Opportunity Colleges (SOC), a group of more than 1,900 colleges and universities providing voluntary postsecondary education to members of the military throughout the world. As an SOC member, we recognize the unique nature of the military lifestyle and have committed to assessing the transfer of relevant course credits and crediting learning from appropriate military training and experiences. This commitment includes a partnership with Army Recruiting Command Program ConAP that links new soldiers to college at the time of enlistment.

SOC has been developed jointly by educational representatives of each of the Armed Services, the Office of the Secretary of Defense, and a consortium of fifteen leading national higher education associations. It is sponsored by the American Association of State Colleges and Universities and the American Association of Community Colleges.

**Student Life**

For information about student life, visit pencol.edu/student-life. You’ll learn about available services, where to find them, and how to become involved in campus life. Information about College policies and procedures, including policies relating to discipline and due process, is also included.

We serve a population diverse in age, geographical origin, and cultural background. In recognition of this diversity, an effort is made to offer and assist with a broad range of activities outside the classroom to encourage the greatest possible personal development. Some activities are provided through the efforts of student government; others are encouraged by interest groups.

**Student Government**

The Associated Students are governed by the Associated Student Council (ASC), which is comprised of 11 officers. This group plans activities for all students and allocates funds for campus student activities and organizations. For more information about student government and the ASC Constitution visit pencol.edu.

**Clubs and Organizations**

Students are encouraged to participate in student clubs and organizations. Information about joining clubs, or forming new clubs, is available at pencol.edu/student-life/student-government-asc. You can participate in a number of clubs and organizations on campus and in the community. Assistance in joining or forming clubs is available by calling the Associate Dean for Athletics and Student Life at (360) 417-6533.

**Honor Society**

Peninsula College has a chapter of Phi Theta Kappa, the international honor society for students of two-year colleges. The local chapter, Beta Delta Nu, inducts new members and sponsors a student club. To become a member, individuals must have earned at least fifteen credits with a cumulative GPA of 3.7. For more information, contact ptk@pencol.edu.

**Recreation Programs**

The College has designed a wide range of activities to meet the diverse physical interests of the campus population. Included are intramural sports, group recreation activities, special events, and open recreation. Intramural activities are provided for individual and team competitions. Activities include basketball, bowling, soccer, and volleyball.
Open recreation is scheduled during mid-day in the gymnasium and throughout the day for personal fitness in the College’s Fitness Center.

**College Publications**
Journalism students gain experience and credit while providing the college with the award-winning newspaper, *The Buccaneer*. Students contribute to stories and photos published online at passthebuc.com.

Individuals may also gain publication experience by producing the college literary magazine, *Tidepools*, which is published annually. Anyone may submit materials to *Tidepools* in the fall of each year.

**Intercollegiate Athletics**
Peninsula College offers men’s and women’s varsity basketball, men’s and women’s varsity soccer, and coed varsity esports. The Peninsula College Pirates play in the Northwest Athletic Conference (NWAC) for basketball and soccer and in the National Junior College Athletics Association (NJCAA) in esports. Prospective players are encouraged to contact the respective coach. See the directory at gopcpirates.com.

**Cultural Events**

**Public Service Presentations**
College staff members organize a wide variety of programs that are open to and the general public. They include:

- **Studium Generale**—Lectures, forums, performances, and discussions are presented Thursdays in the Little Theater. Topics represent a variety of interests in the humanities, social sciences, natural sciences, and global issues and are designed to contribute to a liberal arts education.

- **Foothills Writers Series**—Readings by poets and writers of local, regional, and national note. Each quarter an “Open Mic” program gives students and other area writers an opportunity to share their poetry and prose.

**Cultural Enrichment Drama/Music**
Dramatic and musical productions performed in the College’s Little Theater and Maier Performance Hall are a natural part of college courses. Additional opportunities for participation are available to students through Community Players, Port Angeles Symphony, Community Chorus, Olympic Theatre Arts, and numerous instrumental and vocal ensembles in the community.

**ʔaʔkʷustəŋáwtxʷ House of Learning, Peninsula College Longhouse**
Built in 2007, ʔaʔkʷustəŋáwtxʷ House of Learning, Peninsula College Longhouse was the first longhouse in the nation built on a community college campus. It was created in collaboration with the six area tribal nations: Hoh River Chalat’, Quileute, Makah, Port Gamble S’Klallam, Jamestown S’Klallam, and Lower Elwha Klallam. The Longhouse builds bridges of understanding and knowledge among tribes, students, educators, and visitors by establishing a special place on campus to gather for cultural ceremonies, community events, classes, workshops, study groups, and individual study. The Longhouse serves as a cultural and educational resource for understanding, honoring, and sharing our cultural heritages.

The Longhouse Art Gallery features exhibits by Native artists and provides a space for artists to share their work and culture with Peninsula College students, faculty, staff, community members, and visitors. Tribal artwork is featured throughout the Peninsula College campus. For more information, contact longhouse@pencol.edu or (360) 417-7992.

**Longhouse & Art Gallery**
Built in 2007, ʔaʔkʷustəŋáwtxʷ House of Learning Peninsula College Longhouse was the first longhouse in the nation built on a community college campus. The Longhouse was created in collaboration with the six area tribal
nations: Hoh River Chalat’, Quileute, Makah, Port Gamble S’Klallam, Jamestown S’Klallam, and Lower Elwha Klallam. The House of Learning builds bridges of understanding and knowledge among tribes, students, educators, and visitors by establishing a special place on campus to gather for cultural ceremonies, community events, classes, workshops, study groups, and individual study. The Longhouse serves as a cultural and educational resource for understanding, honoring, and sharing our cultural heritages.

The Longhouse Art Gallery features exhibits by Native artists and provides a space for artists to share their work and culture with Peninsula College students, faculty, staff, community members, and visitors. Tribal artwork is featured throughout the Peninsula College campus. For more information, contact longhouse@pencol.edu or (360) 417-7992.

Student Union Building
The Pirate Union Building (PUB) is an important campus gathering place and the destination point for student interaction, involvement, entertainment, and social and cultural activities. It is also the venue for student leadership opportunities in the College and community. In the PUB you will be able to connect with other students in a relaxed, informal setting and access a variety of student services, including student government offices, dining and lounge areas, the Bookaneer Campus Store, Campus Safety, and an internet cafe. The facility also houses a small performance stage, a theater seating 250 people, and an Art Gallery. The PUB dining area is serviced by the Pirate Cove Cafe, which offers an extensive variety of healthy food options, as well as an espresso bar. The office of the Associated Student Council (ASC) is located adjacent to the main dining and lounge areas of the PUB, making it convenient to visit and easy for one to become involved in campus life. The ASC sponsors a wide variety of activities for enjoyment and enrichment in the PUB throughout the year, including cultural events, comedy shows, student talent shows, dances, and barbecues. Contact the ASC at asc@pencol.edu or 360-417-6432.

Bookstore
The Bookaneer Campus Store is an essential component of campus life, providing materials and services designed to help students achieve academic success while promoting college activities to both students and our community. It offers course materials, including new and used textbooks, E-books, and textbook rentals. Computer software at academic prices, student supplies, Peninsula College pirate gear, and a large assortment of food and beverage items are also available.

The Bookaneer is conveniently located in the Pirate Union Building (PUB). Regular store hours are Monday through Friday with extended evening hours at the beginning of each quarter. Visit the Bookaneer online bookaneer.pencol.edu for hours and to browse and/or order merchandise, or call (360) 417-6440.

Child Care
The Early Childhood Development Center offers a quality preschool and child care program for children, ages six months to five years, of parents or guardians who are students, staff, or faculty at Peninsula College. This program is also open to children in the community if space is available.

The Early Childhood Development Center is located in Building K on the Peninsula College campus.

For information regarding hours of operation, eligibility, curriculum, fees, or other aspects of the program please visit our website at pencol.edu/ECDC.

Library
The John D. Glann Library connects members of the College and our communities to a variety of high-quality learning resources. The Library advances the College mission with research instruction, collections, learning spaces, and services that support courses and programs offered. Librarians and staff help all users find and use materials suited to their learning needs.

The online catalog shows our print holdings and connects to some of our electronic resources. The Library catalog is web based and can be accessed from off campus.
Our website provides access to subject-specific research and citation guides, streaming academic video content, full-text databases, and other specialized resources.

Collections include thousands of print and electronic titles, including books, e-books, magazines, journals, and newspapers. If we do not provide access to what you need, interlibrary loan services allow students, faculty, and staff to borrow from other libraries.

One-on-one research assistance is provided by a faculty librarian to help students develop research techniques while providing immediate assistance with specific assignments.

The Library is open Monday through Friday during the academic year, except for holidays and quarter breaks. For current hours visit pencol.edu/library.

You are encouraged to use our many resources for research, class-related projects, or independent learning. Faculty and staff are available to assist you.

Learning Assistance

The Learning Center
Tutoring and learning assistance is open to students at all levels and abilities working on projects for any class, including online courses, in any discipline. The Math Center is on the first floor of Maier Hall (Building E). The Writing Center and Tutoring Services, located in the Library (Building B), offer free writing, research, and tutoring support. A computer lab and computer support (including help with online classes) are also available in the Library. The Extension sites in Port Townsend and Forks have their own Learning Centers that include these support services. Learning Center supports are also available online.

Tutoring
The following types of tutoring are available:

- One-on-one peer tutoring
- Writing response/evaluation
- E-Tutoring (online tutoring assistance)
- Math assistance and computer help also are available in the math and computer labs.

Writing Center
At the Writing Center students can make individual appointments for writing help or use the lab’s computers to work on essays and research. The Writing Center is open weekdays to all students engaged in writing projects in any discipline. Students sign up for 30 or 60-minute response sessions. During these sessions, responders will discuss the paper’s strengths and weaknesses, focusing first on larger issues such as clarifying ideas, developing and supporting those ideas, structuring them for readability and coherence, and using correct grammar and punctuation. The center can also help students understand an assignment’s expectations and generate ideas before they begin their writing.

The computers in the Writing Center are also open to students who would like a place to work independently on research and writing assignments. The computers have Microsoft Office and internet access, and a number of writing handbooks are available. Students also have access to a printer, and the Library’s study rooms and research help is just outside the door.

Math Center
The Math Center is a drop-in tutoring center for math students. STEM (Science, Technology, Engineering and Math) program office hours are also sometimes held in the Math Center.

Computer Lab
The Computer Lab in the Library is available for students working on computer-based classes or for general use in any course. Support for student computer work and online learning are available in the Lab through the Library front desk.
Degree Requirements

General Education Competencies (Institutional Core Competencies)
Since 1990, general education competencies define the basic academic skills all graduating students should possess upon completion of their studies. Arts and Sciences students achieve these skills as they move through their required and distribution courses. Professional technical students achieve them in the required courses. Students learn the core knowledge of each program and discipline as they take courses in these areas.

I. Communications Competencies
- Comprehend, identify, and distinguish among the following when reading: main ideas, opinions, facts, inferences, ambiguities, assertions, conclusions, and supporting materials
- Communicate in writing for a variety of purposes and audiences
- Speak effectively
- Listen actively and respond to different audiences

II. Quantitative Reasoning Competencies
- Manipulate numbers (large and small), use common measurement systems, and solve simple linear algebraic problems
- Apply basic computational skills to practical applications
- Recognize functional relationships between and among measurable phenomena
- Apply systematic approaches and logic to solving quantitative problems
- Translate mathematical symbols into words and words into mathematical symbols

III. Information Competencies
- Recognize and formulate an information need
- Find, access, and retrieve information
- Select and reject information within the context of a specific information need
- Evaluate the credibility of information and information sources
- Synthesize and apply information to meet an identified need
- Use basic computer applications

IV. Critical Thinking Competencies
- Identify and troubleshoot problems
- Collect and apply data to solve problems
- Formulate, test, and evaluate potential solutions
- Recognize how individual perspectives and values influence critical thinking

V. Personal & Interpersonal Competencies
- Recognize the importance of accepting ownership for one’s own learning
- Work cooperatively and collaboratively with others
- Function under conditions of ambiguity, uncertainty, and conflict
- Recognize that humans influence, are influenced by, and are dependent upon larger environmental systems: physical, biological, and social

Degrees, Programs, Certificates List
Arts & Sciences Degrees
- Associate in Arts, Direct Transfer Agreement (AA-DTA)
- Associate in Business, Direct Transfer Agreement/Major Related Program (DTA/MRP)
- Associate in Computer Science, Direct Transfer Agreement/Major Related Program (DTA/MRP)
- Associate in General Studies
- Associate in Nursing, Direct Transfer Agreement/Major Related Program (DTA/MRP)
- Associate in Science, Transfer Track 1 (AS)

**Bachelor’s Degree**

- Bachelor of Applied Science in Behavioral Healthcare
- Bachelor of Applied Science in Management
- Entrepreneurship and Marketing Specialization, Bachelor of Applied Science in Management
- Human Resources Management Specialization, Bachelor of Applied Science in Management
- Information Technology Management Specialization, Bachelor of Applied Science in Management
- Tribal Management Specialization, Bachelor of Applied Science in Management

**Professional Technical Programs**

*(Associate in Applied Science (AAS), Associate in Applied Science-Transfer (AAS-T), certificates)*

- Addiction Studies
- Administrative Office Systems
- Automotive Technology
- Business Administration
- Commercial Driver’s License
- Construction Technology (formerly Green Building)
- Criminal Justice
- Cybersecurity & Computer Forensics
- Early Childhood Education
- Emergency Medical Technician
- Entrepreneurship
- Family Life Education
- Emergency Management
- Hospitality and Ecotourism
- Information Technology
- Medical Assisting
- Medical Office Assisting
- Multimedia Communications
- Natural Resources
- Nursing Assistant
- Paralegal
- Phlebotomy
- Welding

**Short Term Certificates of Completion**

For more detailed information on Certificates and on Short Term Certificates specific to Professional Technical programs, visit pencol.edu/proftech.

**Associate Degrees**

Peninsula College’s general education requirements for the Direct Transfer Agreement (DTA) associate degrees conform to the guidelines of the Washington Intercollege Relations Commission (ICRC) for direct transfer of associate degree credits. Washington colleges and universities also accept these guidelines or have separate agreements with Peninsula College to grant junior status and waive their own general education requirements for students entering with the Associate in Arts degree. Major related programs based on the direct transfer agreement (DTA) follow the statewide agreement and share the same benefits.

To meet requirements for these degrees at Peninsula College you must complete a minimum of 90 credits, with a specified number of credits distributed among communications, distribution, and quantitative skills courses. A cumulative grade point average of 2.0 or above is required.
The distribution requirement is based upon the premise that a significant portion of undergraduate education should be characterized by a broad survey of human knowledge.

Distribution requirements consist of a minimum of 45 credits, with 15 credits earned in each of the broad areas of humanities, social sciences, and natural sciences. Communications and quantitative skills requirements are met with the completion of ENGL& 101 and ENGL& 102 and MATH& 107 or above or PHIL& 120.

A specific course may not be credited toward more than one distribution area.

Associate in Applied Science and Associate in Applied Science–Transfer Degrees
The Associate in Applied Science (AAS) and Associate in Applied Science-Transfer (AAS-T) degrees combine the competencies earned in a professional technical program with college-level general education courses. The AAS-T degree is designed for transfer to specific four-year colleges and universities for students pursuing specific professional technical programs. The AAS-T degree is not designed for general transfer.

Students who wish to transfer to four-year colleges, universities, or technical institutions in professional technical programs should obtain the institution’s catalog and review its requirements for junior-year standing in the program to which they would like to transfer. Faculty advisors will work with you to develop an educational plan to meet requirements for transfer to the institution of your choice.

Degree Requirements
• Completion of the courses required for each professional technical program
• Communications, computation, and human relations courses as required by each program
• A minimum of 90 credits
• A cumulative grade point average of 2.0 or above

One Year and Short Term Certificate Requirements
• A cumulative grade point average of 2.0 or above in the courses required for each certificate.

See individual program listings for specifics.

Things You Should Know

Catalog Information
This catalog is designed to provide information for anyone planning to attend Peninsula College. Although the college staff has attempted to make it as comprehensive and accurate as possible, the catalog may contain errors, and program changes may occur during the one year the current catalog is used.

Peninsula College reserves the right to cancel courses. While each individual may work with a Peninsula College advisor, you retain personal responsibility for meeting requirements in this catalog and for being aware of any changes in provisions and requirements.

Selected programs of study at Peninsula College are approved by the Workforce Training and Education Coordinating Board's State Approving Agency (WTECT/SAA) for enrollment of those eligible to receive benefits under the Title 38 and Title 10, USC.

Nondiscrimination and Anti-Harassment Policy
Board Procedure Number: 501
Date Adopted: June 13, 2005
Dates Revised: June 12, 2007; December 9, 2008; June 14, 2011; January 10, 2012; June 11, 2013; June 11, 2015; August 11, 2020

A. Introduction
Peninsula College recognizes its responsibility for investigation, resolution, implementation of corrective measures, and monitoring the educational environment and workplace to stop, remediate, and prevent discrimination on the basis of race, color, national origin, age, perceived or actual physical or mental disability, pregnancy, genetic information, sex, sexual orientation, gender identity, marital status, creed, religion, honorably discharged veteran or military status, or use of a trained guide dog or service animal, as required by Title VI of the Civil Rights Act of 1964, Title VII of the Civil Rights Act of 1964, Title IX of the Educational Amendments of
1972, Sections 504 and 508 of the Rehabilitation Act of 1973, the Americans with Disabilities Act and ADA Amendment Act, the Age Discrimination Act of 1975, the Violence Against Women Reauthorization Act and Washington State's Law Against Discrimination, Chapter 49.60 RCW and their implementing regulations. To this end, Peninsula College has enacted policies prohibiting discrimination against and harassment of members of these protected classes. Any individual found to be in violation of these policies will be subject to disciplinary action up to and including dismissal from the College or from employment.

B. Definitions
1. Complainant: employee(s), applicant(s), student(s), or visitors(s) of Peninsula College who alleges that she or he has been subjected to discrimination or harassment due to their membership in a protected class.

2. Complaint: a description of facts that allege violation of the College’s policy against discrimination or harassment.

3. Consent: knowing, voluntary and clear permission by word or action, to engage in mutually agreed upon sexual activity. Each party has the responsibility to make certain that the other has consented before engaging in the activity. For consent to be valid, there must be at the time of the act of sexual intercourse or sexual contact actual words or conduct indicating freely given agreement to have sexual intercourse or sexual contact. A person cannot consent if he or she is unable to understand what is happening or is disoriented, helpless, asleep or unconscious for any reason, including due to alcohol or other drugs. An individual who engages in sexual activity when the individual knows, or should know, that the other person is physically or mentally incapacitated has engaged in nonconsensual conduct. Intoxication is not a defense against allegations that an individual has engaged in nonconsensual sexual conduct.

4. Discrimination: unfavorable treatment of a person based on that person’s membership or perceived membership in a protected class. Harassment is a form of discrimination.

5. Harassment: a form of discrimination consisting of physical or verbal conduct that denigrates or shows hostility toward an individual because of their membership in a protected class or their perceived membership in a protected class. Harassment occurs when the conduct is sufficiently severe and/or pervasive and so objectively offensive that it has the effect of altering the terms or conditions of employment or substantially limiting the ability of a student to participate in or benefit from the College’s educational and/or social programs. Petty slights, annoyances, offensive utterances, and isolated incidents (unless extremely serious) typically do not qualify as harassment. Examples of conduct that could rise to the level of discriminatory harassment include but are not limited to the following:

   Epithets, “jokes,” ridicule, mockery or other offensive or derogatory conduct focused upon an individual’s membership in a protected class.

   Verbal or physical threats of violence or physical contact directed towards an individual based upon their membership in a protected class.

   Making, posting, emailing, texting, or otherwise circulating demeaning or offensive pictures, cartoons, graffiti, notes or other materials that relate to race, ethnic origin, gender or any other protected class.

6. Protected Class: persons who are protected under state or federal civil rights laws, including laws that prohibit discrimination on the basis of race, color, national origin, age, perceived or actual physical or mental disability, pregnancy, genetic information, sex, sexual orientation, gender identity, marital status, creed, religion, honorably discharged veteran or military status, or use of a trained guide dog or service animal.

7. Resolution: the means by which the complaint is finally addressed. This may be accomplished through informal or formal processes, including counseling, mediation, or the formal imposition of discipline sanction.

8. Respondent: person or persons who are members of the campus community who allegedly discriminated against or harassed another person or persons.
9. Sexual Harassment: a form of discrimination consisting of unwelcome, gender-based verbal, written, electronic and/or physical conduct. Sexual harassment does not have to be of a sexual nature, however, and can include offensive remarks about a person's gender. There are two types of sexual harassment.

a. Hostile Environment Sexual Harassment occurs when the conduct is sufficiently severe and/or pervasive and so objectively offensive that it has the effect of altering the terms or conditions of employment or substantially limiting the ability of a student to participate in or benefit from the College's educational and/or social programs [and/or student housing].

b. Quid Pro Quo Sexual Harassment occurs when an individual in a position of real or perceived authority, conditions the receipt of a benefit upon granting of sexual favors.

Examples of conduct that may qualify as sexual harassment include:

- Persistent comments or questions of a sexual nature.
- A supervisor who gives an employee a raise in exchange for submitting to sexual advances.
- An instructor who promises a student a better grade in exchange for sexual favors.
- Sexually explicit statements, questions, jokes, or anecdotes.
- Unwelcome touching, patting, hugging, kissing, or brushing against an individual's body.
- Remarks of a sexual nature about an individual's clothing, body, or speculations about previous sexual experiences.
- Persistent, unwanted attempts to change a professional relationship to an amorous relationship.
- Direct or indirect propositions for sexual activity.
- Unwelcome letters, emails, texts, telephone calls, or other communications referring to or depicting sexual activities.

10. Sexual Violence: is a type of sexual discrimination and harassment that includes:

a. Nonconsensual sexual intercourse. Any actual or attempted sexual intercourse (anal, oral, or vaginal), however slight, with any object or body part, by a person upon another person, that is without consent and/or by force. Sexual intercourse includes anal or vaginal penetration by a penis, tongue, finger, or object, or oral copulation by mouth to genital contact or genital to mouth contact.

b. Nonconsensual sexual contact. Any actual or attempted sexual touching, however slight, with any body part or object, by a person upon another person that is without Consent and/or by force. Sexual touching includes any bodily contact with the breasts, groin, mouth, or other bodily orifice of another individual, or any other bodily contact in a sexual manner.

c. Incest. Sexual intercourse or sexual contact with a person known to be related to them, either legitimately or illegitimately, as an ancestor, descendant, brother, or sister of either wholly or half related. Descendant includes stepchildren, and adopted children under the age of eighteen (18).

d. Statutory Rape. Consensual intercourse between a person who is eighteen (18) years of age or older, and a person who is under the age of sixteen (16).

e. Domestic violence. Physical violence, bodily injury, assault, the infliction of fear of imminent physical harm, sexual assault, or stalking committed by a person with whom the victim shares a child in common, by a person who is cohabitating with or has cohabitated with the victim as a spouse, by a person similarly situated to a spouse of the victim under the domestic or family violence laws of State of Washington, or by any other person against an adult or youth victim who is protected from that person's acts under the domestic or family violence laws of the State of Washington, RCW 26.50.010.

f. Dating violence. Physical violence, bodily injury, assault, the infliction of fear of imminent physical harm, sexual assault, or stalking committed by a person (i) who is or has been in a social relationship of a romantic or intimate nature with the victim; and (ii) where the existence of such a relationship shall be determined based on a consideration of the following factors: (i) The length of the relationship; (ii) The type of relationship; and (iii) The frequency of interaction between the persons involved in the relationship.
g. Stalking. Engaging in a course of conduct directed at a specific person that would cause a reasonable person to (i) fear for their safety or the safety of others; or (ii) suffer substantial emotional distress.

C. Designee
The following College officials are designated to handle inquiries regarding this policy:

Krista Francis, Vice President of Student Services, kfrancis@pencol.edu
Hanan Zawideh, Vice President of Human Resources, Diversity, Equity & Inclusion, hzawideh@pencol.edu
Address: 1502 E. Lauridsen Blvd., Port Angeles, WA 98362
Phone: (360) 417-6212

Discrimination and Harassment Complaint Procedure

HOW TO FILE A COMPLAINT
Any employee, applicant, student or visitor of the College may file a complaint with the Title IX Coordinator. If the complaint is against that Coordinator, the complainant should report the matter to the president's office for referral to an alternate designee. Complaints may be submitted in writing or verbally. The College encourages the timely reporting of any incidents of discrimination or harassment. For complainants who wish to submit a written complaint, a formal complaint form is available online at pencol-advocate.symplicity.com/public_report. Hard copies of the complaint form are available at the Human Resources Office. Any person submitting a discrimination complaint shall be provided with a written copy of the College's anti-discrimination policies and procedures.

CONFIDENTIALITY AND RIGHT TO PRIVACY
Peninsula College will seek to protect the privacy of the complainant to the full extent possible, consistent with the legal obligation to investigate, take appropriate remedial and/or disciplinary action, and comply with federal and state law, as well as Peninsula College policies and procedures. Although Peninsula College will attempt to honor complainants' requests for confidentiality, it cannot guarantee complete confidentiality. Determinations regarding how to handle requests for confidentiality will be made by the Title IX / EEO Coordinator.

Confidentiality Requests and Sexual Violence Complaints: The Title IX / EEO Coordinator will inform and obtain consent from the complainant before commencing an investigation into a sexual violence complaint. If a sexual violence complainant asks that their name not be revealed to the respondent or that the College not investigate the allegation, the Title IX / EEO Coordinator will inform the complainant that maintaining confidentiality may limit the college's ability to fully respond to the allegations and that retaliation by the respondent and/or others is prohibited. If the complainant still insists that their name not be disclosed or that the College not investigate, the Title IX / EEO Coordinator will determine whether the College can honor the request and at the same time maintain a safe and non-discriminatory environment for all members of the college community, including the complainant. Factors to be weighed during this determination may include, but are not limited to:

- the seriousness of the alleged sexual violence;
- the age of the complainant;
- whether the sexual violence was perpetrated with a weapon;
- whether the respondent has a history of committing acts of sexual violence or violence or has been the subject of other sexual violence complaints
- whether the respondent threatened to commit additional acts of sexual violence against the complainant or others; and
- whether relevant evidence can be obtained through other means (e.g., security cameras, other witnesses, physical evidence).

If the College is unable to honor a complainant's request for confidentiality, the Title IX / EEO Coordinator will notify the complainant of the decision and ensure that complainant's identity is disclosed only to the extent reasonably necessary to effectively conduct and complete the investigation.
If the College decides not to conduct an investigation or take disciplinary action because of a request for confidentiality, the Title IX / EEO Coordinator will evaluate whether other measures are available to limit the effects of the harassment and prevent its recurrence and implement such measures if reasonably feasible.

**INVESTIGATION PROCEDURE**

Upon receiving a discrimination complaint, the College shall commence an impartial investigation. The Title IX / EEO Coordinator shall be responsible for overseeing all investigations. Investigations may be conducted by the Title IX / EEO Coordinator or their designee. If the investigation is assigned to someone other than the Title IX / EEO Coordinator, the Title IX / EEO Coordinator shall inform the complainant and respondent(s) of the appointment of an investigator.

**Interim Measures:** The Title IX / EEO Coordinator may impose interim measures to protect the complainant and/or respondent pending the conclusion of the investigation. Interim measures may include, but are not limited to, imposition of no contact orders, rescheduling classes, temporary work reassignments, referrals for counseling or medical assistance, and imposition of a summary suspension in compliance with the College’s student conduct code or an administrative leave of absence in compliance with the College’s employment policies and collective bargaining agreements.

**Informal Dispute Resolution:** Informal dispute resolution processes, like mediation, may be used to resolve complaints, when appropriate. Informal dispute resolution shall not be used to resolve sexual discrimination complaints without written permission from both the complainant and the respondent. If the parties elect to mediate a dispute, either party shall be free to discontinue mediation at any time. In no event shall mediation be used to resolve complaints involving allegations of sexual violence.

**Investigation:** Complaints shall be thoroughly and impartially investigated. The investigation shall include, but is not limited to, interviewing the complainant and the respondent, relevant witnesses, and reviewing relevant documents. The investigation shall be concluded within a reasonable time, normally ninety days unless there is good cause shown. If it appears completion of the investigation will take longer than ninety days, the Title IX/EEO Coordinator will notify the parties, describe the reasons for the delay, and provide an estimated time for completing the investigation.

At the conclusion of the investigation, the investigator shall set forth their findings in writing. If the investigator is someone other than the Title IX / EEO Coordinator, the investigator shall send a copy of the findings to the Title IX / EEO Coordinator.

The Title IX / EEO Coordinator will provide each party and the appropriate student services administrator or appointing authority with written notice of the investigative findings, subject to the following limitations. The complainant shall be informed in writing of the findings only to the extent that such findings directly related to the complainant’s allegations. The complainant may be notified generally that the matter has been referred for disciplinary action. The respondent shall be informed in writing of the findings and of actions taken or recommended to resolve the complaint and shall be notified of referrals for disciplinary action. Both the complainant and the respondent are entitled to review the investigative findings subject to any FERPA confidentiality requirements.

**Final Decision/Reconsideration:** Either the complainant or the respondent may seek reconsideration of the investigation findings. Requests for reconsideration shall be submitted in writing to the Title IX / EEO Coordinator within seven calendar days of receiving the investigation report. Requests must specify which portion of the findings should be reconsidered and the basis for reconsideration. If no request for reconsideration is received within seven calendar days, the findings become final. If a request for reconsideration is received, the Title IX / EEO Coordinator shall respond within 14 calendar days. The Title IX / EEO Coordinator shall either deny the request or, if the Title IX / EEO Coordinator determines that the request for reconsideration has merit, issue amended findings. Any amended findings are final and no further reconsideration is available.

**PUBLICATION OF ANTI-DISCRIMINATION POLICIES AND PROCEDURES**

The policies and procedures regarding complaints of discrimination and harassment shall be published and
distributed as determined by the president or president’s designee. Any person who believes he or she has been subjected to discrimination in violation of College policy will be provided a copy of these policies and procedures.

LIMITS TO AUTHORITY
Nothing in this procedure shall prevent the College President or designee from taking immediate disciplinary action in accordance with Peninsula College policies and procedures, and federal, state, and municipal rules and regulations.

NON-RETALIATION, INTIMIDATION AND COERCION
Retaliation by, for or against any participant (including complainant, respondent, witness, Title IX / EEO Coordinator, or investigator) is expressly prohibited. Retaliatory action of any kind taken against individuals as a result of seeking redress under the applicable procedures or serving as a witness in a subsequent investigation or any resulting disciplinary proceedings is prohibited and is conduct subject to discipline. Any person who thinks he/she has been the victim of retaliation should contact the Title IX / EEO Coordinator immediately.

CRIMINAL COMPLAINTS
Discriminatory or harassing conduct may also be, or occur in conjunction with, criminal conduct. Criminal complaints may be filed with the following law enforcement authorities:

City of Port Angeles Police Department
321 East 5th Street
Port Angeles, WA 98362
Phone: 360-452-4545
wa-portangeles.civicplus.com/288/Police-Department

City of Forks Police Department
500 East Division Street

Jefferson County Sheriff Department
79 Elkins Road
Port Hadlock, WA 98339
Phone: 360-385-3831
cojeffersonwa.us/172/Sheriff

The College will proceed with an investigation of harassment and discrimination complaints regardless of whether the underlying conduct is subject to civil or criminal prosecution.
**OTHER DISCRIMINATION COMPLAINT OPTIONS**

Discrimination complaints may also be filed with the following federal and state agencies:

- Washington State Human Rights Commission, [hum.wa.gov](http://hum.wa.gov)
- US Dept of Education Office for Civil Rights, [ed.gov/about/offices/list/ocr](http://ed.gov/about/offices/list/ocr)

**Drug and Alcohol Abuse Prevention**

Peninsula College is concerned about the safety and welfare of students, employees, and members of the community while they utilize college facilities and grounds. In the interest of providing and maintaining an environment free from crime, illicit drug use, and the abuse of alcohol and in compliance with the Drug-Free Schools and Communities Act Amendment of 1989 we have adopted and implemented a program to prevent the unlawful possession, use, or distribution of illicit drugs or abuse of alcohol by students and employees.

**Confidentiality of Student Records**

Peninsula College complies with the Family Educational Rights and Privacy Act of 1974 (FERPA) regarding confidentiality of student records and release of personally identifiable information.

In order to respect the privacy rights of individuals, only limited information about students can be released to individuals off campus without the express written permission of the student. Federal laws concerning the privacy rights of students and college policy provide the basis for these procedures. See the College website at pencol.edu for detailed information.

**Limitation of Liability**

The College's total liability for claims arising from a contractual relationship with the student in any way related to classes or programs shall be limited to the tuition and expenses paid by the student to the College for those classes or programs. In no event shall the College be liable for any special, indirect, incidental, or consequential damages, including but not limited to, loss of earnings or profits.

Course Descriptions

Accounting (ACCT/ACCT&)

ACCT& 201: Principles of Accounting I
Credits 5
Quarter Offered Fall
Emphasis on nature of accounting as a system of information for decision making. Specific topics include basic financial statements, the accounting cycle, forms of business organization, financial assets, inventories, and depreciation. This class may include students from multiple sections. (Elective)
Prerequisites
MATH 90 or AMATH 121 or concurrent enrollment
Course Outcomes
- Prepare and interpret financial statements for decision making in accordance with generally accepted accounting principles.
- Describe internal controls and their function in accounting.
- Analyze and record business transactions, adjusting entries, and closing entries throughout the accounting cycle.
- Compute and analyze the valuation and presentation of financial assets in the financial statements.
- Describe how the accounting equation helps to understand, analyze, and communicate the effects of business transactions and events in the financial statements.
- Explain and apply basic valuation theories of inventory.

ACCT& 202: Principles of Accounting II
Credits 5
Quarter Offered Winter
Study of accounting is continued through specific topics, including liabilities, stockholder’s equity, statement of cash flows, financial statement analysis, and global and management accounting. This class may include students from multiple sections. (Elective)
Prerequisites
2.0 or higher in ACCT& 201
Course Outcomes
- Define the opportunities and challenges associated with operating in a diverse and global business environment.
- Demonstrate how to report and analyze plant assets, liabilities, and owners’ equity transactions.
- Prepare, analyze, and evaluate a classified income statement.
- Prepare, analyze, and evaluate the changes in the corporate retained earnings.
- Prepare, analyze, and evaluate a statement of cash flows.
- Analyze comparative financial statements using problem solving and critical thinking skills using appropriate technical accounting knowledge.
- Explain and apply the three principles guiding the design of management accounting systems.

ACCT& 203: Principles of Accounting III
Credits 5
Quarter Offered Spring
Managerial concepts are explored through accounting systems, management reports, and special analysis for decision making; cost volume-profit analysis; incremental analysis; responsibilities accounting; operational and capital budgeting; and standard cost systems. This class may include students from multiple sections. (Elective)
Prerequisites
2.0 or higher in ACCT& 202
Course Outcomes
- Compare and contrast managerial accounting from financial accounting.
- Determine product costs using job order and process costing systems.
- Analyze, compute, and evaluate problems related to cost-volume-profit and incremental analysis.
- Prepare budget data and determine their use in planning and control.
- Evaluate business challenges and opportunities using managerial accounting concepts.
ACCT 101: Introduction to Accounting and Finance

Credits 5
Establish a foundation in accounting procedures within the traditional framework of a sole-proprietorship and explore the financial use of accounting information. Coverage of basic principles expanded by presenting partnership, corporation, and managerial accounting concepts. This class may include students from multiple sections.

ACCT 215: Quickbooks

Credits 5
Quarter Offered Winter
Learn the fundamentals of Quickbooks Pro, a popular general ledger software package for small and medium sized businesses. Coverage of vendors and customers transactions, inventory activities, bank transactions, financial reports, end of period procedures, payroll and other key accounting procedures. This class may include students from multiple sections.

Course Outcomes
- Record transactions for service and inventory businesses—from simple to complex—that simulate real-world occurrences.
- Prepare, analyze, customize, and create a variety of reports.
- Close an accounting period.
- Create a new company file.
- Customize QuickBooks to fit the needs of an individual company.
- Prepare a payroll in Quickbooks.
Addiction Studies (HSSA/HSSA&)

HSSA& 101: Introduction to Addictive Drugs
Credits 5
Quarter Offered Fall
Definitions of alcohol and other drug use and abuse; alcoholism and other addictions; history and types of chemical dependency; impact on individual, family, and society. This class may include students from multiple sections. (Elective)
Course Outcomes
- Define addiction as a disease in a whole-person (holistic) perspective.
- Discuss between various kinds of addiction.
- Identify basic facts regarding the impact of addiction on the individual, family and society.
- Report symptoms of addiction and identify those affected.
- Explain family dynamics/co-dependency concepts in regard to addiction.
- List various support systems for recovery.

HSSA 105: Phys/Pharm of Alcohol and Drugs
Credits 5
Quarter Offered Fall
Physical effects of alcohol and other drugs on the body. Designed to meet primary certification requirements for chemical dependency counseling. This class may include students from multiple sections.
Course Outcomes
- Report the actions of drugs on the body.
- Report drug classifications.
- Report the use of drugs throughout history.
- Define and explain co-occurring disorders.
- Describe MAT for opiate addictions.
- Report naloxone as an antidote for opiate overdose.

HSSA 115: Counseling I
Credits 4
Quarter Offered Winter
Familiarization with skills commonly used for individual and family counseling. Includes attending, paraphrasing, reflecting feelings, summarizing, probing, self-disclosure, interpreting, and confrontation. HSSA& 101 and HSSA 105 or permission of instructor is recommended. This class may include students from multiple sections.
Course Outcomes
- Identify eight basic counseling skills.
- Define the ten therapeutic counselor characteristics.
- Define therapeutic criteria of counseling environment.
- Identify traits of self-actualized counselor.
- Summarize the grief process.
- Demonstrate knowledge of counseling skills through utilization.

HSSA 116: Intervention in Chemical Dependency
Credits 2
Quarter Offered Fall
Introduction of objective team approach to confronting denial and presenting reality to chemically dependent, emphasizing skills commonly used for Johnson model intervention. Offered for continuing professional education. Required for ongoing counselor certification. This class may include students from multiple sections.
Course Outcomes
- Define intervention of the chemically dependent.
- Develop insight into intervention team approach.
- Report necessary intervention skills.
- Outline steps of intervention process.
- Identify intervention techniques learned.
**HSSA 135 : Family Treatment/CD I**

**Credits** 3  
**Quarter Offered** Spring

Exploration of dynamics of chemically dependent family during addiction and recovery. Includes therapy models useful in supporting individuals through recovery process and for restoring relationships within family. This class may include students from multiple sections.

**Course Outcomes**
- Define family as a system with emphasis on recovery process.
- Distinguish healthy/unhealthy family dynamics.
- Identify stages of family recovery.
- Explain abuse/abandonment in regard to the family system.
- List traits of adult children of alcoholics.
- Compare and contrast various treatment modalities for the chemically dependent family.

**HSSA 136 : Relapse Prevention**

**Credits** 3  
**Quarter Offered** Spring

Familiarization with symptoms, warning signs, and high-risk factors involved in relapse process, with emphasis on recovery, family-of-origin issues, relationships, self-care, and interdependence. This class may include students from multiple sections.

**Course Outcomes**
- Define relapse as a part of and process in regard to recovery.
- Identify the symptoms, warning signs, and high-risk factors involved in the relapse process.
- Evaluate stress and relapse.
- Review medication assisted treatments for alcohol and opiate use disorders.

**HSSA 140 : Group Counseling**

**Credits** 5  
**Quarter Offered** Spring

Theory and therapy models common to rehabilitation of chemically dependent through group process. HSSA& 101, HSSA 105 and HSSA 115 is recommended. This class may include students from multiple sections.

**Course Outcomes**
- Define stages of group process.
- Define group therapy.
- Apply awareness of Motivational Interviewing as a treatment modality.
- List therapy models for counseling the addicted population.
- Demonstrate dynamics of group facilitation.
- Compose personalized reflection of subject matter on group therapy model of choice.

**HSSA 145 : Teaching Skills for Counselors**

**Credits** 3  
**Quarter Offered** Spring

Facts about alcohol and other drug use and abuse and skills to impart these facts in a counseling environment. Includes physical effects and behavioral attitudes, family systems, health and safety, drinking and driving, treatment resources, and responsible decision making. Offered for continuing professional education; highly recommended as an elective. HSSA& 101 and HSSA 105 is recommended. This class may include students from multiple sections.

**Course Outcomes**
- Discuss insight into ADIS philosophy.
- Identify facts about alcohol and other drug use.
- Identify seven steps of effective decision-making.
- Develop curriculum planning and instructional skills.
- Demonstrate understanding of lesson plan development, classroom instruction and management.
- Demonstrate teaching methods used in ADIS environment.

**HSSA 150 : Case Management**

**Credits** 3  
**Quarter Offered** Winter
Chemical dependency case management and record keeping. Provides working knowledge of a system for up-to-date, accurate, and usable case files and records. This class may include students from multiple sections.

**Course Outcomes**
- Define case management in treating the chemically dependent.
- Identify components of chemical dependency record keeping.
- Recognize components with a chemical dependency biopsychosocial assessment.
- Outline a basic individual service treatment plan.
- Summarize appropriate case file management for chemical dependency treatment.
- Assimilate awareness of Washington Administrative Code (WAC) and DOH Counselor requirements.

**HSSA 155: Youth CD Counseling and Assessment**

**Credits** 3

Learn identifying signs and symptoms of teenage substance abuse, appropriate intervention, family dynamics, defense mechanisms and emotional honesty, treatment facilities, aftercare, and family's progress toward health. This class may include students from multiple sections.

**Course Outcomes**
- Interpret most updated strategies of DBHR in working with Chemically Dependent Youth.
- Explain a variety of techniques and evidenced based programs for prevention.
- Students will identify Risk Factors and Protective Factors in community, school and individual.
- Identify student role in social norms.
- Discuss Science Based Education, Prevention and Intervention.
- Explore Evidence Based Programs as opposed to Promising Programs.
- Distinguish practices that work best in counseling youth and their families.
- Identify obstacles in counseling youth.
- Create flexible solutions to these obstacles and put them into practice.
- Develop an opportunity to evaluate ethical values in Chemical Dependency Counseling.

**HSSA 160: Chemical Dependency and the Law**

**Credits** 3

**Quarter Offered** Winter

Understand State of Washington court procedures and laws pertaining to alcohol and drug related offenses, domestic violence, incapacitated persons and involuntary commitment, and deferred prosecution. This class may include students from multiple sections.

**Course Outcomes**
- Expose students to a variety of laws (RCW and WAC) through written materials, research and guest speakers.
- Students will explain in written and oral form how the Social Justice System works for their clients in the State of Washington.
- Students will understand how the Chemical Dependency Field relates to the community as a whole.
- Students will identify a minimum of five employment opportunities in the Chemical Dependency Field.
- Expose students to their role in the establishment of community values, state values and national values relating to Chemical Dependency Studies and Work.
- Develop a familiarity with the differences in State, Local Ordinances and Federal Laws.
- Develop Opportunities to re-evaluate community, person and ethical values in the Chemical Dependency Field.
- Develop an understanding of how laws evolve and can be changed.

**HSSA 165: Chemical Dependency Counseling & Ethics**

**Credits** 3

**Quarter Offered** Fall

Principles and rules of conduct of ethical standards essential for CD profession, including nondiscrimination, responsibility, competence, legal and moral standards, client welfare, confidentiality, client relationships, and interprofessional conduct. This class may include students from multiple sections.

**Prerequisites**
Instructor permission

**Course Outcomes**
- Define ethics in the counseling profession.
- Identify code of ethics & rules of conduct for the CD profession.
Apply understanding of counselor professional ethics.
List counselor ethical principles.
Develop awareness of burnout symptoms in a counseling environment.
Apply ethical criteria in an experiential setting.

**HSSA 172: Cultural Diversity**

**Credits** 3  
**Quarter Offered** Winter  
Knowledge and strategies needed to become more culturally sensitive. Focuses on integration of cultural competence in an AOD curriculum and development of effective prevention messages and treatment modalities within a cultural context while identifying ethnically challenging issues. This class may include students from multiple sections.

**Prerequisites**  
HSSA& 101 or instructor permission

**Course Outcomes**  
- Define cultural diversity in a therapeutic environment.  
- Identify cultural differences in a treatment setting.  
- Report basic facts regarding cultural competency.  
- Develop awareness of ethnically-challenging issues in a helping environment.  
- Distinguish between various cultural needs within a treatment milieu.  
- Summarize prevention modalities in a cultural context.

**HSSA 190: DBHR HIV/AIDS; Brief Risk, Airborne Pathogens**

**Credits** 1  
**Quarter Offered** Fall  
Education about HIV/AIDS, focusing on prevention, transmission of virus, health, community, and self-awareness. This class may include students from multiple sections.

**Prerequisites**  
Instructor permission

**Course Outcomes**  
- Identify AIDS and Hepatitis C as diseases.  
- Interpret prevention and treatment of these public health issues.  
- Demonstrate confidentiality regarding speaker.  
- Show awareness of legal and ethical issues identified with these diseases.

**HSSA 200: Internship**

**Credits** 5  
Five credits awarded to students presenting documentation of 250 hours of supervised counseling training with agency approved by Division of Alcohol and Substance Abuse. Students must complete 2,500 total hours of supervised counseling training to obtain professional qualifications to practice as chemical dependency counselors. Instructor permission required. This class may include students from multiple sections.

**Prerequisites**  
Instructor permission; HSSA& 101, HSSA 105 and HSSA 115

**Course Outcomes**  
- Choose agency for CDPT documentation of hours.  
- Demonstrate professional competency by completion of documented hours.  
- Utilize counseling skills in a therapeutic environment.  
- Assess areas of learning in helper role.  
- Compose group activity for observation.

**HSSA 201: Pathological Gambling & Other Addictions**

**Credits** 3  
**Quarter Offered** Winter  
A comprehensive overview of assessment and treatment of the pathological gambler. Gambling specialist awareness addressed; also a focus on other addictions and compulsive behaviors. This class may include students from multiple sections.

**Course Outcomes**  
- Identify similarities to and differences from substance use addictions.
Report profiles of the different gambler types.
Report impact of problem gambling on individual, families and society.
Recognize co-existing conditions and addictions requiring treatment or referral.
List current methods of treatment.
Explain relapse factors for problem gamblers.
Identify methods of assessment of problem gambling.

HSSA 215 : Counseling II
Credits 3
Quarter Offered Winter
Emphasis on learning to deal with issues specific to the counselor’s personal challenges. Offered for continuing professional education. Recommended for ongoing counselor certification. This class may include students from multiple sections.
Prerequisites HSSA 115
Course Outcomes
- Identify categories of self-defeating behavior.
- Gain personal insight into counselor role.
- Assess counselor professional readiness.
- Develop awareness of stress management techniques.
- Apply holistic awareness in counselor role.
- Summarize effective self-care plan.

HSSA 232 : Mental Health Issues-CDP
Credits 3
Quarter Offered Fall
Familiarizes chemical dependency counselors with language and basic concepts of mental health disorders as they present in the dually diagnosed patient. Provides opportunity to assess and plan interventions for such patients involving introduction to motivational interviewing. This class may include students from multiple sections.
Prerequisites HSSA & 101 and HSSA 150
Course Outcomes
Orientation and skill building for counseling clients who have co-occurring mental health and substance use disorders. The information offered will support counselors in providing assessment, treatment, and referral services. It will prepare students to collaborate with mental health professionals. This course is offered for continuing professional education and is suggested for initial counselor certification. This course provides an overview of the field of addiction counseling and the impact of addiction on child, adolescent, and adult populations. The course will summarize key points drawn from the following areas: the American experience with addiction and recovery, theoretical explanations for understanding addiction and mental health, basic neuroscience, and assessment and treatment issues specific to counseling individuals with co-occurring disorders. Additional areas include prevention, intervention, and treatment strategies and relevant issues pertaining to social justice and diversity.

HSSA 250 : Case Management for Professionals
Credits 3
Quarter Offered Spring
Exploration/emphasis on the application of the ASAM criteria in chemical dependency case management and record keeping. This class may include students from multiple sections.
Prerequisites HSSA 150 and instructor permission
Course Outcomes
- Manage the treatment of an entire patient case, including the following: Assessment and Diagnosis; Admission to treatment; Treatment Planning Process; Plan Implementation; and Progress Evaluation and Discharge.
- Complete a patient chart reflecting entire process for personal referrals.
- Define the functions and responsibilities of a Case Manager in the treatment setting.
Implement the Case Management role, including advocacy and referral functions as a component in client care and record keeping.
Identify resources in their respective community through the development of a functional directory to include sources and contact information.

**HSSA 280 : Peer Counseling**

**Credits 5**  
**Quarter Offered** Winter  
Students will learn concepts of recovery, resilience, and practice of Certified Peer Counseling. Develop interpersonal skills that emphasize healthy attachment, defusing transference, self-advocacy, client assessment planning, goal setting for self and peers, and the impact of values and culture on life transitions. This course is designed to meet the State and Federal standards for a Peer Recovery Specialist. This class may include students from multiple sections.

**Course Outcomes**  
Recall concepts of recovery, resilience and practice of Certified Peer Counselor.  
Demonstrate interpersonal skills for connecting with a client.  
Develop a community resource and referral manual for potential clients.  
Develop an awareness of self-advocacy and wellness for a peer counselor career path and demonstrate by developing a burnout prevention plan.  
List the steps for a client data and assessment plan.  
Demonstrate intervention skills.  
Identify components of non-judgmental and non-adversarial interactions.  
Demonstrate skills in goal setting in a written format provided in the training manual.  
Demonstrate strategies for goal setting based on standards from the Department of Behavioral Health and Recovery.  
Describe the implications of the effect of values and culture on life transitions.

**HSSA 290 : Medical Aspects of Addiction**

**Credits 5**  
**Quarter Offered** Spring  
This class teaches students about medical complications of substance abuse including alcohol, tobacco, cocaine, amphetamines, opiates, cannabis and benzodiazepines. Class emphasizes addiction, overdose and withdrawal and how chemicals affect the body. This class may include students from multiple sections.

**Course Outcomes**  
Define the controlled substance Act and criteria for placing drugs into it  
Discuss the pros and cons of MAT  
Define Medically Assisted Treatment (MAT) for opiate dependency and naloxone for opiate overdose  
Define major co morbidities of drug abuse and addiction  
Differentiate between clients who need medical referrals with clients not in need of medical referral  
Define addiction as a disease  
List and discuss the most common medical complications and sequelae of chemical (substance abuse)  
Discuss whether Marijuana should be a legal drug  
List diseases resulting from sharing needles
Administrative Office Systems (AOS)

AOS 101: Digital Literacy

Credits 5
Quarter Offered Fall
Course content focuses on what skills are needed to be successful digital citizens in college and beyond. Students use information and communication technologies to find, evaluate, create and communicate information. Interactive training and skill-based assessments are completed in a virtual environment; projects are based on real-world business situations. Touch keyboarding skills is recommended. This class may include students from multiple sections.

Course Outcomes
- Use cognitive and technical skills to find and evaluate digital technologies.
- Explain the effect of digitization on intellectual property, freedom of speech, privacy, and ethics.
- Describe the processes used to connect and communicate online.
- Describe computing components, capabilities, storage, and operating systems.
- Describe the transmission process of wired and wireless communication.
- Analyze the personal and global effect of current and emerging technologies.

AOS 102: Windows Computing Overview

Credits 1
Quarter Offered Fall, Winter, Spring
Introduces the basic elements and functions of computer hardware and operating systems, including information on managing files, updating your PC, online personal safety and security, and an introduction to common office application features. This class may include students from multiple sections. (Formerly CAT 116)

Course Outcomes
- Recognize standard computer hardware, peripheral devices, ports, and connectors.
- Open, login, and navigate Windows 10 features including the Start Menu, File Explorer, and Desktop.
- Demonstrate an understanding of basic operating systems, and Windows concepts and terms.
- Use and customize Start Menu, Taskbar, and Desktop.
- Open, switch between, and close apps/applications.
- Identify and use dialog boxes.
- Create a screenshot and paste it into a document.
- Create a simple text document and save it to a specific location.
- Develop file management strategies.
- Use File Explorer to view, navigate, organize, name/rename, delete, and filter folders and files.
- Identify file locations and file paths.
- Compress and extract files.
- Describe how to identify and connect to a wireless network.
- Identify potential online security risks and Windows Security measure.

AOS 103: Word Basics

Credits 1
Quarter Offered Fall, Winter, Spring
A short introduction to Microsoft Word (word processing) basics. Keyboarding skills are recommended. This class may include students from multiple sections. (Formerly CAT 117)

Course Outcomes
- Create new and edit existing documents in Word.
- Save an existing document as a revised document under a new name.
- Use Word Ribbon tools, tabs, groups, dialog box launchers, backstage view, and contextual tabs to edit and format a document.
- Recognize and apply font formats, paragraph formats, page formats, and file formats.
- Insert and modify a picture in a document.
- Create and manage document comments.
- Insert and edit document controls for headers/footers, citations, and bibliographies.
- Prepare a document for sharing and printing.
AOS 104 : Excel Basics  
Credits 1  
Quarter Offered  Fall, Winter, Spring  
A short introduction to Microsoft Excel (spreadsheet) basics. Keyboarding skills are recommended. This class may include students from multiple sections. (Formerly CAT 118)  
Course Outcomes  
Create new and edit existing spreadsheet workbooks in Excel.  
Save an existing workbook as a revised workbook under a new name.  
Use Excel Ribbon tools, tabs, groups, dialog box launchers, backstage view, and contextual tabs to edit, manage, and format cells.  
Identify, enter, and edit text, values, formulas, and functions.  
Select, move, insert, and delete cells.  
Demonstrate an understanding of cell range references.  
Apply and modify cell formats, including dates, currency, percentages, alignments, merge, borders & shading, and conditional formats.  
Create calculations in a cell by using cell references, static values, simple functions, order of operations, and proper syntax.  
Use Relative and Absolute references for copied formulas.  
Use Formula View to error-check and edit formulas.  
Organize and modify worksheets within a workbook.  
Prepare a workbook for sharing and printing.  

AOS 105 : Introduction to Microsoft Word  
Credits 5  
Quarter Offered  Fall, Spring, Summer  
Develop beginning through intermediate word processing skills in Microsoft Word and associated technologies. Create, edit, format documents and tables; use themes and building blocks, illustrate documents with graphics, merge data sources and documents. Interactive training and skill-based assessments are completed in a virtual environment; projects are based on real-world business situations. Integration with cloud computing. Touch keyboarding skills is recommended. This class may include students from multiple sections.  
Course Outcomes  
Apply critical thinking skills to complete real-world business projects.  
Combine technical skills to complete independent core concept reviews.  
Create, edit, and format documents of varying complexity.  
Create and format tables.  
Illustrate documents with graphics.  
Customize themes, building blocks, and style sets.  
Create a data source and merge it with Word documents.  
Interact and share information in the Cloud.  

AOS 106 : Introduction to Microsoft Excel  
Credits 5  
Quarter Offered  Fall, Winter, Spring, Summer  
Develop beginning through intermediate spreadsheet skills in Microsoft Excel and associated technologies. Create, edit, and format spreadsheets; analyze data using formulas, manage workbook data, create and analyze table data. Interactive training and skill-based assessments are completed in a virtual environment; projects are based on real-world business situations. Integration with cloud computing. Touch keyboarding skills is recommended. This class may include students from multiple sections.  
Course Outcomes  
Apply critical thinking skills to complete real-world projects.  
Combine technical skills to complete independent core concept reviews.  
Demonstrate an understanding of the functionality and program design of Spreadsheets.  
Format a worksheet.  
Create charts based on accurate data.  
Analyze data using formulas.  
Manage workbook data.  
Create tables and analyze table data.  
Interact and share information in the Cloud.
AOS 107: Microsoft Access Databases

Credits 5
Quarter Offered Spring

Develop beginning through intermediate relational database management skills in Microsoft Access and associated technologies. Create tables, relationships, forms, and reports. Interactive training and skill-based assessments are completed in a virtual environment; projects are based on real-world business situations. Integration with cloud computing. Touch keyboarding skills is recommended. This class may include students from multiple sections.

Course Outcomes
- Apply critical thinking skills to complete real-world projects.
- Combine technical skills to complete independent core concept reviews.
- Demonstrate an understanding of relational databases.
- Create and modify tables.
- Create relationships between tables.
- Build queries, forms, and reports.
- Analyze and filter data.
- Use graphical tools and elements.

AOS 108: Introduction to Microsoft Outlook

Credits 2
Quarter Offered Fall

An introduction to Microsoft Outlook, an information management software. Learn how to send and receive emails, store personal and professional contacts, update your calendar, monitor tasks, and share files. This class may include students from multiple sections.

Course Outcomes
- Set up an Outlook email account.
- Compose, format, and respond to email messages.
- Configure the Outlook calendar and schedule meetings and events.
- Create contacts and contact groups.
- Create and manage tasks.
- Customize email messages.

AOS 109: Introduction to Microsoft Powerpoint

Credits 2
Quarter Offered Winter, Spring

Basics of Microsoft PowerPoint, including creating and delivering a presentation, design templates, text layout styles, master slides, using clip art, drawing objects, animation to enhance presentations, working with delivery options, toolbar options, and editing tools. Keyboarding and file management skills are recommended. This class may include students from multiple sections. (Formerly CAT 114)

Course Outcomes
- Creating and managing presentations
- Formatting textual content
- Designing slides, using a slide master
- Formatting illustrations and tables
- Formatting pictures and other media
- Applying animations and transitions to PowerPoint presentations

AOS 110: Medical Terminology I

Credits 5
Quarter Offered Fall, Spring

Systems approach to the study of selected roots, prefixes, and suffixes; principles of word building; study of diagnostic, operative, and symptomatic terms of body systems. Emphasis on accurate spelling and pronunciation of all medical terms. Strong component of the course is related to common medical abbreviations, selected eponyms, clinical laboratory procedures, and radiology procedures with associated terminology for each body system. This class may include students from multiple sections.

Course Outcomes
- Identify and apply the rules of building medical terms.
- Spell and pronounce medical terms correctly.
Explore and distinguish medical terminology as it relates to the different body systems.
Explore common terms associated with pathological conditions and procedures by body system.
List common medical abbreviations associated with different body systems.

AOS 111 : Medical Terminology II
Credits 3  
Quarter Offered  Winter  
Continued medical terminology on body systems emphasizing clinical applications. Investigation of diagnostic and therapeutic procedures, advanced abbreviations and symbology, and systemic diseases and treatment modalities. Ability to read, understand, and interpret various types of medical reports and physician-generated documentation will be stressed and required. This class may include students from multiple sections.

Course Outcomes
- Continue exploration of medical terminology as it relates to the different body systems.
- Apply prior knowledge of medical terminology to read, comprehend, and interpret different practical applications of medical terminology.
- Spell and pronounce medical terms correctly.
- Explore common medical terms associated with pathological conditions and procedures affecting different body systems.
- List and distinguish common abbreviations associated with different body systems.

AOS 112 : Microsoft PowerPoint Comprehensive
Credits 5  
Quarter Offered  Spring  
Create mixed media presentations using Microsoft PowerPoint and associated technologies. Create and share interactive presentations online with voice, video, inking and screen recording. Interactive training and skill-based assessments are completed in a virtual environment; projects are based on real-world business situations. Integration with cloud computing. Touch keyboarding skills is recommended. This class may include students from multiple sections.

Course Outcomes
- Apply critical thinking skills to complete real-world projects.
- Combine technical skills to complete independent core concept reviews.
- Create, modify, and customize a presentation.
- Enhance a presentation with graphical elements, media and animation.
- Create and format information graphics.
- Collaborate on delivery of a presentation.
- Customize templates and masters.

AOS 115 : Google Workspace
Credits 3  
Quarter Offered  Winter  
Learn how to use Google Workspace (formerly G-Suite), a cloud-based collaboration application for business. Use business email, video conferencing, cloud storage, and file sharing. Collaborate with Google Docs, Sheets, and Slides, Google Calendar, store files in Google Drive. This class may include students from multiple sections.

Course Outcomes
- Create and edit web-based documents
- Set up a business email
- Schedule appointments and events
- Create and collaborate with online spreadsheets
- Create online presentations
- Store, access, and share files online
- Create and share online forms and surveys
- Create a business website

AOS 116 : Virtual Meetings
Credits 3  
Quarter Offered  Winter
Set up, schedule, customize, and lead virtual meetings with Zoom and Microsoft Teams with admin tools. Manage waiting rooms and break out rooms while collaborating in real-time. Monitor chat, share files, calendars, links, and video. Create and administer polls, record meetings, save chat files, and manage security settings. Students will create and complete projects remotely. This class may include students from multiple sections.

**Course Outcomes**
- Customize and manage admin tools and settings for virtual meetings
- Create and administer polls
- Archive chat and recorded meetings
- Set up and customize your team
- Share calendars to schedule meetings
- Use chat instead of email conversations
- Securely edit files at the same time
- Join and participate in group meetings
- Create, edit, and complete group projects
- Present group project(s)

**AOS 117 : Surveys and Data Reports**

**Credits** 2

**Quarter Offered** Winter

Learn the fundamentals of survey design, distribution, and data collection with common survey tools used by businesses to collect information from a specific population. Students will develop a questionnaire, collect responses, and present results in tables and charts. This class may include students from multiple sections.

**Course Outcomes**
- Develop a survey with various question type such as Likert, open ended, and multiple choice.
- Administer a survey to a group.
- Collect survey results and present in table and graphical formats.

**AOS 120 : Digital Forms**

**Credits** 2

**Quarter Offered** Spring

Create digital business forms with form fields that people can fill and sign from any device. Create custom knowledge checks, surveys, polls, questionnaires, and registrations with Microsoft Forms. Fill out PDF files, create new forms, and manage documents online with Adobe Forms. This class may include students from multiple sections.

**Course Outcomes**
- Create interactive digital forms
- Publish the forms
- Collect data from forms
- Analyze form results
- Track e-signature status
- View audit trails for transactions

**AOS 135 : Writing Essentials**

**Credits** 5

**Quarter Offered** Winter

Develop writing skills with a step-by-step approach to identify and use parts of speech, punctuation, capitalization, and numbers correctly; write effective sentences and paragraphs. Results of digital self-diagnostic exercises create individualized study plans and learning paths. Touch keyboarding skills is recommended. This class may include students from multiple sections.

**Course Outcomes**
- Identify parts of speech and how they function in sentences.
- Write complete sentences avoiding fragments, comma splices, and run-ons.
- Use nouns, pronouns, verbs, adjectives, adverbs, conjunctions, prepositions, and interjections correctly in oral and written communication.
- Demonstrate realistic applications of current usage and style in today’s workplace.
- Demonstrate improved vocabulary, spelling, and editing skills.
- Recognize and create professional business messages that demonstrate correct formats and ideas expressed in clear, concise, and correct English.
AOS 170: Business Communications

Credits 5
Quarter Offered Spring

Apply writing skills to a variety of technical and business applications. Exercises and activities introduce the latest business communication practices. Digital coverage of social media and communication; self-recorded videos demonstrate student verbal communication skills. Touch keyboarding skills is recommended. This class may include students from multiple sections.

Course Outcomes

- Develop or improve the ability to use clear, concise, and grammatically correct language.
- Use appropriate formats in business writing.
- Plan, organize, and revise business messages.
- Write short workplace messages such as email, memos, messaging, blogs, and social networking.
- Format and create a writing plan for common business letters (positive, persuasive, direct claims, complaints, and adjustments).
- Demonstrate an understanding of report writing styles, formatting, purpose, and strategies.
- Develop job search strategies and write employment documents.
- Identify the types of job interviews, questioning strategies, and follow-up.

AOS 205: Advanced Microsoft Word

Credits 5
Quarter Offered Fall

Develop advanced word processing skills in Microsoft Word and associated technologies. Create multipage and research papers; apply automated functions; collaborate and share documents, build electronic forms, apply advanced graphical tools. Interactive training and skill-based assessments are completed in a virtual environment; projects are based on real-world business situations. Integration with cloud computing. This class may include students from multiple sections.

Prerequisites

AOS 105 or CAT 130

Course Outcomes

- Apply critical thinking skills to complete real-world projects.
- Combine technical skills to complete independent core concept reviews.
- Format multi-page research reports.
- Create and modify styles, templates, and themes.
- Integrate Word with other software programs.
- Create and format advanced graphics.
- Build and complete interactive forms.
- Customize Word functions and display.
- Interact and share information in the Cloud.

AOS 206: Advanced Microsoft Excel

Credits 5
Quarter Offered Winter

Develop advanced spreadsheet skills in Microsoft Excel and associated technologies. Use advanced functions and formulas; enhance charts, use “what-if” analysis, analyze data with PivotTables, exchange data with other programs, share files and incorporate web content, and program with XML. Interactive training and skill-based assessments are completed in a virtual environment; projects are based on real-world business situations. Integration with cloud computing. This class may include students from multiple sections.

Prerequisites

AOS 106 or CAT 140 and MATH 90 or AMATH 121 or concurrent enrollment

Course Outcomes

- Apply critical thinking skills to complete real-world business projects.
- Combine technical skills to complete independent core concept reviews.
- Create workbooks with advanced formatting and mathematical functions.
- Analyze data with PivotTables.
- Export data into other file formats.
- Customize Excel and advanced worksheet management.
- Write VBA code to automate repetitious tasks.
- Interact and share information in the Cloud.
AOS 212 : Advanced Applications of Microsoft 365

Credits 5
Quarter Offered Spring

Advanced applications of word processing, spreadsheets, presentations, and databases. Project-based application of advanced skills in an integrated, comprehensive business practice set of problems. Apply concepts and skills to create solutions to problems using Word, PowerPoint, Excel and Access. Interactive training and skill-based assessments are completed in a virtual environment; projects are based on real-world business situations. Integration with cloud computing. AOS 205 and AOS 206 is recommended. This class may include students from multiple sections.

Prerequisites AOS 105, AOS 106, and AOS 107

Course Outcomes
- Apply critical thinking skills to complete comprehensive business projects.
- Combine technical skills to complete independent core concept reviews.
- Apply prior learning to advanced applications of Office 365.
- Create and integrate documents, presentations, workbooks, and databases.
- Interact and share information in the Cloud.

AOS 214 : Office Procedures and Technology

Credits 5
Quarter Offered Winter
(Formerly AOS 210) Use current technologies to complete administrative tasks in a professional office environment. Plan and write effective business correspondence. Plan and present oral office communications. Create and process reports; apply records management procedures; plan onsite and online business meetings; make business travel arrangement. Research career options, market trends, job duties and earnings. Write targeted and focused employment documents. AOS 205 and AOS 206 is recommended. This class may include students from multiple sections.

Prerequisites AOS 105, AOS 106, and AOS 107

Course Outcomes
- Complete administrative activities in a realistic office environment.
- Plan and write effective business correspondence.
- Plan and present oral office communications.
- Create and process financial reports.
- Manage physical and electronic records.
- Plan electronic and on-site business meetings.
- Make business travel arrangements.
- Research career options, market trends, job duties, and earnings.
- Write targeted and focused employment documents.

AOS 260 : Internship

Credits 1 -5

Internship in a workplace setting of the student’s choice, based on needs and interests. Thirty-three hours per credit. This class may include students from multiple sections.

Prerequisites Instructor permission

Course Outcomes
- Participate in a structured work experience related to the program of study and/or career goal.

AOS 299 : Integrated Study-Honors

Credits 2

In this capstone honors course, students will complete a project relevant to their career pathway and program. The project will integrate at least two Business and IT programs (Business Administration, Administrative Office Systems, Multimedia Communications, Cybersecurity & Computer Forensics, or Information Technology) to provide breadth and relevance to the project. This class may include students from multiple sections.

Prerequisites
Completion of 60 credits in the BUS/IT program of study with a GPA of 3.5 or higher; and completion of the English course required in the BUS/IT program of study

**Course Outcomes**
- Complete a project relevant to learning pathway and program.
- Integrate Business and IT programs to provide breadth and relevance to the project.
American Sign Language (ASL&)

**ASL& 121 : American Sign Language I**

**Credits** 5  
**Quarter Offered** Occasionally  
An introductory course focusing on expressive and receptive language skills, covering the beginning fundamental principles of American Sign Language (ASL). Introduces basic information and Deaf history, the Deaf community, and Deaf culture. This class may include students from multiple sections. (Elective)  

**Course Outcomes**  
Demonstrate the basic expressive and receptive functions in ASL.  
Demonstrate the knowledge of essential basic vocabulary to the specific situations.  
Demonstrate the expressive basic skills of narrating such as telling or summarizing short stories, utilizing ASL grammatical features.  
Demonstrate proper use of particular language functions (responding to questions or statements appropriately, commanding, requesting, agreeing, etc.) and responds appropriately when conversation partner uses these functions.  
Identify the behaviors appropriate to Deaf culture through social and language functions.

**ASL& 122 : American Sign Language II**

**Credits** 5  
**Quarter Offered** Occasionally  
Continued study of ASL focused on expanding vocabulary and grammar with an emphasis on conversation and story telling. Further expansion of knowledge of the Deaf culture is also included. This class may include students from multiple sections. (Elective)  

**Prerequisites**  
Completion of **ASL& 121** with a 2.0 or higher, or instructor permission

**Course Outcomes**  
Demonstrate the knowledge of essential intermediate vocabulary to the specific situations.  
Demonstrate the expressive intermediate skills of dialogues, short narratives and stories utilizing ASL grammatical features.  
Demonstrate proper use of particular language functions (responding to questions or statements appropriately, commanding, requesting, agreeing, etc.) and responds appropriately when conversation partner uses these functions.  
Identify the behaviors appropriate to Deaf culture through social and language functions.

**ASL& 123 : American Sign Language III**

**Credits** 5  
**Quarter Offered** Occasionally  
Expanded study of ASL with emphasis on conversation skills and story telling; continued expansion of knowledge of Deaf culture and Deaf community. This class may include students from multiple sections. (Humanities, Elective)  

**Prerequisites**  
Completion of **ASL& 122** with a 2.0 or higher, or instructor permission

**Course Outcomes**  
Demonstrate the knowledge of essential intermediate to advanced vocabulary to specific situations.  
Demonstrate the expressive and receptive intermediate to advanced skills of dialogues and short narratives/stories, utilizing ASL grammatical features.  
Demonstrate proper use of particular language functions (responding to questions or statements appropriately, commanding, requesting, agreeing, etc.) and responds appropriately when conversation partner uses these functions.  
Identify the behaviors appropriate to Deaf culture through social and language functions.
Anthropology (ANTH/ANTH&)

ANTH& 100: Survey of Anthropology

Credits 5
Quarter Offered Fall (even year)
Introduction for nonmajors to study of humans as biological and cultural beings. Includes surveys of archaeology and physical, cultural, and linguistic anthropology to examine human biological and cultural evolution, culture, and cultural systems. This class may include students from multiple sections. (Social Sciences, Elective)

Prerequisites
Eligibility for or completion of ENGL& 101

Course Outcomes
What is anthropology? Lectures and readings will survey the four fields of anthropology: physical anthropology, ethnology, archaeology, and linguistic anthropology.
What do anthropologists do? Anthropologists will be discussed as social scientists--their methods, areas of interest or study, and how they gather data;
What is the theoretical basis of anthropology as a social science? An understanding of the concept of culture will be developed, including its nature, dynamics, and how it can be used to understand humankind, wherever and whenever it has been encountered;
What kind of information do anthropologists use and produce? A body of factual information about selected cultures around the world and throughout human history will be developed in the class.

ANTH& 204: Introduction to Archaeology

Credits 5
Quarter Offered Spring
This course introduces students to the key concepts and methods utilized by archaeologists in the excavation, analysis, and interpretation of a variety of material evidence left by ancient societies and cultures. Students will engage in a series of practical exercises (labs) to gain hands-on experience with a variety of artifacts and techniques commonly utilized within the discipline. This class may include students from multiple sections. (Social Sciences, Elective)

Prerequisites
ENGL& 101 or concurrent enrollment

Course Outcomes
Characterize and explain the main goals, principles, theories, and scientific methods utilized in archaeology. Describe the importance of archaeology in the understanding of ancient and modern societies. Demonstrate an understanding of the ethical and legal issues surrounding archaeological excavations. Describe and evaluate the strengths, weaknesses, and practical limitations of the various excavation techniques (invasive and non-invasive) commonly utilized within the field of archaeology. Illustrate understanding of the intersection of history and anthropology as each relates to the study of archaeology. Explain the importance of laws governing the protection, collection, and preservation of historic and cultural artifacts.

ANTH& 205: Biological Anthropology

Credits 5
A survey of humankind from a biological perspective. Includes human evolution and variation, hominid phylogeny and taxonomic theory, and the interaction between human biology, behavior, and culture. This class may include students from multiple sections. (Natural Sciences, Elective)

Prerequisites
ENGL& 101 or instructor permission

Course Outcomes
Human osteology
Scientific methods for studying human evolution including methods for data recovery, dating techniques, and basic analytical techniques
The place of humankind in the animal world including taxonomic theory and primate taxonomy
The biological development of humans over time including evolutionary forces, fossil markers, and the interactions with cultural evolution
Biological adaptations and variation in human populations

**ANTH& 206 : Cultural Anthropology**

**Credits** 5  
**Quarter Offered** Spring (even year)

Introduction to study of recent cultures and societies. Focus on development of anthropological thought, language, culture, and broad patterns of cultural behavior. Includes cross-cultural perspectives on belief systems, economic behavior, family, kinship, and sociopolitical structures. This class may include students from multiple sections. (Social Sciences, Elective)

**Prerequisites**
Eligibility for or completion of **ENGL& 101**

**Course Outcomes**
An orientation in cultural anthropology as an academic discipline;  
basic information on culture, cultures, and cultural behavior from an anthropological perspective; and a sense of culture, how culture shapes and patterns your every act, thought, and interaction.

What is cultural anthropology?
Lectures and readings will place cultural anthropology within anthropology as a discipline. In addition, an understanding of the culture as a concept will be developed, exploring its nature, dynamics, and how it unifies humankind as well as creates its diversity.

What do cultural anthropologists do?
Cultural anthropology will be discussed as social science; the discussion will include their methods, areas of interest and study, and how they gather and analyze their data.

What is the theoretical basis of cultural anthropology as a social science?
A history of cultural anthropology and ethnological thought will be presented with an emphasis of the major perspectives and thinkers in the field.

What kinds of information do cultural anthropologists use and produce?
A body of factual information about selected cultures around the world will be developed in the class.

**ANTH& 210 : Indians of North America**

**Credits** 5

Provides a general view of the variations in the lifeways of the Native Americans up to current times. Major Native American culture areas are visited and discussed in a broad comparative context. We examine current indigenous and scientific thoughts about the origins, development and variation of North American Native culture areas. We also examine current issues and legal contexts, with a particular focus on cultural resource management (CRM) and the laws applied throughout North American and their continuing applications in attempts to protect cultural resources. This class may include students from multiple sections. (Elective)

**Course Outcomes**
Describe general cultural and environmental characteristics of the Native American culture areas of North America,  
Describe how social scientist have described the languages, human biology and archaeological heritage of the people in each of the Native American culture areas,  
Recognize the indigenous and scientific views of ancient development of Native American societies in each of the culture areas  
Explain the historical cross-cultural contact period that set the stage for treaties and efforts by the U.S., Canada and Mexico to acculturate Native Americans into their culture,  
Describe social and political impact of European contact in North America,  
Discuss the shifts in U.S. government policy toward Native Americans: “civilizing” missions, removal policy, Dawes Act, Reorganization Act, termination and relocation policy, self-determination policy, and current trends,  
Articulate the impact of recent CRM laws: Archaeological Resource Protection Act (ARPA), American Indian Religious Freedoms Act (AIRFA), Native American Graves and Repatriation Act (NAGPRA), establishment of Tribal Historic Preservation Officers (THPO) and others,  
Analyze perspectives on the history of anthropological research in Native North America,  
Analyze contemporary issues in Native North America, including development of future fishing, sea mammal hunting, land mammal hunting, gathering, logging and gaming.
ANTH 234 : Religion & Culture  
**Credits** 5  
**Quarter Offered** Winter (even year)  
A global introduction to the religions of the world from a broad comparative perspective. Students examine the development and aspects of various religions (indigenous, Islam, Judaism, Buddhism, Hinduism, Christianity, and others). The relationship between religion and the social and cultural context are explored, especially in relation to nationalism, politics and globalization. This class may include students from multiple sections. (Elective)  
**Course Outcomes**  
- Evaluate religion using academic methods, such as those used in anthropology, comparative religion, and/or religious studies.  
- Describe and compare the doctrines, institutional structures, and ethical systems of a sample of the major world religions (e.g., primal religions, Hinduism, Buddhism, Judaism, Christianity, Islam, Chinese Religions, and/or others) while emphasizing the development of world religions and their subdivisions.  
- Analyze the various media (e.g., texts, music, ritual, symbolism and myth, architecture, etc.) through which religious knowledge and belief are expressed.  
- Explore the interplay between religious belief systems and religious practice.  
- Evaluate relationships between religion and the social/cultural context, especially in relation to nationalism, politics, and globalization.  
- Students will demonstrate through oral and written communications between their peers and professor, tolerance, appreciation, and open-mindedness towards religious traditions that are not their own.  
- Students will be able to contrast (1) orthopraxy with orthodoxy, (2) substance ontology with a process ontology, and (3) theistic with non-theistic conceptions of ultimate reality and then illustrate each with a few relevant examples.

ANTH 212 : The Archaeology of Death and Burial  
**Credits** 5  
**Quarter Offered** Winter  
This course examines a variety of burial practices found throughout the Ancient Near East and Mediterranean. Students will examine the similarities and differences in various burial practices and related religious beliefs not only across regions but also time periods. This course explores burial practices beginning in Late Neolithic through Early Medieval Period (4000 BCE thru 600 CE). This class may include students from multiple sections. (Elective)  
**Prerequisites** ENGL 101, ANTH 204 or ANTH 206, or instructor permission  
**Course Outcomes**  
- Explain a broad-range of archeological approaches, techniques, and theoretical models which are utilized in the excavation, analysis, and interpretation of a variety of evidence left by ancient societies of the Mediterranean, ANE and Europe (c. 4000 thru 600 CE).  
- Differentiate common burial typologies (cremation, inhumation, pit, urn, tomb, etc.).  
- Describe the possible relationship(s) between burial practices and the creation of monumental structures.  
- Explain common features of inhumation burials, such as positioning and the inclusion of grave goods.  
- Demonstrate the role votive objects played in the veneration of ancestral spirits (found in the post-burial deposits).  
- Explain the necessity of culturally-sensitive excavation and removal practices involving human remains within the fields of anthropology and archaeology.  
- Conduct research that utilizes methodologies commonly associated with anthropology and archaeology.

ANTH 220 : Pacific Northwest Coast Peoples- Past & Present  
**Credits** 5  
Examines current indigenous and scientific thoughts about the origins, development and variation of Pacific Northwest cultures. We consider at least 12,000 years of cultural history in the Northwest Coast region, leading to one of the culturally most complex maritime societies to have existed into the contemporary times. Pacific Northwest Coast Peoples, rich in culture, tradition and with an extensive knowledge of the environment they occupy, are recorded with mile-long villages containing as many as 1,000 inhabitants, monumental construction in homes, canoes and art, and highly complex societies, consisting of nobles, commoners and slaves. We will discuss how these cultures shape modern life throughout this region today. This class may include students from multiple sections. (Elective)  
**Course Outcomes**
Characterize the general and culturally significant environmental features of the Northwest Coast of North America,
Understand how social scientists have described the languages, human biology and archaeological heritage of the people in this region,
Analyze the historical cross-cultural contact period that set the stage for treaties and efforts by the U.S. and Canada to acculturate Northwest Indians into their culture,
Describe the history of anthropological research in this area,
Characterize the anthropological/archaeological research in the major cultural regions of the Northwest Coast
Identify the underpinnings of current political configurations of tribes/bands in the Northwest,
Recognize contemporary issues in the region, including development of future fishing, sea mammal hunting, land mammal hunting, gathering, logging and gaming.
Discuss from a Euro-American perspective of John Jewitt's, what cultural life was like from 1803-1805 while he was held as a slave of Chief Maquinna of the Nuu-chah-nulth on the West Coast of Vancouver Island.

**ANTH 238 : The Archaeology of Ritual and Religion**

**Credits** 5

**Quarter Offered** Fall

This course provides a comprehensive overview of the theories, methodologies, and principles used in the examination of the origins and development of religious beliefs and practices ranging from the Paleolithic through Modern Period. Topics range from gender rites to rites of passage, from ritual feasting to ritual fasting, from normative practices to taboos, sacred landscapes to profane utterances. This class may include students from multiple sections. (Social Sciences, Elective)

**Prerequisites**
ENGL& 101

**Course Outcomes**
- Explain the key theoretical frameworks which have been used to examine the development of religious beliefs and practices among Homo sapiens.
- Describe phenomenological, culturally-affirming, and socially-normative religious practices.
- Compare and contrast animistic and anthropomorphic belief systems.
- Identify the similarities and differences in religious beliefs between various cultural groups surveyed during the course.
- Explain the key anthropological theories associated with the development of hierarchical religious systems beginning in early agrarian societies.
- Demonstrate the distinctions between communal, domestic, and personal religious practices.
- Illustrate the concept of cultural diffusion and the role it plays in religious syncretism.

**ANTH 275 : Archaeology Field School (Irchester)**

**Credits** 5

**Quarter Offered** Summer

Students will participate in a two-week archaeological field school facilitated by the University of Leicester, at the Romano-British site of Irchester in the United Kingdom. During which time students will develop a variety of hands-on techniques, including but not limited to excavation, recording, and post-excavation analysis. This class may include students from multiple sections. (Elective)

**Prerequisites**
ENGL& 101, ANTH& 204 or ANTH& 206

**Course Outcomes**
- Explain the key characteristics of modern methodological excavation techniques.
- Demonstrate common collection and recording/documentation practices.
- Demonstrate and practice workplace safety in and around archaeological sites.
- Examine ethical and legal issues concerning the excavation of artifacts and/or human remains.
- Demonstrate familiarization with various forms of material cultural common to Romano-British sites.
- Define terms, phrases, and abbreviations commonly used by professional archaeologists.
- Demonstrate proper use of common archaeological tools and instruments such as shovel, spade, trowel, measuring tape, auto-level, and total station.
Art (ART/ART&)

ART& 100 : Art Appreciation
Credits 5
Quarter Offered Fall, Winter, Summer
Study of two and three dimensional art concepts. Lectures and selected art projects. This class may include students from multiple sections. (Humanities, Elective)

Course Outcomes
- Identify and apply the elements of art used in two-dimensional and three-dimensional artwork and critiques.
- Identify and apply the principles of art used in two-dimensional and three-dimensional artwork and critiques.
- Identify and apply the components used to achieve aesthetics in two and three-dimensional artworks.
- Demonstrate technical ability and competence through projects involving the use of two-dimensional and three-dimensional art mediums.
- Demonstrate an ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as your own.
- Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.
- Develop some cultural awareness of visual arts practice and history.

ART 101 : Two Dimensional Design Concepts
Credits 5
Quarter Offered Occasionally
Applies principles of art, combining theories of creative thinking and modern design. Problems in organization of compositional elements and two dimensional space concepts. This class may include students from multiple sections. (Humanities-Performance, Elective)

Course Outcomes
- Identify and apply the elements of art used in two-dimensional artwork and critiques.
- Identify and apply the principles of art used in two-dimensional artwork and critiques.
- Identify and apply the components used to achieve aesthetics in two-dimensional artworks.
- Demonstrate technical ability and competence through projects involving the use of two-dimensional art mediums.
- Demonstrate an ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as your own.
- Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.
- Develop some cultural awareness of visual arts practice and history.

ART 102 : Interaction of Color in Design
Credits 5
Quarter Offered Occasionally
Color theory based on traditional and contemporary color theories. Study of painting, materials, and techniques. This class may include students from multiple sections. (Humanities-Performance, Elective)

Course Outcomes
- To promote visual thinking and a respect for the visual arts.
- To achieve an understanding of the visual theories of art through a study of art elements and design principles.
- To promote an understanding of various visual art mediums and the artist's contribution to society.
- To increase awareness of the relationship of creative mankind.

ART 103 : Three Dimensional Form in Design
Credits 5
Quarter Offered Occasionally
This course is an introduction to the elements and principles of three dimensional design. We will work with diverse materials to create sculptural forms that develop each student's personal expression and critical thinking skills. This class may include students from multiple sections. (Humanities-Performance, Elective)
Course Outcomes
Identify and apply the elements of art used in three-dimensional artwork and critiques.
Identify and apply the principles of art used in three-dimensional artwork and critiques.
Identify and apply the components used to achieve aesthetics in three-dimensional artworks.
Demonstrate technical ability and competence through projects involving the use of three-dimensional art mediums.
Demonstrate an ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as your own.
Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.
Develop some cultural awareness of visual arts practice and history.

ART 104 : Drawing: Methods/Material
Credits 5
Quarter Offered Fall, Spring
Intensive study of line, value, perspective, and form, using various drawing mediums that offer a new way of seeing through investigation of visual language of drawing. This class may include students from multiple sections. (Humanities-Performance, Elective)
Course Outcomes
Identify and apply the elements of art used in drawings and critiques.
Identify and apply the principles of art used in drawings and critiques.
Identify and apply the components used to achieve aesthetics in drawings.
Demonstrate technical ability and competence through projects involving the use of various drawing mediums.
Demonstrate an ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as your own.
Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.
Develop some cultural awareness of drawing practice and history.

ART 105 : Color & Form in Drawing
Credits 5
Quarter Offered Winter
Intensive study of color and drawn forms offers new approach for seeing. Time divided between traditional and contemporary drawing techniques. This class may include students from multiple sections. (Humanities-Performance, Elective)
Course Outcomes
Identify and apply the elements of art used in drawings and critiques with an emphasis on color and value.
Identify and apply the principles of art used in drawings and critiques.
Identify and apply the components used to achieve aesthetics in drawings.
Demonstrate technical ability and competence through projects involving the use of various drawing mediums.
Demonstrate an ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as your own.
Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.
Develop some cultural awareness of drawing practice and history.

ART 106 : Exploration in Drawing
Credits 5
Quarter Offered Occasionally
Experimental drawing, experience of drawing and seeing and possibilities of extending traditional concepts about drawing. This class may include students from multiple sections. (Humanities-Performance, Elective)
Prerequisites
ART 104 or instructor permission
Course Outcomes
Identify and apply the elements of art used in drawings and critiques.
Identify and apply the principles of art used in drawings and critiques.
Identify and apply the components used to achieve aesthetics in drawings.
Demonstrate technical ability and competence through projects involving the use of various drawing mediums.
Demonstrate an ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as your own.
Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.
Develop some cultural awareness of drawing practice and history.
Produce drawings with a focus on aesthetic variation, experimentation, and original work.

ART 109: Introduction to Printmaking
Credits 5
Quarter Offered Fall
Printmaking from past through present. Study and application of basic printmaking techniques, concepts, and media. Covers linocuts, woodcuts, multicolor prints, and experimental monotypes. Introduces relief and intaglio techniques, with an emphasis on small editions. This class may include students from multiple sections. (Humanities-Performance, Elective)

This class has a $20 printmaking course fee.

Course Outcomes
Identify the four types of fine art printmaking and demonstrate technical ability and competence in two or more of the four forms.
Identify the elements of art as related to image making and critique.
Develop some understanding of the cultural context of related works of art, both historically and culturally.
Demonstrate the ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as ones own, including conceptual aspects of art, thematic content, meaning, etc.
Develop images through a series of proofs, print small editions of those images by hand and on the press, and present work professionally by signing, numbering, matting and photographing work.
Exercise drawing skills and learn to translate drawings into prints using appropriate printmaking methods for a variety of visual results.
Demonstrate the ability to respond to constructive criticism and to revise and improve works in progress.

ART 110: Introduction to Painting
Credits 5
Quarter Offered Fall, Winter, Spring
Painting from past through present. Exploration of beginning painting techniques, concepts, composition problems. This class may include students from multiple sections. (Humanities-Performance, Elective)

Course Outcomes
Identify and apply the elements of art used in Paintings and critiques.
Identify and apply the principles of art used in Paintings and critiques.
Identify and apply the components used to achieve aesthetics in Paintings.
Demonstrate technical ability and competence through projects involving the use of painting mediums.
Demonstrate an ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as your own.
Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.
Develop some cultural awareness of painting practice and history.

ART 112: Life Drawing
Credits 5
Quarter Offered Spring
The course is an introduction to creating drawings based on in-class observations of a range of posed models. The class also provides an overview of the drawing process as a form of visual thinking in relation to rendering the human figure through a variety of techniques and art-making materials ranging from charcoal and graphite to color pastels and acrylic paint. This class may include students from multiple sections. (Humanities-Performance, Elective)

Course Outcomes
Identify and apply the elements of art used in figure drawings and critiques.
Identify and apply the principles of art used in figure drawings and critiques. Identify and apply the components used to achieve aesthetics in figure drawings. Demonstrate technical ability and competence through projects involving the use of various drawing mediums. Demonstrate an ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as your own. Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner. Develop some cultural awareness of figure drawing practice and history.

ART 126 : History of Art I
Credits 5
Quarter Offered Fall
The art of ancient civilizations, beginning with Paleolithic cave painting and megalithic monuments. Indian, Chinese, Japanese, Mesopotamian, Egyptian, Minoan, Greek, Etruscan, Roman, Early Christian, and Byzantine artistic traditions are studied in light of their cultural origins. Illustrated lectures. This class may include students from multiple sections. (Humanities, Elective)
Course Outcomes
Gain an understanding of some of the historical traditions in the visual arts.
Describe, analyze, interpret, understand, and discuss selected works from the history of visual art.
Identify a visual artwork from the course content and understand its place in history as well as its relationship to art and other aspects of culture.
Define art terminology from the course content and correctly apply it correctly in context of historical works of visual art.
Identify the geographical location an artwork came from and the artist responsible for its creation when possible.
Experience a visual art location outside of the classroom and reflect upon the experience.

ART 127 : History of Art II
Credits 5
Quarter Offered Winter
The art of western civilization from the early middle ages through the French revolution is considered. Periods explored include the Islamic, Carolingian, Celtic, Romanesque, Gothic, Renaissance, Mannerist, Baroque, and Rococo. Illustrated lectures. This class may include students from multiple sections. (Humanities, Elective)
Course Outcomes
Gain an understanding of some of the historical traditions in the visual arts.
Describe, analyze, interpret, understand, and discuss selected works from the history of visual art.
Identify a visual artwork from the course content and understand its place in history as well as its relationship to art and other aspects of culture.
Define art terminology from the course content and correctly apply it correctly in context of historical works of visual art.
Identify the geographical location an artwork came from and the artist responsible for its creation when possible.
Experience a visual art location outside of the classroom and reflect upon the experience.

ART 128 : History of Art III
Credits 5
Quarter Offered Spring
The art of the modern age is explored. Developments studied include Neoclassicism, Romanticism, Realism, Impressionism, the Fauves, Art Nouveau, Cubism, Surrealism, Regionalism, Abstraction, Pop Art, and Post Modernism. Illustrated lectures. This class may include students from multiple sections. (Humanities, Elective)
Course Outcomes
Gain an understanding of some of the historical traditions in the visual arts.
Describe, analyze, interpret, understand, and discuss selected works from the history of visual art.
Identify a visual artwork from the course content and understand its place in history as well as its relationship to art and other aspects of culture.
Define art terminology from the course content and correctly apply it correctly in context of historical works of visual art.
Identify the geographical location an artwork came from and the artist responsible for its creation when possible.
Experience a visual art location outside of the classroom and reflect upon the experience.

**ART 205 : Intermediate Painting**

**Credits** 5  
**Quarter Offered** Fall, Winter, Spring  
Painting from past through present. Exploration of intermediate painting techniques, concepts, composition problems. This class may include students from multiple sections. (Elective)

**Prerequisites**
ART 110 or instructor permission

**Course Outcomes**
- Identify and apply the elements of art used in paintings and critiques.
- Identify and apply the principles of art used in paintings and critiques.
- Identify and apply the components used to achieve aesthetics in paintings at an intermediate level.
- Demonstrate technical ability and competence through projects involving the use of painting mediums at an intermediate level.
- Demonstrate an ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as your own at an intermediate level.
- Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.
- Develop some cultural awareness of painting practice and history.
- Produce paintings with a focus on aesthetic variation, experimentation, and original work.

**ART 206 : Advanced Painting**

**Credits** 5  
**Quarter Offered** Fall, Winter, Spring  
Continues technical, formal and critical aspects of painting, with an emphasis on more personal point of view in aesthetic presentation. Encourages more freedom and responsibility in work. This class may include students from multiple sections. (Elective)

**Prerequisites**
ART 205 or instructor permission

**Course Outcomes**
- Identify and apply the elements of art used in paintings and critiques.
- Identify and apply the principles of art used in paintings and critiques.
- Identify and apply the components used to achieve aesthetics in paintings at an advanced level.
- Demonstrate technical ability and competence through projects involving the use of painting mediums at an advanced level.
- Demonstrate an ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as your own at an advanced level.
- Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.
- Produce a unified body of work with an artist statement that supports it.
- Identify cultural, historical, and contemporary relevance to the body of artwork produced and present this information and work to the class.

**ART 224 : Introduction to Ceramics: Hand Building**

**Credits** 5  
**Quarter Offered** Fall, Winter, Spring  
This course is an introduction to ceramics based materials and creative process, with emphasis on personal expression through diverse practices. Students create a series of projects utilizing a variety of traditional and innovative hand building techniques and processes to create three dimensional sculptural forms. This class may include students from multiple sections. (Humanities-Performance, Elective)

This class has a $120 ceramics supply course fee.

**Course Outcomes**
- Identify and apply the elements of art used in ceramic artwork and critiques.
- Identify and apply the principles of art used in ceramic artwork and critiques.
Identify and apply the components used to achieve aesthetics in ceramic artworks.
Demonstrate technical ability and competence through projects involving the use of the ceramic mediums.
Demonstrate an ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as your own.
Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.
Develop some cultural awareness of ceramic visual arts practice and history.
Demonstrate appropriate health and safety practices in the ceramics studio.

ART 225 : Introduction to Ceramics: Wheel Throwing
Credits 5
Quarter Offered Fall, Winter, Spring
This course is an introduction to ceramics materials and creative processes, using the potter's wheel. Students create a series of projects utilizing a variety of traditional and innovative throwing techniques and firing processes to create functional forms. This class may include students from multiple sections. (Humanities-Performance, Elective)
This class has a $120 ceramics supply course fee.
Course Outcomes
- Identify and apply the elements of art used in ceramic artwork and critiques.
- Identify and apply the principles of art used in ceramic artwork and critiques.
- Identify and apply the components used to achieve aesthetics in ceramic artworks.
- Demonstrate technical ability and competence through projects involving the use of the ceramic mediums.
- Demonstrate an ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as your own.
- Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.
- Develop some cultural awareness of ceramic visual arts practice and history.
- Demonstrate appropriate health and safety practices in the ceramics studio.

ART 226 : Intermediate Ceramics: Hand Building
Credits 5
Quarter Offered Fall, Winter, Spring
This course helps students advance their ceramic based techniques and concepts through studio work, art theory, processes, and personal expression. The focus of the course is determined by student interests and will include a diverse offering of sculptural and functional theories and approaches to making. This class may include students from multiple sections. (Elective)
This class has a $140 ceramics supply course fee.
Prerequisites
ART 224 or instructor permission
Course Outcomes
- Identify and apply the elements of art used in ceramic artwork and critiques.
- Identify and apply the principles of art used in ceramic artwork and critiques.
- Identify and apply the components used to achieve aesthetics in ceramic artworks.
- Demonstrate an increased technical ability and competence through projects involving the use of the ceramic mediums.
- Demonstrate an increased ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as your own.
- Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.
- Develop an increased cultural awareness of ceramic visual arts practice and history.
- Demonstrate appropriate health and safety practices in the ceramics studio.

ART 227 : Intermediate Ceramics: Wheel Throwing
Credits 5
Quarter Offered Fall, Winter, Spring
This course helps students advance their ceramic-based techniques and concepts through studio work, art theory, processes, and personal expression. Though the majority of the artwork in this course will be made utilizing the potter’s wheel, the focus of course is determined by the functional theories and approaches to making. This class may include students from multiple sections. (Elective)

This class has a $140 ceramics supply course fee.

**Prerequisites**
ART 225 or instructor permission

**Course Outcomes**
- Identify and apply the elements of art used in ceramic artwork and critiques.
- Identify and apply the principles of art used in ceramic artwork and critiques.
- Identify and apply the components used to achieve aesthetics in ceramic artworks.
- Demonstrate an increased technical ability and competence through projects involving the use of the ceramic mediums.
- Demonstrate an increased ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as your own.
- Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.
- Develop an increased cultural awareness of ceramic visual arts practice and history.
- Demonstrate appropriate health and safety practices in the ceramics studio.

**ART 260 : Special Topics in Studio Art (Ceramics)**

**Credits** 1 -5

**Quarter Offered** Fall, Winter, Spring

The focus of the course is determined by student interests and will include a diverse offering of special topics in the advanced study of ceramics. This course helps students advance techniques and concepts through studio work, art theory, processes and personal expression. This class may be repeated up to twenty credits. This class may include students from multiple sections. (Elective)

This class has a $32/credit ceramics supply class fee.

**Course Outcomes**
- Identify and apply the elements of art used in artwork and critiques.
- Identify and apply the principles of art used in artwork and critiques.
- Identify and apply the components used to achieve aesthetics in artworks.
- Demonstrate an increased technical ability and competence through projects involving the use of the medium/s being studied.
- Demonstrate an increased ability to objectively critique artwork by assessing, analyzing, and understanding other artwork as well as your own.
- Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.
- Develop an increased cultural awareness of visual arts practice and history.
- Demonstrate appropriate health and safety practices in the studio.
Astronomy (ASTR&)  

**ASTR& 100 : Survey of Astronomy**  

**Credits**  5  
**Quarter Offered** Winter, Spring, Summer  
Introduction to the universe, with emphasis on conceptual, as contrasted with mathematical, comprehension. Modern theories and observations; ideas concerning nature and evolution of galaxies; quasars, stars, black holes, planets, and solar system. This class may include students from multiple sections. (Natural Sciences, Elective)  

**Course Outcomes**  
- Describe and explain why we have seasons, tides, see phases of the Moon, and how our geocentric model of the universe came to be.  
- Describe and explain Newton’s laws (motion and gravity), and how we can understand the universe using light.  
- Describe and explain the formation of the solar system and planets, the characteristics of the terrestrial and Jovian planets, and the methods of discovery and classification of extra-solar planets.  
- Describe and explain the birth, life, and death processes of stars, and their remains.  
- Describe and explain the birth and evolution of galaxies, and the birth of the universe, including dark matter and the effects of dark energy we see today.  
- Identify the constellations visible from the northern hemisphere and relate some of the mythology of them.
Automotive Technology (ATEC)

ATEC 181: Automotive Safety & Tools
Credits 2
Quarter Offered Fall
Students will learn how to use automotive hand tools and industry specific and equipment for electrical, gas, and diesel vehicles. Emphasis on automotive shop safety, personal protective equipment, and hazardous materials handling. Class includes overview of Automotive Service Excellence (ASE) certification standards. This class may include students from multiple sections.

This class has a $60 Automotive Technology course fee.
Course Outcomes
- Recognize unsafe situations that may occur in an automotive repair shop
- Identify the safety precautions and procedures when working with electrical, gas, and diesel vehicles in a repair shop setting
- Describe the proper application of safety procedures for electrical, gas, and diesel vehicles
- Demonstrate safe operation of available equipment.
- Demonstrate use of appropriate hand tools and diagnostic equipment.

ATEC 182: Basic Electrical for Automotive
Credits 4
Quarter Offered Fall
Students will learn basic automotive electronics, starting and charging systems, and electrical diagnosis. Emphasis on basic electronics, and properly using a multimeter to identify wiring faults, and evaluating electrical systems performance for new and late model electrical and gas vehicles. This class may include students from multiple sections.

This class has a $60 Automotive Technology course fee.
Course Outcomes
- Troubleshoot electrical system components and configurations
- Demonstrate knowledge of electrical series, parallel, and series-parallel circuits using principles of electricity
- Demonstrate proper use of a digital multimeter when measuring source voltage, voltage drop, grounds, current flow, and resistance
- Identify cause and effect from shorts, grounds, opens, and resistance problems in electrical/electronic circuits
- Remove, inspect, and replace electrical components

ATEC 183: Gas & Diesel Vehicles
Credits 4
Quarter Offered Fall
Survey of gas and diesel engine vehicles, including vehicle service information such as fluid type, internal combustion engine operation, vehicle service history, service precautions, technical service bulletins, and recalls. This class may include students from multiple sections.

This class has a $60 Automotive Technology course fee.
Course Outcomes
- Inspect engine assembly for fuel, oil, coolant, and other leaks
- Identify cylinder head and valve train components and configurations
- Identify engine block assembly components and configurations
- Identify lubrication and cooling system components and configurations
- Perform engine oil and filter change per manufacturer specifications

ATEC 184: Special Topics in Automotive
Credits 5
Quarter Offered Fall
Students will explore special topics in automotive including specialized manufacturer trainings, research emerging electrical vehicle trends, identify restoration and late model vehicle repair considerations, and identify innovative technologies that will impact the future automotive industry. This class may include students from multiple sections.

This class has a $60 Automotive Technology course fee.

**Course Outcomes**
- Compare and contrast manufacturer maintenance and repair requirements
- Explore current and future automotive and electrical vehicle trends such as intelligent and connected vehicles.
- Present special topics projects in class

**ATEC 185 : Electrical Vehicles**

**Credits** 4  
**Quarter Offered** Winter

Survey of how to service, diagnose and repair hybrid-electric vehicles, plug-in hybrid-electric vehicles, and battery-electric vehicles. Emphasis on normal operation of hybrid and electric vehicles, low-voltage and high-voltage battery types, electric motor types and other EV/ Hybrid specific components and safety standards pertaining to EV/ Hybrid vehicles. This class may include students from multiple sections.

This class has a $60 Automotive Technology course fee.

**Course Outcomes**
- Identify laws, regulations, standards, and safety equipment pertaining to high-voltage components on hybrid and electric vehicles.
- Define different EV types, driving range, regenerative braking, drivetrain modes, and electric vehicle supply equipment.
- Describe normal operation of hybrid and electric vehicles, low-voltage and high-voltage battery types, electric motor types and other EV/ Hybrid specific components.
- Service, diagnose and repair hybrid-electric vehicles, plug-in hybrid-electric vehicles, and battery-electric vehicles.

**ATEC 186 : Automotive Diagnostics**

**Credits** 5  
**Quarter Offered** Winter

Troubleshoot and diagnose new and late model electrical and gas vehicles. Students will learn diagnostic methods, identify engine performance and battery issues, read computerized control system components, and customer service skills. This class may include students from multiple sections.

This class has a $60 Automotive Technology course fee.

**Course Outcomes**
- Diagnose common automotive issues and recommend/perform proper repairs
- Identify and interpret engine performance concerns; determine needed action
- Diagnose abnormal engine noises or vibration concerns; determine needed action
- Diagnose the cause of excessive oil consumption, coolant consumption, unusual exhaust color, odor, and sound; determine needed action
- Identify computerized control system components and configurations
- Access and use service information to perform step-by-step (troubleshooting) diagnosis

**ATEC 187 : Preventative Maintenance & Inspection**

**Credits** 2  
**Quarter Offered** Winter

Students will learn how to perform multi-point inspections on electrical and gas vehicles. Create an inspection report and perform various preventative maintenance procedures. Students will identify pertinent information relevant to the maintenance schedule of a particular vehicle and present an action plan to their customers. This class may include students from multiple sections.

This class has a $60 Automotive Technology course fee.

**Course Outcomes**
Identify pertinent information relevant to the maintenance schedule of a particular vehicle. Perform multi-point inspection and complete a vehicle inspection report. Perform various preventative maintenance tasks such as oil change, tire balancing/rotation, and check fluid levels. Create a plan of action for each specific service or diagnostic situation and make appropriate customer recommendations.

ATEC 291 : Internship

Credits  1
Quarter Offered  Winter
Students will learn and apply new skills in a workplace setting while being mentored an automotive professional. This class may include students from multiple sections.

This class has a $60 Automotive Technology course fee.

Course Outcomes
- Apply automotive skills in a workplace setting
- Identify individual strengths and weaknesses related to workplace skills and behaviors
- Acquire new workplace skills and behaviors
- Demonstrate effective communication and interpersonal behaviors in the workplace
- Demonstrate initiative and time management in a workplace setting
Basic Education for Adults (BASED)

BASED 1-18 : English As a Second Language Levels 1-6

Credits 0
Courses designed to improve reading, writing, and speaking the English language in order to become college and/or career ready.

Course Outcomes
- Construct meaning from oral presentations and literary and informational text through level-appropriate listening, reading, and viewing.
- Participate in level-appropriate oral and written exchanges of information, ideas, and analyses, in various social and academic contexts, responding to peer, audience, or reader comments and questions.
- Speak and write about level-appropriate complex literary and informational texts and topics.
- Construct level-appropriate oral and written claims and support them with reasoning and evidence.
- Conduct research and evaluate and communicate findings to answer questions or solve problems.
- Analyze and critique the arguments of others orally and in writing.
- Adapt language choices to purpose, task, and audience when speaking and writing.
- Determine the meaning of words and phrases in oral presentations and literary and informational text.
- Create clear and coherent level-appropriate speech and text.

BASED 1-59 : Adult Basic Education Levels 1-6

Credits 0
Courses designed to improve basic reading, writing and math skills that meet requirements for a Washington State high school diploma. Preparation for GED® testing is also available.

Course Outcomes
HSE Contemporary World Problems (BASED 40)

Determine the central ideas or information of a primary or secondary source; provide an accurate summary that makes clear the relationships among the key details and ideas.
- Read and comprehend history/social studies texts at a College & Career Ready level of complexity.
- Integrate and evaluate content presented in diverse media and formats, including visually and quantitatively, as well as in words in order to address a question or solve a problem.
- Conduct short as well as more sustained research projects based on focused questions (including self-generated question) or to solve a problem, demonstrating understanding of the subject under investigation.
- Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally.
- Read closely to determine what the text says explicitly and to make logical inferences from it: cite specific textual evidence (when writing or speaking) to support analysis of primary and secondary sources, connecting insights gained from specific details to an understanding of the text as a whole.
- Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence.
- Present information, findings, and supporting evidence such that listeners can follow the line of reasoning and the organization, development, and style are appropriate to task, purpose, and audience.

HSE Fine Arts (BASED 41)

Integrate and evaluate content presented in diverse media and formats, including visually and quantitatively, as well as in words.
- Integrate and evaluate content presented in diverse media and formats, including visually and quantitatively, as well as in words.
- Prepare for and participate effectively in a range of conversations and collaborations with diverse partners, building on others’ ideas and expressing their own clearly and persuasively.
- Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally.
- Make strategic use of digital media and visual displays of data to express information and enhance understanding of presentations.
HSE English (BASED 42)

Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific
textual evidence.
Determine central ideas or themes of a text and analyze their development; summarize the key supporting
details and ideas.
Interpret words and phrases as they are used in a text, including determining technical, connotative, and
figurative meanings.
Produce clear and coherent writing in which the development, organization, and style are appropriate to
task, purpose, and audience.
Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new
approach.
Gather relevant information from multiple print and digital sources, assess the credibility and accuracy of
each source, and integrate the information while avoiding plagiarism.

HSE Occupational Education (BASED 44)

Integrate and evaluate content presented in diverse media and formats, including visually and
quantitatively, as well as in words.
Use technology, including the Internet, to produce and publish writing and to interact and collaborate with
others.
Gather relevant information from multiple print and digital sources, assess the credibility and accuracy of
each source, and integrate the information while avoiding plagiarism.
Integrate and evaluate information presented in diverse media and formats, including visually,
quantitatively, and orally.
Adapt speech to a variety of contexts and communicative tasks, demonstrating command of formal
English when indicated or appropriate.

HSE Science Lab (BASED 45)

Follow precisely a complex multistep procedure when carrying out experiments, taking measurements, or
performing technical tasks, analyze the specific results based on explanations in the text.
Synthesize information from a range of sources (e.g. texts, experiments, simulations) into a coherent
understanding of a process, phenomenon, or concept, resolving conflicting information when possible.
Evaluate the hypothesis, data, analysis, and conclusions in a science or technical text, or experiment,
verifying the data when possible and corroborating or challenging conclusions with other sources of
information.

HSE US History and US Civics and Government (BASED 46, 56)

Determine the central ideas or information of a primary or secondary source; provide an accurate summary
that makes clear the relationships among the key details and ideas.
Read and comprehend history/social studies texts at a College & Career Ready level of complexity.
Integrate and evaluate content presented in diverse media and formats, including visually and
quantitatively, as well as in words in order to address a question or solve a problem.
Conduct short as well as more sustained research projects based on focused questions (including self-
genrated question) or to solve a problem, demonstrating understanding of the subject under
investigation.
Integrate and evaluate information presented in diverse media and formats, including visually,
quantitatively, and orally.
Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific
textual evidence (when writing or speaking) to support analysis of primary and secondary sources,
connecting insights gained from specific details to an understanding of the text as a whole.
Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and
relevant and sufficient evidence.
Present information, findings, and supporting evidence such that listeners can follow the line of reasoning
and the organization, development, and style are appropriate to task, purpose, and audience.
HSE Washington State History (BASED 47)

Determine the central ideas or information of a primary or secondary source; provide an accurate summary that makes clear the relationships among the key details and ideas.
Read and comprehend history/social studies texts at a College & Career Ready level of complexity.
Integrate and evaluate content presented in diverse media and formats, including visually and quantitatively, as well as in words in order to address a question or solve a problem.
Conduct short as well as more sustained research projects based on focused questions (including self-generated question) or to solve a problem, demonstrating understanding of the subject under investigation.
Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally.
Read closely to determine what the text says explicitly and to make logical inferences from it: cite specific textual evidence (when writing or speaking) to support analysis of primary and secondary sources, connecting insights gained from specific details to an understanding of the text as a whole.
Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence.
Present information, findings, and supporting evidence such that listeners can follow the line of reasoning and the organization, development, and style are appropriate to task, purpose, and audience.

HSE Health (BASED 49)

Integrate and evaluate content presented in diverse media and formats, including visually and quantitatively, as well as in words.
Use technology, including the Internet, to produce and publish writing and to interact and collaborate with others.
Gather relevant information from multiple print and digital sources, assess the credibility and accuracy of each source, and integrate the information while avoiding plagiarism.
Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally.
Adapt speech to a variety of contexts and communicative tasks, demonstrating command of formal English when indicated or appropriate.

HSE Physical Education (BASED 58)

Integrate and evaluate content presented in diverse media and formats, including visually and quantitatively, as well as in words.
Use technology, including the Internet, to produce and publish writing and to interact and collaborate with others.
Gather relevant information from multiple print and digital sources, assess the credibility and accuracy of each source, and integrate the information while avoiding plagiarism.
Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally.
Adapt speech to a variety of contexts and communicative tasks, demonstrating command of formal English when indicated or appropriate.

HSE Science (BASED 59)

Determine central ideas or themes of a text and analyze their development; summarize the key supporting details and ideas.
Read and comprehend science & technical text at a College & Career Ready level of complexity.
Integrate and evaluate content presented in diverse media and formats, including visually and quantitatively, as well as in words.
Conduct short as well as more sustained research projects based on focused questions (including self-generated question) or to solve a problem, demonstrating understanding of the subject under investigation.
Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally.
Read closely to determine what the text says explicitly and to make logical inferences from it; cite specific textual evidence when writing or speaking to support conclusions drawn from the text. Write arguments to support claims in an analysis of substantive topics or texts, using valid reasoning and relevant and sufficient evidence. Present information, findings, and supporting evidence such that listeners can follow the line of reasoning and the organization, development, and style are appropriate to task, purpose, and audience.

Math 1-4 (51-54)

While each course focuses on specific math concepts which build from basic to more complex operations, teaching and learning strategies will integrate the following 8 standards for mathematical practice.

- Make sense of problems and persevere in solving them (CCRS: MP.1)
- Reason abstractly and quantitatively (CCRS: MP.2)
- Construct viable arguments and critique the reasoning of others (CCRS: MP.3)
- Model with mathematics (CCRS: MP.4)
- Use appropriate tools strategically (CCRS: MP.5)
- Attend to precision (CCRS: MP.6)
- Look for and make use of structure (CCRS: MP.7)
- Look for and express regularity in repeated reasoning (CCRS: MP.8)

*Learning outcomes for these courses are the Standards for Mathematical Practice in the College and Career Readiness Standards.
Behavioral Healthcare (BHAV, Bachelor of Applied Science)

**BHAV 300 : Research and Statistics Methods for Non-Science Majors**
- **Credits**: 5
- **Quarter Offered**: Spring
- Pending Curriculum Committee approval

**BHAV 320 : Social and Cultural Diversity in Behavioral Health**
- **Credits**: 5
- **Quarter Offered**: Winter

This course examines how cultural, biological, and social diversity affect thought and behavior. It presents current theories and practices for working with diverse populations in the behavioral health field and fosters the understanding and application of cultural diversity, cultural competency, self-awareness, social justice, and advocacy. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Behavioral Healthcare degree to enroll. If interested, visit pencol.edu/bas

**Prerequisites**
Behavioral Healthcare BAS Program Admittance

**Course Outcomes**
- Describe how culture, cultural identity, and intersectionality are related to behavioral health and behavioral healthcare.
- Explain how culture and stigma can influence help-seeking behaviors.
- Analyze the impacts of local, state, and national public policies on the quality and accessibility of behavioral health services.
- Examine how one’s own social statuses, culture-bound worldviews, assumptions, biases, and experiences influence counseling interactions.
- Demonstrate the ability to modify counseling theories, techniques, and interventions to make them culturally appropriate for diverse populations.
- Describe how oppression, power, privilege, racism, and discrimination impact clients of diverse populations and the therapeutic relationship.
- Examine strategies for identifying and eliminating barriers, prejudices, and processes of intentional and unintentional oppression and discrimination.
- Demonstrate comprehension of the multi-faceted aspects of gender, gender identity, and sexuality.

**BHAV 321 : Overview of Behavioral Health Disorders**
- **Credits**: 5
- **Quarter Offered**: Fall

This course offers students the opportunity to learn about various aspects of common behavioral health disorders. Students will develop the ability to identify behavioral health issues including anxiety, depression, bipolar, psychotic disorders, substance use disorders, childhood disorders and other disorders within the DSM-5-TR. This course will examine the relationship between knowledge and skills necessary to conduct systematic and culturally sensitive assessments, intervention and treatment recommendations. Reviewing evidence-based interventions, students survey the range of effective and promising treatments for common mental health disorders. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Behavioral Healthcare degree to enroll. If interested, visit pencol.edu/bas

**Prerequisites**
Behavioral Healthcare BAS Program Admittance

**Course Outcomes**
- Define the terms behavioral health, mental disorder, and abnormal behavior.
- Demonstrate the ability to carry out a brief behavioral health screen, navigate and access the psychiatric behavioral health system, and communicate with behavioral health providers across the treatment continuum.
Illustrate how to recommend outpatient, crisis and inpatient treatment.
Discuss the use of Diagnostic and Statistical Manual of Mental Disorders (DSM) when working with specific populations.
Identify and explain the concept of functional impairment.
Illustrate understanding of how to assess risk.

BHAV 330 : Counseling Ethics and Scope of Practice
Credits 5
Quarter Offered Winter
This course provides a broad understanding of ethics, legal standards, and professional responsibilities in behavioral health with an emphasis on counseling ethics. Students explore behavioral health professionals' responsibilities to themselves, clients, colleagues, and society. Facilitates an understanding of ethical standards and ethical decision-making, professional boundaries, confidentiality, and federal and state laws pertaining to specific populations and situations in the behavioral health field. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Behavioral Healthcare degree to enroll. If interested, visit pencol.edu/bas

Prerequisites
Behavioral Healthcare BAS Program Admittance

Course Outcomes
- Synthesize common themes in professional associations' ethical standards or codes of conduct.
- Define person-first and client-centered care and generate examples.
- Articulate how to support the rights of clients, including their rights to confidentiality, informed consent, self-determination, and least-restrictive treatment options.
- Determine when and how to report suspicions of abuse, exploitation, neglect, danger to self, and danger to others.
- Explain examples of racism, sexism, and other types of discrimination and societal structures or systems which facilitate inequality.
- Formulate strategies to avoid the disclosure of personal information which has the potential to interfere with clients' work toward recovery.
- Describe how to advocate to the state legislature and executive branch for the policy change.
- Distinguish the scope of professional practice in a variety of roles in care provision.
- Describe current standards of the "Duty to Warn" and mandated reporting.

BHAV 332 : Behavioral Health Systems of Care
Credits 5
Quarter Offered Fall
This course reviews and prepares students to practice within the systems which provide prevention, intervention, and treatment for mental health issues in clinical mental health settings. This course surveys behavioral healthcare systems, with emphases on local, outpatient, and publicly-funded care. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Behavioral Healthcare degree to enroll. If interested, visit pencol.edu/bas

Prerequisites
Behavioral Healthcare BAS Program Admittance

Course Outcomes
- Identify and explain the range of privately- and publicly-funded local behavioral health care systems, including outpatient, crisis care, and impatient services.
- Outline community resources in order to recommend local urgent, hospital, and primary care medical services
- Connect clients with appropriate professional services based on their degree of risk for suicide.
- Assess the impact of governmental influences on behavioral healthcare, such as funding, public safety, access to treatment, criminal prosecution and/or involuntary treatment.
- Detail the eligibility criteria and application process for publicly-funded, outpatient behavioral healthcare
- Compare and contrast the responsibilities of primary care medicine and behavioral healthcare.
- Analyze the appropriateness of different treatment options
BHAV 340 : Professional Development for Behavioral Health
Credits 2
Quarter Offered Winter
Prepares students for field entry through resume and goal preparations, scheduling interviews, self-assessment, supervision discussions, and site selection. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Behavioral Healthcare degree to enroll. If interested, visit pencol.edu/bas
Prerequisites
Behavioral Healthcare BAS Program Admittance
Course Outcomes
- Identify behavioral healthcare or human services jobs that interest them and for which they are qualified.
- Describe the duties and desired characteristics of behavioral healthcare or human services supervisors.
- Identify multiple options for continued professional education, including formal coursework, trainings, professional journals, peer-to-peer communication, etc.
- Evaluate personal readiness for a practicum/work setting and set preliminary learning goals.
- Create a resume, research agencies, select a site, prepare for an interview, and engage in clinical documentation.
- Explain the requirements, tasks, challenges, and responsibilities required to ensure success in a practicum/work setting.
- Assess potential practicum sites for alignment with personal goals.

BHAV 400 : Case Management
Credits 5
Quarter Offered Spring
Overview of case management within the context of human services delivery. Students develop observation, problems-solving, recording and relationship building skills through the exploration of the case management process which includes client engagement and assessment, interview techniques and collection of client information. Students learn how to plan and develop a case file, refer clients for services, monitor the services coordination process and terminate a case. They also explore professional responsibility and cultural diversity in the context of case management practice. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Behavioral Healthcare degree to enroll. If interested, visit pencol.edu/bas
Prerequisites
Behavioral Healthcare BAS Program Admittance
Course Outcomes
- Analyze the primary roles and responsibilities of case managers in Behavioral Health and Human Services settings
- Demonstrate interpersonal skills to support and guide clients/families/significant others receiving case management services
- Identify and articulate the unique case management issues that come into play while working with specific populations
- Demonstrate the ability to complete client-centered assessments, identifying areas of problems and strengths
- Develop mutually agreed upon goals with clients and develop appropriate service plans from these goals
- Apply detailed, step-by-step information on how to record impressions and recommendations effectively
- Apply knowledge to forms and letter writing to practice compiling and sending information throughout the management of a case
- Identify community resources and demonstrate the ability to make necessary and appropriate referrals to community providers
- Apply knowledge to simulations that represent an extremely broad range of possible circumstances in the field
- Describe the process and techniques of case management

BHAV 420 : Assessment and Goal Planning
Credits 5
Quarter Offered Fall
Students will learn to identify a client’s presenting problem and demonstrate how to arrive at the client’s goal. Learning to effectively explore the clients' unique circumstances and partner with client to develop a client driven and person-centered course of action; Screening clients, intake processes, assessments, achieving client-identified goals, and synthesis of assessment and its impact on the "Golden Thread" model. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Behavioral Healthcare degree to enroll. If interested, visit pencol.edu/bas

**Prerequisites**
Behavioral Healthcare BAS Program Admittance

**BHAV 430 : Trauma-Informed Care**

**Credits** 5

**Quarter Offered** Spring

This course offers an overview of the various types of trauma and the impact they have on individuals, couples, families, and communities. Students who complete the course will gain the knowledge, skills and dispositions required by behavioral health professionals to utilize trauma-informed intervention and treatment principles and successfully assist in a time of crisis. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Behavioral Healthcare degree to enroll. If interested, visit pencol.edu/bas

**Prerequisites**
Behavioral Healthcare BAS Program Admittance

**Course Outcomes**
- Summarize specific intervention and treatment principles that guide clinicians, other behavioral health workers, and administrators in becoming trauma-informed and in creating a trauma-informed organization and workforce
- Delineate types of trauma; distinguish among traumas that affect individuals, groups, and communities; describe trauma characteristics; and address the socioecological and cultural factors that influence the impact of trauma
- Evaluate the impact of trauma, trauma-related stress reactions and associated symptoms, and common behavioral health and substance use disorders associated with trauma
- Delineate screening and assessment processes and tools that are useful in evaluating trauma exposure, its effects, and client intervention and treatment needs
- Evaluate clinical issues that counselors and other behavioral health professionals may need to know and address when treating clients who have histories of trauma
- Evaluate specific treatment models for trauma, distinguishing integrated models (which address substance use disorders, mental disorders, and trauma simultaneously) from those that treat trauma alone
- Evaluate programmatic and administrative practices that will help behavioral health program administrators increase the capacity of their organization to deliver trauma-informed services
- Illustrate how trauma and substance abuse are related
- Describe the concepts of secondary and vicarious trauma

**BHAV 440 : Family Systems**

**Credits** 5

**Quarter Offered** Fall

This course will introduce students to the theory in family strategies used in the practice of family systems counseling. The focus of the course will be on building a theoretical base for understanding techniques. Didactic and experiential learning will provide students with the opportunity to apply and integrate knowledge and skills gained through reading, lectures, and video. This class may include student from multiple sections.

Must be seeking a Bachelor of Applied Science in Behavioral Healthcare degree to enroll. If interested, visit pencol.edu/bas

**Prerequisites**
Behavioral Healthcare BAS Program Admittance

**Course Outcomes**
- Articulate a fundamental understanding of family systems theories.
- Describe assessment, treatment planning, intervention, and evaluation in family systems.
Describe family developmental processes as they relate to the family life cycle.
Describe how problems develop, are maintained, and are resolved within a family system.
Describe families as distinct cultural systems, embedded in and influenced by other sociocultural systems.
Define the importance of family, social networks, and community systems in the treatment of mental and emotional disorders.

BHAV 450: Advanced Counseling Techniques

Credits 5
Quarter Offered Spring
This course provides a comprehensive survey of the major contemporary theories of counseling, as well as their implications for practice. Core topics such as historical background, key concepts, the counseling process, counseling techniques and procedures, multicultural perspectives, and evaluation are examined for each theory. Students are given the opportunity to conceptualize selected case studies, decide on appropriate counseling interventions, and practice a variety of techniques that are commonly used in counseling practice. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Behavioral Healthcare degree to enroll. If interested, visit pencol.edu/bas

Prerequisites
Behavioral Healthcare BAS Program Admittance

Course Outcomes
Define, implement, and practice major theoretical models of counseling and rapport building
Explain a systems approach to conceptualizing clients cases
Apply basic therapeutic techniques used by each theoretical approach during in-class demonstrations
Describe the multicultural and diversity effectiveness of each theory
Evaluate and demonstrate the appropriate use of techniques associated with selected alternative and emerging therapies
Demonstrate skills of referral and advocacy
Identify issues specific to various social and cultural groups, including those based on gender race, ethnicity, social class, and ability
Demonstrate the ability to assess for difficulties in the areas of addictive behavior, depression, suicidality and/or homicidal and violent behavior
Evaluate the emerging role of technology-based counseling
Participate in facilitating groups
Define and describe dialectical behavioral therapy (DBT) and cognitive behavioral therapy (CBT)
Analyze major theories of human development
Explore evidence-based modalities of treatment
Apply the theory of Motivational Interviewing

BHAV 455: Neurology of Behavioral Health

Credits 5
Quarter Offered Fall
This course explores the relationship between neurology and behavioral health, examining the biological basis of various behavioral health disorders. Students will gain an understanding of the neurological mechanisms, etiology, clinical presentation, and treatment options for these disorders. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Behavioral Healthcare degree to enroll. If interested, visit pencol.edu/bas

Prerequisites
Behavioral Healthcare BAS Program Admittance

Course Outcomes
Develop a foundational understanding of the structure and function of the brain and its significance in shaping human behavior.
Examine the neurobiological basis of behavioral health disorders, including the involvement of neurotransmitters, brain regions, and neural circuits in these conditions.
Investigate the potential causes and risk factors associated with the development of behavioral health disorders, such as genetics, environmental influences, and stressors.
Develop research skills by critically analyzing scientific literature related to the neurology of behavioral health disorders and encouraging students to engage in research projects. Demonstrate an understanding of NEAR (Neurobiology, Epigenetics, Adverse Childhood Experiences and Resilience research) science, intellectual disabilities, learning disorders, epigenetics, traumatic brain injury, nature nurture.

**BH AV 465 : Internship**  
**Credits** 1-5  
**Quarter Offered** Fall  
Through supervised clinical experience, the student begins hands-on training in a behavioral health/human services field, focusing on: intake interviewing, case management, assessment of client/consumer needs, intervention strategies, individual and group counseling, outreach activities, recording procedures, appropriate use of community referral and networking resources, staff relations, and inter-agency communication. This class may include students from multiple sections.  
Must be seeking a Bachelor of Applied Science in Behavioral Healthcare degree to enroll. If interested, visit pencol.edu/bas  
**Prerequisites**  
Behavioral Healthcare BAS Program Admittance: BHAV 320, BHAV 321, BHAV 330, BHAV 332, BHAV 400, BHAV 430, BHAV 450  
**Course Outcomes**  
Integrate theoretical classroom learning with experiential learning to implement professionalism and best practices related to behavioral health in a community agency setting  
Articulate the mission, history, and services of the placement agency  
Outline the charting procedures and paperwork requirements for entry level positions at the practicum site  
Explain the procedures for admission to and discharge from the host program  
Outline the community resources used by the placement agency  
Create personal learning objectives in measurable terms appropriate to practicum setting  
Demonstrate increase in self-knowledge and awareness of strengths and limitations  
Demonstrate ability to relate effectively with clients in an ethical and culturally sensitive manner  
Demonstrate successful work relationships with agency administrator, supervisors, and colleagues in the practicum setting  

**BH AV 471 : Capstone Project**  
**Credits** 5  
**Quarter Offered** Spring  
Pending Curriculum Committee approval
Biology (BIOL/BIOL&)

BIOL& 100 : Survey of Biology with Lab
Credits 5
Quarter Offered Fall, Winter, Summer
Introduction to the structural and functional characteristics of life. Surveys the evolutionary, ecological, cellular, and genetic biology of living organisms. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)
Prerequisites Eligibility for both ENGL& 101 and MATH 90
Course Outcomes
- Identify and use fundamental biochemical principles to explain life processes and structure.
- Explain common life processes of metabolism, photosynthesis, and homeostasis.
- Use fundamental genetic principles to explain inheritance, biodiversity and evolution.
- Describe general features of organisms across taxonomic ranks including domain, kingdom, phylum and common classes.
- Apply fundamental ecological principles to explain biological diversity, ecosystem processes, and human effects on ecosystem processes.
- Practice common fundamental methods of scientific inquiry such as observation; hypothesis creation; simple study design; development and implementation of study protocols; data collection and analysis; drawing conclusions; and communicating scientific findings.

BIOL& 160 : General Biology with Lab, Cell Biology Emphasis
Credits 5
Quarter Offered Fall, Winter, Spring, Summer
Includes process of science, overview of central ideas of biology (unity, diversity, interdependence, evolution), basic chemistry concepts, biomolecules, cell structure, cell physiology (including enzyme function, energetics, synthesis of DNA, RNA and protein), cell reproduction, introduction to genetics. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)
Prerequisites Eligibility for both ENGL& 101 and MATH 90
Course Outcomes
- Read, correctly interpret, and critically evaluate biological information in books, journals, online resources, and the popular media.
- Explain and give examples of the basic themes and concepts of the chemistry of life including basic cell chemistry, properties of water and pH, basic organic chemistry, and properties of organic macromolecules (carbohydrates, lipids, proteins, and nucleic acids).
- Explain and give examples of the basic themes and concepts of cell biology including cell structure and function, membrane structure and function, metabolism and enzyme function, respiration and fermentation, photosynthesis, cell communication, and mitosis.
- Explain and give examples of the basic themes and concepts of genetics including meiosis and sexual life cycles, Mendelian genetics, chromosomes and non-Mendelian genetics, function of DNA (synthesis, transcription, and translation), regulation of gene expression, DNA tools and biotechnology, and genomes and their evolution.
- Explain and give examples of the evolution and diversity of viruses, bacteria, and protists.
- Apply quantitative analysis to solve problems in hypothetical and real situations.
- Demonstrate ability to process information and experiences in the form of laboratory write-ups and project presentations to convey findings of library research and/or scientific inquiry using appropriate language, format, and graphical methods.
- As a group (3-6 students) design and conduct a scientific exploration, interpret results, and explain findings in a logical and appropriate manner using critical thinking and problem solving skills.
- Describe connections of the covered concepts of biology to their local environments, possible future careers, and daily lives.

BIOL& 221 : Ecology and Evolution with Lab
Credits 5
Quarter Offered Fall
First course in the three-quarter sequence of introductory biology for science students. An introduction to evolutionary and ecological processes involved in the generation of our planet’s biodiversity, including a review of patterns and processes that influence the origin, evolution, distribution, and abundance of living things. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)

**Prerequisites**
Eligibility for ENGL& 101, completion or concurrent enrollment in MATH 98 or higher

**Course Outcomes**
- Read, correctly interpret, and critically evaluate biological information in books, journals, online resources, and the popular media.
- Explain and give examples of the basic themes and concepts of ecology, including abiotic and biotic factors, the ecology of individuals, interactions, populations, communities, ecosystems, landscapes, global ecology, succession, and conservation biology.
- Explain and give examples of the basic themes and concepts of evolution, including natural selection, sexual selection, genetic drift, gene flow, mutation, microevolution, Hardy-Weinberg equilibrium, and macroevolution.
- Explain and give examples of the evolution and diversity of animals.
- Correctly and safely use scientific equipment to make observations and collect data.
- Apply quantitative analysis to solve problems in hypothetical and real situations.
- Demonstrate ability to process information and experiences in the form of laboratory write-ups and project presentations to convey findings of library research and/or scientific inquiry using appropriate language, format, and graphical methods.
- As a group (3-6 students) design and conduct a scientific exploration, interpret results, and explain findings in a logical and appropriate manner using critical thinking and problem solving skills.
- Describe connections of the covered concepts of biology to their local environments and daily lives.

**BIOL& 222 : Molecular & Cellular Biology with Lab**

**Credits** 5

**Quarter Offered** Winter

Second course in the three-quarter sequence of introductory biology for science students. Introduction to structure and function of biomolecules, cells, and membranes; photosynthesis and respiration; molecular origin of life; phylogenetic and metabolic diversity of prokaryotes; and molecular genetics and genomics. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)

**Prerequisites**
- BIOL& 221 (minimum 2.0)

**Course Outcomes**
- Read, correctly interpret, and critically evaluate biological information in books, journals, online resources, and the popular media.
- Explain and give examples of the basic themes and concepts of the chemistry of life including basic cell chemistry, properties of water and pH, basic organic chemistry, and properties of organic macromolecules (carbohydrates, lipids, proteins, and nucleic acids).
- Explain and give examples of the basic themes and concepts of cell biology including cell structure and function, membrane structure and function, metabolism and enzyme function, respiration and fermentation, photosynthesis, cell communication, and mitosis.
- Explain and give examples of the basic themes and concepts of genetics including meiosis and sexual life cycles, Mendelian genetics, chromosomes and non-Mendelian genetics, function of DNA (synthesis, transcription, and translation), regulation of gene expression, DNA tools and biotechnology, and genomes and their evolution.
- Explain and give examples of the evolution and diversity of viruses, bacteria, and protists.
- Apply quantitative analysis to solve problems in hypothetical and real situations.
- Demonstrate ability to process information and experiences in the form of laboratory write-ups and project presentations to convey findings of library research and/or scientific inquiry using appropriate language, format, and graphical methods.
- As a group (3-6 students) design and conduct a scientific exploration, interpret results, and explain findings in a logical and appropriate manner using critical thinking and problem solving skills.
- Describe connections of the covered concepts of biology to their local environments and daily lives.

**BIOL& 223 : Organismal Biology with Lab**

**Credits** 5
Quarter Offered  Spring
Third course in the three-quarter sequence of introductory biology for science students. Introduction to the study of the structure and function of plants and animals and how they cope with varying environmental conditions. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)

Prerequisites
Biol 222 (minimum 2.0)

Course Outcomes
- Read, correctly interpret, and critically evaluate biological information in books, journals, online resources, and the popular media.
- Explain and give examples of the basic themes and concepts of plant form and function including structure, growth and development, resource acquisition and transport, soil and nutrition, reproduction and related technology, and responses to internal and external signals.
- Explain and give examples of the basic themes and concepts of the basic principles of animal form and function including comparative anatomy and physiology related to nutrition, circulation and gas exchange, immunity, osmoregulation and excretion, endocrine function, and reproduction and development.
- Explain and give examples of the basic themes and concepts of comparative anatomy and physiology of animal nervous systems, sensory and motor mechanisms, and the fundamentals of animal behavior.
- Explain and give examples of the evolution and diversity of plants and fungi.
- Apply quantitative analysis to solve problems in hypothetical and real situations.
- Demonstrate ability to process information and experiences in the form of laboratory write-ups and project presentations to convey findings of library research and/or scientific inquiry using appropriate language, format, and graphical methods.
- As a group (3-6 students) design and conduct a scientific exploration, interpret results, and explain findings in a logical and appropriate manner using critical thinking and problem solving skills.
- Describe connections of the covered concepts of biology to their local environments, possible future careers, and daily lives.

BIOL 241: Human Anatomy & Physiology I with Lab
Credits  5
Quarter Offered  Fall, Winter
Structure and function of the human body. Homeostasis; tissues; integumentary, skeletal, nervous, and muscular systems. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)

Prerequisites
Eligibility for both ENGL 101 and MATH 90; 2.0 or higher in BIOL 160 or BIOL 222

Course Outcomes
- Explain and give examples of the basic themes and concepts of the cells, including basic cell chemistry, properties of water and pH, basic organic chemistry, and properties of organic macromolecules, cell structure and function, membrane structure and function, metabolism and enzyme function, respiration and fermentation, photosynthesis, cell communication, and mitosis.
- Use and define descriptive anatomical and directional terminology such as anatomical position, directional terms, sections, body cavities and regions, and body membranes.
- Explain and give examples of the four types of tissues found in the human body, their functions, and which organs they make up.
- List the general functions of, describe the gross and microscopic anatomy of, and explain the physiological functions of the following systems of the human body: integumentary, skeletal, nervous, muscular, and special senses.
- Explain and give examples of select pathologies of each system and drugs used to treat them.
- Demonstrate ability to process information and experiences in the form of laboratory presentations to convey findings of internet and/or text research using appropriate language.
- Describe connections of the covered concepts of biology to their local environments, possible future careers, and daily lives.

BIOL 242: Human Anatomy & Physiology II with Lab
Credits  5
Quarter Offered  Winter, Spring
Cardiovascular system; lymphatic system; immunology; respiratory system; digestive system; metabolism; urinary system; endocrine system; reproductive system; and genetics. This class may include students from multiple sections. (Elective)
Prerequisites
Eligibility for both ENGL& 101 and MATH 90; 2.0 or higher in BIOL & 241

Course Outcomes
Explain and give examples of the basic themes and concepts of the cells, including basic cell chemistry, properties of water and pH, basic organic chemistry, and properties of organic macromolecules, cell structure and function, membrane structure and function, metabolism and enzyme function, respiration and fermentation, photosynthesis, cell communication, and mitosis.
Use and define descriptive anatomical and directional terminology such as anatomical position, directional terms, sections, body cavities and regions, and body membranes.
List the general functions of, describe the gross and microscopic anatomy of, and explain the physiological functions of the following systems of the human body: cardiovascular (including blood), lymphatic, immune, respiratory, digestive, urinary, endocrine, and reproductive.
Explain and give examples of the principles of metabolism, fluid, electrolyte, and acid-base balance, pregnancy and development, and genetics.
Explain and give examples of select pathologies of each system and drugs used to treat them.
Demonstrate ability to process information and experiences in the form of laboratory presentations to convey findings of internet and/or text research using appropriate language.
Describe connections of the covered concepts of biology to their local environments, possible future careers, and daily lives.

BIOL & 260: Microbiology with Lab
Credits 5
Quarter Offered Spring
Introduction to bacteria, viruses, and other microorganisms. Includes microbial structure, metabolism, genetics, ecology, technological applications, microbial diseases of humans, immunology, public health, and medical control strategies. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)

Prerequisites
Eligibility for both ENGL& 101 and MATH 90; 2.0 or higher in BIOL & 160 or BIOL & 222

Course Outcomes
Discuss the structural features of bacteria, viruses, and prions, and how those features are related to mechanisms of infection.
Discuss how strategies such as disinfection and pasteurization are used to control microbial growth.
Discuss how mutations coupled with rapid growth support the emergence of multidrug-resistant pathogens.
Explain how recombinant DNA technology can be used to produce large quantities of human proteins in bacteria for further study.
Discuss the importance of arthropod vectors (mosquitoes, e.g.) in transmission of malaria and other diseases.
Explain the fundamental differences between the innate and adaptive immune systems and the advantages/disadvantages of each.
Discuss the general mechanisms by which pathogens cause damage to the host, and be able to explain the difference between exotoxins and endotoxins.
Explain how immunoassays are used to detect the presence of particular pathogens, and why it is useful to know the identity of the infectious microbe.
Discuss the principles of transmission of disease including the importance of portals of exit, portals of entry, and reservoirs of infection.
Demonstrate the ability to use the CDC website, including the Morbidity and Mortality Weekly Report (MMWR), to learn about infectious diseases.

BIOL 150: Introduction to Marine Biology with Lab
Credits 5
Quarter Offered Spring
Hands-on approach utilizing facilities at local marine laboratory, field trips, and group projects to learn biological concepts relevant to marine biology. Emphasis on local organisms and ecology. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)

Prerequisites
Eligibility for both ENGL& 101 and MATH 90

Course Outcomes
Apply fundamental ecological principles to explain biodiversity, ecosystem processes, and human effects on ecosystems processes in the marine environment.

Explain common life processes of metabolism, photosynthesis, and homeostasis as applied to the marine environment.

Differentiate among various taxonomic groups of marine autotrophs, invertebrates and vertebrates based on physical characteristics.

Interpret observations of form of various marine organisms across taxonomic ranks in light of their function (physiological and ecological) and evolutionary history.

Identify common fundamental methods of scientific inquiry (e.g. observation; hypothesis creation; simple study design; development and implementation of study protocols; data collection and analysis; drawing conclusions; and communicating scientific findings) within existing marine biology research examples.

Apply fundamental scientific inquiry to a novel question in marine biology that produces a complete study including presentation of results (written and oral presentation).

Demonstrate how physical properties of the ocean (geology, physical oceanography) affect marine organisms and how they help define marine ecosystems.

Critically evaluate current information surrounding a regional marine environmental issue in order to present an informed point of view on that topic, along with possible realistic solutions.

**BIOL 161 : General Biology I with Lab**

**Credits** 5

First course in the two-quarter sequence of introductory biology for forestry students. Topics include cell structure and function, cellular energy metabolism, photosynthesis, genetics, and various facets of zoology, including anatomy and physiology, physiological ecology, and development. Current research will be used to illustrate the scientific and social importance of these topics. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)

**Prerequisites**
Eligibility for both ENGL& 101 and MATH 90

**Course Outcomes**

- Conduct a scientific exploration in a logical and appropriate manner.
- Correctly read and interpret biological information in books, journals and the media.
- Understand the basic themes and concepts of the cellular basis of life.
- Understand the basic themes, concepts, and applications of molecular biology.
- Understand the basic themes and concepts of organismal biology, with the main focus on animals.
- Understand the following five central themes relating to organismal biology:
  - How are organisms built?
  - How do organisms obtain and use nutrients and energy?
  - How do organisms transport fluids internally?
  - How do organisms sense and respond to the environment (internal and external)?
  - How do organisms develop and reproduce?
- Understand and become familiar with how animals have adapted to the challenges they face in nutrition, respiration, water balance, excretion, monitoring internal and external environments, movement and reproduction.
- Process information and experiences in the form of lab write-ups and projects, and demonstrate an ability to synthesize concepts, facts and ideas into coherent, independent work.
- Discuss and express ideas and information, applying what they have assimilated from readings, laboratory experiences and field work.
- Build a foundation for further study and educated decision-making in biology.
- Connect the overall concepts of biology to their local environments and daily lives.

**BIOL 162 : General Biology II with Lab**

**Credits** 5

Second course in the two-quarter sequence of introductory biology for forestry students. Topics include plant growth and survival, photosynthesis, and plant/ environmental interactions, evolution and diversity of living plants and animals, fundamentals of ecology, and conservation biology. Current research will be used to illustrate the scientific and social importance of these topics. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)

**Prerequisites**
Eligibility for both ENGL& 101 and MATH 90
**Course Outcomes**

Conduct a scientific exploration in a logical and appropriate manner.
Correctly read and interpret biological information in books, journals and the media.
Understand the basic themes and concepts of organismal biology, with the main focus on plants.
Understand the following five central themes relating to plant organismal biology:
- How are organisms built?
- How do organisms obtain and use nutrients and energy?
- How do organisms transport fluids internally?
- How do organisms sense and respond to the environment (internal and external)?
- How do organisms develop and reproduce?
Understand and become familiar with how plants have adapted to the challenges they face in nutrition, respiration, water balance, excretion, monitoring internal and external environments, movement and reproduction.
Understand the basic themes and concepts of ecology, including the scope of ecology, abiotic and biotic factors, ecology of individuals, interactions, population ecology, community ecology, ecosystems, landscape ecology, global ecology, succession, and conservation biology.
Understand the basic themes and concepts of genetics, including Mendelian and non-Mendelian genetics, Hardy-Weinberg equilibrium, and the New Synthesis.
Understand the basic themes and concepts of evolution, including natural selection, sexual selection, genetic drift, gene flow, mutation, microevolution, and macroevolution.
Process information and experiences in the form of lab write-ups and projects, and demonstrate an ability to synthesize concepts, facts and ideas into coherent, independent work.
Discuss and express ideas and information, applying what they have assimilated from readings, laboratory experiences and field work.
Build a foundation for further study and educated decision-making in biology.
Connect the overall concepts of biology to their local environments and daily lives.

**BIOL 250 : Introduction to SCOPE Capstone Project**

**Credits** 2

**Quarter Offered** Fall

SCOPE capstone projects are opportunities for you to actively partake in an authentic undergraduate research experience that explores some aspect of the science and culture of the Olympic Peninsula. This course begins by examining a variety of undergraduate research experiences (or REUs) in regional natural and cultural resources as a way of exploring topics for student capstones. By the end of this course, students will have selected a project topic and developed a capstone proposal with a realistic scope and timeline. Capstone projects continue for 3 quarters and allow in-depth exploration. Recommended that this course be taken concurrently with BIOL 299: Field Methods in Ecology. This class may include students from multiple sections.

(Elective)

**Prerequisites**

- ENGL& 101 and eligibility for MATH 98 required

**Course Outcomes**

Describe how knowledge of regional natural sciences is conveyed through several scientific and cultural/regional perspectives.
Develop a research question of interest and outline a method for answering that question. Field research and internships are emphasized, however literature, arts and other humanities methods are also encouraged.
Create a capstone timeline that spans several academic quarters and culminates with a presentation of findings in a public setting.

**BIOL 277 : Field Investigative Nearshore I**

**Credits** 1

-4

**Quarter Offered** Summer

Students will earn credit for participating in collaborative, multiagency project administered by Coastal Watershed Institute. (Elective)

**Prerequisites**

Instructor permission
BIOL 278: Field Investigative Nearshore II
Credits 1
Quarter Offered Fall
Students will earn credit for participating in collaborative, multiagency project administered by Coastal Watershed Institute. (Elective)
Prerequisites
Instructor permission

BIOL 283: Native Plant Propagation: Fall
Credits 2
Quarter Offered Fall
Learn how to propagate native plants for local restoration projects. Through hands on training, students will propagate native plants from seed and live cuttings. Plants produced for this class will be used for various revegetation projects on the Olympic Peninsula. BOT 101 recommended but not required. This class may include students from multiple sections. (Elective)
Prerequisites
Eligibility for both ENGL& 101 and MATH 90
Course Outcomes
Understand the complexities of running a native plant nursery.
Describe basic seed ecology including seed dispersal mechanisms, seed dormancies and types of fruiting bodies common in the Pacific Northwest. Apply that knowledge to a novel assignment.
Demonstrate an ability to identify native species for seed collection.
Demonstrate specific seed and fruit preparation techniques correctly and apply them to specific plant types.
Assess the quality of various references and will synthesize information from various sources into cohesive written products. Students will be able to distinguish credible and current resources from less reliable ones.

BIOL 284: Native Plant Propagation: Winter
Credits 2
Quarter Offered Winter
Learn how to propagate native plants for local restoration projects. Through hands on training, students will propagate native plants from seed and live cuttings. Plants produced for this class will be used for various revegetation projects on the Olympic Peninsula. BOT 101 and BIOL 283 recommended but not required. This class may include students from multiple sections. (Formerly BIOL 291E, Elective)
Prerequisites
Eligibility for both ENGL& 101 and MATH 90
Course Outcomes
Understand the complexities of running a native plant nursery.
Demonstrate an ability to propagate native trees and shrubs from hardwood cuttings.
Analyze germination rates and determine the most effective seed stratification method for a variety of native plant species.
Develop plant propagation plans for a restoration project.

BIOL 285: Native Plant Propagation: Spring
Credits 2
Quarter Offered Spring
Learn how to propagate native plants for local restoration projects. Through hands on training, students will propagate native plants from seed and live cuttings. Plants produced for this class will be used for various revegetation projects on the Olympic Peninsula. BOT 101 recommended but not required. This class may include students from multiple sections. (Formerly BIOL 291C, Elective)
Prerequisites
Eligibility for both ENGL& 101 and MATH 90
Course Outcomes
Understand the complexities of running a native plant nursery.
Demonstrate an ability to care for young seedlings of native species in a working native plant nursery.
Demonstrate proper fertilization and watering techniques for native seedlings.
Formulate potting soils for a variety of native species relative to their ecological needs.
Develop a planting plan for a restoration project.

BIOL 286: Elwha Restoration Research
Credits 3
Quarter Offered Spring
Elwha Ecosystem Restoration, the second largest restoration project ever undertaken by the National Park Service, presents unique opportunities to learn about forest development and restoration assessment techniques in the Pacific Northwest. Olympic National Park implemented an unprecedented re-vegetation program in conjunction with dam removal, planting over 300,000 trees and shrubs to accelerate forest development in the former reservoirs. Understanding how planting efforts influence forest succession is critical to future dam removal and other salmon restoration projects. Learn how to conduct scientific surveys of restoration sites, identify native and non-native trees and shrubs in the winter, organize and manage data and identify factors driving forest development. BOT 101 and BIOL 285 recommended but not required. This class may include students from multiple sections. (Formerly BIOL 291D, Elective)

Prerequisites
Eligible to enroll in 100 level MATH with MATH 90 or MATH 98 as a prerequisite

Course Outcomes
Identify important native and non-native tree and shrub species in the winter.
Understand how native forests develop and how restoration can influence forest succession.
Demonstrate how to navigate in a field setting with compass and field GPS units.
Compare the strengths of different scientific survey methods to assess young forest stands and restoration sites.
Organize and evaluate scientific survey data and assess the strengths and limitations of the data they collect.
Demonstrate how the process of science is used to answer scientific questions.
Clearly communicate the results of a scientific study in written form.

BIOL 287: Field Investigations in Nearshore Topics III
Credits 1
Quarter Offered Winter
Students will earn credit for participating in collaborative, multiagency project administered by Coastal Watershed Institute. (Elective)

Prerequisites
Instructor permission

BIOL 288: Field Investigations in Nearshore Topics IV
Credits 1
Quarter Offered Spring
Students will earn credit for participating in collaborative, multiagency project administered by Coastal Watershed Institute. (Elective)

Prerequisites
Instructor permission

BIOL 290-294: Undergraduate Research in Biology
Credits 1
Quarter Offered Occasionally
Students serve as active members on research teams working to advance knowledge in biological science. Dependent upon the project, students will participate in hypothesis formation, experimental design, data collection, analysis, and determination of conclusions. This class may include students from multiple sections. (Elective)

Prerequisites
Prerequisites determined by instructor

**BIOL 299: Field Methods in Ecology**

**Credits** 2

**Quarter Offered** Fall

This course will introduce students to common field methods used in ecological studies through field data collection in local areas. Students will learn how to measure and evaluate field studies data including vegetation/restoration studies, wildlife monitoring (invertebrates, birds, other), and water quality of aquatic systems (freshwater and marine). The course will cover the field research process, from question development to results. **BIOL& 100** or **BOT 101** recommended but not required. This class may include students from multiple sections. (Elective)

**Prerequisites**
**ENGL& 101** or concurrent enrollment; eligibility for **MATH 98**

**Course Outcomes**
Describe and critique the strengths and weaknesses of some basic scientific survey methodologies including:
- **Vegetation:** cover class surveys, line-intercepts, frequency surveys, stem counts, measuring DBH and tree heights.
- **Wildlife:** mark/recapture, plot studies, some invertebrate trapping, bird identification.
- **Aquatic systems:** intertidal monitoring techniques, stream benthic invertebrates and water quality sampling.

Demonstrate a basic ability to use GPS field units to find a point on a map.
Identify/suggest potential appropriate survey methods to novel scientific field research questions.
Enter data accurately into a spreadsheet, check for accuracy, and generate a table or graph from the data using common digital software programs.
Botany (BOT)

**BOT 100 : Plants of the Pacific Northwest**
- **Credits** 3
- Introduction to flowering plants, conifers, ferns, and mosses of the Pacific Northwest, with emphasis on identification, life history, ecological relationships, and distribution. Two Saturday field trips required. This class may include students from multiple sections. (Elective)
- **Prerequisites**
- Eligibility for both ENGL& 101 and MATH 90
- **Course Outcomes**
  - Describe how plants are classified utilizing general principals of taxonomy.
  - Identify regionally important plants by both common and scientific names.
  - Describe vegetative and reproductive morphology.
  - Differentiate how variation plays a role in plant identification.

**BOT 101 : Introduction to Botany with Lab**
- **Credits** 5
- **Quarter Offered** Spring
- Introduction to general plant biology. Anatomy, physiology, and diversity of common protists, fungi, and plants, with emphasis on plants of the Pacific Northwest. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)
- **Prerequisites**
- Eligibility for both ENGL& 101 and MATH 90
- **Course Outcomes**
  - Distinguish among the various major groups of plants and identify why they are categorized as so.
  - Diagram or describe key plant processes such as photosynthesis, respiration, transpiration.
  - Identify some common native plants by common and sometimes scientific names.
  - Explain some of the key relationships between plants and people including ecosystem services, agriculture, wood production, ethnobotany.
  - Interpret data collected from botanical inquiry.
  - Analyze and communicate (verbally and orally) the results of a scientific study.
  - Discuss some of the ecological dilemmas related to the plant kingdom and evaluate potential solutions.
  - Safely and correctly use lab equipment such as microscopes.
  - Demonstrate the ability to collect field data and use field equipment and tools correctly (such as dichotomous keys, GPS, compass).
  - Accurately record, in detail, lab specimens in order to illustrate key characteristics of plant structures and compare and contrast characteristics.
  - Use library resources to support a research objective in an independent project.
  - Approach unknown questions with a critical eye. Able to apply acquired knowledge to novel questions or challenges.
BUS Administration (BUS/BUS&)

BUS& 101 : Introduction to Business

Credits 5
Quarter Offered Fall, Winter, Spring, Summer
Introduction to business systems, processes, and the general business environment. Students explore marketing, management, finance, accounting, business law, information technology, human resources, entrepreneurship, and emerging business topics. This class may include students from multiple sections. (Elective)
Course Outcomes
- Explain the functions of production, marketing, management, human resources, accounting, finance, and technology in business.
- Identify ethical and societal challenges in business scenarios.
- Describe the nature of the general (macro) and specific (micro) economic forces shaping the global environment of business and decision-making.
- Summarize the process of starting a new venture.
- Describe the features of a successful business plan.

BUS& 201 : Business Law

Credits 5
Quarter Offered Winter
Introduction to the fundamentals of business law and the principles of the American legal system including criminal, tort, and business law, contracts, sales, Uniform Commercial Code, and employment. Familiarity with Washington's RCWs (Revised Codes of Washington) and WACs (Washington Administrative Codes) emphasized through researching regional business law cases. This class may include students from multiple sections. (Elective)
Course Outcomes
- Exhibit critical thinking and knowledge in the legal environment.
- Describe the basic structure and principles of the American legal environment.
- Critique ethical issues in business, including their legal implications.
- Analyze rights, obligations and legal principles involved with business decisions.
- Apply business and legal principles when analyzing opening or managing a business scenarios.
- Identify options and apply sound business and legal principles to avoid or mitigate lawsuits.

BUS 110 : Small Business Planning

Credits 5
Designed for those who are thinking about starting their own business or who wish to expand an existing small business. Focus is on the basics of how to run a business. Students will create a business plan for a business of their choice that includes sections on business form, production, management, marketing, and financials. This class may include students from multiple sections.
Course Outcomes
- Understand the nature of small business and the role it plays in the makeup of business in the United States and throughout the global economy.
- Understand the nature of entrepreneurial opportunities.
- Understand the rewards and drawbacks of entrepreneurship.
- Define the characteristics of an entrepreneur.
- Differentiate among the four routes to entrepreneurship: the family business; the franchise; the startup; and, the purchase of an existing business.
- Understand the concept of competitive advantage.
- Select strategies to gain competitive advantage.
- Understand the role of a business plan in a business.
- Prepare a business plan, including its research and writing.
- Develop a marketing plan for a business.
- Understand the theories and concepts of management and be able to employ them in a small business.
- Select a management team.
- Understand the four basic forms of business and be able to choose one for a new business.
- Understand how to prepare income tax reports for al forms of business.
Select locations for, and plan the facilities of, various types of small businesses, including home-based businesses.
Understand and be able to create accounting statements for various types of small businesses.
Research and create financial forecasts for a small business.
Locate and access public and private sources of funding for a small business, including both debt and equity capital.
Understand the process of consumer decision-making.
Understand and apply the tenets and processes of customer satisfaction.
Understand social and ethical issues affecting small business and be able to choose socially responsible courses of action for a small business related to those issues.
Identify public and private sources of small business management assistance and how to access and use those sources when needed.
Know how to recruit, hire, train, compensate and motivate employees.
Understand and apply state and federal human resource laws and regulations.
Understand and be able to apply the tenets and processes of Total Quality Management.
Understand diverse small business computer systems and be able to choose appropriate hardware and software.
Understand and be able to choose appropriate insurance coverage for small business needs.
Know how to value a business.
Understand the importance and methods of harvesting (exit strategies) and be able to choose an appropriate strategy.
Understand the personal problems of life after the harvest.

BUS 135 : Bookkeeping Small Business Foundations
Credits 6
Quarter Offered Fall
Learn the fundamentals of small business accounting and bookkeeping. Topics include analyzing transactions, inventories, receivables, and cash flow, financial statement analysis, budgeting, product pricing and capital investment analysis. Review and implement key accounting concepts and procedures including setting up new company, establishing a chart of accounts, beginning balance, customers, vendors and product/services. Recording operating activities: sales and cash receipts, purchases and cash payments, investing and financing activities, as well as payroll. Establishing budgets and preparing bank reconciliations, analysis and recording of adjusting entries, and preparation of financial statements and reports. This class may include students from multiple sections.

Course Outcomes
Compare the functions of accounting in small business and the role of accounting information in making economic decisions.
Analyze the processes for managing and tracking inventory transactions and sales.
Explain the importance of accounting information within the company, primarily management in financial performance for a period of time in terms of the relationship of revenues and expenses.
Create a ledger, explain double-entry system of accounting and the purpose of a journal and its relationship to the ledger.
Articulate the nature of net income, revenue, and expenses.
Prepare a bank reconciliation and explain its purpose.
Identify what matters in a great business plan, and characteristics of entrepreneurial leaders
Adopt lean startup practices such as business model experimentation.

BUS 205 : Principles of Management
Credits 5
Quarter Offered Winter
An introduction to management concepts, including topics of planning, organizing, leading, managing, and motivating available human resources and business assets to optimally and ethically accomplish performance goals. This class may include students from multiple sections.

Course Outcomes
Explain and apply the four primary functions of management and how they apply in the operations of a modern enterprise.
Analyze the ways managers make decisions with regards to planning and controlling business operations.
Differentiate and evaluate common organizational structures and their affect on company culture.
Summarize the key motivational factors influencing individual or team performance and how a manager applies these in a leadership role.
Evaluate the importance of diversity in small, local businesses vs. large global businesses.
Appraise the importance of entrepreneurism in the modern business environment.

BUS 210 : Business Planning
Credits  5
Quarter Offered  Fall
This course introduces the fundamental considerations of starting and growing a business. Topics include entrepreneur readiness, operational planning, market planning, and cash flow forecasting. This class may include students from multiple sections.
Course Outcomes
- Describe the responsibilities and requirements of owning and operating one’s own business.
- Describe the core functions of a business.
- Create a comprehensive marketing plan.
- Develop pro-forma financial statements projected for one year.
- Analyze financial statements to develop a business strategy.
- Create a comprehensive business plan.

BUS 220 : International Business
Credits  5
Quarter Offered  Fall
This course examines the basics of international business through social, economic, political, and cultural systems perspectives. Topics include foundation concepts, the international business environment, ethics in international business, theories of international trade, emerging markets, and international business strategy. Planning and organizing international operations are integrated with the study of analyzing international business opportunities. This class may include students from multiple sections.
Course Outcomes
- Identify and apply strategic solutions to emerging issues in global business and the processes of globalization.
- Describe the key concepts influencing international business.
- Recognize and analyze the multi-cultural and political issues affecting globalization.
- Identify and analyze the basic characteristics of a culture and its impact on business.
- Develop the basic skills for conducting research for evaluating business opportunities existing in international settings.
- Formulate international market penetration strategies.

BUS 245 : Entrepreneurship and New Innovation
Credits  5
Quarter Offered  Winter
Learn how to become a small business owner. Students will analyze entrepreneurship and perspectives for success in their chosen field or service. Class features business scenario simulations as a key component to entrepreneurialism and start up. Other topics include entrepreneurship life, commitment to integrity, quality performance, innovation, motivations of owning a business, and influences on decision making. This class may include students from multiple sections.
Course Outcomes
- Analyze the importance of small businesses and entrepreneurism in our society.
- Distinguish among the different types and sources of start-up ideas.
- Identify what matters in innovative thinking to generate ideas for business start-ups.
- Describe the characteristics of successful entrepreneurial leaders.
- Develop a business marketing plan.
- Forecast sales and competitive advantages for specific businesses.
- Articulate types of compensation plans, including the use of incentive plans and their use in lean startup practices such as business model experimentation.

BUS 247 : Payroll and Business Taxes
Credits  5
Quarter Offered  Fall
A study of current payroll and Washington State excise tax laws, record keeping requirements, preparing payrolls, payroll reporting, and accounting procedures. Addresses such issues as excise tax and business taxes, employee vs independent contractor, Fair Labor Standards Act, and statutory federal and state reporting requirements. Uses computer-simulation software. This class may include students from multiple sections.

**Course Outcomes**
- Identify and summarize federal and statement employment laws.
- Describe and demonstrate required payroll record keeping procedures.
- Calculate gross payroll, payroll deductions, and net payroll.
- Compute the federal and state payroll taxes and prepare payroll tax reports.
- Journalize the entries to record the payroll and payroll taxes.
- Describe the Washington State Business & Occupation Tax rules and required reporting.

**BUS 250 : Operations Management**

**Credits** 5  
**Quarter Offered** Spring, Summer  
Designed to present operations management tools that can be used to develop a competitive advantage in commercial environments. Topics will be studied using an operations management framework: Introduction to operations management thinking, strategic and operational planning, ethical issues, organizational controls and tools, risk management, and the role of technology in operations management. This class may include students from multiple sections.

**Course Outcomes**
- Identify and apply the various elements that comprise the field of operations management (OM).
- Critique new and evolving concepts within OM.
- Select and use OM tools and concepts that can be applied to a wide variety of situations, including non-OM related areas.
- Analyze the relationship between OM and other management functions within an organization.
- Develop a strategy to use OM tools in solving common manufacturing and service industries operations.

**BUS 270 : Management Information Systems**

**Credits** 5  
**Quarter Offered** Spring  
Introduces the fundamental concepts about management information systems and the integral role they play in a successful business. Course objectives embrace the notion that management of a modern organization requires knowledge of information systems to gain a competitive advantage, defining what they are, how they affect the organization and its employees, their strategic importance, and the role of emerging technologies in business processes. Students will develop and demonstrate proficiency in the use of key business application technologies. This class may include students from multiple sections.

**Course Outcomes**
- Describe how the components of an information system in a digital world are used in managing a competitive business.
- Explain how enterprise applications, collaboration and communication systems, and intranets improve organizational performance.
- Describe what ethical, social, and political issues are raised by information systems.
- Define IT infrastructure and its components. Identify current trends in hardware and software.
- Describe the principal tools and technologies for accessing information from databases to improve business performance and decision making.
- Define the components of an organizational framework for security and control.
- Demonstrate competency in Microsoft Word, Excel, and PowerPoint or in a comparable open source office suite software application.

**BUS 280 : Managerial Finance**

**Credits** 5  
**Quarter Offered** Spring  
Focuses on maximizing economic value or wealth for business owners: a study of how to allocate scarce resources over time under conditions of uncertainty. Students will consider such financial decisions as when to introduce a new product, when to invest in new assets, when to replace existing assets, when to borrow from
banks, when to issue stocks or bonds, and how much cash to maintain. Concepts of cash flow analysis and financial planning, time value of money, net present value of cash flows, valuation of stocks and bonds, capital budgeting, and ratio analysis will be explored. This class may include students from multiple sections.

**Prerequisites**
Completion of ACCT& 202 and ENGL& 101

**Course Outcomes**
- Describe the concept of finance, financial assets, and financial markets.
- Explain and apply the mechanics of time value of money.
- Describe and apply risk and return concepts.
- Calculate the value of various financial assets.
- Determine whether a new project should be accepted or rejected using capital finance tools.
- Define and measure the expected rate of return of an individual investment.
- Describe and apply working capital management tools.

**BUS 282: Principles of Marketing**

**Credits** 5

**Quarter Offered** Fall

Examines the role of marketing in general business activities. Students will learn the marketing process that develops products and services, methods and techniques of market research, target markets, market segmentation, product planning, distribution, pricing, and promotion. This class may include students from multiple sections.

**Course Outcomes**
- Explain the purpose of marketing and evaluate the ethical, economic, and social factors involved in the modern marketing environment.
- Describe the concepts behind the strategic functions of marketing.
- Analyze concepts behind the strategic functions of marketing.
- Evaluate concepts behind the strategic functions of marketing.

**BUS 283: Human Resources Management**

**Credits** 5

**Quarter Offered** Winter, Summer

A broad introduction to Human Resources Management (HRM.) HRM is the implementation of organizational behavior knowledge to effectively manage people at work. Specific topics include legal issues, job analysis, recruiting and selection, performance appraisal, compensation, benefits, training and development, and career planning. This class may include students from multiple sections.

**Course Outcomes**
- Develop skills and knowledge in planning strategic Human Resources (HR) policies.
- Describe the equal opportunity and legal environment and apply solutions to HR scenarios.
- Explain how to manage effective staffing and employee separations and formulate HR strategies.
- Design practices for managing the training process.
- Describe an effective compensation and benefits strategy.
- Explain how to encourage effective communications.
- Identify employer’s responsibilities in discipline and safety.

**BUS 290: Internship in Business**

**Credits** 1-5

Provides opportunities to assume the role of employees in a business and gain practical experience prior to paid employment. This class may include students from multiple sections.

**Prerequisites**
Instructor permission

**Course Outcomes**
- Participate in a structured work experience related to the program of study and/or career goal.
Provides opportunities to assume the role of employees in a business and gain practical experience prior to paid employment. This class may include students from multiple sections.

**Prerequisites**
Instructor permission

**Course Outcomes**
- Participate in a structured work experience related to the program of study and/or career goal.

**BUS 299: Integrated Study-Honors**

**Credits** 2
In this capstone honors course, students will complete a project relevant to their career pathway and program. The project will integrate at least two Business and IT programs (Business Administration, Administrative Office Systems, Multimedia Communications, Cybersecurity & Computer Forensics, or Information Technology) to provide breadth and relevance to the project. This class may include students from multiple sections.

**Prerequisites**
Completion of 60 credits in the BUS/IT program of study with a GPA of 3.5 or higher; and completion of the English course required in the BUS/IT program of study

**Course Outcomes**
- Complete a project relevant to learning pathway and program.
- Integrate Business and IT programs to provide breadth and relevance to the project.
Chemistry (CHEM&)

CHEM& 110 : Chemical Concepts with Lab
Credits 5
Quarter Offered Winter, Spring
Introduction to chemistry covering selected principles and their effect on ourselves and our environment. Intended for non-science majors wishing to improve their science literacy and develop a long-term interest in science. Includes online lab. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)
Prerequisites MATH 90 or higher; eligibility for ENGL& 101
Course Outcomes
- Communication - Distinguish between opinions, interpretations, and solid evidence.
- Quantitative Reasoning - Apply quantitative methods to characterize the behavior of chemical systems.
- Information - Identify and use appropriate reference materials to research a topic related to chemistry.
- Critical Thinking - Analyze data to explain chemical trends.
- Personal & Interpersonal - Synthesize course information and apply it to practical, everyday issues such as climate change, acid rain, air and water pollution, and limited resources on Planet Earth.

CHEM& 121 : Introduction to Chemistry with Lab
Credits 5
Quarter Offered Fall, Winter, Spring
For individuals with little or no chemistry background. Atomic nature of matter, chemical bonding, periodic table, chemical reactions, phases of matter, solutions, equilibrium, reaction rates, and nuclear reactions. Includes laboratory. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)
Prerequisites Completion of MATH 90 or higher; eligibility for ENGL& 101
Course Outcomes
- Communication - Distinguish between opinions, interpretations, and solid evidence with regard to chemical systems.
- Quantitative Reasoning - Apply quantitative methods to characterize physical and chemical changes (phases, kinetics, reactions, and equilibrium).
- Information - Utilize the scientific method to explore chemical systems.
- Critical Thinking - Describe chemical systems in terms of structural composition and changes.
- Personal & Interpersonal - Define chemistry as a scientific study of matter and its impact on society and everyday life.

CHEM& 131 : Intro to Organic/Biochemistry with Lab
Credits 6
Quarter Offered Spring
Presents organic chemistry and biochemistry, with emphasis on functional groups, synthesis, and biochemical applications. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)
Prerequisites Eligibility for ENGL& 101; MATH 98 or higher; 2.0 or higher in high school chemistry or CHEM& 121; or instructor permission
Course Outcomes
- Communication - Distinguish between opinions, interpretations, and solid evidence with regard to chemical and biochemical systems.
- Information - Utilize the scientific method to explore chemical and biochemical systems.
- Critical Thinking - Explain organic reactions and biochemical pathways using functional groups.
- Personal & Interpersonal - Define chemistry as a scientific study of matter and its impact on society and everyday life.

CHEM& 161 : General Chemistry with Lab I
Credits 5
Quarter Offered Fall
For science and engineering majors. This course focuses on the fundamentals of chemical structures: atomic nature of matter, atomic structure, periodic trends, quantum concepts, molecular structure, and chemical reactions. Three hours of lecture and four hours of laboratory. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)

**Prerequisites**
Eligibility for ENGL& 101; MATH 98 or higher; or instructor permission

**Course Outcomes**
- Communication - Distinguish between opinions, interpretations, and solid evidence with regard to chemical systems.
- Quantitative Reasoning - Apply quantitative methods to characterize chemical structures (electronic transitions and reaction stoichiometry).
- Information - Utilize the scientific method to explore chemical systems.
- Critical Thinking - Describe chemical structures in terms of composition and geometry.
- Personal & Interpersonal - Define chemistry as a scientific study of matter and its impact on society and everyday life.

**CHEM& 162 : General Chemistry with Lab II**
**Credits** 5
**Quarter Offered** Winter
This course focuses on physical and chemical interactions: intermolecular forces, properties of mixtures, gas laws, and thermodynamics. This course builds on the content developed in CHEM& 161. Three hours of lecture and four hours of laboratory. This class may include students from multiple sections. (Elective)

**Prerequisites**
2.0 or higher in CHEM& 161 or instructor permission

**Course Outcomes**
- Communication - Distinguish between opinions, interpretations, and solid evidence with regard to chemical systems.
- Quantitative Reasoning - Apply quantitative methods to characterize physical and chemical changes (gas laws and thermodynamics).
- Information - Utilize the scientific method to explore chemical systems.
- Critical Thinking - Describe chemical systems in terms of structure and energy.
- Personal & Interpersonal - Define chemistry as a scientific study of matter and its impact on society and everyday life.

**CHEM& 163 : General Chemistry with Lab III**
**Credits** 5
**Quarter Offered** Spring
This course focuses on the quantitation of dynamic chemical systems: equilibrium, acid-based reactions, electrochemistry, kinetics, and nuclear reactions. This course builds on the content developed in CHEM& 162. This class may include students from multiple sections. (Elective)

**Prerequisites**
2.0 or higher in CHEM& 162 or instructor permission

**Course Outcomes**
- Communication - Distinguish between opinions, interpretations, and solid evidence with regard to chemical systems.
- Quantitative Reasoning - Apply quantitative methods to characterize dynamic chemical systems (equilibrium, electrochemistry, and kinetics).
- Information - Utilize the scientific method to explore chemical systems.
- Critical Thinking - Describe chemical systems in terms of composition and changes.
- Personal & Interpersonal - Define chemistry as a scientific study of matter and its impact on society and everyday life.

**CHEM& 241 : Organic Chemistry I**
**Credits** 4
First course for students planning to take three quarters of organic chemistry. Structure, nomenclature, reactions, and synthesis of the main types of organic compounds. No organic laboratory accompanies this course. This class may include students from multiple sections. (Elective)

**Prerequisites**
Course Outcomes
Understand structure and bonding in organic compounds including concepts of molecular hybridization theory, charge distribution, resonance, and stereochemistry.
Be able to name/recognize the functional groups associated with organic compounds; apply the rules of organic nomenclature.
Use knowledge of acid/base theory, electronic effects and steric effects to predict/explain reactivity of organic compounds.
Use knowledge of intermolecular forces to predict/explain physical properties of organic compounds.
Apply knowledge of acid/base theory, electronic effect and steric effects to propose reasonable mechanisms for reactions.
Apply knowledge of reaction mechanisms for nucleophilic substitution, elimination, and addition reactions to predict/explain the outcome of a reaction.

CHEM& 242: Organic Chemistry II
Credits 4
Second course for individuals planning to take three quarters of organic chemistry. Further discussion of physical properties and transformations of organic molecules, especially aromatic and carbonyl compounds. This class may include students from multiple sections. (Elective)
Prerequisites 2.0 or higher in CHEM& 241 or instructor permission
Course Outcomes
Interpret patterns of reactivity for reactions of alkenes, alkynes, alkyl halides, alcohols, ethers, epoxides, radicals, and aromatic compounds, and provide electron-pushing mechanisms and multistep products where applicable.
Apply IUPAC nomenclature rules and predict trends in physical properties for simple organic molecules based on their functional groups.
Provide reagents or predict products for reactions of carbon nucleophiles.
Predict the relative energies of radicals and product distributions which arise from radical reactions, including an understanding of side reactions which occur.
Design syntheses of organic molecules of moderate complexity using multiple synthetic steps to produce the highest yield using the fewest steps and/or protecting groups.
Deduce molecular structures based on various spectroscopic techniques such as NMR, MS, and/or IR.
Apply knowledge of reaction mechanisms to predict/explain the outcome of a reaction.

CHEM& 243: Organic Chemistry III
Credits 3
Third course for individuals planning to take three quarters of organic chemistry. Polyfunctional compounds, lipids, carbohydrates, amino acids, proteins, and nucleic acids. This class may include students from multiple sections. (Elective)
Prerequisites 2.0 or higher in CHEM& 242 or instructor permission
Course Outcomes
Interpret patterns of reactivity for reactions of alcohols, carbonyl, and aromatic compounds, and provide electron-pushing mechanisms and multistep products where applicable.
Apply IUPAC nomenclature rules and predict trends in physical properties for simple organic molecules based on their functional groups.
Provide reagents or predict products for reactions of carbon nucleophiles, such as Grignard and Gilman reagents.
Apply resonance and/or molecular orbital theory in determining the stability of conjugated systems and predicting the product of conjugate addition reactions (1, 2- and 1,4- conjugate additions, cycloadditions, etc.)
Provide reagents or predict products for reactions at the alpha carbon.
Classify and identify basic biomolecules such as carbohydrates, amino acids, lipids, and nucleic acids.
Apply basic organic reactions in a biological context, as in the reactions of carbohydrates, amino acids, lipids, and nucleic acids.
Design syntheses of organic molecules of moderate complexity using multiple synthetic steps to produce the highest yield using the fewest steps and/or protecting groups.
Apply knowledge of reaction mechanisms to predict/explain the outcome of a reaction.

**CHEM& 252: Organic Chem Lab II**

*Credits 3*

Introduction to organic laboratory techniques and preparation of representative organic compounds. This class may include students from multiple sections. (Elective)

*Prerequisites*

2.0 or higher in [CHEM& 241](#) and concurrent registration in [CHEM& 242](#) or instructor permission

*Course Outcomes*

- Know and follow procedures for safe laboratory practice.
- Keep a detailed laboratory notebook as a record of experimental procedure and outcomes.
- Use knowledge of functional groups, electronic, and steric effects to predict/explain physical properties and reactivity of organic compounds.
- Apply basic purification and separation techniques such as crystallization, extraction, distillation, and chromatography.

**CHEM& 253: Organic Chem Lab III**

*Credits 3*

Preparation of representative organic compounds and qualitative organic analysis. This class may include students from multiple sections. (Elective)

*Prerequisites*

2.0 or higher in [CHEM& 242](#), concurrent registration in [CHEM& 243](#), or instructor permission

*Course Outcomes*

- Know and follow procedures for safe laboratory practice.
- Keep a detailed laboratory notebook as a record of experimental procedure and outcomes.
- Use knowledge of functional groups, electronic, and steric effects to predict/explain physical properties and reactivity of organic compounds.
- Effectively use laboratory techniques to synthesize, isolate, and purify samples, and assess the purity and yield of final products.
College Success (COLL)

COLL 101: College Success

Credits 5
Quarter Offered Fall, Winter, Spring, Summer

This course provides support, develops positive connections, and opens learning opportunities to help students identify and pursue their academic and career goals. Through a process of self-discovery, students cultivate a deeper understanding of themselves that highlights their unique strengths and identifies areas for growth. Students will also learn how to navigate college systems and understand its specialized vocabulary and procedures. Throughout, this course reassures students of all backgrounds and abilities that they belong. This class may include students from multiple sections. (Elective)

This class has a fee of $12.13.

Course Outcomes
- Create a student success plan that aligns personal, academic, and career interests.
- Demonstrate an understanding of learning preferences, motivation strategies, and campus resources.
- Analyze how inequity, power, and privilege impact one's lived experience.
- Apply personal wellness habits and strategies to maintain balance, manage stress, and improve health.
Commercial Driver's License (CDL)

CDL 100 : Commercial Driver's License A

Credits 10
This intensive 160 hour course will assist students with preparation for the written portion of the Commercial Driver's License at the Department of Licensing and prepare students for the driving test with a third-party Washington state tester. This class may include students from multiple sections.

Course Outcomes
Upon completion of this program, students will be able to:

- Safely operate a commercial vehicle.
- Inspect a commercial vehicle.
- Take the Washington State Commercial Driving Class A test.
Communication Study (CMST/CMST&)

CMST& 102: Intro to Mass Media
Credits 5
Quarter Offered Fall, Winter, Spring, Summer
Examines vital issues for people who use mass media or are affected by it. Emphasis on freedom of expression, censorship, fair trial, privacy, ethics, law, media economics, technology, effectiveness in communicating to audiences and relationships to social, cultural, and political values in the United States and throughout the world. This class may include students from multiple sections. (Humanities, Elective)

Course Outcomes
- Define basic principles of media ethics and media law.
- Recognize mainstream social, cultural, and political values and structures related to mass media.
- Recognize the roles of mass media to serve as information provider, entertainer, persuader, and transmitter of cultural values.
- Recognize the basics of media economics and the role of technology across the dynamics of international landscapes.
- Recognize and analyze how the individual must take responsibility for self learning and engagement in a democratic society that is dependent on mass media.

CMST& 210: Interpersonal Communication
Credits 5
Quarter Offered Winter, Spring
Interpersonal communication theory and practice is explored in this class in regards to both dyad and group settings. Communications process is explored through analysis of several areas, including: perception, listening, self disclosure, speech apprehension, ethics, nonverbal communication, conflict, power, and dysfunctional communication relationships. This class may include students from multiple sections. (Humanities, Elective)

Prerequisites
ENGL& 101 or instructor permission

Course Outcomes
- Demonstrate confidence in interpersonal encounters.
- Identify patterns in interpersonal communication processes.
- Identify patterns in nonverbal communication.
- Demonstrate listening skills, empathy, and the capacity to self-disclose.
- Identify and manage ethical dilemmas.
- Reflect on interpersonal communication concepts.
- Research and present on an area of interpersonal communication.
- Attend and actively participate in classroom activities and discussions.

CMST& 220: Public Speaking
Credits 5
Quarter Offered Fall, Winter, Spring
Explores classic and modern elements of persuasion and applies that understanding to assemble, deliver, and evaluate extemporaneous speeches. Eligibility for or concurrent enrollment in ENGL& 101 is recommended. This class may include students from multiple sections. (Humanities, Elective)

Course Outcomes
- Rehearse, outline, and present a variety of extemporaneous speeches.
- Analyze the rhetoric structure of argumentation.
- Respond critically to oral presentations by other students.
- Define rhetorical appeals and objectives.
- Develop a working outline of main idea including a thesis statement, introduction, and conclusion.
- Employ effective semantic selection.
- Demonstrate an understanding of verbal and non-verbal messages.
- Identify the four major goals of persuasion in speeches.
- Develop effective persuasive strategies that are appropriate to neutral and unfavorable audiences.
- Analyze a published modern speech using criteria of classic and modern elements of persuasion.
CMST 100: Introduction to Multimedia Journalism  
Credits 5  
In this course, students will be introduced to the various forms of professional communications. Students will create multimedia stories for web, radio/streaming/podcasting, online publications, and public relations. This class may include students from multiple sections. (Humanities, Elective)  
Course Outcomes  
- Write a clear and accurate media post and/or article.  
- Develop stories in a variety of media formats and publish them in that format, including blogs, web, and other publications.  
- Apply the ethics of journalism to professional communications, including blogs, web posts, and other publications.

CMST 103: Careers in Communications  
Credits 3  
Quarter Offered Fall, Winter  
Class explores the variety of careers available in professional communications across multiple fields of business, sales, public relations, and advertising. Class includes traditional internal and external communications and explores emerging roles in the field of mass communications. This class may include students from multiple sections. (Elective)  
Course Outcomes  
- Identify a range of careers available in professional, legacy, and emerging communication modalities.  
- Demonstrate rudimentary ability to use common, current modalities of professional communications.

CMST 121: Photojournalism I  
Credits 5  
Quarter Offered Fall, Spring  
Introduction to Photojournalism I Foundation class in use of cameras, lenses, light, composition, timing, and field techniques. Emphasis on news and feature photography with principles applicable to all visual communications, including video. Produce black and white photos for assignments, mass communications, including the students news service The Buccaneer. Provide own DSLR camera equipment or mobile device and USB drive for photo storage and field work. This class may include students from multiple sections. (Humanities, Elective)  
Course Outcomes  
- Identify and explain the controls of a 35 mm digital single lens reflex camera and flash and or other mobile device.  
- Identify a variety of light conditions and interpret their impacts on a given subject.  
- Identify aesthetic compositional devises that give a photo impact and interest.  
- Recognize the newsworthy qualities of an action, event or trend.  
- Develop a strategy for documenting a subject visually.  
- Plan, execute and assemble a photo story, or essay, including 4-7 points with accompanying text and captions.  
- Identify legal restrictions that inhibit photographic documentation.  
- Compose a caption that will interpret and explain an image’s content and context, understanding that it may be the deciding factor in a reader’s decision to start a story.  
- Gather relevant information to a photo subject in order to write an effective caption.  
- Demonstrate a working knowledge of photographic terms related to the camera, lens, design, and aesthetic composition.

CMST 122-123: Advanced Photojournalism II, III  
Credits 3  
Quarter Offered Fall, Spring  
Intermediate/advanced class applying professional standards of journalistic photography to practical field experience and digital imagery. Produce color photos for assignments, mass communications, including the students news service The Buccaneer. Provide own DSLR camera equipment or mobile device and USB drive for photo storage and field work. This class may include students from multiple sections. (Elective)  
Course Outcomes  
- Identify, categorize and defend a selection of newsworthy topics to photograph for the campus newspaper.  
- Analyze with a photo editor the best approach and photo treatment of an assignment.  
- Work independently to complete a photo assignment in the field.
Collaborate with other photographers to solve technical and aesthetic obstacles. Lead a discussion on the merits and weaknesses of an image in a group, peer critique. Demonstrate knowledge of color contrasts in visual journalism.

**CMST 150 : Introduction to Podcasting: A Voice in the Crowd**

**Credits** 5

**Quarter Offered** Fall, Winter, Spring

This hands-on, project-based course introduces students to the basics of storytelling through creating their own podcasts, exploring their own voices and the voices of their communities. Students will examine different narrative styles and podcast types as well as interview techniques. Students will apply this knowledge while learning to plan, create, and publish podcast episodes. They can expect to become proficient in pitching ideas for stories, recording and interviewing, storyboarding and writing scripts, as well as editing and crafting audio. Student may collaborate as groups or work individually to create their podcasts. Eligibility for college level English recommended. This class may include students from multiple sections. (Humanities, Elective)

**Course Outcomes**
- Demonstrate basic understanding of the elements of project management for creating podcasts, including audio production, content-creation, storyboarding, scripting, editing, and story development
- Describe and demonstrate different podcast formats
- Apply research skills including primary and secondary peer reviewed sources
- Demonstrate a variety of interview skills
- Collaborate with interviewees to establish and maintain trust during interviews
- Demonstrate editing audio skills using digital audio workstation software
- Evaluate distribution platforms for publication

**CMST 197 : Internship I**

**Credits** 1 - 5

**Quarter Offered** Occasionally

Opportunities to gain experience and insights in communications careers through internships supervised by media professionals. This class may include students from multiple sections. (Elective)

**Prerequisites**
Instructor permission and CMST& 102 and CMST 121

**Course Outcomes**
- Gain insight into role of student press & professional press.
- Analyze the performance of the media in reporting on the performance of community culture, sports, administrative leadership and student leadership.
- Recognize the qualitative differences in news reports versus narrative feature stories and hybrids of the two. Recognize and separate opinion versus fact in all contexts of placement in broadcast and print.
- Gain a better comprehension of beat coverage.

**CMST 201 : Social Media & Society**

**Credits** 5

**Quarter Offered** Winter, Spring

Social media weaves a comforting security net for some and a withering web for others. An in-depth look at storytelling practices and civic engagement using emerging web tools. The tools of mobile technology in social media will be explored as they effect civic engagement, cultures, and communities around the world. Explore the phenomena of Twitter, Reddit, and the rise of information empires in the ascent of Facebook, our chosen family and fate. This class may include students from multiple sections. (Humanities, Elective)

**Course Outcomes**
- Demonstrate and accept responsibility for personal learning in a digital environment.
- Recognize emerging web tools and social media networks.
- Recognize legal and ethical aspects of Web publications for informative, entertaining, and persuasive content.
- Identify case studies of social media in the role of informing, entertaining, and persuasions across historic systems of politics, commerce, and global communications.
- Recognize the source of communications and its role in creating factual versus opinion-based content.
CMST 208 : Reporting in the Digital Revolution

Credits 5
Learn in incremental stages to gather information through direct observation, interviewing, document searches, web searches, and database mining with software, such as Access and Excel, and to build a report. Use the tools of reporting to increase the accuracy and depth of news stories with an emphasis on public affairs. Learn the philosophy and anatomy of a narrative story, drawn from short story fiction and creative news stories. These tools will be applied in the pursuit of reporting basic news and to exploring trends, creating profiles, and dissecting organizations in more advanced stories. This class may include students from multiple sections. (Humanities, Elective)

Prerequisites
Completion of ENGL & 101

Course Outcomes
- Apply critical thinking skills.
- Articulate ideas in speech and writing.
- Gather information using a variety of traditional and electronic resources.
- Accept responsibility for one’s learning.
- Work cooperatively and collaboratively with others.
- Recognize the differences between fact and opinion.
- Edit others work in a professional and collaborative style.
- Design news pages.
- Begin to understand and facilitate publication production.
- Begin to understand the multiple means and manners of leadership.
- Display professional development for lifelong learning.

CMST 209 : Editing Stories & Images

Credits 5
The editing class will engage students in the discipline of editing text and images for publication. News copy desk operations will be introduced, including headline writing, dummying, page design, pagination, creating news graphics, photo cropping, photo editing, and photo packaging. This class may include students from multiple sections. (Humanities, Elective)

Prerequisites
ENGL & 101 and either CMST 207 or CMST 208 or instructor permission

Course Outcomes
- Apply critical thinking skills.
- Articulate ideas in speech and writing via news reports and narrative stories.
- Edit information that is gathered using a variety of traditional and electronic resources, including software that paginates text and visuals together on a page.
- Identify and target audience interest values.
- Learn a variety of interviewing techniques. Work cooperatively and collaboratively with staff.
- Recognize the differences between fact and opinion. Learn to edit this content appropriately in the context of expository fashion for news reports and narrative stories.
- Edit personal work and that of others in a professional and collaborative style.
- Begin to understand and facilitate publication production.
- Begin to understand the multiple means and manners of leadership.
- Display proficiency in principles of design for text and visuals.

CMST 235 : Multimedia Journalism Production

Credits 5
Students will use journalistic techniques to publish the college Buccaneer including the digital publication. The Buccaneer will include news and feature stories, editorials and reviews. Publication of the Buccaneer will provide opportunities for students to use the publication as a public forum to inform, entertain, and persuade, using its online platform. Skills gained can be easily applied to a variety of careers. This class may include students from multiple sections. (Elective)

Prerequisites
Completion of CMST 100 or instructor permission

Course Outcomes
- Integrate critical thinking, reading, and writing to locate, research, and produce multimedia publications.
- Critically analyze and recognize legitimate and reliable sources of knowledge.
Adapt writing and visuals to audience, context, and purpose based on geography, political and other cultural elements.
Describe and evaluate publications for content and design.
Write in a range of professional modes using professional ethics.
Demonstrate ability to meet the deadlines and demands of a regular professional production schedule.

CMST 250: Advanced Podcasting Workshop
Credits 5
Quarter Offered Winter
This project-based workshop is ideal for self-motivated individuals who want to build on what they have learned in CMST 150. Students may work individually or as a group to produce a single, longer format podcast, and/or plan and convert a previous one into a pilot for a series. Project management is heavily emphasized, from determining the format and style of podcasts to distributing them to a hosting site. Throughout the quarter, students will be presenting their own work to the class as well as providing feedback for their classmates' work. This class may include students from multiple sections. (Elective)
Prerequisites CMST 150
Course Outcomes
Continue developing project management skills for podcasting: planning, workflow techniques, research, narrative techniques, storyboarding, and script writing
Apply advanced elements of audio production and recording
Demonstrate principles of soundscapes
Produce a professional podcast or podcast series
Analyze and assess critically their own work as well as that of their classmates
Demonstrate knowledge of techniques and tools necessary for publishing and distributing content online

CMST 255: Podcast Series Production (Arts and Culture)
Credits 5
Quarter Offered Spring
This student-run course builds on CMST 150 and is ideal for self-motivated individuals who want to learn and practice the process of producing a podcast series, from planning to publishing, with an emphasis on effective collaboration, management, story judgment, interviewing, editing, and design. Students will produce this arts podcast series, designing its structure and style, by supervising its quarterly publication which examines society from a critical perspective, specifically in the areas of art and culture. This class may include students from multiple sections. (Elective)
Prerequisites CMST 150
Course Outcomes
Create, maintain, and develop podcasts for a student-run quarterly series.
Demonstrate effective project management and editorial skills by identifying, evaluating, and selecting stories.
Analyze and synthesize information from research and interviews to create these stories.
Demonstrate knowledge of narrative craft and audio editing skills in the creation of these podcasts.

CMST 286-288: Introduction to Newspaper Production I, II, III
Credits 3
Theory and application of principles for supervising a publication, from planning to preparation for printer. Emphasis on effective collaboration, management, news judgment, ethical decision making, editing, design, and use of computers to produce student newspaper. More advanced students fill staff management roles on the newspaper. This class may include students from multiple sections.
Prerequisites Instructor permission
Course Outcomes
Demonstrate professional development for lifelong learning related to course competencies.
Demonstrate essential skills for collaboration in management, editing, design and production of a publication.
Management needed to supervise materials others produce.
Editing stories and images for publications.
Identify design that enhances a publication's effectiveness for readers.
Demonstrate ability to produce professional quality images and stories for printed and web-based publications.

**CMST 291-293 : Advanced Newspaper Production IV, V, VI**

**Credits** 3

Theory and application of principles for supervising a publication, from planning to preparation for printer. Emphasis on effective collaboration, management, news judgment, ethical decision making, editing, design, and use of computers to produce student newspaper. More advanced students fill staff management roles on the newspaper. This class may include students from multiple sections.

**Prerequisites**
Instructor permission

**Course Outcomes**
- Professional development for lifelong learning related to course competencies.
- Collaboration essential for management, editing, design and production of a publication.
- Management needed to supervise materials others produce.
- Editing materials for publications.
- Design that enhances a publication’s effectiveness.
- Production, using computer-assisted technology to make materials ready for printing.

**CMST 294 : Digital News 2.0 Practices and Principles**

**Credits** 1

An in-depth look at storytelling practices and the emerging innovation Web tools offer news outlets in the Digital Revolution. More than a dozen workshops will be held in areas of newswriting, editing, photography, layout, design, media law, web publication, and multimedia production. These workshops will be led by professional journalists and multimedia experts from around the country. This class may include students from multiple sections. (Elective)

**Course Outcomes**
- Gain insight into role of collegiate and professional journalists.
- Compare the roles of student media in print and online through the eyes of university newspaper staff, their advisers, and their online platforms.
- Analyze the performance of the media in reporting on student culture, politics, sports, administrative leadership and student leadership.
- Recognize the qualitative differences and challenges in media production.
Computer Applications Technology

CAT 140: Introduction to Microsoft Excel

Credits 5
Introduction to spreadsheets. Create, format, edit, and print worksheets; formula and function capabilities; analyze, link, and summarize data; create charts and tables; images and diagrams; work with multiple worksheets; use templates and galleries. Keyboarding and file management skills are recommended. This class may include students from multiple sections.

Course Outcomes
- Create and manage workbooks.
- Organize and enter data.
- Change properties and print worksheets.
- Format cells.
- Enter simple formulas.
- Use advanced functions.
- Display data in charts.
- Organize data in tables.
- Summarize complex data.
- Introduced to pivot tables/charts.
- Develop Excel workbook implementing skills learned.
CSE 101 : Computer Basics/PC Hardware and Internet Tech

Credits 5
Learn about computer systems and the physical components that make them work. We will explore how software interacts with hardware as well as alternate computing hardware such as mobile and tablet devices. We will also cover performance characteristics of hardware components and how to mitigate bottlenecks in software. The internet is the backbone of connected services. Learn to make web applications and utilize the cloud infrastructure to build robust and scalable websites.

Course Outcomes
- Students will be able to identify common computer components.
- Assemble computer components into a working machine.
- State differences between common storage types and list pros and cons of each.
- Explain what CPU cache is used for and how it affects performance.
- Explain the difference between a 32 bit and 64 bit CPU and how they differ.
- Identify the motherboard along with North and South bridge components and explain what purpose they serve.
- State the purpose of the BIOS and how it opened the door for general operating systems.
- Explain the functions of a video card and how it affects performance during graphically intensive operations.
- Explain the purpose of a network card or modem and how it affects the speed of your internet connection.
- Describe the Gigahertz barrier and why CPU speeds have dropped dramatically in the last several years.
- Write simple software applications and explain how hardware runs that software.
- Identify different forms of Virtualization and in which cases we might use them.
- Use HTML 5 and CSS3 to create web pages.
- Utilize server side processing to connect HTML applications to databases and communicate with web services.
- Create web services and expose them for use by other applications.
- Implement authentication services to enable secure user profiles.
- Setup authorization mechanisms to enable fine grained control of individual resources.
- Connect authentication to external login services to support single sign on.
- Explain how SSL works and how certificates create a secure trusted connection to web sites.
- Work with common database systems to provide storage for web applications.
- Explain the difference between Input/Output in standard applications and in web applications.
- Create mobile aware web applications and display appropriate alternate layouts.
- Use Javascript to add ajax features to web applications.
- Work with graphic design software to create images suitable for use in web pages.

CSE 102 : Foundations of Game Development

Credits 5
Games are complex systems that use software code to simulate your fantasy world. Learn about how to manage object state and use object oriented design to organize your game system into manageable parts.

Course Outcomes
- Create your own flow charts to describe software logic.
- Identify various data types available.
- Demonstrate ability to use binary math.
- Demonstrate the use of object oriented software development.
- Explain how inheritance and encapsulation can be used to write better code.
- Explain the difference between assembly language and high level languages.
- Describe machine code and byte code and how they differ.
- Compile C# code into program code that can be run by the computer.
- Demonstrate mastery of using If statements to make choices in software.
- Demonstrate ability to create loops to do repetitive work.
- Explain how CPU Registers and cache are used and how memory is accessed by the CPU during program execution.
- Describe the difference between writing code that talks directly to the hardware and code that uses the HAL layer in the operating system.
Demonstrate familiarity with basic data structures.

CSE 103: Game Design Fundamentals/Storyboard Development

Credits 5
Since good games don’t just happen, it is important to create a comprehensive script defining your game world and what the player should experience. Learn to create detailed Game Design Documents (GDD) and storyboards.

Course Outcomes
- Explain the purpose of a Game Design Document.
- Define common game development tools.
- Design the game object hierarchy.
- Determine appropriate genre of the game.
- Define project scope.
- Create a game flow summary.
- Define game play mechanics.
- Create storyboards to define screen and game flow and define layout.
- Write an effective game story and break it into chapters of levels of play.
- Define required game art.

CSE 110: Game Design I / Draw Animation

Credits 5
Creating art assets for video games can be a demanding process. It is impossible to build good concept art for games without basic drawing skills. Improve your artistic abilities and learn how to apply those abilities in the digital world using tools such as Photoshop and Blender.

Prerequisites
CSE 101 and CSE 102

Course Outcomes
- Identify common techniques used for drawing.
- Define common terms including perspective, shading, and negative space.
- Use a scanner to digitize drawings.
- Utilize hand drawn images in 2D animations.
- Identify common tools used to create art for 2 Dimensional graphics.
- Describe the process of animation.
- Use drawing tools and software to edit and color scanned pictures.
- Utilize common media formats for storing picture data for games.
- Work with graphic design tools to convert drawings to sprites and textures for game worlds.
- Identify fundamental differences between pixel and vector graphics.
- Make art work for a simple working 2D game.

CSE 111: Game Development I / 2D Game Programming

Credits 5
Write software to simulate 2 Dimensional environments and build virtual worlds. Learn techniques to track and interact with game objects in real-time with programming languages and game engines.

Prerequisites
CSE 103 and concurrent enrollment in CSE 140

Course Outcomes
- Identify common tools used to create media for 2 Dimensional graphics.
- Describe the process of animation.
- Create working 2 Dimensional applications with game elements for player control and artificial intelligence.
- Utilize common media formats for storing picture and game data.
- Work with graphic design tools to create sprites and textures for game worlds.
- Build state machines that can track progress and status of objects.
- Utilize pre-built game engines to deliver graphic, audio, and network capabilities to game software.
- Identify fundamental differences between pixel and vector graphics.
- Demonstrate understanding of math required for 2 Dimensional movement and positioning and translate and optimize equations to programming code.
- Create effective and intuitive UI elements to enable complex actions with a minimal learning curve.
- Deploy finished software to other computer systems.
CSE 120 : Game Design II / 3D Modeling

Credits 5
Learn to take your sketches and turn them into 3D objects. This class teaches you to use your concept art to create a mesh, paint the mesh with textures, and adjust 3D lighting and material effects in Blender and GIMP.

Course Outcomes
- Identify fundamental differences between 2D and 3D design.
- Learn to use 3D modeling software to create objects for 3D worlds.
- Use proper composition techniques in 3D scenes.
- Demonstrate ability to use mesh sculpting tools.
- Utilize reference material to create models.
- Work with bitmaps and shading techniques to create materials.
- Learn about 3D rendering techniques and the pros/cons of each.
- Understand 3D acceleration and how video cards reduce processing load on the CPU.
- Import 3D models into virtual worlds.
- Use pixel shaders and lighting techniques to add realism.
- Create particle systems to simulate hair.
- Import models into Unity3D.

CSE 121 : Game Development II / 3D Game Programming

Credits 5
Moving to the third dimension is quite a jump from 2D game development. Learn about the math involved and how to create 3D models for use in 3D worlds.

Prerequisites
CSE 111 and concurrent enrollment in CSE 141

Course Outcomes
- Learn to use 3D modeling software to create objects for 3D worlds.
- Work with bitmaps and shading techniques to create materials.
- Learn about 3D rendering techniques and the pros/cons of each.
- Understand 3D acceleration and how video cards reduce processing load on the CPU.
- Write C# code that uses Direct3D or OpenGL to render 3D worlds.
- Import 3D models into virtual worlds.
- Learn 3D animation techniques such as inverse kinematics and pre-positioned frames.
- Use pixel shaders and lighting techniques to add realism.
- Gain familiarity with mathematical equations required to render 3D objects on a 2D screen.
- Synchronize game data across the network to facilitate multiplayer virtual worlds.

CSE 130 : Game Design III / 3D Animation Techniques

Credits 5
Modern 3D games employ many techniques such as motion capture, inverse kematics and key frame animation to achieve realistic movement for game characters. Learn to set up 3D characters with bones so that they can respond normally to outside events or play back in scripted moves.

Prerequisites
CSE 110 and CSE 120

Course Outcomes
- Identify animation techniques available for 3D motion.
- Utilize scripting tools to fine tune and modify animation sequences.
- Demonstrate ability to rig an existing humanoid and non-humanoid mesh.
- Configure idle and walk animations for a model.
- Demonstrate ability to paint meshes using textures and materials.
- Rig facial animation to display common emotions.
- Utilize Unity3D to create character interaction between mesh and objects.
- Create key frame animation sequences.
- Rig armature structures to meshes.
- Utilize proper lighting and materials.
- Import into custom made meshes into Unity3D.
- Create character interaction with world objects using collision in Unity3D.
CSE 131: Game Development III / Mobile Game Development

Credits 5
Mobile devices are the fastest segment of computer use. Learn how to make mobile games and about the new app stores where customers can find and purchase your software.

Course Outcomes
- Create mobile applications for various devices.
- Identify common mobile devices available.
- Create working apps for mobile emulated devices and Raspberry PI systems.
- Create art assets in mobile friendly formats.
- Manage project time and resources to deliver milestones on time.
- Use mobile development tools to write code in Java, C#, Objective C, or Python.
- Create HTML5 mobile applications.
- Deploy mobile apps to devices.

CSE 140: Team Project I / Building a Side Scrolling Game

Credits 5
Learn to create your own 2D video game. Work with a small team to create the game design document and use team members to create program code and art assets to assemble your game and present it for others to play.

Course Outcomes
- Create a Game Design Document (GDD) for your game.
- Work with a small team to complete your assignments.
- Create art assets according to technical specs provided for the game.
- Write programming code as needed to enable game play in the virtual environment.
- Manage project time and resources to deliver milestones on time.
- Use pro-social interaction with team members to work through technical and personal issues.
- Successfully deploy game software and website for others to play.
- Use effective play testing techniques and bug tracking software to ensure software quality.

CSE 141: Team Project II / First Person 3D Game Development

Credits 5
Learn to create your own 3D video game. Work with a small team to create the game design document and use team members to create program code and art assets to assemble your game and present it for others to play.

Prerequisites
Concurrent enrollment in CSE 120 or CSE 121

Course Outcomes
- Create a Game Design Document (GDD) for your game.
- Work with a small team to complete your assignments.
- Create a 3D virtual world that the player can interact with.
- Create and display 3D Models.
- Create art assets according to technical specs provided for the game.
- Write programming code as needed to enable game play in the virtual environment.
- Manage project time and resources to deliver milestones on time.
- Use pro-social interaction with team members to work through technical and personal issues.
- Successfully deploy game software and website for others to play.
- Use effective play testing techniques and bug tracking software to ensure software quality.
Computer Science (CS/CS&)

CS& 141 : Computer Science I with Java
Credits 5
Quarter Offered Winter
This course introduces the "algorithmic thinking" and the design and implementation processes necessary for you to solve complex, real-world problems with computers. We introduce the Java programming language to learn to write programs; understand the features of programming languages; decompose problems; develop algorithms; and use important software practices. We include software architecture (structure), classes (ways of modeling things), handling data, some computer ethics, standards, and maintaining program correctness. This course and its successor, CS 142 will help you become more competent and comfortable on the paths to both computer science and professional software development. CS 100 is strongly recommended for students with no programming experience. This class may include students from multiple sections. (Elective)
Prerequisites
P (2.0 or higher) in MATH 98 or above or concurrent enrollment
Course Outcomes
Implement basic numerical algorithms.
Implement common search algorithms, including linear searches.
Apply the concepts of modeling and abstraction with respect to problem solving.
Design a simple class hierarchy using superclasses, and subclasses.
Design an algorithm in a programming language to solve a simple problem.
Create code in a programming language that includes primitive data types, references, variables, expressions, assignments, I/O, control structures, and functions.
Apply a variety of strategies to test and debug programs.
Use an integrated development environment (IDE) to create, execute/test, and debug secure programs.
Use standard libraries for a given programming language.
Differentiate among intellectual property, fair-use, copyright, patent, trademark, and plagiarism.
Develop technical artifacts.
Develop and use Unit Tests to guide development and verify software methods.
Write programs involving multiple classes and files, user I/O and internal storage.

CS 100 : Introduction to Computer Science
Credits 5
Quarter Offered Fall, Winter, Spring, Summer
An introduction to fundamentals of computer science. Topics covered include algorithmic design; problem-solving techniques for computer programming; fundamentals of digital logic and computer organization; the role of the operating system; introductory programming methodology, including variables, assignment statements, control statements and subroutines (methods); programming paradigms; the compilation process; theoretical limits of computation; database structures; and social and ethical issues. This class may include students from multiple sections. (Natural Sciences, Elective)
Course Outcomes
Describe the early human history of computation and the development of tools to aid in computation including computer science pioneers.
Articulate the social and ethical implications of technology, and issues related to privacy and digital security.
Describe the main parts of a modern computer and how a computer operates.
Describe what an algorithm is and develop algorithms to solve problems.
Demonstrate algorithmic thinking, programming, and debugging.
Demonstrate working knowledge of how data is represented in the computer including common data types.
Develop functions in code to make code modular.
Develop and test functions which accept arguments and return values.
Write code for a basic sorting algorithm, test the code and prove it works.
Articulate the difference between a class and an object.
Write code that instantiates an object and uses the object’s methods.
Write code to work with user input.
CS 142: Computer Science II with Java

Credits 5
Quarter Offered Spring

This course continues CS& 141, delving more deeply into computer science principles and professional software development principles and practices. We cover and use object-oriented and functional programming paradigms, basic top-down context-derived software processes and architectures, abstract data types, generics, data structures, recursion, complexity analysis of algorithms and O-notation, computer ethics, handling and querying data, unit tests, developing to standards, modeling physical processes, graphical user interfaces. We use a modern, intelligent professional development environment to implement concepts concretely. This course will help you become more competent and comfortable on the paths to both computer science and professional software development. This class may include students from multiple sections.

(Elective)

Prerequisites CS& 141 and currently enrolled in MATH& 141 OR 2.0 or higher in MATH& 141 with instructor permission

Course Outcomes

- Estimate time and space complexities for a given algorithm using Big-O notation.
- Contrast standard complexity classes.
- Implement common search algorithms, including linear and binary searches.
- Compare various data structures for a given problem, such as array, list, set, map, stack, queue, hash table, tree, and graph.
- Create and execute different traversal methods for trees and graphs.
- Calculate probabilities of events and expectations of random variables for elementary problems.
- Implement in code OOP constructs, including encapsulation, abstraction, inheritance, and polymorphism.
- Contrast functional and object-oriented programming paradigms.
- Use a professional-level integrated development environment (IDE) to create, execute, test, and debug secure programs.
- Apply consistent documentation and program style standards.
- Implement in code different types of testing, including security, unit testing, system testing, integration testing, and interface usability.
- Compare professional codes of conduct from the ACM, IEEE Computer Society, and other organizations.
- Understand and apply appropriate software architecture and software development strategies in creating solutions to a range of problems.
- Apply directions, requirements, and specifications in solving problems.
- Search and manipulate data using functional stream techniques.
- Evaluate computer ethics issues.
Computer-Based Training (CBT)

CBT 104: Introduction to Keyboarding

Credits 1
Quarter Offered Fall, Winter, Spring
This self-paced course is designed for the student with no previous typing experience. Through the use of keyboarding software the student learns the basic techniques of keying alphabet and number keys in modern computer keyboards. Emphasis is on good technique and the development of speed and accuracy. Students must purchase the keyboarding software to work at home, or can use Peninsula College’s computer labs to complete all work. A maximum of 2 credits of CBT 104 and/or CBT 105 or combination thereof will count towards a degree or certificate. This class may include students from multiple sections.

Course Outcomes
- Key the alphabet, number, symbol, space bar, and enter keys by touch.
- Demonstrate correct finger placement, technique, and keystrokes.
- Demonstrate proficiency with straight-copy keying speed and accuracy.
- Type a minimum of 28 wpm on a 2-minute timed writing with 5 or fewer errors.
Construction Technology (CONST)

CONST 101: Introduction to Woodworking
Credits 3
Quarter Offered Fall
Introduction to woodworking tools, materials, hand and power tools used in residential and commercial jobsites. Overview of the woodworking industry, safety and building materials. This class may include students from multiple sections. (Formerly GRBD 101)

Course Outcomes
Students will be able to recognize and demonstrate proper and safe usage of modern hand and portable power tools and stationary tools.
Students will have working knowledge of common fasteners and building materials to construct simple projects.
Students will be able to construct their own shop drawings and be able to build simple projects from magazine plans, shop drawings and similar designs.
Students will gain and demonstrate the confidence necessary to undertake simple projects on their own.

CONST 102: Woodworking II
Credits 5
Quarter Offered Winter
Students will explore the art of creating finished pieces and establishing a career in the woodworking industry. This class covers advanced woodworking, cabinet making, and Labor and Industry guidelines for shop floor plans and walkways. Students will construct using jogs and templates. This class may include students from multiple sections. (Formerly GRBD 102)

This class has a $65 construction technology course fee.

Course Outcomes
Students will be able to recognize and demonstrate proper and safe usage of modern hand and portable power tools and stationary tools.
Students will demonstrate the knowledge of OSHA and WA St. Dept L & I guidelines and requirements by designing a shop floor print, complete with walkways, minimum tool requirements, workflow and storage.
Students will explain the meaning of significant figures an tolerances as they relate to woodworking.
Students will demonstrate their ability to build precision cabinets by making drawing and building cabinet box, face, doors and drawers to within 1/32” tolerances.
Students will demonstrate their ability to make matching pieces by constructing and using jigs and templates.

CONST 103: Finish Carpentry
Credits 5
Quarter Offered Spring
Students will learn finish carpentry techniques, craftsmanship finishing touches on construction project. Learn about traditional, colonial and modern construction styles including interior and exterior trim. This class may include students from multiple sections. (Formerly GRBD 103)

This class has a $65 construction technology course fee.

Course Outcomes
Using traditional, colonial, and modern molding styles; students will be able to trim out the interior and exterior profiles of a windows and doors.
Using a compound miter saw and a coping saw; students will demonstrate two ways to make corner joints for interior molding.
Students will be able to describe, draw, and build a wainscoting wall finish complete with chair rail.
Students will install multiple base cabinets and uppers, install countertop, and trim out.
Students will design and build a coat closet organized, complete with adjustable shelves.

CONST 104: Carpentry and Rigging
Credits 5
Students will gain practical experience in design, carpentry, and rigging for stage and theater performances. This class may include students from multiple sections. (Formerly GRBD 104)

This class has a $65 construction technology course fee.

**Course Outcomes**
- Describe theater and stage safety regulations and practices.
- Use theater carpentry and rigging terminology.
- Demonstrate familiarity with hand tools for stage and scene carpentry.
- Work as a team to build a scene for a theater performance or event.
- Explore scenery design, props, and scenic painting for a theater production.
- Design, operate, and maintain stage-rigging equipment.
- Inspect, maintain and manage theater scenes and stage-rigging systems.
- Demonstrate backstage logistics and planning for theater productions.

**CONST 105 : Blueprint Reading**

**Credits** 3

**Quarter Offered** Winter

Introduction on how to read and use blueprints to construct residential and commercial structures. Course emphasis will be on learning to read blueprints and how to apply different types of foundations, framing, and interior and exterior finishes. Learn how building codes apply to various stages of construction. This is one of the required courses for the Carpentry one-year certificate. This class may include students from multiple sections. (Formerly GRBD 105)

**Course Outcomes**
- Understand the purpose of blueprint drawings as a communication tool.
- Identify the composition and layout of a set of drawings.
- Interpret symbols, abbreviations, dimensions, line types and weights.
- Understand scale as a relationship between the measurement used on a drawing and the measurement of the object it represents.
- Develop proficiency using an architect’s and engineer's scale.
- Evaluate the completeness of a set of drawings.
- Interpret specifications and schedules.
- Differentiate between the various presentation drawings.
- Understand the role of building codes in the construction process.
- Apply the building code to various aspects of the drawings.

**CONST 106 : Foundations and Framing**

**Credits** 5

**Quarter Offered** Fall

This class introduces students to the beginning carpentry phases of conventional stick frame residential and light commercial construction. Learn International Building Codes as they apply to foundations and framing. This class may include students from multiple sections. (Formerly GRBD 106)

This class has a $65 construction technology course fee.

**Course Outcomes**
- Students will be able to demonstrate a basic understanding of blueprint reading and the IBC (International Building Code).
- Students will be able to explain the construction of typical stem wall and monolithic foundation systems as well as explain the advantages and disadvantages of each.
- Students will be able to properly demonstrate the layout of walls on a subfloor and be able to use the proper equipment and techniques to check for square, level, and plumb.
- Students will be able to work together, as a crew would on a jobsite, to frame floors, wall, and ceilings.
- Students will be able to demonstrate the ability to frame the rough openings for windows and doors in exterior and interior walls.

**CONST 107 : Siding, Decks and Stairs**

**Credits** 5

**Quarter Offered** Spring
This class will focus on three of the most functional and visible elements of any residential construction or light commercial project: siding, decks, and stairs. Code compliance will be a major focus of deck and stair system construction. This class may include students from multiple sections. (Formerly GRBD 107)

This class has a $65 construction technology course fee.

**Course Outcomes**
- Apply both shear and non-shear compliant siding as well as the flashing and trim components.
- Explain deck code compliance, as it applies to fasteners, spans, and design.
- Design and build code compliant small deck project complete with stairs.
- Demonstrate proper stair system design, layout, and placement.
- Develop and submit a deck addition permit application, as required by local building department.

**CONST 108 : Roof Systems and Roofing**
**Credits** 5
**Quarter Offered** Winter
This class will focus on the proper and safe construction of both rafter and truss roof systems. Students will learn about various roofing material, practice flashing and installing multiple roofing products. This class may include students from multiple sections. (Formerly GRBD 108)

This class has a $65 construction technology course fee.

**Course Outcomes**
- Using OSHA approved fall protection equipment, students will demonstrate the proper way to harness and operate on a roof.
- Following OSHA guidelines, students will successfully and properly setup scaffolding, ladders, ladder jacks, planks and roof jacks.
- Students will have working knowledge of diagnosing the indicators of the most common roof leakage hazards and demonstrate the proper way to flash them.
- Students will construct and roof both a truss and a rafter roof system.
- Students will calculate and cut the seat cut and top cut of an exposed truss so that it is both structurally and visually sound.

**CONST 114 : Residential Remodel and Retrofit**
**Credits** 5
**Quarter Offered** Summer
This class introduces students to the skills and techniques necessary to repair, maintain, and remodel conventional stick frame residential and light commercial construction. This class may include students from multiple sections. (Formerly GRBD 114)

This class has a $65 construction technology course fee.

**Course Outcomes**
- Demonstrate and perform the task of preparing and applying for a remodel construction permit.
- Explain the construction balloon frame and conventional stick frame houses and how it has changed over one hundred years.
- Demonstrate and/or explain the proper identification, treatment, and disposal of asbestos and lead based paint.
- Collaborate, as a crew would on a jobsite, to perform repairs and improvements on existing residential and light commercial structures.
- Demonstrate the ability to frame the rough openings for replacement windows and doors in exterior and interior walls.

**CONST 136 : Building Permits and Codes**
**Credits** 3
**Quarter Offered** Winter
Learn building codes and standards applicable to building construction and the inspection process. The class will focus on a variety of local jurisdictions and differences in the permit and inspection process. Students will study the basic building codes necessary for carpentry, plumbing, electrical, and heating, ventilation and cooling (HVAC) as well as where to locate advanced code requirements. This class may include students from multiple sections.
**Course Outcomes**

Explain guidelines for obtaining a building permit and map out the process from application through to final inspection.
Identify the correct type of building permit required for a specific construction project.
Demonstrate the process for obtaining a building permit by successfully completing the application process.
Demonstrate the process of preparing for and scheduling for an inspection.
Describe commonly used building codes and their use in a construction project.

**CONST 153 : Residential Homebuilding**

**Credits** 5

Hands on residential construction at an actual home building site. Students will learn safety, OSHA competent person, how to operate power tools, building codes, construction standards, blueprint reading, and how to build walls, floors and various components of a home. This class may include students from multiple sections. (Formerly GRBD 153)

**Course Outcomes**

- Identify and demonstrate safe and competent person work practices.
- Demonstrate safe and appropriate workplace (job site) behavior.
- Identify hand and power tools and be able to demonstrate proper safety and use.
- Identify and explain the elements of common residential construction.
- Perform measurements and mathematical calculations critical to carpentry.
- Identify building codes and residential construction standards.
- Build key components of a home.
- Demonstrate the ability to accurately read blueprints.
- Identify weatherization standards for home building.

**CONST 160 : Small Farm and Backyard Carpentry**

**Credits** 3

**Quarter Offered** Spring

Students will learn the necessary skills required to research, design, and build backyard farm and garden structures that promote efficiency of urban sustainable living. This class may include students from multiple sections. (Formerly GRBD 160)

This class has a $65 construction technology course fee.

**Course Outcomes**

- Define terminology and concepts related to hands on carpentry techniques for small farm and backyard structures.
- Locate, identify, and comply with local Laws, Codes, Covenants, and Restrictions.
- Develop the skills and confidence to safely use common hand and power tools.
- Students will learn to read and build from prints and shop drawings and will learn the skills necessary to construct shop drawings.
- Identify and select the proper materials and fasteners for your project.
- Research, design, and build small outdoor structures.

**CONST 165 : Introduction to Alternative Energy**

**Credits** 5

Students will learn about sustainable alternative energy and examine, in detail, solar, wind, and mini-hydro electricity. Perform an energy audit and analyze current energy usage. Explore components, efficiency, and requirements of each type of system and design a grid tied or an off grid sustainable alternative energy system for a single family residence. This class may include students from multiple sections. (Formerly GRBD 165)

**Course Outcomes**

- Define terminology and concepts related to Sustainable Alternative Energy.
- Perform an energy audit to determine household energy requirements.
- Compare and contrast Solar, Wind, and Mini-Hydro Sustainable Alternative Energy options.
- Develop and design a Sustainable Alternative Energy System plan that adequately meets the energy requirements of a single family residence, as determined by an energy audit.
- Compare cost, efficiency, and reliability of Solar, Wind, Mini-Hydro, and Grid Power for a given location.
**CONST 195 : Facilities Maintenance**

**Credits** 7  
**Quarter Offered** Winter  
Learn basic facilities maintenance skills in plumbing, HVAC, carpentry tools, electrical, building codes, and permits. Class emphasizes safety and standards necessary to repair and maintain residential homes, buildings, and facilities. This class may include students from multiple sections. (Formerly GRBD 195)

This class has a $65 construction technology course fee.

**Course Outcomes**
- Describe day-to-day responsibilities and operational tasks of a facility maintenance technician
- Explain safety guidelines for facilities maintenance and renovation tools
- Work in teams to perform repairs and improvements on a residential home or commercial facility
- Demonstrate basic maintenance procedures for heating, ventilation, air-conditioning, plumbing, and electrical systems
- Demonstrate the ability to follow systematic, diagnostic, and troubleshooting practices
- Explain the importance of acknowledging customer needs and expectations

**CONST 206 : Advanced Carpentry Design and Concepts**

**Credits** 5  
**Quarter Offered** Fall  
Learn Construction Technology techniques and processes and how they apply modern stick framed residential and light commercial building. Design and orient a house plan. Practice advanced framing, insulation, air infiltration and material selection. Learn the United States Construction Technology Council LEED process. Explore eligibility requirements from Energy Star and Clallam Built Green. This class may include students from multiple sections. (Formerly GRBD 206)

This class has a $65 construction technology course fee.

**Course Outcomes**
- Students will be able to demonstrate a knowledge of the Green Building movement and what it means. They will be able to explain what Building Certification is, what certifications there are national and locally, and what may be certified.
- Students will study and gain an advanced knowledge of building science (principles of energy, heat and air flow, moisture flow, dew point and condensation, and relative humidity).
- Students will demonstrate their understanding of structure orientation, window and landscape shading, waste management, and design by designing a residential structure for a particular plot.
- Students will be able to demonstrate their knowledge of Green Building concepts, such as advanced framing, thermal bridging, and air infiltration by taking a standard set of blueprints and Greening them up by applying Green Building Techniques.
- Students will study the key components to Green Material selection and will be able to argue for and against the selection of Building Materials, based on whether or not they are Green Building Materials.

**CONST 210 : Job Site Management**

**Credits** 3  
**Quarter Offered** Fall  
This class will introduce the students to construction jobsite management. Learn OSHA and Washington State Department of Labor and Industries requirements for job site safety. Control of resources and materials on the jobsite as well as the proper order and flow of jobs on the worksite. Negotiate with labor and subcontractors.

This class will teach students leadership skills to work as a foreman or contractor on a construction site. This class may include students from multiple sections. (Formerly GRBD 210)

**Course Outcomes**
- Explain the OSHA and WA State L & I requirements, as they apply to residential and light commercial construction.
- Serve as project manager and demonstrate the knowledge of the correct order of work as well as proper and efficient and proper storage and distribution of materials on the job site.
- Define, document, and keep record of what is important on the job site.
- Document the proper order and scheduling of deliveries, construction, and subcontractor schedules.
- Explain the impact that change orders and mistakes have on both the time line and the bottom line for the contractor.
CONST 212: Engineered Building Materials & Methods
Credits 5
Quarter Offered Spring
This class focuses on the role and use of engineered wood, steel, and fast growing plants in the construction world. Starting with Glulams, finger-jointed studs, and manufactured trusses. Learn about cutting edge engineered building materials like mass timbers, cross laminated timbers, and thermally modified wood and their impact on the Construction Technology Movement. This class may include students from multiple sections. (Formerly GRBD 212)

This class has a $65 construction technology course fee.

Course Outcomes
- Learn what engineered wood building material are commonly used today as well as the pros and cons of each of these.
- How the use of engineered building materials impacts the cost and time of residential and light commercial construction.
- Gain a working knowledge of the many new materials hitting the market and how the implementation of these building materials can impact the Green Certifications of the project as well as the design and structural loads of the structure.
- What changes are on the horizon and what are the costs associated with using a new building material or process (tooling up, learning curve, additional permits, inspections, or engineering)?

CONST 215: Carpentry Estimation
Credits 3
Quarter Offered Winter
This class will cover practices for successful cost estimation of residential and light commercial construction. Students will conduct material ‘take offs’ then put their skill to use, estimating materials such as lumber, roofing, windows, doors, permits applications, professional fees for architects and engineers, waste, time, and overhead. This class may include students from multiple sections. (Formerly GRBD 215)

Course Outcomes
- Estimate the costs associated with the construction of residential and light commercial construction.
- Calculate board feet, square and cubic feet and yards and convert from inches to feet to yards as well as figuring the cost associated with quantities verse single items.
- Using blueprints or drawings, students will accurately estimate the quantity of materials, including waste, to complete the project at hand.
- Identify hidden components that fall into the general category of overhead (gas, hours at night, wear and tear on equipment, license, bond, and insurance, etc.) and how to bed on those items.
- Describe the importance of accuracy and the costs associated with over and underbidding.

CONST 220: Alternative Building Methods
Credits 5
Quarter Offered Fall
Class focuses on building engineered wood products into traditional stick framing as well as construction using Structurally Insulated Panels (SIPS), Insulated Concrete Forms (ICF), and other nontraditional, yet existing and allowable building methods for today's construction industry. This class may include students from multiple sections. (Formerly GRBD 220)

This class has a $65 construction technology course fee.

Course Outcomes
- Explain and demonstrate how SIPS panels are assembled and installed on the job site.
- Select one engineered building material and describe how it could be used as an architectural or structural element, or both, in a conventionally stick framed house. Include shop drawings.
- List and explain the engineering code changes that have come into place in the past 10 years concerning pole building construction and describe what must be done meet these code changes.
- Construct a geodesic dome and detail the elements that make this building structure so cost efficient and sturdy.
- Design, draw, and estimate the cost of building a 400 sf exempt structure that minimizes the square footage cost.
**CONST 225 : Construction Management**

**Credits** 3

**Quarter Offered** Spring

Learn leadership and ethics for construction management and the business of being a contractor. Explore legal requirements and risk analysis for a construction project. Analyze cost and project budgets. This class may include students from multiple sections. (Formerly GRBD 225)

**Course Outcomes**
- Create a successful business plan that includes a vision statement, for the construction industry.
- List and describe all the legal requirements to become a contractor.
- Develop the ability to identify and analyze the risks associated with a construction project.
- Understand the basics of cost flows and project budgets.
- Understand the ethics of construction management.

**CONST 260 : Construction Technology Internship**

**Credits** 1-5

**Quarter Offered** Fall, Winter, Spring, Summer

This class will provide opportunities for Construction Technology students to participate in internships with local businesses. Instruction permission is required. This class may include students from multiple sections. (Formerly GRBD 260)

This class has a $7.21 liability insurance course fee.

**Prerequisites**
Completion of **CONST 106**, **CONST 107** and **CONST 108**

**Course Outcomes**
- Apply skills that relate to the internship workplace.
- Identify individual strengths and weaknesses related to workplace skills and behaviors.
- Acquire new workplace skills and behaviors.
- Demonstrate effective communication and interpersonal behaviors in the workplace.
- Demonstrate initiative and time management in a workplace setting.
Construction Trades (CTAP)

CTAP 120: Construction Trades Math
Credits 3
This course will provide students with a solid foundation in mathematical principles needed for a variety of vocational trades. Trades included, but not limited to Laborers, Iron workers, Carpenters, Cement Masons, Electricians, Finish Trades and Pipe Trades. Students will practice the application of the principles in the shop through a variety of apprenticeship preparation activities and tasks.

Course Outcomes
- Add and subtract construction fractions.
- Calculate and use percentages.
- Convert between fractions and decimals.
- Use and explain various measuring techniques.
- Calculate volume from linear dimensions.
- Explain and apply the concepts of lineal footage, square footage and board footage.
- Explain and apply the concepts of rise, run and diagonal.
- Calculate material and cost.
- Measure accurately as prescribed by trade union guidelines.
- Apply the concepts of construction math, measuring and calculation of materials and cost by passing a comprehensive test that meets the trade union benchmark.
- Use measuring devices correctly so that accurate measurements are obtained.

CTAP 130: Worksite Behavior, Readiness and Safety
Credits 5
This course will provide instruction in worksite behaviors and expectations: preparing for the workday, communication skills, teamwork skills, pro-active attitude, attendance expectations, integrity, resume writing, mock job interview, appropriate work attire, and what employers are really looking for when hiring. To include, but not limited to, behaviors and actions that could disqualify, lead to disciplinary action, or even terminate an individual from a job. Also, to be included is health and safety needed for the trades. Topics include physical fitness, healthy eating habits, worksite assessment, identifying workplace hazards, hazard prevention and DOC safety training. Proper use and fit of personal protective equipment will be discussed.

Course Outcomes
- Explain how to meet the physical requirement needed to enter construction industry and/or apprenticeships.
- Develop sufficient endurance and stamina to enter an apprenticeship program.
- Apply proper techniques for safe handling, and movement of building materials and equipment.
- Apply elements of hazard prevention.
- Use personal protective equipment.
- Complete OSHA 10 Training for Jobsite Hazard Recognition for the Trades.
- Model appropriate worksite behaviors and expectations.
- Prepare for the workday.
- Document worksite activities to employer verbally and in writing by the use of industry standard work records.
- Apply teamwork techniques to a construction project.
- Demonstrate punctuality and jobsite readiness.
- Write resume for a job in the construction industry.
- Demonstrate interview techniques.
- Complete Diversity, Equity and Inclusion Training.

CTAP 140: Basic Tools, Basic Construction, Basic Blueprints
Credits 5
This course focuses on identification, maintenance and safe usage of tools and equipment used in the trades. Students will have an understanding of job safety importance and requirements. Tool and job safety will be taught and practiced throughout the entire program. This course will also provide exposure to construction basics via skill building activities and trades related to agility courses. The course will include footings and foundations (slab and grade, post and beam, footings and stem wall). This course also covers framing to include
floor framing, wall framing, and roof framing. Students will receive roofing and siding exposure as well as experience with interior and exterior finishes. Students will interpret the signs and symbols on construction blueprints. Students will demonstrate their skill by drawing their own basic construction blueprint.

**Course Outcomes**
- Differentiate tools and equipment used in various construction trades including laborer's, carpentry, masonry, ironworking.
- Demonstrate use of tools safely to industry standards site specific.
- Prepare tool belt for the workday.
- Identify and interpret the signs and symbols on construction blueprints.
- Draw a basic construction blueprint incorporating appropriate signs and symbols.
- Successfully complete agility stations and/or courses site specific.
- Model appropriate worksite behaviors and expectations.

**CTAP 150 : Introduction to the Trades**

**Credits** 5

This course will provide exposure to a variety of different trades and applications to the job site. These include: Laborers, Iron Workers, Cement Mason, Carpenters, Plumbers, Pipe Fitters, and Electricians. Included in the class will be guest speakers from different trades who will inform students of what it takes to be successful in their respective trade. Students will be provided with physical requirements needed, application requirements, wages, benefits, job opportunities and any other information pertinent to that specific trade.

**Course Outcomes**
- Apply techniques for working safely in a shop and/or jobsite.
- Explain how to meet the physical requirement needed to enter construction industry and/or apprenticeships.
- Describe a minimum of 4 apprenticeship programs available in Washington state.
- Describe application requirements, wages, benefits, and job opportunities available in a variety of trade unions.
- Identify and use common tools properly and handle materials safely for Ironworking; Construction Craft Laborers; Carpentry; Cement Masons and Plasterers per facilities resources (See qualifications for this Outcome in Course Topics section).

**CTAP 160 : Capstone Project**

**Credits** 2

In this capstone course, students will experience the link between theory and practicum through completing a relevant project. This project will integrate the skills and abilities acquired during the program and demonstrate competencies learned.

**Course Outcomes**
- Construct a building project utilizing safety standards and proper equipment from blueprint drawing to completion.
- Compose a portfolio of materials needed to enter construction apprenticeship program or employment.
Criminal Justice (CJ/CJ&)

**CJ& 101: Introduction to Criminal Justice**

**Credits** 5

**Quarter Offered** Fall

Traces historical development of courts, corrections, and law enforcement to understand structure and process of the criminal justice system. Examine roles, responsibilities, and perspectives of its participants. This class may include students from multiple sections. (Elective)

**Course Outcomes**

- Define what historical events influenced the development of our current criminal justice system.
- Identify and discuss the strength and weaknesses of the U.S. criminal justice system.
- Define the elements of a crime and distinguish between civil and criminal law.
- Identify and discuss the role of the police, courts and correctional components of the criminal justice system.
- Discuss the role of the prosecutor in the criminal justice process, the areas of conflict and cooperation between the prosecutor and the police.
- Discuss the pretrial procedures following arrest and describe the process including the problems and purposes associated with each step.
- Describe the organization, function and jurisdiction of Federal and State Courts, and discuss the role of the judge in a criminal trial.

**CJ& 105: Introduction to Corrections**

**Credits** 5

**Quarter Offered** Spring

Examines institutional and community correction applications, focusing on correctional facility operations, probation, parole, and intermediate sanctions within the American criminal justice system. This class may include students from multiple sections. (Elective)

**Course Outcomes**

- Provide the student with a clear understanding of the correctional system, as it exists today and the role of corrections as a critical element of the criminal justice system.
- Assist the student in understanding the entire correctional system: jails and minimum, medium, maximum and super maximum prison facilities, halfway houses and other types of correctional facilities and programs.
- Provide the student with an understanding of the goals of punishment versus rehabilitation, incarceration versus non-incarceration sentencing structures, and diversionary programs currently in use in many state correctional systems.
- Provide the student with the cornerstone knowledge that will maximize criminal justice learning in future courses of study in this specific field.
- Provide the student with the knowledge that will allow them to understand the theories currently in use regarding corrections and how these theories and practices have changed and will continue to change over time.

**CJ& 106: Juvenile Justice**

**Credits** 5

**Quarter Offered** Spring

Overview of the juvenile justice system covering due process requirements of each phase of the process. Also examines theories behind delinquency causation and discusses treatment modalities and programs. This class may include students from multiple sections. (Elective)

**Course Outcomes**

- Understand the nature and purposes of the juvenile justice system.
- Understand the reasons for the development of juvenile court.
- Understand how the juvenile court functions.
- Understand the philosophical basis for the juvenile court.
- Understand the limitations of the juvenile court and the reasons for those limitations.
- Understand the correctional process of the juvenile justice system and its integration into the adult correctional system.
- Understand the current issues in the field of juvenile justice and trends for the future.
CJ& 110 : Criminal Law
Credits 5
Quarter Offered Fall
Substantive criminal law applied to crime prevention and control activities in criminal justice. Examines definitions, classifications, grades, prohibitions, and punishments ascribed to criminal law through statutes and case law. This class may include students from multiple sections. (Elective)

Course Outcomes
- Explain what makes an act or omission a crime.
- Explain Mens Rea.
- Define the difference between General Intent and Specific Intent.
- Explain the Violence Against Women Act.
- Discuss the difference between Church and State.
- Explain what a Grand Jury is and its functions today.
- Explain the history of the Eighth Amendment to the U.S. Constitution.

CJ 115 : Constitutional Issues in Criminal Justice
Credits 5
Quarter Offered Winter
Comprehensive study and analysis of constitutional law applying to administration of justice (criminal law procedure), specifically constitutional guidelines guaranteeing due process of law, equal protection, and fundamental fairness in application of the law. This class may include students from multiple sections.

Course Outcomes
- To appreciate the long constitutional history of responding to crime with justice;
- To understand the developments in society such as technological innovations shape and reshape criminal justice legislation;
- To understand the roles and functions of police, courts and corrections in a constantly challenging society;
- To understand and appreciate a multicultural society;
- To understand and explain the constitutional issues facing today’s criminal justice system;
- Identify the constitutional roles and functions of police, courts, and corrections as they apply to the criminal justice system.

CJ 121 : Criminal Evidence
Credits 5
Quarter Offered Winter
Rules of criminal evidence regulating the burden of proof, admissibility, relevancy, materiality, weight, and sufficiency of evidence in criminal legal proceedings. This class may include students from multiple sections.

Course Outcomes
- Understand and explain the history of evidence law and the legal process.
- Be able to discuss the sources of the individual rights including the US Constitution and Bill of Rights.
- Be able to discuss the implications of the Bill of Rights regarding evidence.
- Be familiar with the concept of judicial review.
- Be knowledgeable about the history of the rules of evidence.
- Identify the federal sources of rules of evidence.
- Be able to discuss the role of the Constitution, Supreme Court, and the Federal Courts in evidence law.
- Be familiar with the Uniform Rules of Evidence and the Federal Rules of Evidence.
- Understand the role of state constitutions, rules of evidence, and case law as they relate to evidence.
- Understand the content and quality of good evidence.
- Be able to distinguish between the concepts of relevancy, materiality, and inadmissibility in evidence.

CJ 136 : Law Enforcement Report Writing
Credits 5
Quarter Offered Winter
Report writing for law enforcement provides students with a comprehensive guideline that documents all the aspects of the criminal justice system, from the arrival at an incident to the presentation of the written report in court. This class may include students from multiple sections.

Course Outcomes
- Demonstrate proficiency in basic English grammar and police terminology.
- Exhibit proficiency taking notes at a crime scene.
Demonstrate the process of writing a detailed, narrative case report for an investigation in a chronological format.

Explain the duties of the first responding officer arriving at a crime scene.

Accurately complete various forms utilized by officers in their day to day duties.

Demonstrate an understanding of basic requirements needed in probable cause affidavits, search warrants and arrest warrants.

Explain what an Affidavit of Expertise is and how it builds a foundation for court room testimony.

**CJ 211 : Criminal Investigation**

**Credits** 5  
**Quarter Offered** Spring  
Criminal investigation case management, interview/interrogation techniques and methods for reconstructing past events. Provides basic skills for conducting criminal investigations. This class may include students from multiple sections.

**Course Outcomes**
- Define the major historical benchmarks of criminal investigation.
- Define and apply the basic concepts of criminal investigation.
- Define and apply how current technology impacts police investigations.
- Understand the interrelationships that the criminal investigator has with other professionals in the system.
- Understand crime specific investigative techniques.
- Understand arrest and search responsibilities of investigators.
- Conduct successful victim, witness and suspect interviews.
- Understand court process, testimony and evidence presentation.
- Comprehend the importance of future directions in police criminal investigation techniques.

**CJ 236 : Introduction to Patrol Procedures**

**Credits** 5  
**Quarter Offered** Fall  
Provides an overview of the types and purposes of police patrol, including vehicle patrol and routing patrol procedures, mediation, and management of crisis situations. Emphasis is placed on citizen protection, crime prevention, and identification and apprehension of suspects. This class may include students from multiple sections.

**Course Outcomes**
- Explain the role of the field officer in the overall scheme of law enforcement.
- Describe how a police or sheriff’s department is organized and managed in the 21st Century.
- Recount a brief history of police patrol in the United States.
- Discuss the basic objectives of police patrol.
- List and explain the basic patrol activities.
- Explain the decision-making process in deployment of resources.
- Discuss the importance of ethical conduct and integrity of the law enforcement professional.

**CJ 241 : Ethics in Criminal Justice**

**Credits** 5  
**Quarter Offered** Spring  
Philosophical foundations of moral and ethical theory, doctrines, and controversies for understanding the necessity for practicing good moral and ethical judgment when performing criminal justice duties. This class may include students from multiple sections.

**Course Outcomes**
- Define the term ethics and explain its application in the criminal justice system.
- Examine the philosophical foundations of ethical theory and list the major theories and theorists.
- Define the term ethics and describe the nature and sources of ethics.
- Trace the historical origins of ethics and describe its development.
- Explain how constitutional provisions serve as a source of ethics.
- Explain the role of law as a source of ethics.
- Describe the purpose of a professional code of ethics in criminal justice and explain why it is important to attach ethics to the issue of professionalism.
CJ 242: Introduction to Police Management

Credits 5
Introduces selected issues and practices associated with midlevel police management. Emphasizes the changing police environment and the shift that has been occurring in police organizational structures. This class may include students from multiple sections.

Course Outcomes
- Define the major historical benchmarks of police management.
- Define and apply the major theoretical management principles to current police operations including leadership, supervision, and communications.
- Define and apply how current technology impacts police operations.
- Present and analyze current managerial issues related to human resources, planning and labor relations.
- Present future directions in police management.
- Conduct proactive planning.

CJ 250: Supervision for Law Enforcement

Credits 5
Quarter Offered Winter
Introduction to selected issues and practices associated with police supervision. This course focuses on strength based leadership, ethics, communications, empowerment, self-control, and teamwork. Students will learn how to apply basic leadership theory and practice of police supervision to improve performance and accountability. This class may include students from multiple sections.

Course Outcomes
- Identify issues related to supervising law enforcement personnel.
- Explore leadership theory and practices.
- Discuss the art of persuasion and the language of reassurance.
- Discuss ethics, empowerment, and self-control.
- Apply effective communication strategies to motivate individuals and teams.
- Analyze strength based leadership strategies in law enforcement.

CJ 260: Internship

Credits 1-5
Quarter Offered Fall, Winter, Spring
Internship in a workplace setting of the student’s choice, based on needs and career interests. Agency background check may be required by law enforcement internship employers. This class may include students from multiple sections.

Prerequisites CJ& 101, CJ& 105 and CJ 236

Course Outcomes
- Participate in a structured work experience related to the program of study and/or career goal
- Develop an internship learning contract with supervisor to describe duties, responsibilities and hours
- Apply skills and concepts learned throughout the student’s studies in the field of criminal justice in a workplace setting
Cybersecurity & Computer Forensics (CSIA)

CSIA 110: Introduction to Cybersecurity and Cybercrime
Credits 5
Quarter Offered Spring
Provides an introduction to the field of Cyber Security through the analysis of technology and concepts in the field of cyber security and cybercrime. This course provides a complete introduction to the protection of business information and systems that support business process. The objective is to identify common threats and attacks, analyze the role of security techniques and architectures, explain the role of cryptography, and analyze issues related to managing security. This class may include students from multiple sections.
Course Outcomes
- Develop an understanding of security in relation to technology and information systems.
- Demonstrate an understanding of basic computer and networking technologies in relation to IT security.
- Identify career pathways in the fields of digital forensics and cyber security.
- Explore case studies in the fields of cyber security and cyber crime.
- Develop basic understanding of the role of information security in the IT field.
- Identify core principles of cybercrime and cybersecurity.

CSIA 185: Cybersecurity I: Risks, Control and Encryption
Credits 5
Quarter Offered Winter
This course explores the basic security landscape through the topics of risks, threats, control and encryption. Learn how to assess and prioritize risks with computer system, implement authentication controls and the functions of encryption/cryptography. Course may prepare students to complete Security + certification. Course maps to CTCITC117 Security +. This class may include students from multiple sections.
Course Outcomes
- Demonstrate an understanding of the process for comparing and prioritizing security risks.
- Demonstrate an understanding of mechanisms used to control access to computer systems.
- Illustrate techniques for controlling computer files.
- Identify features of major file systems used in operating systems and removable storage.
- Articulate techniques for accurately associating individuals with user identities inside computer systems.
- Demonstrate the fundamentals of encryption and cryptanalysis.

CSIA 190: Cybersecurity II: Securing the Modern Enterprise
Credits 5
Quarter Offered Spring
From securing networked computers to securing the web this course provides and in-depth look at the challenges and opportunities with securing the modern enterprise. This class may include students from multiple sections.
Course Outcomes
- Demonstrate the core functions of computer networking.
- Identify and demonstrate understanding of networks connect to other networks.
- Articulate the risks and threats unique to large enterprises.
- Demonstrate and understanding of how encryption on networks functions.
- Articulate the security issues with email and other internet services used in the enterprise.
- Demonstrate understanding of government level information security policy.
- List security classifications and clearance levels within various government agencies.

CSIA 195: Cybersecurity III: Ethical Hacking
Credits 5
Quarter Offered Fall
This course serves as an introduction into the skills, steps and concepts related to the field of penetration testing and ethical hacking. The modern penetration tester or “pen tester” relies on a specific set of skills to help secure IT infrastructure by testing defenses. This course places a heavy emphasis on the ethical issues and practices required by all professional penetration testers. This class may include students from multiple sections.
Course Outcomes
Articulate the ethical issues of information technology.
Demonstrate the principles of unethical and ethical penetration testing.
Demonstrate working knowledge of reconnaissance practices and tools including scanning and sniffing tools.
List vulnerabilities within TCP/IP.
Demonstrate understanding of password cracking, spoofing and session hijacking techniques.
Identify techniques for penetrating network devices.
Demonstrate understanding of operating system vulnerabilities including Windows and Linux Operating Systems.
Demonstrate the proper incident handling techniques and practices.

**CSIA 280 : Computer Forensics I: Intro to Computer Forensic**
**Credits** 5  
**Quarter Offered** Winter
Explore the role and skillset required of the computer forensics professional investigator including an introduction to the computer investigation process, data acquisition process, crime scenes and forensics tools. This class may include students from multiple sections.

**Course Outcomes**
- Define computer forensics and describe how to prepare for computer investigations.
- Demonstrate the importance of maintaining professional conduct.
- Explain how to prepare a computer investigation and explain requirements for data recovery workstations and software.
- Describe certification requirements for computer forensics lab.
- Explain the criteria for selecting a basic forensic workstation.
- List digital evidence storage formats and explain how to use acquisition tools.
- Articulate rules for controlling digital evidence.
- Explain guidelines for seizing digital evidence at a crime scene.
- Describe computer forensics software tools and methods for validating and testing computer forensics tools.

**CSIA 290 : Cybersecurity Capstone**
**Credits** 5  
**Quarter Offered** Spring
Provides cybersecurity students with the opportunity to develop a complex, quarter long project working in the field of information security. Students will work with their instructor to determine career readiness and develop a project focused on honing specific individual skills based on areas of need. Students will have the opportunity to collaborate with others and learn from real world needs, often working with industry on projects. This class may include students from multiple sections.

**Course Outcomes**
- Develop and present a resume to potential employers.
- Demonstrate job searching skills techniques for researching potential jobs.
- Design, deploy and document a project tied to real world needs and skills.
- Develop a plan for continuing professional development, certifications, and skill building.
- Present project work in written and oral forms.
- Demonstrate the ability to collaborate with others on a quarter long project.
- Demonstrate interviewing skills for technical job interviews.

**CSIA 299 : Integrated Study-Honors**
**Credits** 2
In this capstone honors course, students will complete a project relevant to their career pathway and program. The project will integrate at least two Business and IT programs (Business Administration, Administrative Office Systems, Multimedia Communications, Cybersecurity & Computer Forensics, or Information Technology) to provide breadth and relevance to the project. This class may include students from multiple sections.

**Prerequisites**
Completion of 60 credits in the BUS/IT program of study with a GPA of 3.5 or higher; and completion of the English course required in the BUS/IT program of study

**Course Outcomes**
- Complete a project relevant to learning pathway and program.
Dental Hygiene (DHYG)

**DHYG 110 : Oral Health Education**

**Credits 2**

This course introduces students to the profession of Dental Hygiene and the concepts and practices that prevent and control oral diseases. The emphasis is on oral health promotion, to include plaque control, patient education, and behavior modification through clinician/client communication. Communication strategies such as motivational interviewing, reflective listening, and anticipatory guidance are practiced. This class may include students from multiple sections.

**Course Outcomes**

- Describe the dental hygienist's role in patient education.
- Identify basic dental health assessment indices in patient evaluation.
- Explain how to use the health history and oral evaluation regarding patient oral hygiene care challenges and considerations.
- Explore methods to instruct patients in dental self-care procedures, utilizing principles and practices of prevention and control of disease, and oral health promotion.
- Describe how to plan, implement, and evaluate the individualized oral hygiene procedure for patients.
- Explain the rationale for the use of oral hygiene self-care devices and aids based on individual patient need, ability, and preference.
- Evaluate the patient's skill and effectiveness of the patient's oral self-care routine utilizing principles of Motivational Interviewing and practicing non-judgmental feedback.
- Describe the care of oral prosthesis.
- Describe the self-care needs for patients with dental implants.
- Evidence-base decision making.

**DHYG 111 : Head & Neck Anatomy**

**Credits 2**

This course expands student knowledge of the anatomical structures of the head and neck. Investigation of clinical correlations relevant for dental professionals is emphasized. Information from this course prepares the student for the **DHYG 124** Pain Management course as well. This class may include students from multiple sections.

**Course Outcomes**

- Use the correct anatomical terminology to describe structures of the head and neck.
- Identify major surface landmarks of the head and neck, including intraoral structures.
- Identify the bones of the head and neck and explain their relationships; describe major features of each bone including key foramina.
- Identify and describe the actions of the muscles of mastication, the muscles of facial expression, and the muscles of the tongue, palate, and pharynx.
- Explain the structure and function of the temporomandibular joint and signs and symptoms of temporomandibular disorders.
- Identify the major arteries and veins of the head and neck, describe regions served, and explain the consequences of common vascular conditions.
- Name and describe the functions of the twelve cranial nerves: trace autonomic innervations to major targets of the head and neck.
- Identify the branches of the trigeminal and facial nerves and explain deficits resulting from nerve lesions.
- Identify the major and minor salivary glands and ducts, describe their blood and nerve supply; explain conditions affecting salivary function; identify other glands of the head & neck region including thyroid, parathyroid & thymus glands.
- Trace the flow of air through the head and neck to the lungs; describe the anatomy of the paranasal sinuses and the relationship between the maxillary sinus and the oral cavity; explain laryngeal anatomy as it relates to laryngeal obstruction and emergency airway.
- Identify the major groups of lymph nodes in the head and neck and describe the drainage pathways of lymph from the teeth, oral cavity, and surrounding structures.

**DHYG 112 : Dental Anatomy & Morphology**

**Credits 2**
This course focuses on the study of anatomy and morphology of primary and permanent teeth. Students will also understand the structures that form the foundation for normal and abnormal function and the relationship of teeth to each other. Anatomical terminology, root morphology, hard tissue charting, occlusion and dental anomalies are applied to clinical correlations in the laboratory setting. This class may include students from multiple sections.

**Course Outcomes**
- Define and interpret general anatomical terms related to dental anatomy, tooth morphology, and the oral cavity.
- Identify tooth form and function.
- Describe the interrelation of normal structures, form and function of the teeth and supporting tissues.
- Describe and compare permanent and primary teeth, and the eruption sequence.
- List and utilize the dental charting systems.
- Name and chart existing teeth, missing teeth, carious lesions, restorations and dental anomalies.
- Describe dental occlusion classifications and recognize occlusal deviations from normal.
- Define and utilize the Universal, International and Palmer numbering systems.

**DHYG 114 : Oral History & Embryology**

**Credits** 2

This course explores the embryologic formation and the histologic processes of the oral cavity. Normal and abnormal structures of the head and oral cavity, as well as microscopic anatomy of the oral cavity are studied. This class may include students from multiple sections.

**Course Outcomes**
- Explain the major events of embryologic development as they relate to the orofacial complex.
- Analyze the process of facial development including disturbances in development.
- Describe the types of clefts that occur in the face and palate and when they are likely to develop.
- Explain the contribution of branchial arches to facial, palatal and tongue development.
- Describe and diagram the process of odontogenesis.
- Explain the processes of amelogenesis, dentinogenesis & cementogenesis.
- Explain the process of root formation and eruption.
- Identify the histologic structures of enamel, dentin, and cementum.
- Discuss the dentin-pulp complex and the properties of dentin and pulp.
- Define and describe the histology of the periodontium including alveolar bone, periodontal ligament fibers and oral mucosa.
- Diagram, describe and identify the histologic structures and functions of the gingiva and oral mucosa including lining, masticatory and specialized types.
- Identify and diagram the histologic structures of the salivary glands.
- Discuss clinical issues that integrate embryology and histology with patient treatment.

**DHYG 115 : Pre-Clinical Dental Hygiene**

**Credits** 3

Students are introduced to the theoretical and practical aspects of all areas of clinical dental hygiene. Areas explored include the contemporary role of the dental hygienist, the evolving profession of dental hygiene, and procedures and techniques that are utilized in the dental hygiene process of care. Emphasis is on professionalism, patient communication, ergonomics, clinical systems and protocol, infection control, basic instrumentation and sharpening. This course also includes OSHA, CDC, hazard communication and infection control guidelines. This class may include students from multiple sections.

**Prerequisites**
Concurrent enrollment in **DHYG 116**

**Course Outcomes**
- Exhibit professionalism through personal appearance, attitude, legal and ethical conduct appropriate for the learning environment and ethical delivery of dental hygiene care.
- Explain novice professional and culturally sensitive communication skills.
- Identify the various roles of the dental hygienist and promote their growth through self-assessment and lifelong learning.
- Describe ADA recognized dental specialties and distinguish their respective areas of dental care delivery.
- Distinguish and summarize the phases of the dental hygiene process of care: Assessment, problem Identification/Diagnosis, Planning, Implementation, and Outcome Evaluation.
Define infection control protocols established by the Washington State Occupational Safety and Health Administration, the Centers for Disease Control and Prevention (CDC) and Organization for Safety, Asepsis and Prevention (OSAP).

Describe accurate, appropriate, comprehensive medical/dental history intake, and explain its rationale and implications.

Define normal vital signs: Temperature, blood pressure, pulse, and respiration, and explain the ramification(s) regarding deviations from normal.

Describe a systematic extra-oral and intra-oral examination of the hard and soft tissues.

Describe correct hard tissue dental charting and periodontal charting and their record maintenance.

Differentiate principles and demonstrate proper use of mirror, explorer, and probe including grasp and fulcrum.

Describe the rationale for proper ergonomic positioning of patient and operator.

Describe the design, function and use of basic universal curette scaling instruments and their sharpening method.

Define American Society of Anesthesiologists (ASA) status and discuss clinical care considerations.

**DHYG 116 : Pre-Clinical Dental Hygiene Lab**

**Credits 3**

This course provides the opportunity for application of the information presented concurrently in **DHYG 115**.

Students practice infection control, patient assessment, including taking vital signs, health history review, extra-oral and intra-oral examination, hard tissue evaluation, periodontal charting, instrument sharpening and instrumentation using manikins and student partners. Students are trained in Basic Life Support Systems (BLS).

This class may include students from multiple sections.

**Prerequisites**

Concurrent enrollment in **DHYG 115**

**Course Outcomes**

- Exhibit professionalism through personal appearance, attitude, and conduct appropriate for the humanistic learning environment and delivery of ethical dental hygiene care.
- Display novice professional and culturally sensitive communication skills.
- Explain the rationale, and demonstrate the use of infection control, sterilization, and exposure control procedures.
- Demonstrate the collection and documentation of accurate, comprehensive medical/dental histories related to oral/systemic disease and patient well-being.
- Explain and present to clinical faculty, using professional terminology, a summary of medical/dental history and physical status.
- Demonstrate proper clinic equipment maintenance.
- Display proper ergonomic positioning of patient and operator.
- Practice and examine normal vital signs: temperature, blood pressure, pulse, and respiration, and explain the ramification(s) regarding deviations from normal.
- Demonstrate and evaluate a systematic extraoral and intraoral examination of the hard and soft tissues.
- Demonstrate accurate hard tissue charting and record maintenance.
- Demonstrate basic understanding of periodontal, dental charting, and electronic record maintenance.
- Demonstrate correct utilization of instrumentation techniques as a novice clinician.
- Demonstrate and utilize correct sharpening techniques for universal curettes.
- Complete Basic Life Support (CPR) certification and explain its importance as a requirement for the entire dental team.

**DHYG 118 : Radiology I**

**Credits 2**

This course is designed to examine the fundamentals of dental radiography. Topics include history, physical, biological, radiation safety, legal and quality assurance considerations. Clinical applications include exposure techniques, film processing, digital techniques, along with interpreting and correcting technical errors. The radiology lab will also include obtaining diagnostic quality exposures on the dental mannequin DXTR. This class may include students from multiple sections.

**Course Outcomes**

- Describe the history and theory of dental radiology, to include discovery, characteristics, biology, and physics.
- Describe the federal, state, and local regulations and identify the components of dental x-ray equipment.
Discuss radiation protection and safety guidelines using (MPD) maximum permissible dose and ALARA concept.
Define the different types and uses of dental film, the manual processing procedure, and film mounting.
Explain the fundamentals, purpose, and use of digital imagining.
Demonstrate infection control protocols for the operator and patient in the lab setting.
Demonstrate proficiency in dental imaging using paralleling, bisecting, and bitewing techniques to obtain quality diagnostic radiographs in the lab setting.
Identify and describe the appearance of normal anatomy as well as abnormal structures and pathology in radiographic images.
Discuss patient relations, education, informed consent and legal implications as defined for the standard of care in the dental setting.

DHYG 120 : Intro to Periodontology I
Credits 3
This course presents a structured study of the discipline of periodontics with a focus on the biological, behavioral, and clinical aspects of periodontal diseases. Topics include normal vs. diseased periodontal structures, etiology, risk factors, classification, and epidemiology. Students will apply periodontal assessment techniques leading to the development of appropriate strategies for planning preventative care, initial treatment, and maintenance procedures for periodontal diseases. Students are introduced to evidence-based decision making as they apply course content to simulated cases. This class may include students from multiple sections.

Course Outcomes
- Examine the clinical and histologic anatomic structures of the periodontium in both health and disease.
- Identify the various risk factors for periodontal diseases as well as the relationship of periodontal diseases to other systemic diseases.
- Explain the American Academy of Periodontology classification system of periodontal diseases.
- Discuss the evidence-based approach to treatment planning and its advantages.
- Discuss the key concepts of effective periodontal maintenance care in the ongoing treatment of inflammatory periodontal diseases.

DHYG 121 : Pharmacology
Credits 3
This course introduces dental hygiene students to the principles of pharmacology and its relation to oral hygiene. Classes of pharmaceuticals and their treatment of common health disorders will be provided in addition to drugs that are commonly used in the dental practice setting. This class may include students from multiple sections.

Course Outcomes
- Identify medications frequently employed by dental hygienists and dentists.
- Identify common drug classes and the systemic diseases that are used to treat them.
- Recognize basic principles of pharmacokinetics, including absorption, therapeutic effect and elimination.
- Describe how certain pharmaceutical therapies can interact with oral hygiene and provide education on how any negative side effects to oral hygiene can be mitigated.
- Identify components of a written prescription and explain requirements to ensure the prescription is safe.
- Recognize commonly used drugs used in health emergency situations at dental offices.
- Define substance use disorders and recognize common drug classes that have abuse potential.
- Identify the role the dental hygienist has in aiding patients with tobacco use disorder.
- Analyze a patient medical and surgical history and identify drugs taken by the patient and how the drug could affect their care.

DHYG 122 : General and Oral Pathology
Credits 2
This course covers general pathological processes and the study of diseases and conditions affecting the oral and maxillofacial structures. Special emphasis is placed on the recognition of clinical signs and symptoms of disease, the diagnostic process, and the treatment of oral and maxillofacial diseases and disorders. This class may include students from multiple sections.

Course Outcomes
- Identify the eight categories of information for making a definitive diagnosis of an oral lesion.
- Identify the variants of normal and benign conditions in the oral cavity.
Demonstrates correct use of scientific terms to describe extra/intraoral lesions.
Describe the clinical signs and microscopic events associated with inflammation and repair.
Describe traumatic injuries to soft and hard tissues and the contributory factors.
Describe traumatic injuries to soft and hard tissues and the contributory factors.
Differentiate between hypersensitivity, autoimmune reactions, and immunodeficiency.
Identify the etiological organisms, routes of transmission and the oral manifestations of infectious disease.
Explain the role that the human papilloma virus plays in oropharyngeal cancer.
Describe the characteristic of developmental disorders as compared to normal developmental patterns and the related oral/systemic manifestations.
Describe the basic concepts of genetics and genetic abnormalities as compared to expected inheritance patterns.
Explain the difference between benign and malignant tumors and describe the diagnostic process for a definitive diagnosis for neoplastic pathologies.
Identify the general characteristics of endocrine, blood, gastrointestinal, connective tissue, and bone along with their associated oral pathologies.
Evaluate the scientific literature as it relates to commonly encountered oral pathological conditions.

DHYG 123: Medical & Dental Emergencies

Credits 2
In this course, students learn basic methods of medical and dental emergency prevention and management in the dental setting. Emphasis is placed on recognizing signs, symptoms, and treatment of the more common emergencies which may occur in the dental setting. Drugs and equipment that are utilized in the management of medical emergencies are explored. Students practice communication skills necessary in emergency situations. This class may include students from multiple sections.

Course Outcomes
- Explain the importance of patient evaluation and monitoring techniques relative to prevention of emergencies.
- Describe the relationship of vital signs to potential emergency situations.
- Evaluate patient history responses to develop follow-up questions to assess the patient’s risk of an emergency or need for treatment modification(s).
- Describe methods for evaluating patients’ anxiety levels and methods to reduce anxiety.
- Demonstrate appropriate recognition and management of medical and dental emergencies, which may occur in the dental office.
- Review dental office and personnel emergency preparedness.
- Demonstrate familiarity with components of a basic dental office emergency kit.
- Recognize patient medical and dental health factors which may increase the chance of emergencies to arise in the dental setting.
- Recognize patient medical and dental health factors which may increase the chance of emergencies to arise in the dental setting.
- Describe and drill with the dental hygiene clinic emergency protocol.

DHYG 124: Pain Management

Credits 2
This course provides instruction, clinical experiences, and assessment of atraumatic techniques of local anesthesia delivery. Introduction and experience with safe pain management strategies including topical, injectable, and subgingival local anesthetic delivery will be presented and implemented. Methods of sedation will be introduced and experienced, with an emphasis on nitrous oxide/oxygen analgesia and sedation. This class may include students from multiple sections.

Course Outcomes
- Recognize patient anxiety and pain and explain how the cardiovascular system, emotions, and behavior are impacted.
- Explain the physiology and pharmacology of local anesthesia.
- Demonstrate a commanding knowledge of local anesthetics and vasoconstrictors used in dentistry.
- Describe the medical issues impacting the use of local anesthetics and vasoconstrictors in dental care.
- Describe possible local and systemic complications of local anesthesia and how to manage them.
- Utilize local anesthesia armamentarium with appropriate safety and infection control considerations.
- Explain the anatomy of areas anesthetized with local anesthesia for dental/dental hygiene care.
Explain the penetration site, depth of penetration, deposition site, amount deposited, and area anesthetized for the following injections: Infiltration, Anterior Superior Alveolar, Posterior Superior Alveolar, Middle Superior Alveolar, Anterior Middle Superior Alveolar, Nasopalatine, Greater Palatine, Inferior Alveolar, Lingual, Long Buccal and Gow-Gates.

Perform the following injections: Infiltration, Anterior Superior Alveolar, Posterior Superior Alveolar, Middle Superior Alveolar, Anterior Middle Superior Alveolar, Nasopalatine, Greater Palatine, Inferior Alveolar, Lingual, Long Buccal and Gow-Gates.

Demonstrate how to make a thorough chart entry for the administration of local anesthesia and nitrous oxide administration.

Explain the physiology and pharmacology of nitrous oxide utilization.

Explain the medical considerations and precautions with the use of nitrous oxide.

Demonstrate the use of nitrous oxide equipment in administration to patients.

**DHYG 125: Dental Hygiene Theory I**

**Credits** 1

This lecture course is designed to provide students with the dental hygiene process of care for child, adolescent, adult, and geriatric patients. Promotion of oral health and wellness is stressed through lectures and case studies. Products are discussed as well as cariology, fluoride delivery options and polishing. Tooth desensitizing and more advanced sharpening techniques will be added to the students’ growing dental hygiene knowledge. Students will begin to create a clinical case portfolio that will be submitted for review in the final quarter of the dental hygiene program. Students integrate knowledge and skills developed in DHYG 110, DHYG 115, DHYG 116, and concurrent course DHYG 126. This class may include students from multiple sections.

**Prerequisites**

DHYG 115; concurrent enrollment in DHYG 126

**Course Outcomes**

- Exhibit professionalism through personal appearance, attitude, legal and ethical conduct appropriate for the humanistic learning environment and delivery of ethical dental hygiene care.
- Identify occlusal morphology, beginning caries detection and explain the risk factors for caries disease and its management via preventive and dental hygiene treatment methods.
- Identify occlusal morphology, beginning caries detection and explain the risk factors for caries disease and its management via preventive and dental hygiene treatment methods.
- State rationale, precautions, and describe procedures for the professional applications of topical fluorides.
- Discuss the delivery of dental hygiene therapy to children and adolescents.
- Discuss the delivery of dental hygiene therapy to geriatric patients and patients who are pregnant.
- Evaluate and recognize radiographic technique and anatomical and dental structures in states of health and disease on radiographs.
- Describe accurate pharmacological, dental, and medical information for optimized patient care, safety, and collaboration.
- Define Evidence-Based Decision Making (EBDM), list the fundamental principles including types of evidence.
- Describe the criteria for creating a professional portfolio.

**DHYG 126: Clinical Dental Hygiene I**

**Credits** 4

This course is designed to allow students to demonstrate professional behavior and beginning clinical experiences in the treatment of child, adolescent, adult, and geriatric patients. Promotion of oral health and wellness is stressed through clinical experiences with patient assessment, dental hygiene care planning, intra-professional communication via case presentation and implementation and evaluation of treatment outcomes. This class may include students from multiple sections.

**Prerequisites**

DHYG 116; concurrent enrollment in DHYG 125

**Course Outcomes**

- Exhibit professionalism through personal appearance, attitude, and conduct appropriate for the humanistic learning environment and delivery of ethical dental hygiene care.
- Employ developing professional and culturally sensitive communication skills that apply health equity concepts.
- Demonstrate competence in the use of infection control, sterilization, and exposure control procedures.
Describe accurate, comprehensive medical/dental histories related to oral/systemic disease and patient well-being and present a summary of medical/dental history and physical status to clinical faculty.
Demonstrate accurate utilization of clinical software, patient electronic health records and hard copy patient records.
Demonstrate correct dental charting and record maintenance.
Demonstrate beginning data analysis, dental presentation, and the process of gaining informed consent, hygiene diagnosis, and case type planning.
Demonstrate comprehensive treatment planning, presentation, and the process of gaining informed consent.
Demonstrate correct novice periodontal therapy instrumentation techniques, utilizing all instructed curettes and sickles.
Describe the correct design, function, and demonstrate the use of sickle scaling instruments.
Collect accurate pharmacological, dental, and medical information for optimized patient care, safety, and collaboration.
Differentiate and select the appropriate oro-physiotherapy (OPT) aids, demonstrate their use and evaluate patients' ability to use.
Evaluate and recognize radiographic technique, anatomical and dental structures in states of health and disease.
Implement patient-centered DH treatment modalities, including oral hygiene instructions, therapeutic services, and adjunctive therapies.
Develop and present comprehensive DH treatment plans for the child and adult delivery of dental hygiene therapy.
Demonstrate and evaluate correct coronal polishing procedures and techniques.
State rationale, precautions, and describe procedures for the professional applications of tooth desensitizing agents and fluoride varnish.
Present written reflections and observations regarding DH clinical care.
Demonstrate and utilize correct sharpening techniques for universal curettes, and sickles.
Utilize and be familiar with the rationale for professional topical fluoride applications and alternative methods of fluoride delivery.
Evaluate the patient response, prognosis, and re-evaluation/recare plan.
Demonstrate an understanding of occlusal morphology, beginning caries detection, and appropriate protocols.
Assess the patient’s skill and the effectiveness of the patient’s oral self-care routine utilizing disclosing solution, a plaque index and the principles of motivational interviewing.

**DHYG 128 : Radiology II**

**Credits** 2

In this course, students will gain experience with industry standards such as digital intra oral, digital extra oral, digital photography, and intraoral cameras with critique and interpretation of normal and abnormal conditions. Radiographs on patient populations are performed. Clinical applications of the concepts delivered in **DHYG 118** take place during the laboratory experience. This class may include students from multiple sections.

**Prerequisites**

**DHYG 118**

**Course Outcomes**

- Review infection control procedures (Radiology I) to include preparation of treatment room, supplies, and equipment for the dental patient and operator in the lab and clinical setting.
- Participate in quality assurance control tests for film, digital imaging, and x-ray equipment to include a detailed written administrative program.
- Identify and describe exposure and technique errors to include vertical and horizontal angulations, film/sensor placements, PID alignment, double images, movement, and other miscellaneous problems.
- Demonstrate the correct vertical angulations for maxillary and mandibular occlusal projections and localization techniques.
- Identify and describe extra-oral imaging such as panoramic, cephalometric, and three-dimensional digital imaging.
- Describe and demonstrate equipment and patient preparation, patient positioning, and cause of errors of a panoramic image.
- Identify normal dental anatomy, landmarks, and bones of the skull on a panoramic image.
Explain the importance of image interpretation for dental diagnosis and to educate the dental patient including periodontal disease, restorations, periapical lesions, dental caries, trauma, and other lesions. Identify and demonstrate the intraoral camera and lighting in the use of the intraoral camera for capturing pictures of normal and abnormal structures to diagnose dental conditions. Identify and describe strategies used for dental imaging when managing pediatric and patients with special care needs. Demonstrate proficiency in dental imaging using paralleling, bisecting, and bitewing techniques to obtain quality diagnostic radiographs on a patient.

DHYG 131: Restorative & Dental Materials I

Credits 3
This course introduces the student to selected dental materials and to basic restorative dentistry procedures and techniques. The course is designed to give students a working knowledge of skills required for restorative dentistry. This class may include students from multiple sections.

Course Outcomes
- Explain the principles of cavity design and cavity preparation.
- Identify classes of dental materials used in dentistry.
- Discuss general properties and characteristics of dental materials.
- Manipulate the dental materials introduced this quarter, following the manufacturers’ directions and safety precautions.
- Demonstrate the principles of selected restorative dentistry skills and procedures including self-evaluation criteria.

DHYG 135: Dental Hygiene Theory II

Credits 1
In this lecture course students learn the principles, rationale, and applications of area-specific curets, advanced fulcrum techniques, piezo and magnetostrictive ultrasonic scaling, air-powder polishing. Students will continue utilizing the dental hygiene process of care for child, adolescent, adult, and geriatric patients. Promotion of oral health and wellness is stressed through lectures and case studies. Students continue to add to their clinical case portfolio. This class may include students from multiple sections.

Prerequisites
- DHYG 125; concurrent enrollment in DHYG 136

Course Outcomes
- Exhibit professionalism through personal appearance, attitude, legal and ethical conduct appropriate for the humanistic learning environment and delivery of ethical dental hygiene care.
- Discuss the role of saliva in oral health.
- Summarize recall protocol necessary for continuity in long term preventive periodontal care.
- Evaluate and recognize radiographic technique, anatomical and dental structures in states of health and disease.
- Describe correct sharpening techniques for area-specific curettes and files.
- Explain the rationale for ultrasonic technology, both piezoelectric and magnetostrictive instrumentation, including their indications, and contraindications.
- Explain the rationale and practice utilization of air-powder polishing technology, including its indications, and contraindications.
- Describe the correct instrument design, function and use of area specific Gracey curettes and files.
- Explain individualized treatment modifications for patients with special healthcare needs.
- State rationale, precautions, and describe procedures for the professional application of silver diamine fluoride and other remineralizing products.

DHYG 136: Dental Hygiene Clinic II

Credits 4
In this course, the use of ultrasonic scaling, air-polishing, area-specific curettes and periodontal files, advanced fulcrums and other treatment modalities are implemented. Cariology considerations and additional fluoride delivery options implemented for patient care. Students integrate knowledge and skills developed in previous courses. This class may include students from multiple sections.

Prerequisites
- DHYG 126; concurrent enrollment in DHYG 135

Course Outcomes
Exhibit professionalism through personal appearance, attitude, and conduct appropriate for the humanistic learning environment and delivery of ethical dental hygiene care.

Employ competent professional and culturally sensitive communication skills that apply health equity concepts.

Demonstrate continued competence in the use of infection control, sterilization, and exposure control procedures.

Describe accurate, comprehensive medical/dental histories related to oral/systemic disease and patient well-being and present a summary of medical/dental history and physical status to clinical faculty.

Develop and present comprehensive DH treatment plans for the child and adult delivery of dental hygiene therapy.

Differentiate and select the appropriate oro-physiotherapy (OPT) aids, demonstrate their use and evaluate patients’ ability to use.

Demonstrate correct periodontal therapy instrumentation techniques, utilizing all instructed curettes, scalers and files.

Present written reflections and observations regarding DH care provided in the clinic and a variety of service-learning rotations.

Demonstrate rationale and practice utilization of ultrasonic technology, both piezoelectric and magnetostrictive instrumentation, including the indications, and contraindications.

Demonstrate the rationale and practice utilization of air-powder polishing technology, instrumentation, including the indications, and contraindications.

Demonstrate continued assessment and treatment skills delivered at a beginning level for a variety of clinic patients.

Evaluate the patient response, prognosis, and re-evaluation/recare plan.

Evaluate and recognize radiographic technique, anatomical and dental structures in states of health and disease.

Evaluate and recognize indications for the professional application of silver diamine fluoride.

**DHYG 220 : Periodontics II**

**Credits** 3

This course presents advanced concepts of dental hygiene theory, comprehensive dental hygiene assessment, and treatment planning. Topics will include evidence-based decision making, powered instrumentation, dentinal hypersensitivity, periodontal pharmacology/chemotherapies to control disease activity, advanced instrumentation techniques and root morphology, sharpening skills, periodontal/restorative relationships, evolving technology for evaluation of oral lesions, and practice with comprehensive dental hygiene treatment planning. This class may include students from multiple sections.

**Prerequisites**

**DHYG 120**

**Course Outcomes**

- Apply an evidence-based approach to dental hygiene treatment planning.
- Describe rationale and techniques for utilizing powered instrumentation.
- Describe options and techniques for treatment of dentinal hypersensitivity.
- Explain the types of chemotherapeutic agents in dentistry, including techniques and their limitations.
- Outline basic periodontal surgical procedures, their intended outcomes, and the post-operative care indicated to promote healing.
- Formulate comprehensive dental hygiene care plans using advanced clinical procedures and instrumentation, including modifications required for clients with special needs.
- Evaluate instrument sharpening techniques and choice of stone.
- Present case documentation including imaging media for a periodontally involved patient.

**DHYG 224 : Patient Management/Special Needs**

**Credits** 2

This course focuses on providing preventive dental hygiene care for people with special health care needs. It provides students with a broad background in the provision of oral health services for people with a variety of special needs and circumstances. This class may include students from multiple sections.

**Course Outcomes**

- Explain reasons why dental hygienists should treat people with special needs.
- Describe societal trends regarding oral health preventive care for people with special needs.
- Evaluate and discuss barriers to oral health care within a population group.
Identify community-based systems and common goals, identifying most urgent needs.
Explain etiologies and definitions of intellectual disabilities, utilizing correct terminology.
Contrast the differences in the spectrum of autism disorders. Explain treatment options and relevant considerations.
Discuss various and specific treatment options, risks, benefits, and alternatives to care regarding geriatric oral health care.
Determine appropriate treatment planning based on medical history and dental abnormalities.
Utilize people-first language when referencing people with special needs.
Discuss legal, clinical, and emergency issues relating to informed consent for patients with special needs.
Describe how informed consent can be obtained and from whom. Apply information to case studies.
Integrate principles of positive reinforcement with structuring and promoting good oral health self-care.
Describe the safety considerations of wheelchair transfers.
Evaluate effective use of restraints, mouth props and techniques for patients who are willing, but unable to cooperate.
Relate limitations of disability to dental hygiene therapies, decision-making, and oral hygiene instruction.

DHYG 227 : Law and Ethics
Credits 3
Students study ethical theories and issues related to the practice of dental hygiene and professionalism. A personal philosophy of professional conduct, continuous quality assurance and self-assessment is explored. Fundamental factors necessary to practice within existing regulatory frameworks are stressed. Inter- and intra-professional communication is practiced. This course will also include Washington State laws to pass the required state Drug and Law exam. This class may include students from multiple sections.

Course Outcomes
- Formulate personal and professional moral and ethical decision-making strategies.
- Apply basic biomedical ethics to clinical practice, including ethical, legal, and regulatory concepts.
- Define and discuss ethics and professionalism, including models of professionalism in oral health care.
- Define and apply the concept of "standard of care".
- Discuss patients’ legal rights and responsibilities regarding dental hygiene care.
- Explain concepts of legal documentation and professional risk management that apply to practice.
- Apply concepts of quality assurance through self-assessment and record auditing.
- Establish and apply ethical reflection and self-assessment as a lifelong endeavor.
- Analyze factors associated with abuse of children, domestic partners, and elders and determine the appropriate actions to take in suspected cases.
- Discuss the Codes of Ethics from professional dental organizations and analyze their application to practice.
- Discuss legislation affecting dental practice and jurisprudence.

DHYG 231 : Sociology of Multiculturalism and Community Oral Health
Credits 5
This course is designed to enable students to examine the principles and practices of social and cultural competent oral health care. The social and professional responsibility of the dental professional regarding public promotion of oral health and access to care is examined. Course will introduce students to health care disparities from a sociological perspective, such as social structure, socialization, and inequalities of underserved populations. The role of effective communication and the provision of care with diverse populations will be explored. Emphasis is placed on the role of the dental hygienist as an innovator and educator in community dental health programs with consideration to the social determinants of oral health, needs assessment, biostatistics application, program planning, results, and evaluation. Students will design and implement a community-based oral health research project. This class may include students from multiple sections.

Course Outcomes
- Describe the historical development of sociology and why sociology is important to oral healthcare.
- Identify social theories, concepts, and trends affecting domestic and global oral health.
- Compare and contrast social and cultural determinants of oral health.
- Identify the diverse social, cultural, economic, and political factors influencing oral health problems.
- Compare and contrast the principles and practices of public health as they relate to dental health.
- Describe the role of the dental hygienist in community health programs.
Describe the major oral health problems using epidemiology and the extent to which they affect the population.

Assess the oral health needs of a target group utilizing surveys, questionnaires, interviews, or other means.

Describe how to develop a community dental health program including project objectives, proposals, assessment instruments, implementation and evaluations.

Identify and describe current public dental health measures, programs, and resources available to reduce or control major oral health problems in a diverse array of communities.

Utilize scientific literature to select treatment modalities consistent with best knowledge and research available in the field.

Compile a list of community dental health information resources.

Explain the status of community water fluoridation and the social implications this has on the public health decay rate statistics.

Apply information gained in course to school dental health program rotation, to include dental screening and grade appropriate student oral health education.

Examine the social and professional responsibility of the dental professional regarding public dental health and access.

Review basic biostatistics as it relates to oral health and understanding scientific literature.

Describe health communication in relation to health information technology, as well as strategies to frame health messages for diverse audiences and media applications.

**DHYG 241: Restorative & Dental Materials II**

**Credits** 3

This course is a continuation of **DHYG 131** Restorative I and builds on previously introduced principles of restorative dentistry and corresponding armamentarium. Students continue to develop restorative skills through lab experiences and didactic instruction. This class may include students from multiple sections.

**Prerequisites**

**DHYG 131**

**Course Outcomes**

- Manipulate the dental materials introduced this quarter, following the manufacturers’ directions and safety precautions.
- Demonstrate the principles of selected restorative dentistry skills and procedures including self-evaluation criteria.
- Identify different dental gypsum products and impression materials and have a working knowledge of when each product/material is used in restorative dentistry.
- Identify the different types of implants available in the dental industry and discuss the indications for and contraindications to dental implants.
- Describe the different treatment options for tooth whitening including techniques, patient selection and side effects.
- Identify various types of dental ceramics used in restorative dentistry.
- Identify various dental cements and their applications.

**DHYG 242: Restorative & Dental Materials III**

**Credits** 3

This course is a continuation of **DHYG 241** Restorative Dentistry II and builds on previously introduced principles of restorative dentistry and corresponding armamentarium. Students continue to develop restorative skills through lab experiences and clinical application. This class may include students from multiple sections.

**Prerequisites**

**DHYG 241**

**Course Outcomes**

- Manipulate the various dental materials introduced in previous quarters, following the manufacturers’ directions and safety precautions including self-evaluation criteria in laboratory and clinical setting.
- Demonstrate the principles of selected restorative dentistry skills and procedures including self-evaluation criteria in laboratory and clinical setting.
- Place and remove rubber dam demonstrating beginner competency.
- Perform alginate impressions, pour, and trim study model demonstrating beginner competency.
- Place cavity liners, bases, and other cavity medicaments with guidance.
- Perform margination procedure for patient with composite or amalgam overhang with guidance.
- Recontour, finish, and polish previously placed amalgam restorations in laboratory setting.
DHYG 243 : Restorative & Dental Materials IV

Credits  3
This course is a continuation of DHYG 242 Restorative Dentistry III and builds on previously introduced principles of restorative dentistry and corresponding armamentarium. Students continue to develop restorative skills through lab experiences and clinical application. This class may include students from multiple sections.

Prerequisites
DHYG 242

Course Outcomes
- Manipulate the various dental materials introduced in previous quarters, following the manufacturers’ directions and safety precautions including self-evaluation criteria in laboratory and clinical setting.
- Demonstrate the principles of selected restorative dentistry skills and procedures including self-evaluation criteria in laboratory and clinical setting.
- Place and remove rubber dam demonstrating competency.
- Perform alginate impressions, pour, and trim study model demonstrating competency.
- Place cavity liners, bases, and other cavity medicaments without assistance.
- Perform margination procedure for patient with composite or amalgam overhang with guidance demonstrating competency.
- Recontour, finish, and polish previously placed amalgam restorations in laboratory setting.

DHYG 244 : Biochemistry & Nutrition

Credits  3
This course is designed to provide a review of the basic principles of biochemistry and nutrition related to oral health and disease. Nutritional knowledge and principles will be utilized as it relates to the dental hygiene process of care. Students will complete patient dietary surveys and develop correctional nutritional plans relative to oral health. This class may include students from multiple sections.

Course Outcomes
- Describe connections between oral and nutritional health as they relate to systemic health.
- Perform nutritional assessments, utilizing patient-centered communication techniques to assess food diaries and 24-hour recalls of themselves, student partners, and clinic patients to develop treatment plans for dental hygiene care.
- Develop and model critical thinking and best-practices for learning, and engage in high quality, frequent oral discussions, and presentations.
- Describe the biochemical and physiological aspects of nutrients.
- Describe the basic process of food transport, digestion, and nutrient absorption.
- Describe metabolism of the energy nutrients.
- Describe the dietary function, recommended intake and ramifications of deficiency or excessive intake of carbohydrates, proteins, and lipids.
- Compare and contrast vitamins and minerals and their dietary function, recommended intake and ramification of deficiency or excess in oral and systemic health.
- Explain nutritional demands associated with various stages of human development.
- Describe nutritional implications related to chronic diseases.
- Develop and actively engage in academic/college writing and research skills appropriate to the high aptitude of students within this academic course.

DHYG 245 : Dental Hygiene Theory III

Credits  1
This lecture course is designed to enable students to expand their knowledge about treatment of the periodontally involved patient. Students will increase their knowledge of techniques for patient assessment, treatment planning, patient communication, full mouth scaling, and non-surgical periodontal treatment. Students study the connection between oral and systemic health. Tobacco Cessation Counseling is introduced. Students continue to add to their clinical case portfolio. This class may include students from multiple sections.

Prerequisites
DHYG 135; concurrent enrollment in DHYG 246

Course Outcomes
- Exhibit professionalism through personal appearance, attitude, legal and ethical conduct appropriate for the humanistic learning environment and delivery of dental hygiene care.
- Discuss correct preventive and periodontal therapy instrumentation techniques.
Define connections between oral and overall health as they relate to decision making in the delivery of clinical patient care.

Explain advanced fulcrums that may be used when treating periodontally involved patients or improving access to difficult areas.

Develop and actively engage in academic/college writing and research skills appropriate to the academic course.

Summarize recall protocol necessary for continuity in long term preventive periodontal care.

Explain the process of Tobacco Cessation Counseling.

Develop and model critical thinking.

Engage in high-quality oral discussions and presentations.

**DHYG 246: Clinical Dental Hygiene III**

**Credits 5**

This clinical course is designed to enable students to demonstrate competency with the pediatric and adolescent patient and to expand their experience in the treatment of the periodontally involved patient. Students refine techniques for treatment planning for root planing and non-surgical periodontal treatment. Utilization of radiographs, local anesthesia and nitrous oxide sedation in patient care is further developed. Students integrate knowledge and skills developed in all previous course work to date. This class may include students from multiple sections.

**Prerequisites**

DHYG 136; concurrent enrollment in DHYG 245

**Course Outcomes**

- Exhibit professionalism through personal appearance, attitude, and conduct appropriate for the humanistic learning environment and delivery of ethical dental hygiene care.
- Employ competent professional and culturally sensitive communication skills that apply health equity concepts.
- Demonstrate continued competence in the use of infection control, sterilization, and exposure control procedures.
- Present a summary of the patient’s complete assessment including all aspects of their history and charting particularly for patients with complex medical considerations.
- Develop and present comprehensive DH treatment plans for the delivery of dental hygiene therapy to child, adolescent, adult, and geriatric patients.
- Present written reflections and observations regarding DH care provided in the clinic and a variety of service-learning rotations.
- Demonstrate correct periodontal therapy instrumentation techniques, utilizing all instructed curettes, scalers, and files.
- Implement alternative fulcrum positions.
- Evaluate the patient response, prognosis, and re-evaluation/recare plan.
- Utilize ultrasonic technology, and air polishing instrumentation when appropriate.
- Describe treatment considerations regarding dental implant placement, evaluation, and maintenance.
- Perform competency evaluations, utilizing patient-centered communication and clinical techniques while delivering dental hygiene treatment for a pediatric and adolescent clinic patient.
- Provide comprehensive dental hygiene care for patients with periodontal involvement.
- Interpret radiographs, recognizing normal and abnormal conditions of the oral cavity.
- Manage pediatric and adolescent patients and provide parent education.
- Integrate and correlate the basic behavioral and dental sciences learned to date as they apply to the care of the dental hygiene patient.
- Assess patients for pain control procedures and utilize local anesthesia and/or nitrous oxide appropriately considering patient-centered care and safety.
- Identify and manage potential complications resulting from patient treatment.
- Assess patients who use tobacco products and provide Tobacco Cessation Counseling when appropriate.
- Assess and implement nutritional counseling regarding oral disease prevention when appropriate.

**DHYG 255: Dental Hygiene Theory IV**

**Credits 1**

This course is designed to enable students to expand their knowledge about treatment of the periodontally involved patient. Students refine techniques for patient assessment, treatment planning, patient
communication, full mouth scaling, and non-surgical periodontal treatment. Connections between oral health and systemic health are pursued. Students continue to develop and add to their clinical case portfolio. This class may include students from multiple sections.

**Prerequisites**

DHYG 245; concurrent enrollment in DHYG 256

**Course Outcomes**

Exhibit professionalism through personal appearance, attitude, legal and ethical conduct appropriate for the humanistic learning environment and delivery of dental hygiene care.

Demonstrate critical thinking, public speaking and oral presentations.

Correlate connections between oral and systemic health as they relate to decision making in dental hygiene care considerations.

Evaluate and present dental hygiene patient case studies.

Develop and actively engage in academic/college writing and research skills appropriate to the academic course.

Describe considerations regarding dental implant placement, evaluation, and maintenance.

Summarize recare protocol necessary for continuity in long term preventive periodontal care, including referral considerations.

Develop and model critical thinking to evaluate dental products' benefits and alternatives based on science, evidence, and clinical trials.

Engage in high-quality oral discussions and presentations.

Evaluate and recognize radiographic technique, anatomical and dental structures in states of health and disease.

Describe outcome evaluation procedures following implementation of dental hygiene care.

Define connections between oral and overall health as they relate to decision making in the delivery of clinical patient care.

Describe communication skills needed to have difficult conversations with patients.

**DHYG 256 : Clinical Dental Hygiene IV**

**Credits** 5

In this course, students continue to practice and further refine their dental hygiene skills. Students further their experience in treatment of the periodontally involved patient. Students refine techniques for treatment planning for root planning, and non-surgical periodontal treatment. Utilization of radiographs, local anesthesia and nitrous oxide sedation in patient care is further developed. Students integrate knowledge and skills developed in all previous course work to date. Students begin extramural rotations into the local community with faculty supervision. This class may include students from multiple sections.

**Prerequisites**

DHYG 246; concurrent enrollment in DHYG 255

**Course Outcomes**

Exhibit professionalism through personal appearance, attitude, and conduct appropriate for the humanistic learning environment and delivery of ethical dental hygiene care.

Employ knowledgeable professional and culturally sensitive communication skills that apply health equity concepts.

Demonstrate continued competence in the use of infection control, sterilization, & exposure control procedures.

Present a summary of the patient's complete assessment including all aspects of their history and charting particularly for patients with complex medical considerations.

Develop and present comprehensive DH treatment plans for the delivery of dental hygiene therapy to adult periodontally involved and geriatric patients.

Perform competency evaluations, utilizing patient-centered communication and clinical techniques while delivering dental hygiene treatment for clinic patients.

Demonstrate proficiency with periodontal therapy instrumentation techniques.

Interpret radiographs, recognizing normal and abnormal conditions of the oral cavity and anatomy in radiographs.

Evaluate the patient response, prognosis, and re-evaluation/recare plan.

Assess the patient for pain control procedures and utilize local anesthesia and/or nitrous oxide appropriately considering patient-centered care and safety.

Identify and manage potential complications resulting from patient treatment.
Integrate and correlate the basic behavioral and dental sciences learned to date as they apply to the care of the dental hygiene patient.
Present written reflections and observations regarding DH care provided in the clinic and a variety of service-learning rotations.

DHYG 265: Dental Hygiene Theory V
Credits 1
This course is designed to enable students to expand their knowledge about the periodontally involved patient. Students refine their knowledge about patient assessment, treatment planning, patient communication, full mouth scaling, and non-surgical periodontal treatment. National Board preparation and taking a mock National Board. Students begin to think about employment and continue to develop and add to their clinical case portfolio. This class may include students from multiple sections.
Prerequisites DHYG 255; concurrent enrollment in DHYG 266
Course Outcomes
Exhibit professionalism through personal appearance, attitude, legal and ethical conduct appropriate for the humanistic learning environment and delivery of dental hygiene care.
Describe preparation for the process of taking the National Board examination.
Refine the ability to evaluate dental manufacturers’ information, product test reports, dental literature, and dental products based on science, evidence, and clinical trials.
Explain common dental terminology codes used in dental hygiene practice.
Describe professional and ethical conduct with patients, students, faculty, and staff.
Utilize dental hygiene employment considerations in preparation for achieving licensure to practice.
Explain the various types of employment opportunities existing in each role of the dental hygienist.
Discuss the delivery of dental hygiene therapy to children and adolescents with an oral health concern, have special needs or are medically complex.

DHYG 266: Clinical Dental Hygiene V
Credits 5
This course continues to offer advanced clinical experience in providing dental hygiene treatment for a variety of clinical patient cases. Students use local anesthesia, nitrous oxide, oral antimicrobials, and dietary analysis and recommendations. Regional Board Examination requirements and protocol are reviewed and simulated through practical exercises. Identification of an appropriate patient for licensure examination is made. Students integrate knowledge and skills developed in all previous course work to date. Students continue extramural rotations into the local community with faculty supervision. This class may include students from multiple sections.
Prerequisites DHYG 256; concurrent enrollment in DHYG 265
Course Outcomes
Exhibit professionalism through personal appearance, attitude, and conduct appropriate for the humanistic learning environment and delivery of ethical dental hygiene care.
Employ proficient professional and culturally sensitive communication skills that apply health equity concepts.
Demonstrate continued competence in the use of infection control, sterilization, & exposure control procedures.
Describe accurate, comprehensive medical/dental histories related to oral/systemic disease and patient well-being and present a summary of medical/dental history and physical status to clinical faculty.
Develop and present comprehensive DH treatment plans for the delivery of dental hygiene therapy to all types of patients.
Identify significant medical and/or dental modifications required prior to proceeding with dental hygiene care (including consultation and referral) and apply them during delivery of care for a widely varied patient base.
Perform competency evaluations, utilizing patient-centered communication and clinical techniques while delivering dental hygiene treatment for clinic patients.
Demonstrate correct periodontal therapy instrumentation techniques, utilizing all instructed curettes, scalers, and files.
Evaluate the patient response, prognosis, and re-evaluation/recare plan.
Interpret radiographs to a high level of accuracy.
Demonstrate competence in the ability to assess patients for pain control procedures. Administer local anesthesia and/or nitrous oxide appropriately considering patient-centered care and safety. Integrate and correlate the basic behavioral and dental sciences learned to date as they apply to the care of the dental hygiene patient.

DHYG 275: Dental Hygiene Theory VI

Credits: 1
This course is designed to prepare students with critical thinking skills for transition into professional clinical dental hygiene practice. Students will review criteria to prepare for licensure exams and integrate acquired knowledge into dental hygiene practice. Development of a personal resume and cover letter are accomplished to facilitate the transition to clinical practice. Students’ professional clinical portfolios will be completed and presented. This class may include students from multiple sections.

Prerequisites
DHYG 265; concurrent enrollment in DHYG 276

Course Outcomes
Exhibit professionalism through personal appearance, attitude, legal and ethical conduct appropriate for the humanistic learning environment and delivery of dental hygiene care.
Identify the need for medical and dental precautions in patient treatments, determine specific precautions necessary.
Describe the criteria and preparation for the process of Western Regional Exam Board licensure examination.
Discuss time management for dental hygiene appointments.
Describe dental business and practice management strategies for dental hygiene practice.
Demonstrate how to create a resume and cover letter for seeking a dental hygiene position.

DHYG 276: Clinical Dental Hygiene VI

Credits: 5
This course continues to offer advanced clinical experience in performing treatment for a variety of clinical patient cases. Students use local anesthesia, nitrous oxide, oral antimicrobials, and dietary analysis. Regional Board Examination requirements and protocol are reviewed and simulated through practical exercises. Student rationale and identification of an appropriate patient for licensure examination is made. Students integrate knowledge and skills developed in all previous course work to date. This class may include students from multiple sections.

Prerequisites
DHYG 266; concurrent enrollment in DHYG 275

Course Outcomes
Exhibit professionalism through personal appearance, attitude, and conduct appropriate for the humanistic learning environment and delivery of ethical dental hygiene care.
Display proficient professional and culturally sensitive communication skills that apply health equity concepts.
Demonstrate continued competence in the use of infection control, sterilization, and exposure control procedures.
Describe accurate, comprehensive medical/dental histories related to oral/systemic disease and patient well-being and present a summary of medical/dental history and physical status to clinical faculty.
Demonstrate case assessment, recording and charting of findings, and treatment plan development for the patient with advanced periodontal disease.
Identify significant medical and/or dental modifications required prior to proceeding with dental hygiene care.
Integrate and perform all aspects of dental hygiene care to include preventive procedures, therapeutic procedures, adjunctive therapies, and follow up care (including re-evaluation and maintenance) for a wide variety of patient types.
Demonstrate proficiency in caries detection.
Demonstrate proficiency in scaling and root planing.
Demonstrate proficiency utilizing ultrasonic scaling and air polishing procedures and techniques.
Interpret radiographs to a high level of accuracy.
Demonstrate competence in the ability to assess patients for pain control procedures.
Administer local anesthesia and/or nitrous oxide appropriately considering patient-centered care and safety. Identify and manage potential complications resulting from patient treatment. Perform competency evaluations, utilizing patient-centered communication and clinical techniques while delivering dental hygiene treatment for clinic patients. Present written reflections and observations regarding DH care provided in clinic and a variety of service-learning rotations. Describe Western Regional Exam Board patient criteria and utilize it to screen and select appropriate patients for licensure examination. Integrate and correlate the basic behavioral and dental sciences learned to date as they apply to the care of the dental hygiene patient.
Directed Studies (DS)

**DS 290 : Directed Research**

**Credits** 1
-5

**Quarter Offered** Occasionally
Directed Research is an in-depth learning opportunity offered to students where their abilities and interests indicate they would benefit from a highly focused task under the direction of an individual faculty member. The student is responsible for finding a sponsoring faculty member. This class may include students from multiple sections. (Elective)

**Prerequisites**
All arrangements must be made with the instructor prior to enrollment

**Course Outcomes**
- Learning outcomes vary according to project

**DS 295 : Special Topics**

**Credits** 1
-5

**Quarter Offered** Occasionally
Special Topics courses are offered from time to time for groups of students where an opportunity for specialized study exists. Examples might include lectures by a visiting expert, study of a timely topical development, a local conference, an on-going faculty research project, or other exceptional educational experience. This class may include students from multiple sections. (Elective)

**Course Outcomes**
- Learning outcomes vary according to project
Drama (DRMA/DRMA&)

**DRMA& 101 : Intro to Theatre**

**Credits** 5  
**Quarter Offered** Fall  
Introduction to history, art, and craft of theater. Plays are read and discussed. Play production is studied from the viewpoints of the playwright, actor, director, and theater technicians. Attendance at current community theater production is desirable. ENGL& 101 highly recommended. This class may include students from multiple sections. (Humanities, Elective)

**Course Outcomes**
- Apply Aristotle's six traditional parts of drama: plot, character, theme, music, diction, and spectacle in relation to excerpts from several significant plays, ranging from classical to contemporary theatre.
- List and explain traits that theatre shares with other kinds of performance.
- Describe the basic process of script development and key elements of plot structure.
- Explain basic performance skills, with a focus on “honesty” in character development and action.
- List and explain traits of theatre itself including configurations and stage shapes.
- Practice costume and set design.
- Perform a monologue and a duet.
- Write a critique of a play performed locally.
- Write and perform a two person scene.

**DRMA 107 : Theatre Production and Design**

**Credits** 5  
**Quarter Offered** Winter  
This course provides instruction and experience in technical theater through lecture, readings, and practical experience. Students will work together as a production team to assist in the design and production of the play being performed within the quarter. This class may include students from multiple sections. (Elective)

**Course Outcomes**
- Create meaningful and functional design for theatrical performances.
- Operate the basic systems in a theatre.
- Respond critically to various theatrical performance designs.
- Work collaboratively as a member of a technical stage crew and participate effectively in production meetings.

**DRMA 124 : Acting I**

**Credits** 5  
**Quarter Offered** Winter  
Acting I is an introduction to craft: the balance of external technique and internal elements in order to create a flexible but consistent process that can be used to create believable characters in a variety of settings. The class is a combination of theory and practice. Students are exposed to major post-Stanislavkian acting theories that are applied in scene and partner work. This class may include students from multiple sections. (Humanities-Performance, Elective)

**Course Outcomes**
- Demonstrate the following aspects of the craft of acting: relaxation/breathing techniques, visualization, given circumstances, objectives, scene analysis, and improvisation.
- Analyze scenes from plays.
- Demonstrate creativity and critical reflection throughout the process of acting.
- Apply a working vocabulary of theatre terms.
- Memorize lines in a timely manner.
- Demonstrate relaxation and energizing methods from warm-ups to rehearsal.
- Demonstrate and apply outer and inner concentration techniques in rehearsal.
- Apply imaginative techniques to a variety of acting scripts and rehearsal situations.
- Apply sensory perception as an acting tool.
- Create and apply the concept of "intention" to the planning and rehearsal of scenes.
DRMA 125 : Acting II

Credits 5
Quarter Offered Occasionally
Acting II is a continuation of the craft-based study of acting. Students will continue to engage with theory and practice, implementing the ideas of Stanford Meisner to apply one particular theoretical approach in the Stanislavskian tradition of realistic theatre. Students will dissect two plays over the course of the quarter, performing scenes from both in front of an audience. This class may include students from multiple sections. (Elective)

Course Outcomes
- Analyze the psychology and emotional depth of a character.
- Apply an advanced working vocabulary of theatre terms.
- Demonstrate a critical approach to scene analysis through the written and spoken word.
- Knowledge of history and application of acting techniques (e.g. Stanislavsky, Meisner, etc.)
- Perform in contrasting acting styles and genres (e.g. film, classic, modern, comedic, dramatic, etc.)

DRMA 175 : Introduction to Playwriting

Credits 5
Quarter Offered Spring
Students will develop a critical vocabulary to talk about scripts as artifacts. Students will develop original one-act plays and compete for possible production spots in the spring Festival of Student-Directed One-Act Plays. This class may include students from multiple sections. (Elective)

Course Outcomes
- Identify dramatic action that will contribute to an effective writing structure.
- Analyze dramatic structure using Aristotle’s elements (i.e. plot, character, theme, diction, music, spectacle).
- Develop, edit, refine, and complete several playwriting assignments, including a 5-10 minute play for the Find Your Voice Play Festival and/or Studium Generale.
- Employ constructive feedback techniques for peers in class.
- Demonstrate critical vocabulary for identifying strengths and areas of concern in peer work.

DRMA 211 : Theater Practicum I

Credits 1-5
Quarter Offered Occasionally
Development of theater production basics, with practical application of this knowledge in the development of a staged play on campus. Classic theater is often emphasized. After the general overview, class members will select areas of concentration, such as acting, stagecraft, lighting, makeup, costuming, publicity, and house or stage management. Participants commit to evening rehearsal and production hours. This class may include students from multiple sections. (Elective)

Course Outcomes
- Demonstrate the ability to work on various practical aspects of theatre production production (e.g. lighting, set construction, makeup, costume design, stage management)
- Develop professional courtesy when working with all members on the production team
- Develop shop skills and safety practices when working on a production
- Use time-management skills to schedule and complete required hours

DRMA 212 : Theater Practicum II

Credits 1-5
Quarter Offered Occasionally
Development of theater production basics, with practical application of this knowledge in the development of a staged play on campus. Classic theater is often emphasized. After the general overview, class members will select areas of concentration, such as acting, stagecraft, lighting, makeup, costuming, publicity, and house or stage management. Participants commit to evening rehearsal and production hours. This class may include students from multiple sections. (Elective)

Course Outcomes
- Be self-motivated in seeking hours and a variety of tasks to complete
- Demonstrate advanced knowledge of various aspects of theatre production (e.g. lighting, set construction, makeup, costume design, stage management)
Continue to employ professional courtesy when interacting with all members of the production team
Maintain shop skills and safety practices when working on a production
Use time-management skills to schedule and complete required hours

DRMA 230 : Directing I
Credits 5
Quarter Offered Winter
Students will develop a critical vocabulary and be introduced to a variety of contemporary perspectives about
play direction. Students will work practically to develop their own ideas and style by directing three short, two-
person scenes with outside actors. Students will compete for spots in the spring Festival of Student-Directed
One-Act Plays. This class may include students from multiple sections. (Elective)

Course Outcomes
Demonstrate a critical vocabulary to talk about direction.
Analyze a text for performative possibility.
Facilitate an interpretation of a text as a collaborative and performative artifact.
Explain contemporary theories of direction.
Explain acting from a directorial perspective.
Communicate objectives to student actors.
Articulate a personal theory of directorial leadership pertaining to issues of movement, motivation, trust,
and creative freedom as it relates to actors and other collaborators.
Prepare an application to direct a one-act play in the Festival of Student-Directed, One-Act Plays on the PC
main stage, Spring quarter.
Early Childhood Education (ECED/ECED&)

ECED& 105 : Introduction to Early Childhood Education
Credits  5
Quarter Offered  Fall
Explore the foundations of early childhood education. Examine theories defining the field, issues and trends, best practices, and program models. Observe children, professionals in action. This class may include students from multiple sections. STARS approved.
Course Outcomes
- Explain current theories and ongoing research in early care and education.
- Describe the role of play in early childhood programs.
- Compare early learning program models.
- Explain the importance of developing culturally responsive partnerships with families.
- Identify appropriate guidance techniques used in early care and education settings.
- Describe the observation, assessment, and teaching cycle used to plan curriculum for all young children.
- Apply the professional code of ethics for early care and education to resolve dilemmas.
- Describe major historical figures, advocates, and events shaping today’s early childhood education.

ECED& 107 : Health, Nutrition, and Safety
Credits  5
Quarter Offered  Fall
Introduces basic concepts of equitable health, safety, and nutrition standards for the growing child in group care and education programs. Requirements as outlined in Chare Care Block Grant funding (CCDF) and state licensing standards for child care providers will be covered including the knowledge and skills to ensure appropriate health, nutritional, and safety practices. In addition, the course will emphasize the skills necessary to recognize signs of child maltreatment, the educator’s role as a mandated reporter and the process of identifying and referring families to available community resources. This class may include students from multiple sections. STARS approved.
Course Outcomes
- Describe federal and state mandated health, safety, and nutrition practices.
- Identify indicators of illnesses/ infectious diseases and steps to prevent the spread of them.
- Outline safety procedures for providing emergency care and daily care.
- Evaluate program safety policies.
- Describe food programs and practices that support the development of children.
- Create examples of developmentally appropriate and culturally responsive health, safety, and nutrition education materials and activities.
- Describe the responsibilities of mandated reporters.
- Develop strategies for working with culturally, linguistically, and ability diverse families in accessing health, nutritional, and dental services.

ECED& 120 : Practicum
Credits  2
Quarter Offered  Fall, Spring
This course will provide students an opportunity to focus on, develop and apply best practice for engaging in nurturing, supportive relationships with children, families, and professional peers in an early learning setting. Students will apply and additional focus of children’s health and safety while promoting growth and development to relationship building with children and families. This class may include students from multiple sections. STARS approved.
Course Outcomes
- Describe the characteristics of nurturing relationships built between teachers and children.
- Practice ideals of professionalism in work with children, families and peers.
- Recognize cultural responsiveness when observing professionals and programs.
- Identify practices that promote health, safety, growth and development of children.

ECED& 132 : Infants and Toddlers
Credits  3
Quarter Offered  Spring
Examine the unique developmental needs of infants and toddlers. Study the role of the caregiver, relationships, developmentally appropriate practices, nurturing environments for infants and toddlers, and culturally relevant care. This class may include students from multiple sections. STARS approved.

**Course Outcomes**
- Discuss developmental milestones from birth to 36 months articulating the influences of individual development, temperament and cultural norms in the context of important, ongoing relationships.
- Design a plan to support reciprocal, culturally sensitive partnerships with families.
- Select positive guidance techniques that are appropriate and effective with infants and toddlers.
- Critique infant and toddler early learning environments, articulating environmental influences on the learning processes of infants and toddlers during authentic play activities.
- Describe a plan for developmentally appropriate, culturally relevant curriculum that supports language, physical, cognitive, creative, social, and emotional development.

**ECED& 134 : Family Childcare Management**

**Credits** 3

**Quarter Offered** Winter

Learn how to manage a family childcare program. Topics include: licensing requirements, record-keeping, relationship building, communication strategies, guiding behavior, and promoting growth and development. This class may include students from multiple sections.

**Course Outcomes**
- Describe strategies for complying with Family Childcare Minimum Licensing Requirements.
- Describe strategies for meeting the developmental needs and guiding the behavior of children in multi-age groups.
- Identify strategies for family child care business management including tax planning and record-keeping.
- Create written documents, such as a contract and policy handbook, that facilitate communication between the provider and the families.
- Develop strategies for creating reciprocal, culturally responsive relationships with families.
- Articulate knowledge and skills that define Family Childcare Providers as professionals.

**ECED& 137 : Outdoor Learning for Young Children**

**Credits** 3

**Quarter Offered** Spring

This course is an exploration of nature-based, outdoor learning experiences for all young children. Students will identify the benefits of outdoor learning for children, learn about the teacher’s role in supporting learning in the outdoor learning environment, consider adult comfort levels with outdoor experiences, and examine risk-taking as a part of learning. This class may include students from multiple sections.

**Course Outcomes**
- Describe the benefits of outdoor learning environments (OLE) for all children birth-8 years, including disabilities and recognize the OLE as a place where development is encouraged.
- Explain the benefits of OLE and how OLE can positively impact children as well as practice conversational skills to advocate for OLE to parents and administrators.
- Create a plan for an OLE that supports all children’s learning.
- Identify and practice teaching strategies that can be used in the OLE.
- Explore and describe personal comfort level with outdoor experiences and risk-taking and describe the value of risk-taking as it pertains to children’s learning and development.
- Demonstrate strategies for supporting children’s risk-taking and learning in the outdoor learning environment.

**ECED& 139 : Administration of ECE Programs**

**Credits** 3

**Quarter Offered** Spring

This course will help students develop administrative skills required to develop, open, operate, manage, and assess early childhood education and care programs. Students will explore techniques and resources available to Washington State licensing and NAEYC standard compliance. This class may include students from multiple sections.

**Course Outcomes**
- Articulate early learning program philosophies, mission statements, and corresponding daily practice.
Create program policies and practices in compliance with state child care licensing codes, food program guidelines, and accreditation standards.
Plan for appropriate staffing, meals, equipment and materials and programming for specific age groups and settings.
Use a variety of strategies to maintain regular communication with families and provide opportunities for parent engagement and education.
Plan a balanced budget.
Identify methods for recruiting, hiring, evaluating, supervising, and supporting the professional development of program personnel.
Use tools to evaluate program effectiveness and identify areas of improvements.
Articulate effective application of the NAEYC Code of Ethics.

**ECED& 160 : Curriculum Development**

**Credits** 5  
**Quarter Offered** Winter

Investigate learning theory, program planning, and methods for curriculum development promoting language, fine/gross motor, social-emotional, cognitive and creative skills and growth in young children birth through age 8 utilizing developmentally appropriate practice. This class may include students from multiple sections. STARS approved.

**Course Outcomes**
- Explain major early childhood curriculum theories and current trends in curriculum design for early learning environments.
- Apply principles of developmentally, individually and culturally appropriate practice when designing, implementing and evaluating curriculum.
- Evaluate integrated learning experiences supportive of children’s development and learning incorporating national, state and local standards.
- Design curriculum that supports children’s language/communication, cognitive, social/emotional, fine/gross motor and creative development.
- Design curriculum that is inclusive and represents the diversity of children and families.
- Plan developmentally appropriate activities and schedules, which promote all children’s growth and learning.
- Observe, document and assess individual and group needs, interests and skills for the purpose of curriculum planning and on-going modifications of plans.

**ECED& 170 : Environments**

**Credits** 3  
**Quarter Offered** Spring

This class focuses on the adult’s role in designing, evaluating, and improving indoor and outdoor environments that ensure quality learning, nurturing experiences, and optimize the development of young children. This class may include students from multiple sections. STARS approved.

**Course Outcomes**
- Design healthy, respectful, supportive, and challenging learning environments for children.
- Identify strategies to achieve compliance with Washington Administrative Code and other state or federal regulations.
- Create environments that promote growth in all developmental domains and academic disciplines.
- Establish environments, routines, and schedules that promote children’s age-appropriate, self-regulated behaviors.
- Establish environments that promote the cultural diversity of children, families, and their communities.

**ECED& 180 : Language and Literacy Development**

**Credits** 3  
**Quarter Offered** Spring

Teaching strategies for language acquisition and literacy skill development are examined at each developmental stage (birth-age 8) through the four interrelated areas of speaking, listening, writing, and reading. This class may include students from multiple sections. STARS approved.

**Course Outcomes**
- Explain the continuum of language acquisition and early literacy skills.
Develop evidence-based, appropriate environments and opportunities that support children's emergent
language and literacy skills.
Describe strategies for responding to children who are culturally, linguistically, and ability diverse.
Develop ways to facilitate family and child interactions as primary contexts for heritage language and
English development.
Analyze images of culture and individual abilities reflected in children's literature and other learning
materials.
Utilize developmentally appropriate and culturally responsive assessment practices for documenting the
growth of language and literacy skills.

ECED& 190 : Observation and Assessment
Credits 3
Quarter Offered Winter
Collect and record observation and assessment data in order to plan for and support the child, the family, the
group, and the community. Practice reflection techniques, summarizing conclusions, and communicating
findings. This class may include students from multiple sections. STARS approved.

Course Outcomes
- Describe reasons for collecting observation and assessment data.
- Identify indicators of growth, development, learning and social behaviors in all children.
- Identify techniques for avoiding bias, judgments, and assumptions in observations.
- Collect factual, descriptive data using a variety of assessment tools and strategies.
- Document and analyze assessment data for use in planning curriculum for individual and groups of
children.

ECED 147 : Practicum II
Credits 5
Quarter Offered Winter, Spring
Participation with children and staff in an approved early childhood center. Practice applying guidance
procedures, implementing curriculum, and working cooperatively with staff. Lab assignments, six hours per
week; seminar, one hour per week. This class may include students from multiple sections.
Prerequisites
2.0 or higher in ECED& 120 and ECED& 190; STARS approved

Course Outcomes
- Create and maintain a safe and healthy environment for young children.
- Meet each child's individual needs and plan for group needs.
- Prepare and evaluate the learning environment for young children.
- Develop and implement curriculum plans for young children.
- Support the child and family.
- Contribute to a professional team environment.
- Develop personally and professionally.

ECED 161 : Math for Young Children
Credits 2
Quarter Offered Fall
Provides an overview of appropriate math concepts for preschool age children and techniques to facilitate
young children's math learning. Course also provides techniques adults may use to eliminate math anxiety and
improve their basic math skills. This class may include students from multiple sections. STARS approved.

Course Outcomes
- Develop skills that eliminate adult math anxiety.
- Acquire knowledge about math concepts, which are appropriate for young children.
- Develop age appropriate and developmentally appropriate math activities and experiences for young
children.
- Facilitate a math activity with a small group of young children.
- Design an environment for young children, which promotes math.

ECED 201 : Internship
Credits 1
-5
Quarter Offered  Fall, Winter, Spring, Summer
Individually designed field experience and seminar to work with children and/or adults (parents, staff, community) in schools, childcare, or human service agencies. This class may include students from multiple sections. STARS approved.

Prerequisites  
15 credits of ECED

Course Outcomes
  - Develop personal goals for the quarter.
  - Develop objectives to meet personal goals.
  - Develop activities to accomplish objectives.

ECED 260: Practicum III

Credits  5
Quarter Offered  Fall, Winter, Spring
Advanced practicum experience based on skill standards in a developmentally appropriate setting with qualified master teacher. Individualized opportunities for students to practice advanced teaching competencies and professional interactions with site staff and parents. This class may include students from multiple sections. STARS approved.

Prerequisites
Completion of ECED 120 and ECED 190, ECED 147, and at least 30 credits in ECE courses; Grade of 2.0 or higher in ECED 120, ECED 190, and ECED 147

Course Outcomes
  - Create and maintain a safe and healthy environment.
  - Meet each child’s individual needs and plan for group needs.
  - Prepare and evaluate the learning environment.
  - Develop and implement curriculum.
  - Support the child and family.
  - Create and maintain a professional team environment.
  - Develop personally and professionally.
ECON& 201: Microeconomics
Credits 5
Quarter Offered Fall, Winter
Promotes use of critical thinking to explore an individual's relationship to the supply and demand of goods and services. Tools of economic analysis are used to investigate management of environmental systems. This class may include students from multiple sections. (Social Sciences, Elective)
Prerequisites AMATH 121 or MATH 90 and ENGL& 101
Course Outcomes
Students will use graphs and equations to construct and apply the models of consumption possibilities to explain opportunity costs;
Students will use graphs and equations to explain the theory of utility as the foundation for the theory of demand, and explain how and why each demand coordinate represents a constrained maximum;
Students will use the theory of demand to identify and estimate own-price, cross-price, and income elasticity of demand, along with projected changes in expenditures;
Students will use graphs and equations to explain the theory of production and the theory of cost as the foundation of the theory of supply;
Students will use the duality theorem to explain the relationship between production and cost theory as the foundation for the theory of supply;
Students will use the theory of demand and supply to explain how idealized perfect competition can maximize economic welfare.
Students will apply theories of market structure to explain departures from the maximization of economic welfare under perfect competition.
Students will use other economic paradigms (e.g., Ecological Economics, Feminist, Institutionalist and Marxist) to explain economic outcomes;
Students will use critical thinking – the use of empirically grounded reason – to test claims about the impact of public policy on economic outcomes.

ECON& 202: Macroeconomics
Credits 5
Quarter Offered Fall, Spring
Presents economic theories used as tools for critical thinking to show how the U.S. economy operates. Emphasis on causes and consequences of unemployment and inflation and how they affect the well-being of Americans. The use of government spending, taxation, and the monetary system to promote full employment and stable prices will be examined. Explores role of energy and natural resources in shaping our economic future. This class may include students from multiple sections. (Social Sciences, Elective)
Prerequisites AMATH 121 or MATH 90 and ENGL&101
Course Outcomes
Students will access and use primary data from the BEA and BLS to describe the business cycle using macroeconomic performance indicators.
Students will apply alternative theories (Classical, Marxist, Institutionalist, Keynesian and Monetarist) to explain the business cycle.
Students will use algebraic and graphical analysis to design and assess the impacts of fiscal and monetary policy.
Students will access primary data of macroeconomic performance from the BEA, BLS and Census to create spreadsheets and construct trendlines to evaluate the impacts of fiscal and monetary policy.
Students will describe the historical events shaping the evolution of economic society and theories describing macroeconomic outcomes.
Students will use critical thinking – the use of empirically grounded reason to understand phenomena of interest – to evaluate claims about the impact of fiscal and monetary policy on macroeconomic performance.

ECON 101: Introduction to Economics
Credits 5
Quarter Offered  Winter, Spring
Introduction to fundamental economic concepts through contemporary social issues. Examine how societies deal with limited resources and social, cultural, and political responses to changing economic conditions. Recommended for those seeking a greater understanding of economics and contemporary issues. This class may include students from multiple sections. (Social Sciences, Elective)

Prerequisites
MATH 90 or AMATH 121 or concurrent enrollment; and eligibility for ENGL & 101

Course Outcomes
Students will use economic history to explain the evolution of economic institutions and their ideological legitimation of the distribution of welfare.
Students will use graphical models – consumption possibilities, production possibilities, demand and supply, aggregate demand and supply – to explain economic outcomes.
Students will explain, using economic models, how fiscal and monetary policy affect the business cycle.
Students will access primary data for macroeconomic performance from the BEA, BLS and Census to test propositions about economic outcomes as shaped by public policy.

ECON 220 : Introduction to Environmental Economics

Credits  5
This course is intended to serve as an introduction to the concepts, theories, and methods used in the economic analysis of environmental and natural resource sustainability. The course covers topics of pollution, use of renewable and non-renewable resources and international Environmental policy discussions. The course aims to provide students with an ability to think about pressing environmental and resource issues and possible solutions in economic terms. This class may include students from multiple sections. (Elective)

Course Outcomes
Describe the relationship between economics and the environment.
Perform cost-benefit analysis for valuing environmental policy.
Explain economic growth and sustainable development.
Analyze strategic interactions between the environment and scarcity.
Examine the economics of non-renewable natural resources.
Analyze the economics of renewable resources.
Explain the challenge of coordinating international environmental policy.
Discuss the economics of household waste and recycling.
Education (EDUC/EDUC&)

EDUC& 115 : Child Development

Credits  5  
Quarter Offered  Winter, Summer
Build a functional understanding of the foundation of child development from conception through early adolescence in all domains of development as seen through various developmental theories. The impact of culture, race, gender identity, socioeconomic status, family status, and exceptionalities on overall development will be examined as well as current research regarding brain development. Methods of observing and documenting developmental growth will be examined. This class may include students from multiple sections. STARS approved. (Formerly EDUC& 114, Elective)

Course Outcomes
- Discuss prominent child development research and theories guiding parenting and caregiver’s practices.
- Describe the developmental sequence from conception through early adolescence in all domains.
- Analyze critical stages of brain development as influencers of child development.
- Examine techniques to conduct and document observations of children as a means to assess and communicate growth and development.
- Explain individual differences in development.
- Identify how family, caregivers, teachers, community, culture, and trauma influence development.
- Outline community resources to support children’s and families’ development.

EDUC& 130 : Guiding Behavior

Credits  3  
Quarter Offered  Winter
Examine the principles and theories promoting social competence in young children and creating safe learning environments. Develop skills promoting effective interactions, providing positive individual guidance, and enhancing group experiences. This class may include students from multiple sections. STARS approved.

Course Outcomes
- Identify developmentally appropriate individual and group behaviors of children.
- Compare at least three approaches to guiding behavior.
- Recognize positive, respectful, culturally responsive approaches to guidance.
- Plan environment supportive of children’s development with focus on attachment, self-help, relationships, and executive function.
- Articulate strategies to promote social/emotional competence and positive sense of self.

EDUC& 136 : School Age Care

Credits  3  
Quarter Offered  Winter
The basics of quality child care programs for children age 5-12, including developmental profiles of the school-age child, planning, budgeting, program set-up, curriculum, and resources. This class may include students from multiple sections.

Course Outcomes
- Evaluate, written philosophies of school age child care that address high quality care.
- Identify at least five professional organizations or resources for school age care providers.
- Develop an appropriate plan for a before and After school age care environment, (that is bias free, respects cultural and individual diversity, is developmentally appropriate, and supports positive self-esteem, social interaction, active involvement, initiative, responsibility, creativity, in addition, a growing sense of autonomy.)
- Use Washington State Career Development Core Competencies or Skills Standards for school age care providers for self-assessments and professional development planning for educational/training needs.
- Analyze a school age program and identify a plan for improvement that is based on best practices, and accepted standards.

EDUC& 150 : Child, Family, and Community

Credits  3  
Quarter Offered  Spring
Integrate the family and community contexts in which a child develops. Explore cultures and demographics of families in society, community resources, strategies for involving families in the education of their child, and tools for effective communication. This class may include students from multiple sections.

Course Outcomes
- Evaluate and describe the cultural influences, social issues, changes and transitions that affect children, families, schools and communities.
- Examine the concept of family, school, peers, media and community as socialization agents.
- Analyze strategies that empower families to establish and maintain collaborative relationships to support the growth and development of children.
- Identify how one's own family history and life experiences may impact relationships with children and families.
- Identify community services and agencies that support the needs of children and families and establish resource and referral systems for parents and educators.

EDUC& 203 : Exceptional Child
Credits 3
Quarter Offered Fall
An introductory course in understanding educational programs, and state and federal laws regarding the education of children with special needs. An overview of current issues, trends, and resources affecting services and programs for children with special needs. This class may include students from multiple sections. STARS approved. (Elective)
Prerequisites
EDUC& 115 or instructor/advisor permission
Course Outcomes
- Explain the history and current legislation regarding education of young children with disabilities.
- Describe major categories and characteristics of developmental delays.
- Demonstrate a working knowledge of educational models for children with special needs.
- Demonstrate an understanding of how a child with special needs impacts a family.
- Outline the process of Child Find, assessment, placement, and program planning.

EDUC 206 : Issues of Child Abuse and Neglect
Credits 2
Insights into child abuse and neglect within a family system. Identify types of abuse and signs and symptoms of victims. Mandated reporting requirements consistent with WAC 180-78-165 for educators, caregivers, and youth workers. This class may include students from multiple sections. STARS approved.
Course Outcomes
- Define the legal definition of abuse and neglect and explain the state statues regarding responsibilities in reporting.
- Recognize signs of abuse and neglect and describe ways to work effectively with children who have experienced maltreatment.
- Identify characteristics of a potential abuser and list behaviors which might be indicators of maltreatment.
- Describe the mandated reporter's role in reporting suspected abuse and neglect.
- Describe the steps in reporting suspected maltreatment.
- Explain and discuss factors that could lead to child abuse and neglect and how to prevent it.
- Research local community resources that support people who have experienced maltreatment.

EDUC 240 : Advancing Equity in Education
Credits 3
Quarter Offered Spring
Explore fundamental principles of fairness and justice, and work to eliminate structural inequalities that limit equitable learning opportunities. Examine teaching practices that use inclusive teaching approaches, demonstrate respect for diversity and value all children's strengths. This class may include students from multiple sections.
Course Outcomes
- Explain how one’s own biases (implicit and explicit) may contribute to interactions and messages being sent to children and families.
- Describe the developmental, cultural, and linguistic appropriateness of the learning environment and teaching practices.
Explain the importance of developing culturally responsive partnerships with families. Embed fair and equitable approaches in all aspects of early childhood program delivery, including standards, assessments, curriculum, and personnel practices.
English (ENGL/ENGL&)

ENGL& 101: English Composition I
Credits 5
Quarter Offered  Fall, Winter, Spring, Summer
Active reading, effective writing, and critical thinking, using subjective and objective approaches. Introduction to research techniques. This class may include students from multiple sections. (Communication Skills)
Prerequisites
Score of 92 or more on Accuplacer placement test, or passing ENGL 90
Course Outcomes
- Demonstrate an ability to follow the writing process of prewriting, drafting, revising, and editing.
- Compose thesis-centered, well-organized essays that use correct grammar and mechanics with purpose, style, and voice.
- Discuss an author's main point and supporting details in professional essays, assigned readings, and classmates’ essays.
- Recognize and avoid plagiarism, using proper citation format.
- Apply self-assessment to evaluate knowledge and skills in reading, writing, and research.
- Demonstrate good listening skills, and discuss different viewpoints.

ENGL& 102: Composition II
Credits 5
Quarter Offered  Fall, Winter, Spring, Summer
Reading and writing using analytical and critical approaches. One or more research papers. Builds on concepts introduced in ENGL& 101. This class may include students from multiple sections. (Communication Skills)
Prerequisites
2.0 or higher in ENGL& 101
Course Outcomes
- Demonstrate an ability to follow the writing process of prewriting, drafting, revising, editing.
- Compose thesis-centered, well-organized essays that use correct grammar and mechanics with purpose, style, and voice.
- Demonstrate an ability to research academic sources and apply quotes and information from reliable sources to writing assignments.
- Demonstrate an ability to recognize plagiarism and apply proper citation format for secondary sources.
- Discuss an author’s main point and supporting details in professional essays, assigned readings, and classmates’ essays.
- Evaluate stylistic choices, rhetorical strategies, logical explanations, and supporting evidence in professional essays, assigned readings, and classmates’ essays.
- Apply self-assessment to evaluate knowledge and skills in reading, writing, and research.
- Demonstrate good listening skills and tolerate different viewpoints.

ENGL& 111: Introduction to Literature
Credits 5
Quarter Offered  Fall (even year)
Study of the major genres of multicultural literature, including fiction, poetry, and drama. Focus on understanding key concepts to increase appreciation and knowledge. This class may include students from multiple sections. (Humanities, Elective)
Course Outcomes
- Writing Competency: Plan, draft, revise, and complete written compositions which express complex ideas and pose challenging questions, exhibiting clarity, coherence, completeness, correctness, and creativity.
- Reading Competency: Read a variety of texts, applying skills of comprehension, imagination, and analysis.
- Critical Thinking: Identify and troubleshoot problems; collect and apply data, recognize that values and perspectives influence thinking.
- Information Competency: Locate, retrieve, analyze, synthesize, evaluate, and integrate information.
- Personal Competency: Accept responsibility for one's own learning.
- Interpersonal Competency: Listen actively, work cooperatively and productively with others, and make useful contributions in large and small group discussions.
ENGL& 112: Introduction to Fiction
Credits 5
Quarter Offered Spring (even year)
Discover successful ways of exploring fiction. Study of form and structure, as well as major novelists and short-story writers, past and modern. This class may include students from multiple sections. (Humanities, Elective)
Course Outcomes
- Analyze one's own values, identity, and connections to community.
- Analyze literary texts from thematic, cultural, and stylistic perspectives.
- Explain observations and interpretation of literary texts.
- Evaluate reactions to literary texts.
- Interpret information from literary texts, incorporate that information into essays, and document sources correctly.
- Demonstrate collaborative learning.

ENGL& 113: Introduction to Poetry
Credits 5
Quarter Offered Spring (odd year)
Approach poetry successfully. Study of poetic form and structure, as well as major poets and poems, past and present, American and worldwide. This class may include students from multiple sections. (Humanities, Elective)
Course Outcomes
- Analyze one's own values, identity, and connections to community.
- Analyze literary texts from thematic, cultural, and stylistic perspectives.
- Explain observations and interpretation of literary texts.
- Evaluate reactions to literary texts.
- Interpret information from literary texts, incorporate that information into essays, and document sources correctly.
- Demonstrate collaborative learning.

ENGL& 114: Introduction to Drama
Credits 5
Helps to understand and experience a diversity of dramatic literature, from the Greeks through the Renaissance to modern and contemporary playwrights. This class may include students from multiple sections. (Humanities, Elective)
Course Outcomes
- Analyze one's own values, identity, and connections to community.
- Analyze literary texts from thematic, cultural, and stylistic perspectives.
- Explain observations and interpretation of how plays are performed.
- Evaluate audience reactions to plays.
- Interpret information from literary texts, incorporate that information into essays, and document sources correctly.
- Demonstrate collaborative learning.

ENGL& 220: Introduction to Shakespeare
Credits 5
General introduction to the works of Shakespeare, emphasizing the plays: tragedies, comedies, histories, and romances. Approaches Shakespeare both as poetry and as drama, concerning itself with language and with staging. This class may include students from multiple sections. (Humanities, Elective)

**Prerequisites**
ENGL & 101 or instructor permission

**Course Outcomes**
- Describe theatre and stagecraft in Shakespeare's day.
- Describe political, social, and cultural milieu in which Shakespeare wrote his plays.
- React verbally and in writing to a given play, noting themes and motifs.
- Explain verbally and in writing the complexities of Shakespeare's English, noting his own stylistic moves as well as the poetic content of the dialogue, e.g., connotation, images, figures of speech, irony, symbolism, rhyme, and rhythm.
- Write a paper which defends a given literary thesis with reasons and textural examples.

**ENGL & 226: British Literature I**
**Credits** 5
**Quarter Offered** Winter (even year)
Survey of British literature from diverse periods. Selections will vary by quarter but will include classic and influential texts. This class may include students from multiple sections. (Humanities, Elective)

**Prerequisites**
ENGL & 101 or instructor permission

**Course Outcomes**
- Read literature with insight.
- Formulate verbal responses to literature.
- Acquire knowledge about major British authors and their works.
- Acquire a sense of how English developed as a language.
- Hone research skills.
- Increased pleasure from reading literature.
- Increased appreciation for all the arts.
- Increased knowledge of self and world.
- Increased wisdom.
- Increased sensitivity to diversity and other people.

**ENGL & 227: British Literature II**
**Credits** 5
**Quarter Offered** Occasionally
Theme-based study of selected masterpieces of British literature in context. This class may include students from multiple sections. (Humanities, Elective)

**Prerequisites**
ENGL & 101 or instructor permission

**Course Outcomes**
- Read literature with insight.
- Formulate verbal responses to literature.
- Acquire knowledge about major British authors and their works.
- Acquire a sense of how English developed as a language.
- Hone research skills.
- Increased pleasure from reading literature.
- Increased appreciation for all the arts.
- Increased knowledge of self and world.
- Increased wisdom.
- Increased sensitivity to diversity and other people.

**ENGL & 235: Technical Writing**
**Credits** 5
**Quarter Offered** Winter
Develop professional skills in research, design, and communication of technical information. Emphasis on audience analysis, clear and effective writing style, and use of visual elements. Composition of documents in a variety of professional formats such as memos, proposals, progress reports, completion reports, lab reports, and instruction manuals. This class may include students from multiple sections. (Formerly ENGL 150, Elective)

**Prerequisites**
ENGL& 101 or instructor permission

**Course Outcomes**
- Use accepted professional formats and conventions to write documents.
- Produce a research project appropriate to the student’s major and/or career interests.
- Design a research strategy to solve a specific problem.
- Propose a clearly reasoned, convincingly supported solution to a specific problem.
- Conduct primary and secondary research, assessing effectiveness and validity of information sources.
- Paraphrase, summarize, and quote information from sources, using correct citations.
- Design visually effective documents and presentations.
- Revise and edit documents with peer exchange to improve clarity, economy, and rhetorical effectiveness.

ENGL& 236 : Creative Writing I

**Credits** 5

**Quarter Offered** Fall, Winter

Beginning writing in fiction and poetry, other modes by request. Workshop approach, with discussion of work by class members and instructor. Reading of contemporary fiction, poetry, and theory. This class may include students from multiple sections. (Humanities-Performance, Elective)

**Prerequisites**
ENGL& 101 or instructor permission

**Course Outcomes**
- Demonstrate an understanding of the elements of fiction/poetry/drama.
- Generate and revise a portfolio of 15-30 pages of poetry, fiction, creative non-fiction, drama, and/or other genres.
- Analyze creative writing by professional writers and identify the elements of fiction and poetry therein.
- Demonstrate an ability to objectively analyze and critique peer writing.
- Utilize appropriate vocabulary/terminology in regard to analysis of professional and student writing.
- Demonstrate an ability to revise works in response to workshop feedback and personal choice.
- Demonstrate some awareness of cultural and historical context as they apply to interpreting works of poetry/fiction/drama.

ENGL& 237 : Creative Writing II

**Credits** 5

**Quarter Offered** Fall, Winter

Advanced creative writing using workshop approach. Genres offered vary by quarter and instructor. This class may include students from multiple sections. (Elective)

**Prerequisites**
ENGL& 236 or instructor permission

**Course Outcomes**
- Compose beginning works in poetry, fiction, creative non-fiction, drama, and/or other genres.
- Demonstrate an ability to participate in workshops by giving and received substantive feedback.
- Demonstrate an ability to revise works in response to workshop feedback and personal choice.
- Construct a portfolio of 15-30 pages of polished work.
- Analyze creative work by professional writers.
- Demonstrate good listening skills and tolerate different viewpoints.

ENGL& 244 : American Literature I

**Credits** 5

**Quarter Offered** Spring (even year), Summer

Survey of classic works as well as new voices from the beginning of American literature to the present. This class may include students from multiple sections. (Humanities, Elective)

**Prerequisites**
ENGL& 101 or instructor permission

**Course Outcomes**
Read actively and analytically about individuals’ and cultures’ values, practices, behaviors, and expectations.
Engage with the complexity of literature by thinking creatively and logically about what an author is communicating and how it relates to one’s own beliefs and experiences.
Analyze one’s own values and how family, community, place, and nation influence them; consider one’s identity in relation to people from varying backgrounds, cultures, and communities.
Acknowledge different viewpoints and evaluate and challenge assumptions and conclusions—both one’s own and others.
Write pieces controlled by a central argument that are well-edited and supported with specific examples from the texts.
Reduce fears and timidity in expressing opinions in a group setting, acknowledge the needs and expectations of others, and reflect on the impact one’s participation has on a group setting and discussion.

**ENGL& 245 : American Literature II**

**Credits** 5

**Quarter Offered** Spring (odd year)

Theme-based study of selected masterpieces of American literature in context. This class may include students from multiple sections. (Humanities, Elective)

**Prerequisites**

ENGL& 101 or instructor permission

**Course Outcomes**

- Read works of American literature that connect through a specific theme.
- Analyze and discuss works of American literature in relation to major historical events.
- Explain the cultural and political contexts for works of American literature.
- Demonstrate effectively, in writing, knowledge and understanding of assigned readings and the theme that connects them.
- Demonstrate ability to effectively conduct research related to course readings and themes.
- Demonstrate appropriate vocabulary/terminology in regards to literary analysis.

**ENGL& 254 : World Literature I**

**Credits** 5

**Quarter Offered** Fall (odd year)

Survey of world literature from diverse cultures and periods, including historical contexts. Selections will vary by quarter but will include translations from African, Eastern, Latin, and Western literatures. This class may include students from multiple sections. (Humanities, Elective)

**Prerequisites**

ENGL& 101 or instructor permission

**Course Outcomes**

- Analyze and discuss works of world literature in relation to major historical events.
- Discuss a variety of literary genres: fiction, poetry, and plays, as well as academic writing: articles and books about literature.
- Explain the cultural and political contexts of given works of world literature.
- Demonstrate effectively, in writing, knowledge of assigned readings.
- Demonstrate ability to effectively research readings and themes for the purpose of writing about literature.
- Demonstrate appropriate vocabulary/terminology in regards to literary analysis.

**ENGL& 255 : World Literature II**

**Credits** 5

**Quarter Offered** Fall (even year)

Theme-based study of selected masterpieces of African, Asian, European, and American literature in context. This class may include students from multiple sections. (Humanities, Elective)

**Prerequisites**

ENGL& 101 or instructor permission

**Course Outcomes**

- Read works of world literature that connect through a specific theme.
- Analyze and discuss works of world literature in relation to major historical events.
- Explain the cultural and political contexts for works of world literature.
Demonstrate effectively, in writing, knowledge and understanding of assigned readings and the theme that connects them.
Demonstrate ability to effectively conduct research related to course readings and themes.
Demonstrate appropriate vocabulary/terminology in regards to literary analysis.

**ENGL 90 : Fundamentals of English**

**Credits** 5

**Quarter Offered** Fall, Winter, Spring, Summer

Review of sentence structure, grammar, usage, and punctuation. Introduction to essay writing. Placement based on Accuplacer score. This class may include students from multiple sections.

**Course Outcomes**
- Prewrite, draft, and revise paragraphs and short essays controlled by topic sentences or thesis statements and supported by evidence.
- Reduce errors in grammar and mechanics and use a variety of sentence structures.
- Identify main ideas, supporting evidence, patterns of exposition, and transitions in assigned readings and classmates’ essays.
- Develop and apply vocabulary building skills.
- Recognize and avoid plagiarism and demonstrate an awareness of academic documentation including MLA and APA.
- Evaluate and use resources that are authoritative, accurate, unbiased, and current.
- Accept personal academic responsibility including class attendance, class participation, and prompt and thorough completion of assignments.
- Use tools of self-assessment to evaluate knowledge and skills in course outcomes.
- Demonstrate good listening skills, acknowledge different viewpoints, and respect the need to examine cultural diversity.
- Practice expressing opinions in a group setting.

**ENGL 180 : Tidepools: Exploring Literature and the Arts I**

**Credits** 5

**Quarter Offered** Fall

Students will learn the elements of art and apply them to critiques of art works submitted to Tidepools art and literature magazine. Students will also learn the elements of fiction and poetry, and use them to critique creative writing submissions. Students will gain editing skills and practice communication skills while selecting, editing, and preparing art and creative writing for publication. Students will learn ethical, historical, and philosophical aspects of editing while serving as editors and will create and release a print magazine along with promotional materials, and will author and edit press releases, posters, and advertisements. This class may include students from multiple sections. (Humanities, Elective)

**Course Outcomes**
- The Elements of Art: 1) Identify and apply the elements and principles of art in two-dimensional and three-dimensional artwork.
- The Elements of Art: 2) Participate in critiques, explore aesthetics, and apply elements of art to material under consideration.
- The Elements of Literature: 1) Identify and apply the elements of Fiction and Poetry.
- The Elements of Literature: 2) Participate in critiques, explore literary conventions, and apply elements of fiction and poetry to editorial decision making.
- Constructive Feedback: Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.
- Interpersonal Skills: 1) Design and edit an art and literature magazine as a member of a team.
- Interpersonal Skills: 2) Make presentations and participate in group decision making.
- Interpersonal Skills: 3) Apply written and verbal communication skills to a variety of tasks.
Community Outreach: Build new and maintain existing relationships between the campus community and the community at large.

Editing: 1) Generate, revise, and edit group authored documents: advertisements, press releases, letters, etc.

Editing: 2) Compare roles involved in editing: selection of material, line editing, editorial decision making, creative decision making, consideration of space, cost, circulation, etc.

Hands-on Learning: Gain experience that can be used on your resume to further your experience toward gainful employment or future creative opportunities.

**ENGL 181: Tidepools: Exploring Literature and the Arts II**

**Credits** 5

**Quarter Offered** Winter

Students will learn the elements of art and apply them to critiques of art works submitted to Tidepools art and literature magazine. Students will also learn the elements of fiction and poetry, and use them to critique creative writing submissions. Students will gain editing skills and practice communication skills while selecting, editing, and preparing art and creative writing for publication. Students will learn ethical, historical, and philosophical aspects of editing while serving as editors and will create and release a print magazine along with promotional materials, and will author and edit press releases, posters, and advertisements. This class may include students from multiple sections. (Humanities, Elective)

**Course Outcomes**

The Elements of Art: 1) Identify and apply the elements and principles of art in two-dimensional and three-dimensional artwork.

The Elements of Art: 2) Participate in critiques, explore aesthetics, and apply elements of art to material under consideration.

The Elements of Literature: 1) Identify and apply the elements of Fiction and Poetry.

The Elements of Literature: 2) Participate in critiques, explore literary conventions, and apply elements of fiction and poetry to editorial decision making.

Constructive Feedback: Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.

Interpersonal Skills: 1) Design and edit an art and literature magazine as a member of a team.

Interpersonal Skills: 2) Make presentations and participate in group decision making.

Interpersonal Skills: 3) Apply written and verbal communication skills to a variety of tasks.

Community Outreach: Build new and maintain existing relationships between the campus community and the community at large.

Editing: 1) Generate, revise, and edit group authored documents: advertisements, press releases, letters, etc.

Editing: 2) Compare roles involved in editing: selection of material, line editing, editorial decision making, creative decision making, consideration of space, cost, circulation, etc.

Hands-on Learning: Gain experience that can be used on your resume to further your experience toward gainful employment or future creative opportunities.

**ENGL 182: Tidepools: Exploring Literature and the Arts III**

**Credits** 5

**Quarter Offered** Spring

Students will learn the elements of art and apply them to critiques of art works submitted to Tidepools art and literature magazine. Students will also learn the elements of fiction and poetry, and use them to critique creative writing submissions. Students will gain editing skills and practice communication skills while selecting, editing,
and preparing art and creative writing for publication. Students will learn ethical, historical, and philosophical aspects of editing while serving as editors and will create and release a print magazine along with promotional materials, and will author and edit press releases, posters, and advertisements. This class may include students from multiple sections. (Humanities, Elective)

**Course Outcomes**
The Elements of Art: 1) Identify and apply the elements and principles of art in two-dimensional and three-dimensional artwork. two-dimensional and three-dimensional artwork.

The Elements of Art: 2) Participate in critiques, explore aesthetics, and apply elements of art to material under consideration.

The Elements of Literature: 1) Identify and apply the elements of Fiction and Poetry.

The Elements of Literature: 2) Participate in critiques, explore literary conventions, and apply elements of fiction and poetry to editorial decision making.

Constructive Feedback: Demonstrate the ability to respond to constructive feedback from the instructor and other students in a professional manner.

Interpersonal Skills: 1) Design and edit an art and literature magazine as a member of a team.

Interpersonal Skills: 2) Make presentations and participate in group decision making.

Interpersonal Skills: 3) Apply written and verbal communication skills to a variety of tasks.

Community Outreach: Build new and maintain existing relationships between the campus community and the community at large.

Editing: 1) Generate, revise, and edit group authored documents: advertisements, press releases, letters, etc.

Editing: 2) Compare roles involved in editing: selection of material, line editing, editorial decision making, creative decision making, consideration of space, cost, circulation, etc.

Hands-on Learning: Gain experience that can be used on your resume to further your experience toward gainful employment or future creative opportunities.

**ENGL 240: Children's Literature**
**Credits** 5
**Quarter Offered** Spring (odd year)
An examination of the variety and diversity of literature that forms a part of the imaginative experience of children and adolescents, as well as a part of a larger literary heritage, viewed in the light of their social, psychological, political, and moral implications. Exploration of book format, major genres, and works by notable authors and illustrators. This class may include students from multiple sections. (Humanities, Elective)

**Prerequisites**
ENGL& 101 or instructor permission

**Course Outcomes**
- List criteria for excellence in children's books in general and by specific types.
- Evaluate children's books based on criteria of experts in field.
- Identify some of the best authors and illustrators of children's books.
- Discuss and evaluate multiple genres of children's books.
- Analyze the value of a lifelong enjoyment of children's books.
- Discuss how presenting books to children may impact their learning, creativity, and social skills.

**ENGL 250: Intercultural Literature**
**Credits** 5
**Quarter Offered** Winter (odd year)
An examination of literary works from a variety of cultural perspectives. Contemporary texts and local guest speakers from different cultures increase students’ awareness and understanding of the values, beliefs, stories, interests, and experiences of those cultures. Students define their own cultural identity and participate in service learning. This class may include students from multiple sections. (Humanities, Elective)

**Prerequisites**

**ENGL & 101**

**Course Outcomes**

- Analyze issues from a variety of different cultural perspectives and compare content of readings to our own time and lives.
- Evaluate assumptions and support opinions with evidence, details, and examples.
- Analyze literary texts from thematic, cultural, and stylistic perspectives.
- Interpret information from literary texts, incorporate that information into essays, and document sources correctly.
- Demonstrate collaborative learning.

**ENGL 290 : Special Topics in Literature**

**Credits**

1-5

**Quarter Offered**

Occasionally

Directed research is an in-depth learning opportunity offered to students where their abilities and interests indicate they would benefit from a highly focused task under the direction of an individual faculty member. The student is responsible for finding a sponsoring faculty member. This class may include students from multiple sections. (Elective)

**Prerequisites**

All arrangements must be made with the instructor prior to enrollment

**Course Outcomes**

- Write and revise poetry, fiction and/or creative nonfiction, using suggestions given by teacher and peers.
- Research and find possible markets for publication of material; submit material in a professional manner and on a regular basis. Maximize opportunities to publish.
- Develop and execute a reading plan in appropriate genres.
- Build a writing group which gives support to individuals.

**ENGL 325 : Professional and Organization Communications**

**Credits**

5

**Quarter Offered**

Fall

Must be seeking a Bachelor of Applied Science degree to enroll. If interested, visit pencol.edu/bas

**Prerequisites**

**ENGL & 101**

**Course Outcomes**

- Analyze rhetorical choices made by authors of actual business documents.
- Compose a variety of business documents meant for different audiences.
- Compose business documents that use clear, concise, unified, coherent, well-developed, grammatical prose.
- Apply ethics to the composition of business documents.
- Demonstrate an ability to do research on business management topics and apply that research to documents with proper source citation.
- Apply consistent formatting and creative visual design elements to business documents.
- Demonstrate an ability to collaborate with peers.
Entrepreneurship (ENT)

ENT 205 : Entrepreneurship

Credits 5

This course introduces future entrepreneurs to key opportunities in the energy and innovation market place. Students will learn effective techniques to assess market opportunities, align with a market segment and develop a business model canvas that results in competitive advantage for a startup business venture. The business entrepreneurship instruction also includes an overview of energy revenue streams, concepts of supply and demand, pricing and marketing, federal regulatory and localized rate case impacts and the changing role of customers in the energy economy. This class may include students from multiple sections.

Course Outcomes
- Assess the upside and downside of business opportunities for an innovation Enterprise or Venture.
- Conduct an economic analysis of an Innovation Enterprise or venture to determine alignment with associated Economy revenue streams, funding sources, and impacts of the changing roles of customers.
- Develop and present a business model canvas that provides a platform for competitive advantage and return on investment (ROI) to a start-up energy enterprise or business venture.
Entrepreneurship and Marketing Management (EM-BAS, Bachelor of Applied Science)

**EM-BAS 311 : Digital Marketing**
**Credits** 5  
**Quarter Offered** Fall  
This course will cover the foundations of digital marketing. Students will explore how to create visibility and attract customers through search engine marketing as well as social media marketing. Topics will also include but are not limited to how to build and maintain consumer and business relationships through email marketing, content marketing as well as exploring digital marketing plans. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas.

**Prerequisites**  
Entrepreneurship/Marketing Management BAS Program Admittance

**Course Outcomes**
- Identify core concepts of marketing and the role digital marketing has in today’s business environment.
- Explain search engine marketing and the role it plays in digital marketing.
- Describe the importance of social media marketing.
- Formulate a plan with an effective online presence.
- Evaluate the effectiveness of a digital marketing campaign using the appropriate tools.
- Discuss customer relationship development in digital marketing.

**EM-BAS 346 : Applied Statistics**
**Credits** 5  
**Quarter Offered** Spring

Pending Curriculum Committee approval

**EM-BAS 420 : Sales, Negotiation, and Creative Product Development**
**Credits** 5  
**Quarter Offered** Winter

This course addresses the application of basic principles of sales and negotiations through the introduction and analysis of the negotiation process. It focuses on finding customers and developing relationships, using sales strategies and tools to meet clients’ needs and finding and negotiating solutions for customers. This course explores the creative product development process and organization. Topics include identifying customer needs, planning the product and concept generation through testing. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas.

**Prerequisites**  
Entrepreneurship/Marketing Management BAS Program Admittance

**Course Outcomes**
- Research negotiation strategies and evaluate their use and success in negotiations.
- Develop solutions for customers through negotiation.
- Identify sales strategies to meet the needs of clients.
- Explain the product development process and organization.
- Identify customer needs.
- Explain concept generation, selection and testing.

**EM-BAS 450 : Business Launch -1 Entrepreneur**
**Credits** 5  
**Quarter Offered** Winter

Pending Curriculum Committee approval
EM-BAS 460: Business Launch-2 Marketing
Credits 5
Quarter Offered: Spring
Pending Curriculum Committee approval
Environmental Science (ENVS/ENVS&)

**ENVS& 100 : Survey of Environmental Science**

**Credits** 5  
**Quarter Offered** Fall, Winter, Spring  
Scientific approach to understanding nature and scope of contemporary problems in our environment. This class may include students from multiple sections. (Natural Sciences, Elective)  
**Prerequisites**  
Eligibility for both ENGL& 101 and MATH 90  
**Course Outcomes**  
- Use basic principles from biological, physical, and social sciences to explain the nature, causes, and consequences of environmental problems.  
- Use critical thinking and quantitative reasoning to analyze environmental problems.  
- Support a perspective on environmental problems using science, evidence and reason.

**ENVS& 101 : Introduction to Environmental Science with Lab**

**Credits** 5  
**Quarter Offered** Occasionally  
An interdisciplinary science course for both non-science majors and science students. Topics include the practice of environmental science, ecological principles, demographics, forest and wildlife resources, energy, planning, climate change, and pollution. Underlying scientific principles and practices, including the exploration and presentation of scientific uncertainty, are identified and related to societal issues. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)  
**Prerequisites**  
MATH 98 and placement into ENGL& 101  
**Course Outcomes**  
- Describe the process of science as it is practiced by professional scientists;  
- Describe the key tenets of the science of ecology;  
- Describe current major environmental issues;  
- Define the scientific concept of risk and its role in environmental issues;  
- Apply scientific approaches, methods, and lab skills to explore environmental issues in greater depth;  
- Apply knowledge of ecology, risk, and the practice of science to critically evaluate environmental issues, particularly in the interplay between science and politics; and  
- Use scientific problem solving skills in novel ways, and share subsequent information through written and oral communication.

**ENVS 160 : Principles of Environmental Sustainability**

**Credits** 5  
Explores past and present contributions from major events and leaders to the sustainability movement. It combines the basic ways natural systems work with an understanding of economics, social equity, and ecology, followed by a critical analysis of the societal value and environmental impact of trends in sustainability. This class may include students from multiple sections. (Natural Sciences, Elective)  
**Prerequisites**  
Eligibility for ENGL& 101 and MATH 90  
**Course Outcomes**  
- Explain the history of sustainability as a concept, practice, and movement including past and present contributions from major events and leaders.  
- Analyze the principles of ecology with a particular focus on how local, national and global environmental issues affect, and are affected by, people in diverse regions around the world.  
- Examine the environmental challenges around water, food, biodiversity, ecosystems, population, urbanization, energy, climate change, and consumption.  
- Recognize the relationships among poverty, inequality and security within environmental justice.  
- Evaluate diverse conceptual and practical approaches to sustainability and identify multiple tools and strategies to promote sustainability initiatives.  
- Engage in activities that help students reflect on and connect to one’s own history and story through memories, emotions, and personal experiences grounded in nature and place.
Examine one's own attitudes, values, and choices while articulating a hope-based personal vision to positively impact one's community through action and change.

**ENVS 260: Topics in Environmental Science**  
**Credits** 1  
-5  
**Quarter Offered** Occasionally  
Provides opportunity to explore a wide variety of specialized topics in environmental science. Courses offered by topic. Participants may take more than one topic for credit, provided additional credits are taken in different topics. This class may include students from multiple sections. (Elective)  
**Prerequisites**  
Eligibility for both ENGL& 101 and MATH 90  
**Course Outcomes**  
Identify structures associated with stand succession - discussions, field summaries, final examination.  
Analyze forests using structure, composition and function - discussions, field summaries, final examination.  
Measure forest attributes (structures and composition) correlating to stage of forest succession - discussions, field summaries, final examination.  
Identify and explain social, economic and ecological aspects of forest policy - discussions, field summaries, final examination.

**ENVS 277: Field Investigative Nearshore I**  
**Credits** 1  
-4  
**Quarter Offered** Summer  
Students will earn credit for participating in collaborative, multiagency project administered by Coastal Watershed Institute. (Elective)  
**Prerequisites**  
Instructor permission

**ENVS 278: Field Investigative Nearshore II**  
**Credits** 1  
-4  
**Quarter Offered** Fall  
Students will earn credit for participating in collaborative, multiagency project administered by Coastal Watershed Institute. (Elective)  
**Prerequisites**  
Instructor permission

**ENVS 287: Field Investigations in Nearshore Topics III**  
**Credits** 1  
-4  
**Quarter Offered** Winter  
Students will earn credit for participating in collaborative, multiagency project administered by Coastal Watershed Institute. (Elective)  
**Prerequisites**  
Instructor permission

**ENVS 288: Field Investigations in Nearshore Topics IV**  
**Credits** 1  
-4  
**Quarter Offered** Spring  
Students will earn credit for participating in collaborative, multiagency project administered by Coastal Watershed Institute. (Elective)  
**Prerequisites**  
Instructor permission

**ENVS 290: Research Topics in Environmental Science**  
**Credits** 1  
-5
Quarter Offered  Occasionally
Students serve as active members on research teams working to advance knowledge in environmental science. Depending upon the project, students will participate in hypothesis formation, experimental design, data collection, analysis, and determination of conclusions. This class may include students from multiple sections.
(Elective)
Prerequisites
Prerequisites determined by instructor
Course Outcomes
- Use the scientific method to advance the state of knowledge, delineate avenues and apply that method to derive conclusions, and develop assessment methods for evaluation.
Family Life Education (FLE)

FLE 145-147: Parenting Journey
Credits 2
Parents will learn how past experiences and present realities shape their attitudes and beliefs as parents and influence how they engage with their children. Through a process of self-reflection and guided conversation, students will learn parenting styles, patterns, behaviors, and how to utilize community services and supports. This class may include students from multiple sections. Fall, Winter, Spring sequence.

Course Outcomes
- Describe the changing patterns and strength-based habits for parenting children.
- Create personal goals to establish a stronger basis for a successful parent-child relationship.
- Describe the importance of empathy and forgiveness in parenting.
- Explore the importance of making proactive choices in parenting.
- Describe ways in which to nurture themselves and their children.
- Demonstrate how to find and utilize community services and supports.
- Identify strategies to advocate for themselves and their families.

FLE 151-153: Parenting Skills
Credits 1
For parents who have a child enrolled in an early childhood cooperative laboratory program. Develops and/or enhances positive parenting skills. Parent seminars, observation, and participation in children's program. Fall, Winter, Spring sequence.

Course Outcomes
A: Parenting Skills
Parents who attend classes will improve their parenting skills and increase their knowledge in the following areas:

- How children grow and develop.
- Making healthy and age appropriate choices for their children.
- Handling day-to-day challenges of raising children.
- Helping children learn.
- Coping with stress in their own lives, self-care and stress management.
- Positive interaction with co-parents and parents of other children.
- Awareness of community information, programs and resources that are available.
- Satisfaction in their parenting experiences.
- Using positive discipline appropriately with children.

B and C: Kaleidoscope Play and Learn
Parents and caregivers learn about:

- Activities they can do at home to support children's learning.
- Turning everyday activities- such as grocery shopping, cooking, and bath time- into early learning opportunities.
- Child development from birth to five.
- Skills children are expected to have by Kindergarten.
- Community programs and services available to help them raise healthy children.
- Building connections and friendships and how these lead to feeling support in the parental role.

FLE 155-157: Parent Co-Op Leadership
Credits 1
Participate in planning activities and events that support and enhance programs for children, parents, and staff. Includes problem solving, collaborative processes, business management, group organization, and communication. Fall, Winter, Spring sequence.

Course Outcomes
FLE 155
Recognize communication patterns that promote or hinder group climate and productivity.
Observe and recognize skills of decision making and problem solving.
Demonstrate effective participation in group organization and leadership
   Recognize and demonstrate the responsibilities, including ethical responsibilities, of the individual leadership roles.

FLE 156:

Demonstrate skills to build community and commitment within the group.
   Recognize and demonstrate skills to separate issues from personalities in group conflicts.
Demonstrate skills of decision making and problem solving.
Recognize how different values impact personal relationships.
Listen actively and respond appropriately to different audiences.
Present one’s personal point of view clearly and respectfully.

FLE 157:

Recognize how gender and ethnic/cultural values impact communication and personal relationships.
Demonstrate the ability to work cooperatively and collaboratively with others.
Demonstrate effective participation in group organization and leadership.
   Perform the responsibilities of the executive board position.
   Market the program, hire personnel, and carry out responsible financial decisions to enable the group to remain fiscally sound.
Advocate for and support appropriate environments for the physical, social/emotional, and cognitive development of children.
Recognize and advocate for parent involvement in the best interest of children.
Access and advocate for community resources and programs that serve the needs of children.
Evaluate and support the cooperative program and parents’ participation to continue providing a quality program.

FLE 161-163: Family Programs

Credits 1
Parents and children from birth to age eight meet in a child development laboratory. Developmentally appropriate activities are planned for children and combined with parent participation and parent education discussions. Fall, Winter, Spring sequence.

Course Outcomes
FLE 161:

Recognize safe, healthy, and quality environments and practices that minimize the risks and meet the needs of the developing child.
Observe typical age levels and sequences of growth and behavior in developing children.
Recognize the importance of the parent’s role as their child’s teacher.
Understand developmentally appropriate early childhood education principles.
Plan, prepare, and present a nutritious snack for the children.
Observe positive age appropriate guidance techniques used by parents and teachers in the classroom.
Recognize communication patterns that promote or hinder group climate and productivity.
Work cooperatively with others to solve problems and complete tasks.

FLE 162:

Observe children’s individual differences such as temperament, differing abilities, and ethnicity in the laboratory setting.
Discuss and identify developmentally appropriate environments for children that encourage learning through active exploration and self-discovery.
Use positive age appropriate guidance techniques when assisting the teacher and parents in the classroom.
Recognize and eliminate bias, and promote diversity and inclusion in the children's environment. Recognize one's role in personal relationships. Demonstrate active listening and appropriate responses to different audiences.

FLE 163:

Plan and present age appropriate activities to meet the developmental needs of young children. Recognize and respect the difference in family lifestyles, cultural viewpoints and values. Identify and discuss contemporary issues that impact the family such as divorce, substance abuse, as well as physical, emotional or sexual abuse issues. Identify community resources, activities and services that provide education, support, protection and services for families. Access, use, and evaluate the credibility of information about child development and guidance. Present one's point of view clearly and respectfully. Recognize how gender and ethnic/cultural values impact personal relationships. Evaluate and support the co-op program and parents' participation to continue providing a quality program.

FLE 171-173: Toddler-Parent Co-Op

Credits 2
For parents with one to three year old children concurrently enrolled in a toddler child study laboratory. Combines parent observation and participation assignments in children's program. Parent seminars focus on child development, parenting, and family relationship issues. Fall, Winter, Spring sequence.

Course Outcomes

FLE 171:

Recognize safe, healthy, and quality environments and practices that minimize the risks and meet the needs of the developing child. Observe typical age levels and sequences of growth and behavior in developing children. Recognize the importance of the parent's role as their child's teacher. Understand developmentally appropriate early childhood education principles. Plan, prepare, and present a nutritious snack for the children. Observe positive age appropriate guidance techniques used by parents and teachers in the classroom. Recognize communication patterns that promote or hinder group climate and productivity. Work cooperatively with others to solve problems and complete tasks.

FLE 172:

Observe children's individual differences such as temperament, differing abilities, and ethnicity in the laboratory setting. Discuss and identify developmentally appropriate environments for children that encourage learning through active exploration and self-discovery. Use positive age appropriate guidance techniques when assisting the teacher and parents in the classroom. Recognize and eliminate bias, and promote diversity and inclusion in the children's environment. Recognize one's role in personal relationships. Demonstrate active listening and appropriate responses to different audiences.

FLE 173:

Plan and present age appropriate activities to meet the developmental needs of young children. Recognize and respect the difference in family lifestyles, cultural viewpoints and values. Identify and discuss contemporary issues that impact the family such as divorce, substance abuse, as well as physical, emotional or sexual abuse issues. Identify community resources, activities and services that provide education, support, protection and services for families. Access, use, and evaluate the credibility of information about child development and guidance. Present one's point of view clearly and respectfully. Recognize how gender and ethnic/cultural values impact personal relationships.
Evaluate and support the co-op program and parents’ participation to continue providing a quality program.

**FLE 175-177 : Toddler-Parent Lab/Leadership**

**Credits** 2  
For parents with one to three year old children concurrently enrolled in a toddler child study laboratory. Combines parent observation and participation assignments in children’s program. Parent seminars focus on child development, parenting, and family relationship issues. Includes group organization and leadership training. Fall, Winter, Spring sequence.

**Course Outcomes**

**FLE 175:**

- Recognize safe, healthy, and quality environments and practices that minimize the risks and meet the needs of the developing child.
- Observe typical age levels and sequences of growth and behavior in developing children.
- Recognize the importance of the parent’s role as their child’s teacher.
- Understand developmentally appropriate early childhood education principles.
- Plan, prepare, and present a nutritious snack for the children.
- Observe positive age appropriate guidance techniques used by parents and teachers in the classroom.
- Recognize communication patterns that promote or hinder group climate and productivity.
- Work cooperatively with others to solve problems and complete tasks.

**FLE 176:**

- Observe children's individual differences such as temperament, differing abilities, and ethnicity in the laboratory setting.
- Discuss and identify developmentally appropriate environments for children that encourage learning through active exploration and self-discovery.
- Use positive age appropriate guidance techniques when assisting the teacher and parents in the classroom.
- Recognize and eliminate bias, and promote diversity and inclusion in the children's environment.
- Recognize one's role in personal relationships.
- Demonstrate active listening and appropriate responses to different audiences.

**FLE 177:**

- Plan and present age appropriate activities to meet the developmental needs of young children.
- Recognize and respect the difference in family lifestyles, cultural viewpoints and values.
- Identify and discuss contemporary issues that impact the family such as divorce, substance abuse, as well as physical, emotional or sexual abuse issues.
- Identify community resources, activities and services that provide education, support, protection and services for families.
- Access, use, and evaluate the credibility of information about child development and guidance.
- Present one's point of view clearly and respectfully.
- Recognize how gender and ethnic/cultural values impact personal relationships.
- Evaluate and support the co-op program and parents’ participation to continue providing a quality program.

**FLE 181-183 : Pre-School Parent Co-Op**

**Credits** 2  
Parent students participate as teaching assistants in preschool laboratory with children ages three to six years. Focus on early childhood curriculum, child development and behavior, classroom dynamics, and positive guidance. Fall, Winter, Spring sequence.

**Course Outcomes**

**FLE 181:**

- Recognize safe, healthy, and quality environments and practices that minimize the risks and meet the needs of the developing child.
- Observe typical age levels and sequences of growth and behavior in developing children.
- Recognize the importance of the parent’s role as their child’s teacher.
Understand developmentally appropriate early childhood education principles.
Plan, prepare, and present a nutritious snack for the children.
Observe positive age appropriate guidance techniques used by parents and teachers in the classroom.
Recognize communication patterns that promote or hinder group climate and productivity.
Work cooperatively with others to solve problems and complete tasks.

FLE 182:
Observe children's individual differences such as temperament, differing abilities, and ethnicity in the laboratory setting.
Discuss and identify developmentally appropriate environments for children that encourage learning through active exploration and self-discovery.
Use positive age appropriate guidance techniques when assisting the teacher and parents in the classroom.
Recognize and eliminate bias, and promote diversity and inclusion in the children's environment.
Recognize one's role in personal relationships.
Demonstrate active listening and appropriate responses to different audiences.

FLE 183:
Plan and present age appropriate activities to meet the developmental needs of young children.
Recognize and respect the difference in family lifestyles, cultural viewpoints and values.
Identify and discuss contemporary issues that impact the family such as divorce, substance abuse, as well as physical, emotional or sexual abuse issues.
Identify community resources, activities and services that provide education, support, protection and services for families.
Access, use, and evaluate the credibility of information about child development and guidance.
Present one's point of view clearly and respectfully.
Recognize how gender and ethnic/cultural values impact personal relationships.
Evaluate and support the co-op program and parents' participation to continue providing a quality program.
Film (FILM)

FILM 100 : Art of Film
Credits 5
Quarter Offered Fall
Study of film as visual text, including key terms, primary practitioners, and major developments. Examination of film as transmitter of themes and values. This class may include students from multiple sections. (Humanities, Elective)
Prerequisites Eligibility for or completion of ENGL & 101
Course Outcomes
- Define and use specific vocabulary relating to filmmaking and the motion picture industry.
- Analyze motion pictures using established criteria.
- Describe some major developments, personalities, and movements in the history of filmmaking.
- Discuss films as texts that reflect our larger social and cultural value systems.
- Compare and contrast films according to their genres, styles, and narrative strategies.
- Write about specific films in depth using the language and techniques of Film Studies as a discipline.

FILM 101 : Great Directors in Film
Credits 5
Quarter Offered Winter (odd year)
Introduction to authorship in the cinema. Examination of the work of a major director or directors. Exploration of the director’s life, film style, and themes. This class may include students from multiple sections. (Humanities, Elective)
Prerequisites Eligibility for or completion of ENGL & 101
Course Outcomes
- View, identify, and discuss major works of the director.
- Identify and discuss major historical, cultural, economic, and/or political forces that helped shape the films explored in class.
- Identify and discuss major aspects of the director’s film style.
- Identify and correctly use appropriate film terminology.
- Explain and critically discuss the influence of personal (biographical), historical, cultural, economic, and/or political forces on the films viewed in class.
- Explain and critically discuss (and/or write about) films as artworks and as commercial products.
- Explain and apply relevant critical theories about film.
- Compare/contrast films that are explored as part of the class’s theme, according to critical criteria covered by the readings and lectures.
- Research appropriate secondary material about the director and his or her films through library and online sources.
- Assimilate research from secondary source material into an analysis that explores in depth a work or body of work covered in class.

FILM 102 : Film Genre
Credits 5
Quarter Offered Winter (even year)
Introduction to study of film genre through looking at either one or several film genres, including literary, mythic, historic, and theoretical aspects. This class may include students from multiple sections. (Humanities, Elective)
Prerequisites Eligibility for or completion of ENGL & 101
Course Outcomes
- Identify, view, and discuss major works and individuals relating to the genre explored by the class.
- Identify and discuss major historical, cultural, economic, and/or political forces that helped shape the films explored in class.
- Identify major aspects of film style as they relate to the class’s genre.
- Identify and correctly use appropriate film terminology.
Explain and critically discuss the influence of historical, cultural, economic, and/or political forces on the films viewed in class.
Explain and critically discuss (and/or write about) genre films as artworks and as commercial products.
Explain and apply relevant critical theories about film genres.
Compare/contrast films that are explored as part of the class’s theme, according to critical criteria covered by the readings and lectures.
Research appropriate secondary material about film genre through library and online sources.
Assimilate research from secondary source material into an analysis that explores in depth a work or body of work covered in class.

FILM 110 : Literature and Film
Credits 5
Quarter Offered Spring (even year)
Exploration of connected works of literature and film. The films and texts may be direct adaptations of each other or may be connected thematically. The course will focus on a specific overall theme, genre, historical period, and/or author. This class may include students from multiple sections. (Humanities, Elective)
Prerequisites Eligibility for or completion of ENGL& 101
Course Outcomes
Read, discuss, and write about related films and works of literature within their historical, cultural, and intellectual contexts.
Read, discuss, and write about the thematic similarities and dissimilarities of related films and works of literature.
Read, discuss, and write about artistic differences between works of literature and films.
Read, discuss, and write about the relationship of selected secondary readings to films and literature.
Analyze films and literature according to their formal and thematic elements through writing and discussion.
Demonstrate mastery of key terms and concepts related to the course material through answering test questions, participating in discussions, and writing informal and formal responses and essays.
Explore a topic related to the course material in more depth through a final project.

FILM 120 : Introduction to Screenwriting
Credits 5
Quarter Offered Spring (odd year)
Beginning script writing for film and television. Combination small lecture/workshop approach focusing on techniques, formats, and structure of scripts; plot and character development. This class may include students from multiple sections. (Humanities-Performance, Elective)
Course Outcomes
Write beginning scenes for film and television.
Produce a series of short scenes and/or commercials. Complete one polished longer script, either for a short film or a television show.
Discuss and apply concepts of structure and character development outlined in text and lectures.
Discuss and analyze scripts by professional writers.
Model own scripts after scripts by professional writers and after structures discussed in lectures and text.
Develop new script ideas based on models from class.
Analyze representative scenes from filmed versions of scripts and apply visual and narrative concepts from these scenes to producing original scripts.
Interact successfully with others in a workshop setting, giving and taking constructive criticism.
Recognize the limitations and possibilities of film as a written and visual medium and the differences between writing for film and other forms of creative writing. Apply this knowledge to own script writing.
Produce scripts that apply visual motifs, as well as narrative structures and well-crafted dialogue.
Analyze commercials, television shows, and films according to their underlying narrative structures and persuasive (propaganda) techniques.
First Aid (FA)

**FA 100: Industrial First Aid**

**Credits** 1  
**Quarter Offered** Fall, Winter, Spring, Summer  
Prepares individuals to perform basic first aid procedures in cases of emergencies. Learn how to prevent accidents in the home and on the job. Adult CPR. Provides two-year certification. This class may include students from multiple sections.

This class has a $104.67 first aid course fee.  
**Course Outcomes**  
- Understand the basic principles of First Aid.  
- Demonstrate proficiency in CPR.  
- Become certified in basic first aid care.  
- Lay rescuer or Non-healthcare certification.

**FA 105: Basic Industrial First Aid**

**Credits** 1  
Prepares students to perform basic first aid procedures in cases of emergencies. Learn how to prevent accidents in the home and on the job. Adult and infant CPR. Provides three-year certification. This class may include students from multiple sections.  
**Course Outcomes**  
- Understand the roles and responsibilities of the First Aid provider.  
- Realize the importance of scene safety and body substance isolation.  
- Understand the Good Samaritan Law, consent, and confidentiality.  
- Perform an emergency move and place an ill person in the recovery position.  
- Open and maintain an airway.  
- Provide rescue breathing.  
- Manage an obstructed airway.  
- Identify and perform scene safety.  
- Perform primary (initial) and secondary (detailed) survey of an injured and or ill patient.  
- Perform adult one and two rescuer CPR.  
- Recognize the warning signs and symptoms of medical emergencies.  
- Recognize and care for a patient with a decreased level of consciousness.  
- Control external bleeding, recognize signs and symptoms of internal bleeding recognize and care for shock.  
- Recognize and stabilize suspected spinal injury.  
- Recognize and provide manual stabilization of suspected skeletal injuries.  
- Learn how to operate an Automatic External Defibrillator.  
- AHA BLS Healthcare provider certification.

**FA 120: Emergency Medical Tech**

**Credits** 9  
**Quarter Offered** Fall, Spring  
This course will focus on EMT roles and responsibilities, airway management, patient assessment, medical and trauma emergencies, anatomy and physiology, documentation, lifting and moving, and communications. Course includes practical labs and a total of 10 hours of clinical experience in the Emergency Department to provide direct hands-on experience. Special application is required before registration. This class may include students from multiple sections.

This class has a $90 EMT course fee.  
**Prerequisites**  
Current Health Care Provider CPR certification  
**Course Outcomes**  
- Recognize the nature and seriousness of the patient’s condition or extent of injuries to assess requirements for emergency medical care;  
- Administer appropriate emergency medical care based on assessment findings of the patient’s condition;  
- Lift, move, position and otherwise handle the patient to minimize discomfort and prevent further injury;
Perform safely and effectively the expectations of the job description.

**FA 180 : First Aid for Healthcare Providers**

**Credits** 1  
**Quarter Offered** Fall, Winter, Spring, Summer  
This course provides two year American Heart Association (AHA) Health care Provider certification in basic first aid and CPR. Students will be instructed in adult and pediatric CPR, foreign body airway obstruction, automatic external defibrillation and the basic skills necessary to provide first aid assistance in emergency situations. Class is based on nationally recognized standards from AHA and National Safety Council. Students will perform chest compressions and rescue maneuvers and should be prepared for extended stretches of time spent on the floor practicing CPR and first aid procedures. This class may include students from multiple sections.

This class has a $130.17 first aid course fee.

**Course Outcomes**

- Understand the roles and responsibilities of the First Aid provider.
- Realize the importance of scene safety and body substance isolation.
- Understand the Good Samaritan Law, consent, and confidentiality.
- Perform an emergency move and place an ill person in the recovery position.
- Open and maintain an airway.
- Provide rescue breathing.
- Manage an obstructed airway.
- Identify and perform scene safety.
- Perform primary (initial) and secondary (detailed) survey of an injured and or ill patient.
- Perform adult one and two rescuer CPR.
- Recognize the warning signs and symptoms of medical emergencies.
- Recognize and care for a patient with a decreased level of consciousness.
- Control external bleeding, recognize signs and symptoms of internal bleeding recognize and care for shock.
- Recognize and care for shock.
- Recognize and stabilize suspected spinal injury.
- Recognize and provide manual stabilization of suspected skeletal injuries.
- Learn how to operate an Automatic External Defibrillator.
- AHA BLS Healthcare provider certification.
CUL 100: Food Safety and Sanitation
Credits 3
Examine and practice the principles of FATTOM (Food, acidity, time, temperature, oxygen and moisture).
Students will learn about different facilities and equipment, understand food processing, distribution environments and formal sanitation and food safety programs.

Course Outcomes
Students will be able to identify proper temperature for storage, preparation and service of products.
Students will be able to store food in its proper order, dated and labeled correctly as per state and industry standards.
Comprehension of how sanitation, regular cleaning and proper handling can prevent illness.
Students will learn how to clean as they go, keep a professional workstation neat and organized and work as a team to ensure that the kitchen stays safe and sanitary.

CUL 160: Pastry Orientation
Credits 2
This course prepares students for entry into the pastry courses. During this course the student will learn the trade terminology, an overview of the hospitality industry with special emphasis on pastry production, job opportunities, professional organizations, and selection and use of the tools of the trade. Orientation about the program and facility, metric and US measurement conversions and calculations will be covered. Demonstration of mixing skills will be observed.

Course Outcomes
Students will learn how to use and differentiate various types of essential ingredients used in a professional bakeshop as well as appropriately selecting and using proper tools and equipment for any given recipe, project or task.
Comprehension of industry work-ethic expectations (how to work in a professional bakeshop/kitchen, i.e: the brigade system). Introduction to a culture of Gastronomy; the practice or art of choosing, cooking, and eating good food. Knowledge of the professional baking industry's history as well as current gastronomic and industry trends.
Ability to use standard industry terms and verbiage. Use of proper communication standards in a professional environment.
Exhibit proper recipe quantity conversions. Demonstrate ability to convert from Standard to Metric measurements. Comprehension and use of Metric system of measurements.
Ability to use different types of scales accurately. Demonstrate production and organization of “mis en place” in a professional manner.

CUL 166: Bread I
Credits 5
The student will be introduced to the basic mixing methods of yeast doughs, the preparation of enrobed doughs, and shaping of a variety of rolls, basic and specialty breads, breakfast and savory items. During this course, the student will gain an understanding of ingredients and their uses, correct scaling, baking and finishing methods, and practice safety & sanitation procedures.

Prerequisites
CUL 100 and CUL 160

Course Outcomes
Ability to use different scales accurately and efficiently in order to produce accurate mis en place.
Ability to convert recipe quantities and units in order to produce accurate mis en place in a professional environment.
Ability to work in concert with other employees adhering to industry work ethic standards. Ability to work clean, neat and in assembly line form while implementing professional kitchen verbiage and communication.
Ability to produce quality Ferments and Pre-ferments, rich and lean doughs, artisan and other breads in a professional manner.
Students will use critical thinking to evaluate and determine how different mixing methods and ingredients will affect your final product.

**CUL 167: Cookies I**

**Credits 5**
The student will be introduced to basic mixing methods for making cookies. The student will prepare assorted cookie doughs using the one stage creaming and sponge methods and prepare basic types of cookies and their assorted finishes. During this course, the student will gain an understanding of ingredients and their uses, correct scaling, baking and finishing methods. Selection, care and handling of equipment will be emphasized.

**Prerequisites**
[CUL 100](#) and [CUL 160](#)

**Course Outcomes**
- Ability to appropriately select and execute the correct mixing method for the specific recipe.
- Ability to prepare cookie dough, bake, cool, store and package finished product in a professional manner.
- Ability to scale recipe accurately and select proper tool to portion accurately. Ability to produce a uniform and consistent product repeatedly.
- Student will work faster, cleaner and smarter using assembly line techniques while developing a sense of urgency and overall speed in the workshop.
- Students will use critical thinking to evaluate and determine how different mixing methods and ingredients will affect the final product.

**CUL 168: Cakes I**

**Credits 5**
The student will be introduced to the following mixing methods: two stages, flour batter, sponge, high ration, chiffon, angel food and modified sponge methods. The student will prepare assorted breakfast items, fill, mask, pour and finish basic cakes and roulades. During this course, the student will gain an understanding of ingredients and their uses, correct scaling and baking methods.

**Prerequisites**
[CUL 100](#) and [CUL 160](#)

**Course Outcomes**
- Ability to appropriately select and execute the correct mixing method for the specific recipe.
- Ability to prepare dough, bake, cool, store and package finished product in a professional manner.
- Student will learn how to choose, use and store proper hardware for cake baking.
- Students will use critical thinking to evaluate and determine how different mixing methods and ingredients will affect the final product.

**CUL 169: Pies**

**Credits 5**
The student will be introduced to a variety of pie dough, pie fillings, decorative finishes of single and double crusted pies, baked and unbaked pies, custards, curds, strudels and simple desserts.

**Prerequisites**
[CUL 100](#) and [CUL 160](#)

**Course Outcomes**
- Ability to select proper ingredients and use in correct ratio with proper mixing method to craft a professional pie dough and crust.
- Learn how to make different fruit fillings, custards and curds and how to appropriately fill, garnish and display different types of pies and pie forms.
- Ability to make biscuits, scones, frybread, pate brise or any other dough using the biscuit method in a professional manner.
- Students will use critical thinking to evaluate and determine how different mixing methods and ingredients will affect the final product.

**CUL 175: French Pastry I**

**Credits 5**
This course is designated to give the student a practical exposure to the fundamentals of assorted enrobed, non-yeasted doughs, basic creams, fillings and cooked doughs.

**Prerequisites**
[CUL 100](#) and [CUL 160](#)
Course Outcomes
Complete comprehension of the science of enrobed doughs facilitating execution at a professional level of various items such as croissants and danishes.
Ability to create enrobed doughs by hand, from scratch and manipulate in various ways for varied presentations.
Ability to make various basic fillings and creams and ability to use proper ratio of dough to filling for a well-balanced final product.
Students will practice creating consistent and uniform products ensuring the customer’s content plus controlling cost for profit gains. This will also build speed and professionalism.
Students will use critical thinking to evaluate and determine how different mixing methods and ingredients will affect the final product.

CUL 176: Dessert I
Credits 5
This course is designated to give the student the ability to design and produce basic individual plated desserts. Skills in planning, organization, portion control and plate presentation are developed.
Prerequisites CUL 100 and CUL 160
Course Outcomes
Use all previously learned skills to produce all components of a restaurant quality dessert, organize and plate them in a professional manner.
Use of already learned skills with newly acquired ones to create basic candies, brittles, caramels, truffels and bom boms.
As a student advanced in the program, the student will demonstrate leadership qualities assisting and leading newer students in their tasks while focusing and finishing their own assignments.
Responsibility – Be motivated to set high personal goals for achievement.
Students will use critical thinking to evaluate and determine how different mixing methods and ingredients will affect the final product.

CUL 177: French Pastry II
Credits 5
This is an advanced course in basic French pastries where the application of different batters and fillings will be emphasized. Skills in assembling, producing and decorating classic French pastries will be developed.
Prerequisites CUL 175
Course Outcomes
Basic doughs and fillings
Assembling pastries and decoration
Portion and quality control
Assembly procedures and pouring methods
Professionalism and portfolio presentations
Ability to put together business plan for a production facility

CUL 178: Decorating I
Credits 5
This course will introduce the student to the practicality and techniques of basic cake mixing, filling assembling, masking, icing and decorating cakes. Basic tool handling and piping skills will be taught. Assorted cheesecake fillings, as well as curds and tarts will also be introduced.
Prerequisites CUL 100 and CUL 160
Course Outcomes
Ability to use previously learned skills to now work with new sugar techniques creating professional quality buttercreams and frostings.
Ability to cut, fill, frost and decorate square and round cakes with buttercream, frosting and other medians.
Ability to display basic chocolate working skills including ganache, truffle making and chocolate decorative work. Comprehension of the science of chocolate, its properties and how it behaves and reacts with other ingredients.
As a student advanced in the program, the student will demonstrate leadership qualities assisting and leading newer students in their tasks while focusing and finishing their own assignments. Students will use critical thinking to evaluate and determine how different mixing methods and ingredients will affect the final product.
French (FRCH/FRCH&)

FRCH& 121 : French I
Credits 5
Quarter Offered Occasionally
Audio/oral approach, emphasizing speaking the language and incorporating short stories, comprehensive reviews, and language drills. This class may include students from multiple sections. (Elective)

Course Outcomes
Demonstrate an awareness of cultural elements and understand their role in communication at the basic level.
Apply new French vocabulary through a variety of written and oral assignments at the basic level.
Demonstrate novice level proficiency in listening, reading, speaking and writing in French and the ability to function effectively in French in a variety of real-life situations.
Apply appropriate grammatical structures.
Demonstrate an understanding of cultural elements and their role that influences the language and the culture of the French - speaking countries.

FRCH& 122 : French II
Credits 5
Quarter Offered Occasionally
Audio/oral approach, emphasizing speaking the language and incorporating short stories, comprehensive reviews, and language drills. This class may include students from multiple sections. (Elective)

Course Outcomes
Demonstrate an awareness of cultural elements and understand their role in communication at the basic level.
Apply new French vocabulary through a variety of written and oral assignments at the basic level.
Demonstrate novice level proficiency in listening, reading, speaking and writing in French and the ability to function effectively in French in a variety of real-life situations.
Apply appropriate grammatical structures.
Demonstrate an understanding of cultural elements and their role that influences the language and the culture of the French - speaking countries.

FRCH& 123 : French III
Credits 5
Quarter Offered Occasionally
Audio/oral approach, emphasizing speaking the language and incorporating short stories, comprehensive reviews and language drills. This class may include students from multiple sections. (Humanities, Elective)

Course Outcomes
Demonstrate an awareness of cultural elements and understand their role in communication at the basic level.
Apply new French vocabulary through a variety of written and oral assignments at the basic level.
Demonstrate novice level proficiency in listening, reading, speaking and writing in French and the ability to function effectively in French in a variety of real-life situations.
Apply appropriate grammatical structures.
Demonstrate an understanding of cultural elements and their role that influences the language and the culture of the French - speaking countries.

FRCH 104 : Beginning French Conversation I
Credits 1
Quarter Offered Occasionally
A mixture of grammar, culture, pronunciation, listening and speaking at a beginner level. For beginning and ongoing students of the French language. This class may include students from multiple sections. (Elective)

Course Outcomes
Write and speak French for a variety of purposes and audiences at a beginner level.
Listen actively and respond in French at a beginner level.
Discuss diverse societies and cultures.
FRCH 105: Beginning French Conversation II  
Credits 1  
Quarter Offered Occasionally  
A mixture of grammar, culture, pronunciation, listening and speaking at a beginner level. For beginning and ongoing students of the French language. A continuation from FRCH 104, FRCH 104, equivalent or instructor permission is recommended. This class may include students from multiple sections. (Elective)  
Course Outcomes  
- Write and speak French for a variety of purposes and audiences at a beginner level.  
- Listen actively and respond in French at a beginner level.  
- Discuss diverse societies and cultures.

FRCH 106: Beginning French Conversation III  
Credits 1  
Quarter Offered Occasionally  
A mixture of grammar, culture, pronunciation, listening and speaking at a beginner level. For beginning and ongoing students of the French language. A continuation from FRCH 105, FRCH 105, equivalent or instructor permission is recommended. (Elective)  
Course Outcomes  
- Write and speak French for a variety of purposes and audiences at a beginner level.  
- Listen actively and respond in French at a beginner level.  
- Discuss diverse societies and cultures.

FRCH 107: Intermediate French Conversation I  
Credits 1  
Quarter Offered Occasionally  
A mixture of grammar, culture, pronunciation, listening and speaking at an intermediate level. For intermediate and ongoing students of the French language. A continuation from FRCH 106, FRCH 106, equivalent or instructor permission is recommended. This class may include students from multiple sections. (Elective)  
Course Outcomes  
- Write and speak in French for a variety of purposes and audiences at an intermediate level.  
- Listen actively and respond in French at an intermediate level.  
- Discuss diverse societies and cultures.

FRCH 108: Intermediate French Conversation II  
Credits 1  
Quarter Offered Occasionally  
A mixture of grammar, culture, pronunciation, listening and speaking at an intermediate level. For intermediate and ongoing students of the French language. A continuation from FRCH 107, FRCH 107, equivalent or instructor permission is recommended. This class may include students from multiple sections. (Elective)  
Course Outcomes  
- Write and speak in French for a variety of purposes and audiences at an intermediate level.  
- Listen actively and respond in French at an intermediate level.  
- Discuss diverse societies and cultures.

FRCH 109: Intermediate French Conversation III  
Credits 1  
Quarter Offered Occasionally  
A mixture of grammar, culture, pronunciation, listening and speaking at an intermediate level. For intermediate and ongoing students of the French language. A continuation from FRCH 108, FRCH 108, equivalent or instructor permission is recommended. This class may include students from multiple sections. (Elective)  
Course Outcomes  
- Write and speak in French for a variety of purposes and audiences at an intermediate level.  
- Listen actively and respond in French at an intermediate level.  
- Discuss diverse societies and cultures.

FRCH 110: Advanced French Conversation I  
Credits 1  
Quarter Offered Fall
Continue your knowledge of the French language at an advanced level. Class is conducted completely in French. A continuation from FRCH 109, FRCH 109, equivalent or instructor permission is recommended. This class may include students from multiple sections. (Elective)

**Course Outcomes**
- Write and speak in French for a variety of purposes and audiences at an advanced level.
- Listen actively and respond in French at an advanced level.
- Discuss diverse societies and cultures.

**FRCH 111: Advanced French Conversation II**

**Credits** 1

**Quarter Offered** Winter

Continue your knowledge of the French language at an advanced level. Class is conducted completely in French. A continuation from FRCH 110, FRCH 110, equivalent or instructor permission is recommended. This class may include students from multiple sections. (Elective)

**Course Outcomes**
- Write and speak in French for a variety of purposes and audiences at an advanced level.
- Listen actively and respond in French at an advanced level.
- Discuss diverse societies and cultures.

**FRCH 112: Advanced French Conversation III**

**Credits** 1

**Quarter Offered** Spring

Continue your knowledge of the French language at an advanced level. Class is conducted completely in French. A continuation from FRCH 111, FRCH 111, equivalent or instructor permission is recommended. This class may include students from multiple sections. (Elective)

**Course Outcomes**
- Write and speak in French for a variety of purposes and audiences at an advanced level.
- Listen actively and respond in French at an advanced level.
- Discuss diverse societies and cultures.
General Studies (GS)

**GS 121 : Studium Generale**

**Credits** 1
-5

**Quarter Offered** Fall, Winter, Spring

Series of programs from the Humanities, Social Sciences, Natural Sciences, Vocations, and Global Issues. This class may be repeated up to six times for a total of thirty credits. Unless granted instructor permission, students taking this class for five credits will earn a decimal grade. This class may include students from multiple sections. (Elective)

**Course Outcomes**

- Students will reflect their learning through written responses.
- Written responses will demonstrate critical thinking across disciplines.
- Written responses will demonstrate analysis of the content and the presentation style/approach of lectures and performances.
- Written responses will demonstrate accurate use of grammar, punctuation, and other elements of Standard Written English.
- Written responses will show evidence of comprehension of the learning, including content and presentation/performance techniques.

**GS 185-187 : Student Leadership**

**Credits** 2

**Quarter Offered** Fall, Winter, Spring

Development of leadership skills and experiences through lecture, lab and group activities. Examines personal leadership styles, ethics, conflict resolution, communication and related topics. This class may include students from multiple sections. (Elective)

**Prerequisites**

Instructor permission

**Course Outcomes**

- Identify and develop leadership principles, including leadership styles, effective communication, parliamentary procedure, conflict resolution, problem solving, delegation, decision making and team work.
- Examine ethical practices as they relate to leadership.
- Develop interpersonal communication skills.
- Plan, implement and evaluate events and activities.
- Explore the purpose and process of selecting and setting goals.
- Explore and encourage critical thinking.
- Identify historical leaders and evaluate those leaders.
- Explore theories of leadership.
- Manage a budget.
Geography (GEOG/GEOG&)

GEOG& 200 : Human Geography
Credits 5
Quarter Offered Spring
Introduces concepts and techniques relating to the study of place and population, migration, economic, cultural and political organizations. This class may include students from multiple sections. (Social Sciences, Elective)
Prerequisites
Eligibility for ENGL& 101
Course Outcomes
- Interpret maps, graphs, and tables to analyze and interpret data.
- Demonstrate understanding of the basic themes of geographic inquiry.
- Demonstrate understanding of relationships between physical and human landscapes.
- Demonstrate understanding of human spatial patterns upon the landscape, and the processes that create them.

GEOG 120 : Introduction to Physical Geography
Credits 5
Quarter Offered Fall, Winter, Spring, Summer
Geodesy and mapping; introduction to atmospheric science, weather, climate, the oceans, hydrology, and the earth's heat budget. This class may include students from multiple sections. (Natural Sciences, Elective)
Prerequisites
Eligibility for both ENGL& 101 and MATH 90
Course Outcomes
- Describe and explain how solar energy and energy in the atmosphere effect the seasons, the atmosphere, and global temperatures.
- Describe and explain how atmospheric and oceanic circulations determine atmospheric moisture distributions and weather.
- Describe and explain the geology of our planet, and its effect on tectonics, earthquakes, and volcanism.
- Describe and explain the underlying physical processes for why the Earth looks the way it does, including erosion by wind, water, and mass movement.
- Describe and locate the major physical features of the Earth.
Geology (GEOL/GEOL&)

GEOL& 100: Survey of Earth Science
Credits 5
Quarter Offered Winter (even year)
A survey of Earth science including topics on rock and mineral characteristics, natural hazards, surface and groundwater environments, marine and continental environments, resources, land-forms, and global climate change. This class may include students from multiple sections. (Natural Sciences, Elective)
Prerequisites
Eligibility for both ENGL& 101 and MATH 90
Course Outcomes
- Describe and explain the scientific method and the basic terminology, principles, concepts, and theories of Earth science.
- Distinguish between the three major rock types and identify common rocks and minerals.
- Explain the theory of plate tectonics and outline the geological evidence supporting this theory.
- Describe the physical and geological processes that shape the Earth’s surface and identify common land forms created by these processes.
- Describe and explain the interactions between humanity, geology, and other Earth systems, with a focus on geological and physical hazards, including the consequences of global climate change.

GEOL& 101: Introduction to Physical Geology with Lab
Credits 5
Quarter Offered Spring (odd year)
Introduction to geology and survey of the processes that shape the surface of the earth, including water, wind, ice, and gravity. Topics covered include: plate tectonics, volcanism, earthquakes, the geologic time scale, and concepts of mineralogy and petrology. Lab included. Field trips may be required. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)
Prerequisites
Eligibility for both ENGL& 101 and MATH 90
Course Outcomes
- Describe and explain the scientific method and the basic terminology, principles, concepts, and theories of physical geology.
- Using laboratory procedures and field methods, distinguish between the three major rock types and identify common rocks and minerals.
- Identify and explain common land forms and the geological processes that led to their formation, including those found on the other planets and moons of our solar system.
- Explain the theory of plate tectonics and identify the three types of plate boundaries and the geological features that characterize each.
- Identify and explain the major eras of the geological time scale, including the major geological events and evolutionary developments that characterize these periods of geological time.

GEOL& 103: Historical Geology and the History of Life on Earth with Lab
Credits 5
Introduction to historical geology and paleontology. Studies the formation and development through time of the solid Earth, atmosphere, and biosphere. Covers past movements and locations of the continents and interpretation of past environments as recorded in rock and fossil records as well as the history of life and how living organisms evolved over geologic time from the first single-celled organisms through the first invertebrates, vertebrates and plants, to the dinosaurs, and on to the rise of the mammals and early hominids. Includes the chance to examine fossils of early life, various invertebrates, fish, other prehistoric animals, and ancient plants. Lab included. Field trips may be required. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)
Prerequisites
Eligibility for both ENGL& 101 and MATH 90
Course Outcomes
- Describe and explain the scientific method and the basic terminology, principles, concepts, and theories of geology, chemistry, and paleontology as they apply to the study of life on Earth and historical geology.
- Outline and explain the biological, chemical and physical evolution of our planet.
Explain the process of fossilization and successfully identify common fossils. Develop a scientific understanding of the methods used to find and reconstruct fossils of ancient life and their environments and of basic related scientific theories such as evolution. Identify and distinguish between the three major rock types (i.e. igneous, sedimentary and metamorphic) and explain their geologic distribution, origins, and significance for interpreting past environments. Explain and discuss the theory of plate tectonics and the past movements and locations of the continents and how these movements effected both the evolution and extinction of past life. Identify and explain the major eons, eras and periods of the geological time scale, including the major geological events and evolutionary developments that characterize each period of time.

**GEOL 124 : Earth Systems Science**

**Credits** 5

**Quarter Offered** Occasionally

Explores processes that form and shape the earth. These processes comprise a series of integrated systems that interact to produce the earth's continents, oceans, atmosphere, and life. Lab included. Field trips may be required. This class may include students from multiple sections. (Natural Sciences, Elective)

**Prerequisites**

Eligibility for both ENGL & 101 and MATH 90

**Course Outcomes**

- Using laboratory procedures and field methods, distinguish between the three major rock types and identify common rocks and minerals.
- Explain the theory of plate tectonics and identify the three types of plate boundaries and the geological features that characterize each.
- Describe the physical and geological processes that shape the Earth's surface and identify common land forms created by these processes.
- Describe and explain the interactions between humanity, geology, and other Earth systems, with a focus on geological and physical hazards, including the consequences of global climate change.
- Describe how geologists determine the relative and absolute age of rocks and fossils.
Health Education (H ED)

H ED 90 : HIV/AIDS Licensure 4 Hours

Credits 0
Selections from etiology and epidemiology of HIV; transmission and infection control; legal and ethical issues; psychosocial issues. This class may include students from multiple sections. Confirm requirement for licensing (H ED 90 4 hour or H ED 95 7 hour) at doh.wa.gov/licenses-permits-and-certificates/professions-new-renew-or-update

Course Outcomes
Outline the local, national, and global etiology and epidemiology of HIV/AIDS.
List 3 modes of transmission of HIV infection.
Compare and contrast infection control precautions: universal and standard precautions.
Apply the legal and ethical issues related to HIV/AIDS:
   a. Reporting infection to public health
   b. Confidentiality
   c. Discrimination
   d. Public endangerment
Illustrate the psychosocial issues of HIV/AIDS infection on:
   a. Patient and family
   b. Friends
   c. Caregivers
   d. Social Consciousness
Optional-recommended for pharmacy assistants:
   a. Differentiate between screening and confirmatory tests.
   b. List lab tests for monitoring safe and effective treatment.
   c. Compare and contrast different treatment regimens.
Occupational exposure (PEP)
Nonoccupational exposure (nPEP)
Antiretroviral treatment (ART)
Primary Prevention (PrEP)

H ED 95 : HIV/AIDS Licensure 7 Hours

Credits 0
Selections from etiology and epidemiology of HIV; transmission and infection control; testing and counseling; clinical manifestations and treatment; legal and ethical issues; psychosocial issues. This class may include students from multiple sections. Confirm requirement for licensing (H ED 90 4 hour or H ED 95 7 hour) at doh.wa.gov/licenses-permits-and-certificates/professions-new-renew-or-update

Course Outcomes
Outline the local, national, and global etiology and epidemiology of HIV/AIDS.
List 3 modes of transmission of HIV infection.
Compare and contrast infection control precautions, including universal and standard precautions.
Differentiate laboratory tests for the diagnosis and monitoring of HIV infection:
   a. Screening tests
   b. Confirmatory tests
c. Viral load
Compare and contrast different treatment regimens.

a. Occupational exposure (PEP)

b. Nonoccupational exposure (nPEP)

c. Antiretroviral treatment (ART)

d. Primary Prevention (PrEP)

Apply the legal and ethical issues related to HIV/AIDS:

a. Reporting infection to public health

b. Confidentiality

c. Discrimination

d. Public endangerment

Illustrate the psychosocial issues of HIV/AIDS infection on:

a. Patient and family

b. Friends

c. Caregivers

d. Social Consciousness

H ED 180: Introduction to Health

Credits 5

Quarter Offered Fall, Winter, Spring, Summer

Research and identify reliable sources of health information for personal and public health. Students assess their own health behaviors, and develop strategies for health behavior change, while deepening their understanding of mental health, stress management, sleep, nutrition basics, physical activity, drugs and alcohol, sexuality, environmental health, diseases and prevention. The course provides a basis for more advanced study in the Health Professions. This class may include students from multiple sections. (Elective)

Course Outcomes
Evaluate reliable sources of health information are for personal and public health issues.
Describe key factors in health behavior change, as well as general health topics including mental health, stress management, nutrition basics, physical activity, drugs and alcohol, sexuality, environmental health, diseases and prevention.
Develop, implement, and evaluate strategies to improve personal and public health.
Analyze current personal and public health challenges and trends facing society, including marginalized groups.

H ED 215: Sexual Health and Society

Credits 5

Quarter Offered Winter

Exploration of sexuality from scientific and humanistic perspectives. Surveys sex research, female, intersex, male, and transgender sexual and reproductive anatomy and physiology. Examines sexual response, evidence-based healthy communication within relationships, sexual behavior patterns, love, and sexual orientations. Analyzes historical and cultural variations in gender and sexuality. The course provides a basis for more advanced study in the Health Professions. Colisted with SOC 215. (Formerly H ED 210, Elective)

Course Outcomes
Analyze ways to practice sexual health and healthy communication in order to improve sexual and relational well-being through the exploration of research-based principles.
Demonstrate the knowledge of sexual anatomy and physiology of bodies and sexual responses of women, intersex people, men and individuals who transition.
Examine gender from the perspectives of health, psychology, history, culture, and society, and distinguish between sex, gender and sexual orientation as separate yet interconnected terms, discuss intersectionality, and implement ways to be better allies to people with minoritized gender and sexual identities.
Describe the psychological influences that impact the sexual decision-making process as well as health and risk behaviors of individuals.
Analyze health, historical, biological, social, psychological, and cultural contexts of diverse sexual practices in order to gain a better understanding of others’ consensual behaviors.

**H ED 216: Lifelong Sexual Health**

**Credits** 5  
**Quarter Offered** Spring

Examines sexual issues from scientific and humanistic perspectives. Surveys sexuality through the lifespan, sexual problems, sexual satisfaction, contraception, pregnancy and birth, sexuality and disability, sex and chronic illness, sexually transmitted infections, the commercialization of sex, sexual victimization, nonconsensual sexual behavior, and therapeutic techniques. The course provides a basis for more advanced study in the Health Professions. This class may include students from multiple sections. (Elective)

**Course Outcomes**

Upon successful completion students should be able to:

- Analyze historical, psychosocial, legal, and cultural factors impacting contraception use, abortion, pregnancy and the birthing process and discuss best practices to promote equity within healthcare systems.
- Compare and contrast diagnosis and treatment options for sexually transmitted infections and ways to outreach to diverse community members about STI prevention and intervention utilizing health psychology and community-based educational techniques, as well as considering ways to discuss sexual health with partners and healthcare providers.
- Examine, from an intersectional lens, a variety of clinical and professional topics including: the impact of sexual victimization on individuals, how chronic illnesses and disabilities may interact with sexuality, how sexual problems might occur, distinguishing between sexual disorders in the DSM-V (coercive, paraphilic) and functional sexual behaviors (consensual, less common), and trauma-informed clinical practice, community support, and clinical treatment options.
- Differentiate between human trafficking and the many variations of sex work within the United States and globally and analyze the impact of media (sexually explicit, as well as broad forms of media) on sexual knowledge and behavior.
History (HIST/HIST&)

HIST& 126 : World Civilizations I
Credits  5
Quarter Offered  Fall
Historical comparative study of the world's major civilizations (African, Asian, Middle East, European, and American) from prehistory to ca.1200 CE. There will be an emphasis on material existence and understanding value systems. We will delve into how these are expressed in different political, social, economic, cultural, and religious systems as well as in literature and art. This class may include students from multiple sections. (Social Sciences, Elective)
Course Outcomes
  Demonstrate a “historical mindedness”—understanding the historical context of ideas, events, and issues.
  Demonstrate a sense of regionalism that incorporates geography, economics, politics, and culture.
  Demonstrate the contributions and world view of diverse populations of the region.
  Distinguish major themes from a regional perspective and from a national perspective.
  Demonstrate mastery of significant events, people, and ideas that shaped the region from the beginnings of human settlement.
  Analyze and synthesize critical primary and secondary source materials.
  Organize thoughts and communicate them clearly and concisely in written form and in oral discussions.

HIST& 127 : World Civilizations II
Credits  5
Quarter Offered  Winter
Comparative study of the world's major civilizations (African, Asian, Middle East, European, and American) from roughly 1200 CE to 1815. There will be an emphasis on material existence and understanding value systems. We will delve into how these are expressed in different political, social, economic, cultural and religious systems as well as in literature and art. This class may include students from multiple sections. (Social Sciences, Elective)
Course Outcomes
  Demonstrate a “historical mindedness”—understanding the historical context of ideas, events, and issues.
  Demonstrate a sense of regionalism that incorporates geography, economics, politics, and culture.
  Demonstrate the contributions and world view of diverse populations of the region.
  Distinguish major themes from a regional perspective and from a national perspective.
  Demonstrate mastery of significant events, people, and ideas that shaped the region from the beginnings of human settlement.
  Analyze and synthesize critical primary and secondary source materials.
  Organize thoughts and communicate them clearly and concisely in written form and in oral discussions.

HIST& 128 : World Civilizations III
Credits  5
Quarter Offered  Spring
Comparative historical study of the world's major civilizations (African, Asian, Middle East, European, and American) from the beginning of industrialization to today’s global world. There will be an emphasis on material existence and understanding value systems. We will delve into how these are expressed in different political, social, economic, cultural, and religious systems as well as in literature and art. This class may include students from multiple sections. (Social Sciences, Elective)
Course Outcomes
  Demonstrate a “historical mindedness”—understanding the historical context of ideas, events, and issues.
  Demonstrate a sense of regionalism that incorporates geography, economics, politics, and culture.
  Demonstrate the contributions and world view of diverse populations of the region.
  Distinguish major themes from a regional perspective and from a national perspective.
  Demonstrate mastery of significant events, people, and ideas that shaped the region from the beginnings of human settlement.
  Analyze and synthesize critical primary and secondary source materials.
  Organize thoughts and communicate them clearly and concisely in written form and in oral discussions.

HIST& 146 : U.S. History I
Credits  5
Quarter Offered  Fall, Winter, Summer
United States development from European settlements clinging tenuously on the Atlantic coast, or wayward outposts in the Southeast and Southwest, to a large, relatively unified nation between two oceans. We will examine the people of North America, Europe and Africa before colonialism and then address the social, cultural, economic and geographical determinants for colonization. We will explore how colonists began to see themselves separate from the mother country and how this resulted in revolution and a new nation. This class may include students from multiple sections. (Social Sciences, Elective)

Prerequisites
Eligibility for or completion of ENGL & 101

Course Outcomes
- Demonstrate a "historical mindedness"- understanding the historical context of ideas, events, and issues.
- Identify and recognize events that are uniquely American.
- Place American history within the larger context of World and Regional history.
- Critically and aesthetically evaluate the development of a uniquely American culture.
- The student will develop written communication skills, and the ability to express opinions via discussions and short papers.
- The student will develop specific critical thinking skills: to consider multiple perspectives and values, to synthesize and integrate information and ideas, to separate opinion from factual information, and to recognize the patterns in which historical information is organized.
- Last, the student as a more informed citizen will be better prepared to act in accordance with his or her own beliefs.

HIST& 147 : U.S. History II
Credits 5
Quarter Offered  Winter, Spring
United States evolvement after the early years of nation building. The course will begin at the end of the Jacksonian Reform era, and end with the period of overseas expansion as the United States become a Great Power nation. This course will examine a number of crisis or issues of change, including civil war, western expansion, industrialization, immigration and urbanization. The student will learn how the people of the United States responded to crisis periods through reform movements such as Populism, unionization, Progressivism and imperialism. This class may include students from multiple sections. (Social Sciences, Elective)

Prerequisites
Eligibility for or completion of ENGL & 101

Course Outcomes
- Demonstrate a “historical mindedness”-- understanding the historical context of ideas, events, and issues.
- Demonstrate a sense of regionalism that incorporates geography, economics, politics, and culture.
- Identify the contributions and world view of diverse populations of the region.
- Distinguish major themes from a regional perspective and from a national perspective.
- Demonstrate mastery of significant events, people, and ideas that shaped the region from the beginnings of human settlement.
- Analyze and synthesize critical primary and secondary source materials.
- Organize thoughts and communicate them clearly and concisely in written form and in oral discussions.

HIST& 148 : U.S. History III
Credits 5
Quarter Offered  Fall, Spring, Summer
The third part of the History of the United States examines the 20th century starting with World War I. In this period attention directed toward the development of the United States as a modern nation-state. We will cover the process industrialization, urbanization, and immigration that shaped the contours of the country right into the 21st century. Other topics of interest in the larger processes will be the Great Depression, Imperialism, World War I and II, the Cold War, environmentalism, nuclear war and terrorism. The course will end as the United States enters the post-Cold War era. This class may include students from multiple sections. (Social Sciences, Elective)

Prerequisites
Eligibility for or completion of ENGL & 101

Course Outcomes
- Demonstrate a “historical mindedness”-- understanding the historical context of ideas, events, and issues.
- Develop a sense of regionalism that incorporates geography, economics, politics, and culture.
- Appreciate the contributions and world view of diverse populations of the region.
Distinguish major themes from a regional perspective and from a national perspective.
Demonstrate mastery of significant events, people, and ideas that shaped the region from the beginnings of human settlement.
Analyze and synthesize critical primary and secondary source materials.
Organize thoughts and communicate them clearly and concisely in written form and in oral discussions.

**HIST & 214 : Pacific Northwest History**

**Credits** 5

**Quarter Offered** Winter

With emphasis on the states of Washington, Oregon, and Idaho, Pacific Northwest (PNW) history proceeds through five main periods: indigenous peoples before European arrival, European arrival and exploration, European colonialism, industrial and urban development and immigration, and regional autonomy for the PNW, and considers various marginalized groups in society, including Native Americans, African Americans, and Asian Americans. Within these different historical periods, the course also examines social difference (e.g., ethnicity, race, and gender), economic and political organization, and cultural values. **ENGL & 101** is strongly recommended. This class may include students from multiple sections. (Social Sciences, Elective)

**Course Outcomes**

- Demonstrate a “historical mindedness” -- understanding the historical context of ideas, events, and issues.
- Develop a sense of regionalism that incorporates geography, economics, politics, and culture.
- Demonstrate the contributions and world view of diverse populations of the region.
- Distinguish major themes from a regional perspective and from a national perspective.
- Demonstrate mastery of significant events, people, and ideas that shaped the region from the beginnings of human settlement.
- Analyze and synthesize critical primary and secondary source materials.
- Organize thoughts and communicate them clearly and concisely in written form and in oral discussions.

**HIST 216 : Pacific Northwest Environmental History**

**Credits** 5

**Quarter Offered** Spring

This course will examine the environmental history of the Greater Pacific Northwest; the geographic area defined by the Columbia River watershed, including the coastal areas of present-day Oregon, extending north through the Salish Sea including into Canada. Topics covered will include natural history of the Pacific Northwest, the experience of native indigenous people as past, present, and on-going stewards of the land, the historical dynamic of the PNW as a meeting point of multiple cultures, and how historical cultural, social and economic values influence interaction with the environment as a set of changing relationships over time. It will also ask the class as a community and as individuals to reflect on how we understand and value our environment, how we interact with people and place, and how we engage with the past. This class may include students from multiple sections. (Social Sciences, Elective)

**Course Outcomes**

- Reflect on the presence of indigenous views and perspectives including but not limited to relationality, reciprocity, land-based pedagogies, sovereignty, and belonging.
- Compare and contrast conventional (western) historical methodologies such as economic, political, social, cultural and military histories with indigenous epistemologies.
- Participate in a classroom community based on shared classroom agreements that include equity, respect and inclusion.
- Analyze and synthesize varied forms of primary and secondary “text” that include traditional text, written sources such as poetry, narratives, fiction, memoir, government documents, archival photographs, material historical sources, video, music, dance, and ceremony.
- Apply local relationships of place to the broader context of historical research and to larger trends in regional, national and international history.
- Examine personal attitudes, values, and choices in order to encourage self-reflection on one’s own history and story through memories, emotions, and personal experiences grounded in nature and place.

**HIST 217 : History of American Indian Education**

**Credits** 5

**Quarter Offered** Spring

Students in this course will self-reflect on their own learning in relationship to indigenous pedagogies and explore if indigenous informed educational philosophies can represent a practice of healing. This course will
examine The Assimilation Era, 1870s to 1970s, when governmental educational institutions were employed to disrupt and disappear the complex educational systems practiced by native people since time immemorial. The common practices of pre-colonial indigenous pedagogies will be illuminated and engaged to critically explore the colonizing pedagogy forced on students in government-sanctioned schools. Indigenous pedagogies have proven so resilient that they help to illustrate how indigenous people have continually renewed and revived their cultures through education despite the ongoing oppression of colonization. This class may include students from multiple sections. (Formerly HIST 215, Social Sciences, Elective)

Course Outcomes

Create a working definition of indigenous pedagogy, and employ that definition to reflect on different eras of American Indian education from pre-colonial times, through to contemporary efforts at healing and renewal.

Demonstrate understanding of terminology key to Integrated Indigenous Studies that includes but is not limited to, the following—indigenous, pedagogy, culture, cultural genocide, historical trauma, sovereignty, self-determination, Colonization/Decolonization, and Treaties.

Participate in the co-creation of the classroom community.

Recognize the importance of varied forms of “text” that include traditional text, written sources such as poetry, narratives, fiction, memoir, government documents, archival photographs, material historical sources, video, music, dance, and ceremony.

Apply local relationships of place to the broader context of historical research.

Use the tools of indigenous and historical research to demonstrate methods of attribution and citation in a way that properly respects the people being researched.

Apply self-assessment to evaluate their own learning.
Emergency Management (EM)

**EM 102 : Introduction to Emergency Management**

**Credits** 5  
**Quarter Offered** Fall, Winter, Spring, Summer  
Provides a broad overview for exploring a career in emergency management (EM). Students will learn what an emergency management professional does, what an emergency management program consists of, and how that can be applied to a variety of organizations. This class may include students from multiple sections. (Formerly HSEM 102)

**Course Outcomes**
- Define essential elements of an effective emergency management program.
- Define the many roles, responsibilities and functions of the professional emergency manager in addressing holistic community needs.
- Describe the actions taken in hazard identification and components of an emergency plan and principles that guide the planning process.
- Examine the actions taken when planning for incident prevention and hazard mitigation in the context of population, infrastructure and equity.
- Describe basic components of mutual aid systems.
- Analyze compliance requirements for emergency communications and warnings.

**EM 105 : Introduction to Tribal Emergency Management**

**Credits** 5  
**Quarter Offered** Fall, Spring  
This course provides the groundwork on which Tribal Emergency Management can build a strong foundation of preparedness, response, recovery and mitigation for their communities. This class may include students from multiple sections. (Formerly HSEM 105)

**Course Outcomes**
- Identify the essential elements of an effective Tribal Emergency Management program.
- Identify the various roles and responsibilities of Emergency Management Professionals.
- Describe the laws and policies that effectuate Tribal Emergency Management.
- Describe Hazard Mitigation requirements and techniques.
- Describe the Disaster Declaration Process as applicable to federally recognized Native American Tribes.

**EM 110 : Incident Command System (ICS)**

**Credits** 2  
**Quarter Offered** Fall, Winter, Spring, Summer  
This course describes the history, features, principles, and organization structure of the Incident Command System (ICS). It also explains the relationship between ICS and the National Incident Management System (NIMS). (Course will meet ICS 100/200 requirements). This class may include students from multiple sections. (Formerly HSEM 110)

**Course Outcomes**
- Analyze the National Incident Management System (NIMS) and its application to coordinating and integrating a response to domestic incidents.
- Identify five major management functions.
- Explain the roles and responsibilities of the Incident Commander and Command Staff.
- Determine when it is appropriate to institute a Unified or Area Command.
- Describe the Public Information Systems required by NIMS.
- Evaluate ways in which NIMS can affect how jurisdictions prepare for incidents and events.
- Describe how NIMS affects the way resources are managed.
- Describe the advantages of common communication and information management standards.
- Explain how NIMS will influence technology and technological systems required for emergency response.
- Identify the structure, roles, and purpose of the ICS as it is applied to emergency operations.
- Analyze the National Incident Management System (NIMS) and its application to coordinating and integrating response to domestic incidents.
- Apply Incident Command System principles to solve disaster response problems.
EM 111: Tribal Incident Management Systems
Credits 2
Quarter Offered Fall
This course describes the history, features, principles, and incident organization structures used in Indian Country. Explains how those structures can effectively interface with the Incident Command System and National Incident Management System. This class may include students from multiple sections. (Formerly HSEM 111)
Course Outcomes
- Analyze the National Incident Management System (NIMS) and its application to coordinated response.
- Identify commonly utilized Incident Management Structures in Indian Country.
- Describe the various roles and responsibilities of an Incident Commander and Command Staff.
- Describe challenges associated with Incident Management Structures between tribal and non-tribal boundaries.

EM 120: All Hazards Emergency Planning
Credits 3
Quarter Offered Fall, Spring
Introduction to fundamental concepts, systems, and processes that guide and support effective emergency management planning, including the history and rationale behind planning. This class may include students from multiple sections. (Formerly HSEM 120)
Prerequisites
2.0 or higher in EM 102 or instructor permission
Course Outcomes
- Describe the historical basis of and rationale behind the modern emergency management planning processes and requirements.
- Demonstrate how emergency planning is integrated throughout all aspects of the practice of emergency management.
- Describe how the elements of risk analysis (i.e., frequency and consequence of hazards) inform and guide the creation of emergency management plans.
- Explain why centering emergency planning on the concept of "planning with the whole community" creates better plans.
- Apply the guiding principles, regulatory requirements, and standardized process of emergency planning to produce the components of an emergency management plan.

EM 121: Planning for Tribal Emergency Management
Credits 3
Quarter Offered Winter
Introduction to fundamental concepts, systems, and processes that guide and support effective emergency management planning in Indian Country, including the history and rationale behind planning. This class may include students from multiple sections. (Formerly HSEM 121)
Prerequisites
EM 102 or EM 105 or instructor permission
Course Outcomes
- Define the role of plans and planning within the emergency management profession, and the concepts and principles that guide the planning process.
- Identify federal policies, plans, and processes that influence tribal emergency management and planning, including the historical/political relationships between government and tribal communities.
- Outline the purpose and primary components of foundational emergency management plans that are important in tribal emergency management programs (mitigation, COOP/COG, response, and recovery).
- Describe the special considerations including vulnerable populations and community values that must be incorporated in plan development.

EM 130: Technology and Emergency Management
Credits 3
Quarter Offered Winter, Summer
This class provides a detailed overview of the application of technology in emergency management. Students will learn how to effectively use technology in all phases of disaster. This class may include students from multiple sections. (Formerly HSEM 130)
Prerequisites
2.0 or higher or concurrent enrollment in EM 102 or EM 105

Course Outcomes
- Compare the range of technologies available for emergency management use.
- Research the potential impact of new technologies on emergency management.
- Use current technology and data to complete a project.
- Identify legal, ethical, and social elements in the deployment of technology.
- Demonstrate a working level knowledge of developments in technology.

EM 157: Public Information
Credits 2
Quarter Offered Fall, Winter, Spring
This course will prepare students to support emergency management public information operations, ensuring appropriate messaging for the whole community. This class may include students from multiple sections. (Formerly HSEM 157)

Course Outcomes
- List and describe characteristics and responsibilities that make an effective public information officer.
- Describe guidelines for department policies, which guide public information functions.
- Describe purpose, elements, and roles in a joint information system/joint information system.
- Describe various types of alert and warning systems.
- Identify access and functional needs that must be addressed in public messaging.
- Create messages that are appropriate for specific audiences and platforms.

EM 160: Emergency Response Awareness to Terrorism
Credits 5
Quarter Offered Fall, Spring
Provides current and relevant information about terrorism, terrorist behavior, homeland security policies and dilemmas, and how to deal effectively with threats and the consequences of attacks. This class may include students from multiple sections. (Formerly HSEM 160)

Prerequisites
2.0 or higher in EM 102 or EM 105

Course Outcomes
- Identify the characteristics, threats, and risks associated with terrorism.
- Examine the evolution and causes of terrorism around the world.
- Explore federal, state, local and private sector procedures in preparedness measures, response, relief, and recovery.
- Compare and contrast terrorist behavior with criminal activity.
- Examine the positive and negative features of modern news coverage of terrorism.
- Evaluate measures for preventing terrorist attacks.

EM 180: Public Administration
Credits 3
Quarter Offered Winter, Summer
This course provides an overview of the structure and issues of public service. Course participants will examine the context of public administration: the political system, the role of federalism, bureaucratic politics and power, and the various theories of administration that guide public managers today. This class may include students from multiple sections. (Formerly HSEM 180)

Course Outcomes
- Explore the context, nature and structure of public administration in America.
- Compare and contrast the political, legal and social environment of public administration.
- Discuss the nature of the decision-making process in public administration.
- Explain the budget process and planning.
- Discuss the impact and influence of government regulation and administrative law over public affairs.

EM 190: Emergency Management Special Topics
Credits 3
Quarter Offered Fall, Summer
Special topics will be developed for areas outside the usual course offerings in Emergency Management. Topics developed will focus on a specific current issue or concept in the area of emergency management. This class may include students from multiple sections. (Formerly HSEM 190)

**Prerequisites**
2.0 or higher in **EM 102** or **EM 105** and **EM 110** or **EM 111** or instructor permission

**Course Outcomes**
- Research issues related to the course topic.
- Apply course learning to solve a problem related to the course topic.
- Compare and contrast the course topic with existing knowledge and experience in emergency management.
- Evaluate the impact of the course topic on emergency management.

**EM 200: Emergency Operations Center**

**Credits** 2

**Quarter Offered** Fall, Spring

This course provides the student with skills and knowledge to manage an Emergency Operations Center (EOC), acquire and control resources, and interface with on-scene responders within Incident Management Systems. This class may include students from multiple sections. (Formerly HSEM 200)

**Prerequisites**
2.0 or higher or concurrent enrollment in **EM 102** or **EM 105**

**Course Outcomes**
- Introduction to Emergency Operations Center (EOC).
- Functions of the Emergency Operations Center.
- Jurisdictional Setting of the Emergency Operations Center.
- Staffing and Operating the Emergency Operations Center.
- Designing an Emergency Operations Center.
- Incident Management Systems.
- Public Information Officer (PIO) Operations/Information Management.

**EM 205: Cultural Heritage Preservation and Traditional Knowledge**

**Credits** 4

**Quarter Offered** Spring

This course will explore the importance of protecting, preserving, and restoring both tangible and intangible cultural heritage in the face of disasters and emergencies and how traditional knowledge can be applied to disaster planning. This class may include students from multiple sections. (Formerly HSEM 205)

**Course Outcomes**
- Define cultural heritage and native lifeways.
- Research the role of cultural heritage protection in community recovery.
- Differentiate between tangible and intangible cultural heritage collections.
- Evaluate methods to prepare for, mitigate against, respond to, and recover from disaster using traditional knowledge.
- Research local and non-local sources for additional information relevant to cultural heritage disaster planning.

**EM 210: Exercise Design and Evaluation**

**Credits** 3

**Quarter Offered** Winter

This course provides participants with the knowledge and skills to develop, conduct, evaluate and report effective exercises that test a community's operations plan and operational response capability. Throughout the course, participants will learn about topics including exercise program management, design and development, evaluation, and improvement planning. It also builds a foundation for subsequent exercise courses, which provide the specifics of the Homeland Security Exercise and Evaluation Program (HSEEP) and the National Standard Exercise Curriculum (NSEC). This class may include students from multiple sections. (Formerly HSEM 210)

**Prerequisites**
2.0 or higher in **EM 102** or **EM 105**

**Course Outcomes**
- Describe the exercise design process.
Identify hazards that affect a community or organization.
Develop a purpose statement for an exercise.
Develop objectives for an exercise.
Design a discussion based exercise.
Develop exercise evaluation support material.

EM 215 : Tribal Emergency Management - Grants
Credits  4
Quarter Offered  Winter
This course will explore the importance and role of grants in Tribal Emergency Management. Students will research various emergency management grants (federal, tribal, state, and local) and their potential impacts on communities predominately populated by indigenous peoples. This class may include students from multiple sections. (Formerly HSEM 215)
Course Outcomes
Research how grants contribute to effective Tribal Emergency Management.
Identify emergency management grants available to indigenous peoples and their non-tribal emergency management partners.
Describe the grant application process and requirements for a successful grant application.
Describe a successful grant management process.
Identify and evaluate the effectiveness of a grant-funded project.
Articulate the need for sustainable grant funding for Tribal Emergency Management.

EM 220 : Developing and Managing Volunteer Resources
Credits  2
Quarter Offered  Fall, Spring
This course will focus on methods and procedures for involving volunteers in emergency management programs, with the goal of maximizing the effectiveness of volunteer resources. This class may include students from multiple sections. (Formerly HSEM 220)
Prerequisites
2.0 or higher in EM 102 or EM 105
Course Outcomes
Correlate the skills and knowledge required of volunteers in emergency management programs.
Determine how volunteers can be used more beneficially to meet an agency’s needs.
Analyze the steps in developing a volunteer program.
Develop a volunteer policy and job description.
Outline strategies for recruiting, retaining, assigning, training, supervising, and evaluating volunteers.
Analyze the role of volunteers and voluntary agencies in providing emergency assistance.
Describe methods that will ensure cultural humility and equity in managing volunteers in a diverse community.

EM 230 : Disaster Recovery
Credits  2
Quarter Offered  Winter, Summer
The purpose of this course is to enable students to understand and think critically about disaster recovery operations in the profession of emergency management. Students will utilize problem-based learning by analyzing actual disaster events and applying the theories, principals, and practice of disaster recovery. In addition, students will learn about the issues faced by the whole community and how to address access and functional needs in disaster recovery. This class may include students from multiple sections. (Formerly HSEM 230)
Prerequisites
2.0 or higher in EM 102 or EM 105 and EM 120 or EM 121
Course Outcomes
Examine what occurs during a disaster and the impact it has on people, property and the environment.
Differentiate between the responsibilities of the local government after a disaster versus those of the state and federal government.
Analyze human responses to disasters.
Examine the process through which public and individual assistance may be obtained.
Describe special issues during recovery.
Apply principles and practices of disaster recovery in case studies.

**EM 240: Emergency Management Work-Based Learning**
- **Credits**: 4
- **Quarter Offered**: Fall, Spring

Provides students practical experience in emergency management. Students learn to work within time constraints and are exposed to appropriate workplace behaviors, while applying core skills they have learned in the program. This class may include students from multiple sections. (Formerly HSEM 240)

**Prerequisites**
- 2.0 or higher in **EM 249** and instructor permission

**Course Outcomes**
- Obtain emergency management work experience through paid employment or volunteering.
- Set workplace learning objectives.
- Meet workplace learning objectives.

**EM 249: Professional Development 1**
- **Credits**: 2
- **Quarter Offered**: Fall, Spring

This course prepares the student for the Emergency Management AAS-T Work-based Learning experience. Students will learn how to search for jobs and internships, prepare resumes and job applications, prepare for job and internship interviews, and create an appropriate professional portfolio. Course should be taken 2 terms prior to **EM 240**. This class may include students from multiple sections. (Formerly HSEM 249)

**Prerequisites**
- 48 credits of EM courses

**Course Outcomes**
- Develop a Professional Portfolio exhibiting professional development efforts, progress, and achievements.
- Develop model resumes, applications, cover letters, and references for appropriate level work positions.
- Demonstrate the ability to identify job openings appropriate to the student’s knowledge, skills, and abilities.
- Prepare answers to routine emergency management related interview questions.
- Demonstrate understanding of the work based learning experience by identifying potential WBL sites.

**EM 250: Homeland Security Law and Policy**
- **Credits**: 4
- **Quarter Offered**: Winter, Summer

This course is designed to give the student an overview of various statutes, regulations, constitutional law, and common law associated with Homeland Security Emergency Management. Students will be introduced to the legalities and ethics relevant to organizing for counterterrorism, investigating terrorism and other national security threats, crisis and consequence management. This class may include students from multiple sections. (Formerly HSEM 250)

**Prerequisites**
- 2.0 or higher in **EM 102** or **EM 105**

**Course Outcomes**
- Compare and contrast an effective policy with a poor policy.
- Discuss ethical, legal, and social issues in Homeland Security.
- Examine local, state, and federal dynamics involved with the introduction and implementation of new laws and regulations.
- Explain laws and legal issues related to a disaster risk problem.
- Describe important statutes and policies enacted post 9-11 and their impact on emergency management.

**EM 260: Introduction to Healthcare Emergency Management**
- **Credits**: 5
- **Quarter Offered**: Spring

Provides the groundwork on which students can build a strong foundation for healthcare related disaster and emergency management. Addresses issues, policies, questions, best practices, and lessons learned through recent years; standards on healthcare emergency management and business continuity, and exposure to new and developing theories, practices, and technology in healthcare emergency management. This class may include students from multiple sections. (Formerly HSEM 260)

**Prerequisites**
2.0 or higher in [EM 102](#) or [EM 105](#)

**Course Outcomes**

Honors (HONOR)

HONOR 160 : Introduction to Honors Projects
Credits 2
Quarter Offered Spring
Students are introduced to faculty directed projects from a variety of academic fields. Student will use one of these projects, or identify a self-directed project, to complete the project component of the honors program. Acceptance into the Honors Program is required. This class may include students from multiple sections.
Course Outcomes
Students will be able to describe how knowledge is created and conveyed in humanities, mathematics, natural sciences and social sciences.
Students will use integrative knowledge to explain the meaning and importance of project work in humanities, mathematics, natural sciences and social sciences.
Students will identify a project topic and present a project abstract.

HONOR 220 : Second Year Interdisciplinary Projects Seminar I
Credits 1
Quarter Offered Fall
In these two hour bi-weekly seminars students will make brief presentations on the nature objective and probing the nature of their individual projects and provide status updates. Students will contribute to the process of project development by evaluating the methods used to achieve a project’s objective and probing the nature and outcomes of the project using an integrative knowledge approach to critical inquiry. Acceptance into the Honors Program is required. This class may include students from multiple sections.
Course Outcomes
Students will present the objectives of their project and the method(s) used to achieve those objectives.
Students will use an integrative knowledge approach to engage in critical inquiry. The goal is to provide feedback useful for project development.

HONOR 221 : Second Year Interdisciplinary Project Seminar II
Credits 1
Quarter Offered Winter
In these two hour bi-weekly seminars students will make brief presentations on the nature of their individual projects and provide status updates. Students will contribute to the process of project development by evaluating the methods used to achieve a project’s objective and probing the nature and outcomes of the project using an integrative knowledge approach to critical inquiry. Acceptance into the Honors Program is required. This class may include students from multiple sections.
Course Outcomes
Students will present the objectives of their project and the method(s) used to achieve those objectives.
Students will use an integrative knowledge approach to engage in critical inquiry. The goal is to provide feedback useful for project development.

HONOR 250 : Honors Capstone Projects
Credits 2
Quarter Offered Spring
Students complete all aspects of their individual project, including background research activities, submission of a final product and its public dissemination; a critical examination of the project using integrative knowledge; and lastly, a self-reflective video on the project’s value to their undergraduate experience. Students must receive a passing grade on their project to successfully complete the course. Acceptance into the Honors Program is required. This class may include students from multiple sections.
Course Outcomes
Students will use integrative knowledge to assess project work of others in humanities, natural sciences and social sciences.
Students demonstrate ability to design, complete, and present an honors project.
Students will use integrative knowledge to assess their own project and to reflect upon the project’s value to their undergraduate experience.
HONOR 290: Honors Project

Credits 1

Quarter Offered Fall, Winter

This course is for students completing the projects requirement of the Honors Program degree. Faculty permission for students in the Honors Program. This class may be repeated up to 8 times for a total of 8 credits. This class may include students from multiple sections.

Course Outcomes

Students will achieve their individual capstone project goals.
Hospitality and Ecotourism (HOSP)

HOSP 100 : Introduction to Hospitality
Credits  5
Quarter Offered  Fall
Explore the hospitality and tourism industry including lodging, restaurants, managed services, recreation, theme parks, clubs, and gaming entertainment; and assemblies. Learn universal service standards, customer service for guests and key elements of professional service delivery. This class may include students from multiple sections.

Course Outcomes
- Describe the interrelated nature of hospitality and tourism and the characteristics of the hospitality industry.
- Implement universal service standards.
- Discuss success in service and describe appraise approaches to successful service.
- Draw organizational charts for various divisions of a hotel.
- Identify key areas and tasks for front and back of the house operations.
- Summarize the skills required for concierge services.
- Discuss the structure of management and operations for theme parks, attractions, cruises and clubs.
- Describe different positions within and various activities related to the gaming entertainment.

HOSP 110 : Leadership & Management for Hospitality
Credits  5
Quarter Offered  Winter, Summer
This class offers a comprehensive foundation of hospitality management, the world’s largest industry. Explore the role of strategy in creating firm value and growth and stresses the relationship between leadership theory, strategic thinking and financial management for hospitality and tourism. Students will discuss structure and implementation, performance and environmental scanning. This class may include students from multiple sections.

Course Outcomes
- Describe the concept of strategic management as applied to the hospitality industry.
- Discuss leadership strategies, visioning processes and the implications for leading change.
- Manage, motivate and cross train teams and individual staff.
- Formulate a performance standard system.
- Recognize and practice cultural diversity in hiring and leading.
- Utilize effective conflict resolution methods for a given problem.

HOSP 120 : Ecotourism
Credits  5
Quarter Offered  Winter
Overview of the socio-cultural, ecological, economic and community impacts of ecotourism. Explore ecoguide certification and sustainable dimensions of ecotourism from the perspective of conservation. Students will examine ecotourism governance and policy and create an ecotourism program plan. This class may include students from multiple sections.

Course Outcomes
- Describe the socio-cultural, ecological, economic and community impacts of Ecotourism on public and protected areas.
- Compare and contrast Ecotourism with conventional tourism.
- Identify core indicators of sustainable tourism such as site protection, social impact, critical ecosystems and local economy.
- Discuss the nature-based foundation of Ecotourism as an alternative to conventional mass tourism.
- Apply strategies for sustainable Ecotourism in the development of an Ecotourism program plan.

HOSP 130 : Hospitality and Tourism Marketing
Credits  5
Quarter Offered  Spring
Learn an integrative approach to hospitality sales from a team perspective. Analyze consumer behavior, promotion and sales for the hospitality and tourism industry. Develop a hospitality focused marketing distribution channel and promotional plan. This class may include students from multiple sections.

**Course Outcomes**
- Describe the role of marketing strategic planning for the hospitality industry.
- Analyze consumer markets and buying behavior for the tourism industry.
- Discuss information distribution and the impact of social media and globalization on the hospitality industry.
- Explain how changes in the demographic and economic environments affect marketing.
- Examine the hospitality and tourism marketing mix.
- Explain internal marketing.

**HOSP 140 : Food and Beverage Management**
**Credits** 2
**Quarter Offered** Spring
Learn dining room management including operations, budget, cost control, inventory, staffing, layout, and styles of service. This class may include students from multiple sections.

**Course Outcomes**
- Explain the importance of effective communication skills in restaurant and food service management.
- Describe dining room service operations.
- Apply strategies for food service team growth and development.
- Monitor inventory and cost control.
- Develop a food service budget.
- Explain basic procedures to plan dining room layouts that promote employee productivity and guest experience.

**HOSP 150 : Sustainable Tourism Policy and Planning**
**Credits** 3
**Quarter Offered** Spring
Overview of sustainable tourism policy and planning. Students will learn key concepts of tourism and the leisure industry including the development of tourism, tourism supply and demand, transport, accommodation, governance and sustainability in the tourism industry. Explore the future of regional, global, and heritage tourism. This class may include students from multiple sections.

**Course Outcomes**
- Discuss the importance of tourism at a global scale and reasons for its growth.
- Distinguish between regional, global and heritage tourism.
- Describe the many drivers of change in the tourism sector over the next decade.
- Identify trends in consumer behavior related to the tourism industry such as travel-based learning and ecotourism.
- Analyze the interconnections between different elements of tourism including accommodation, transport, attractions and tourism services.
- Compare and contrast the significance of small and large businesses in the tourism sector.
- Develop a plan for managing the impact of tourism on communities and the environment.

**HOSP 215 : Adventure Travel Leadership and Guiding**
**Credits** 5
**Quarter Offered** Spring
This course will provide an overview of customer service, content delivery, and sustainability for adventure travel leadership and guiding. This course will provide a foundation for those interested in pursuing a career in Adventure Travel, as well as connecting existing professionals to international standards. This course will also examine issues and trends in the adventure travel industry and specifically those affecting guides, tour leaders, and instructors. This class may include students from multiple sections.

**Course Outcomes**
- Describe the key principles of adventure travel guiding.
- Analyze the global adventure travel industry.
- Apply interpretive guiding principles and practices.
- Explain principles in sustainability for the adventure travel guide.
- Evaluate customer service skills for the adventure travel guide.
Apply the core concepts of risk management and assessment to the role of guide.
Develop and present a plan for creating and delivering a guide experience.

HOSP 220 : Technology in the Hospitality Industry
Credits  5
Quarter Offered  Fall
Learn the basics of purchasing, implementing, maintaining, and effectively managing a variety of technology systems such as reservations systems, room management, guest accounting, property management, catering software, point-of-sale, food and beverage management, and security maintenance for technology. This class may include students from multiple sections.
Course Outcomes
- Identify and evaluate common technology systems used in hospitality operations.
- Describe the various ways in which hospitality businesses use technology to process reservations and manage rooms.
- Identify and explain the function of common Property Management (PMS) interfaces, which include point-of-sale systems, call accounting systems, energy management systems, electronic locking systems, and guest-operated devices.
- Identify Payment Card Industry (PCI) and Data Security Standard (DSS) objectives and requirements.
- Explain the functions and use of food and beverage management applications, including those concerning recipe and menu management, sales analysis, and pre/postcosting.
- Identify and describe the catering software and accounting applications that are available to hospitality businesses.
- Identify the various threats to technology systems and the security precautions that should be taken to keep those systems safe.

HOSP 230 : Event Planning
Credits  5
Quarter Offered  Winter
Overview of event planning, coordination and catering. Students will explore professional event coordination and develop a comprehensive event plan that focuses on guest experience. Learn catering operations including menu planning and design, pricing, equipment, and staffing. This class may include students from multiple sections.
Course Outcomes
- Define the breadth of event types and opportunities for professional event coordination.
- Identify the food and beverage needs of the audience, participants, staff, and other stakeholders at an event.
- Develop a strategy for creating and coordinating a comprehensive event experience.
- Identify potential event sites and evaluate their suitability to select the best fit for an event.
- Organize efficient, effective, and safe waste control plans including strategies to ensure a sustainable event environment.
- Determine and procure suitable and effective collateral materials that will support the marketing strategies of an event.
- Identify the staging and equipment needs to facilitate the functional requirements of the event environment.
- Describe operational controls for catering including costing, presentation, pricing, production, purchasing and service.
- Develop and present an event plan.

HOSP 235 : Meeting Planning and Production
Credits  5
Quarter Offered  Spring
Students will explore and apply basic concepts and skills required to plan and execute successful conferences and large meetings in a variety of venues.
Course Outcomes
- Describe the structures of the Meetings, Exposition, Events, and Conventions (MEEC)
- Describe the fundamental principles of audio-visual production related to meetings and events
- Demonstrate skills of Meeting planning and production from inception to outcome
- Demonstrate Meeting & Business Events Competency Standards (MBECS)
Create a meeting resume that connects to other hospitality functions, catering, accounting, hotel room blocks, and financial planning
Classify basic principles of video, audio, and sound for meeting production

**HOSP 250 : Hotel Operations**

**Credits** 5

**Quarter Offered** Fall

Learn best practices and future directions in the hotel operations management. Apply strategies for flow of the guest experiences, from reservation, arrival, and registration, to service purchasing, departure, billing, and record keeping. This class may include students from multiple sections.

**Course Outcomes**
- Describe the structures of traditional and modern hotel industry.
- Demonstrate the ability to forecast availability and overbooking of hotel rooms.
- Demonstrate ability to manage guest services from arrival to departure.
- Draw connections to other hospitality functions, related industries, and the broader economy.
- Classify hotel internationalization; green operations; financing sources; boutique and urban collections; and reservations strategy.
- Calculate occupancy percentages, average daily rates, and actual percentage of potential rooms revenue.

**HOSP 290 : Hospitality Internship**

**Credits** 1-5

This class will provide opportunities for Hospitality and Ecotourism students to participate in internships with local businesses. This class may include students from multiple sections.

**Prerequisites**
HOSP 100 and instructor permission

**Course Outcomes**
- Acquire real world skills in a workplace setting based on the criteria identified in a learning contract agreed upon by the student, instructor and the internship supervisor.
- Apply hospitality, tourism or ecotourism skills in a workplace setting based on the criteria identified in a learning contract agreed upon by the student, instructor and the internship supervisor.
- Identify strengths and weaknesses related to workplace skills and behaviors based on the criteria identified in a learning contract agreed upon by the student, instructor and the internship supervisor.
Human Development (HUMDV)

HUMDV 101 : Success in the Online Classroom
Credits 1
Quarter Offered Summer, Fall, Winter, Spring
Overview of what to expect in an online course and how to make web-based learning more productive and rewarding. Meet in an online classroom that simulates a typical web-based learning environment. Students will learn how to use online courseware, navigate threaded discussions, locate articles and research materials, create an electronic presentation, and save electronic documents for presentation on the internet. This class may include students from multiple sections.
Course Outcomes
- Post messages to threaded discussions.
- Locate a peer-reviewed article from the library database.
- Differentiate between the credible and inappropriate internet and research sources.
- Set priorities, and organize your time.
- Download an electronic document and save it to a computer.
- Submit an assignment document.
- Define copyright, fair use, and plagiarism.
- Present a topic in a PowerPoint presentation.
- Attach a PowerPoint presentation a discussion board.
- Start an ePortfolio.

HUMDV 103 : Student Success Skills
Credits 1
Develop the essential skills necessary to achieve student success through this fun and informative class. Students will learn effective communication skills, creative problem solving techniques, helpful decision making skills, how to establish a support network with other students, and how to set and achieve realistic goals. Class includes time on the outdoor stationary Challenge Course. No prerequisites. No text required.
Course Outcomes
- Solve problems which increase in difficulty; in a group setting, determine how to get entire group from point A to point B with minimal resources.
- Make decisions that are in the individual's and group's best interest; as a group member, select a leader, decide upon the most efficient way to successfully accomplish a task; when mistakes are made, rethink decisions and analyze their effectiveness.
- Communicate comprehensively and effectively; articulate triumph, fears, concerns, needs; be verbally and non-verbally supportive of other group member's triumph, fears, concerns, and needs; provide nonverbal feedback to group members.
- Cooperate with group; take leadership role as well as follower role when necessary to accomplish task successfully; help others willingly without waiting to be approached; recognize a need and assist in taking care of that need.
- Recognize and respect individual perceptions and diversity within a group; explain directions in a manner so that different group members can grasp them clearly.
- Follow directions and complete activities.
- Explain how the metaphor used to set up an imaginary problem connects with their real life and/or classroom situation; verbally articulate what the activity elements helped them learn about themselves and/or others and how that transfers into the classroom.

HUMDV 110 : Career/Life Planning
Credits 1-3
Explores career and life options that fit individual interests, needs, and skills through an informative, interactive process. Start with what you know about yourself and create a path for the future. Includes interest inventories, informational interviewing, job market information, and how to create effective resumes.
Course Outcomes
- Assess and discuss individual skills, values, interests, attitudes and approaches that inform career and life decision-making.
Evaluate occupational information and current labor market trends in the context of individual skills, interests, lifestyle and goals. Articulate through writing the reasoning behind informed choices related to careers. Research information on how and where one can acquire the experience and knowledge required for employment in a particular profession. Build resumes and cover letters. Research information on four-year colleges and degrees needed for selected careers.

**HUMDV 112 : Occupational Exploration**

**Credits 1**

- Emphasis on informed choices relating to careers. Self-assessment, occupational information, and current labor market trends stressed. Assess individual skills, values, interests, attitudes, and approaches to decision-making.

**Course Outcomes**

- Student will become familiar with occupational information available.
- Student will be able to use computer software and the Internet for occupational information.
- Student will complete interest inventories, personality analysis, and values assessment designed to assist in career decisions.
- Student will be able to clarify and/or validate occupational choices.
- Students will be aware of other sources of information regarding career options both on and off campus.

**HUMDV 114 : Resume Writing**

**Credits 1**

- Create general and/or targeted employment resumes, using functional and chronological formats. Includes information about effective resume presentation style and approaches to use for a particular employment objective.

**Course Outcomes**

- Distinguish between Functional Skills and several other resume styles.
- Write a Functional Skills resume.
- Write a professional cover letter to accompany the resume.
- Evaluate the critical components to an effective thank you letter.
- Write a professional thank you letter as a follow-up to an interview.

**HUMDV 115 : Interview Skills**

**Credits 1**

- Utilize software and materials available in the Career Services Office to increase skills in interviewing. Participate in a mock interview at the conclusion of the course and receive feedback from the instructor.

**Course Outcomes**

- Be familiar with typical interview questions.
- Student will practice responses to typical interview questions.
- Student will be familiar with interview skills and business etiquette.
- Student will be familiar with Internet resources regarding interviewing.
- Student will have experience responding to interview questions.

**HUMDV 120 : Human Relations**

**Credits 3**

**Quarter Offered** Fall, Winter, Spring

Survey of workplace skills, including communication, team building, problem solving, and leadership. Emphasis on concepts of perception, attitude, motivation, and ethics.

**Course Outcomes**

- Explain the importance of human relations in the workplace.
- Acknowledge and apply differences in perceptions to group situations.
- Define, analyze, and demonstrate communications skills in speaking and listening.
- Describe and employ common strategies for problem solving and for conflict management.
- Describe and apply effective group and team-building skills.
- Illustrate the value of motivation, mission statement, and goal setting to organizations.
Identify steps in the change process and strategies for reducing and overcoming resistance to change.
Analyze sources and types of leadership and power.
Identify and apply guidelines for ethical behaviors.
Define human diversity and explain how it affects organizations.
Describe employee rights and responsibilities including health and wellness, workplace etiquette, and unions.
Prepare a resume and research good interviewing techniques.
Human Resources Management (HR-BAS, Bachelor of Applied Science)

HR-BAS 320 : Compensation and Performance Management
Credits  5  
Quarter Offered  Spring  
This course will teach skills in evaluation of an employee's job-related performance with the primary objective being the improvement of the individual's performance and the knowledge of justification for determining an employee's compensation and ability to be promoted. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas
Prerequisites  
Human Resources Management BAS Program Admittance
Course Outcomes  
- Describe expectancy and equity theories as they apply to compensation.
- Identify the seven basic issues that make up the organizational philosophy on compensation.
- Discuss the three major provisions of the Fair Labor Standards Act (FLSA).
- Identify three types of objective and subjective job evaluation.
- Analyze what objectives need to be evaluated in a performance appraisal.
- Identify purposes of performance appraisals.

HR-BAS 345 : HR Benefits Administration
Credits  5  
Quarter Offered  Fall  
Pending Curriculum Committee approval

HR-BAS 346 : Application of HR Technology and Analytics
Credits  5  
Quarter Offered  Winter  
This course introduces practical applications of technology and analytics in the field of Human Resources (HR). Students will explore how emerging technologies, including artificial intelligence in data analytics are transforming HR functions. The HR system technology impacts functions such as talent acquisition and management, compensation and benefits administration, performance evaluation, and workforce analytics. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas
Prerequisites  
Human Resources Management BAS Program Admittance
Course Outcomes  
- Articulate the role of technology in modern HR practices.
- Analyze system considerations and the design of HR technology.
- Utilize HR analytics tools to drive data driven decisions.
- Evaluate the impact of HR technology and analytics on organizational performance.
- Explore emerging trends and future directions in HR technology.

HR-BAS 401 : Managing Diversity, Equity, Inclusion and Belonging
Credits  5  
Quarter Offered  Spring  
This course will provide students an opportunity to explore key concepts from intersectionality and biases to scarcity mentality and equity. Several crucial soft skills that will allow student to develop and implement meaningful diversity, equity, inclusion and belonging (DEIB) strategies with empathy and effectiveness will be introduced. This class may include students from multiple sections.
Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

**Prerequisites**
Human Resources Management BAS Program Admittance

**Course Outcomes**
- Describe the Objective, Uniform in application, Consistent in effect, and Has job relatedness (OUCH) test and its four components and identify when it is useful in an organizational setting.
- Identify the major equal employment opportunity laws and the groups of people that each law protects.
- Discuss the major functions of the Equal Employment Opportunity Commission (EEOC).
- Contrast the concepts of Equal Employment Opportunity (EEO), affirmative action and diversity.
- Compare the two primary types of sexual harassment.
- Discuss employer’s requirements concerning avoidance of religious discrimination in the workplace.

**HR-BAS 420 : Labor Relations-Union Management Relations**

**Credits** 5

**Quarter Offered** Winter

This course offers an exploration of labor relations, emphasizing the interplay between employment relationship goals, labor rights, and management decisions. Students will learn the mechanics of traditional labor relations processes and gain insight into why these processes exist and how to assess their effectiveness. Additionally, students will develop an understanding of collective bargaining processes that lead to the conclusion of a collective agreement. This class may include students from multiple sections.

**Prerequisites**
Human Resources Management BAS Program Admittance

**Course Outcomes**
- Describe the US historical development, and legal framework of labor relations.
- Evaluate the role and function of labor unions in the contemporary workplace.
- Discuss the interaction of employment goals, and the rights of labor and management in labor relations.
- Analyze collective bargaining processes, practices, and outcomes.
- Explore emerging trends and challenges in labor relations.

**HR-BAS 430 : Training and Development**

**Credits** 5

**Quarter Offered** Winter

Training and development programs help companies gain and retain top talent while also improving employee productivity. This course will focus on the assessment of organizational needs, the creation of development opportunities, and the formulation of effective training strategies. Additionally, students will gain an understanding of the strategic importance of training and development initiatives in achieving organizational goals, as well as exploring emerging trends and challenges in this field. This class may include students from multiple sections.

**Prerequisites**
Human Resources Management BAS Program Admittance

**Course Outcomes**
- Analyze the strategic role of learning and development.
- Assess training needs and identify design elements for effective programs.
- Evaluate and enhance training effectiveness through learning principles.
- Identify development programs that enhance employee engagement and retention.
- Explore trends and challenges in training and development.

**HR-BAS 440 : Human Resources Recruitment, Staffing, and Selection**

**Credits** 5

**Quarter Offered** Spring

Pending Curriculum Committee approval
HR-BAS 450: Employment Law and Compliance
Credits 5
Quarter Offered Spring
Pending Curriculum Committee approval

HR-BAS 470-475: Internship
Credits 5
Quarter Offered Spring
Pending Curriculum Committee approval
Information Studies (INFO)

INFO 101: Research in Health and Social Sciences

Credits 2
Quarter Offered Fall, Spring, Summer
Designed to help you succeed on college research assignments. This course will emphasize developing research questions and search strategies; searching relevant subject databases; synthesizing information from sources; and citing sources in APA format. Readings and assignments focus on issues and contexts specific to Health and Social Sciences. Students will demonstrate core "information competencies" by developing a research project on a topic relevant to the health sciences or social sciences. This class may include students from multiple sections.

Course Outcomes
- Clearly articulate a need for health information.
- Locate multiple relevant sources of health information for a particular need.
- Evaluate information and its sources using a set of criteria.
- Apply information from a variety of sources to a specific purpose.
- Reference information sources using APA style.

INFO 120: Introduction to Research

Credits 2
An online introduction to college-level research. Students will learn how to develop topics into strong research questions that guide their research. They will also learn how to access, evaluate, and ethically engage a wide variety of information sources (e.g. popular, scholarly, print, and multimedia). Eligibility for ENGL & 101 is recommended. This class may include students from multiple sections.
Information Technology (IT)

IT 102 : Computer Hardware Workshop
Credits 2
Quarter Offered Spring
Gain experience assembling, installing and testing a modern desktop pc, rack mounted server and other various computing hardware configurations. This class may include students from multiple sections.
Course Outcomes
- Identify and describe common computer hardware components
- Demonstrate how to assemble a personal computer, install an operating system and start up a new system
- Demonstrate how to assemble a rack mounted server, manage cabling, install and operating system and start up a new server
- Demonstrate how to research parts for a server or PC to ensure hardware compatibility, optimization while working within a budget.

IT 107 : Introduction to Networking
Credits 5
Quarter Offered Fall
This course is an introduction to technologies, terminology, and skills used in the world of data networking. Emphasis is on practical applications of networking and computer technology to real-world problems, including home and small-business network setup. You will perform a variety of hands-on and case project activities combined with your reading activities that will reinforce each of the course objectives. This course maps to CTCITC 115: Introduction to Networking. This class may include students from multiple sections.
Course Outcomes
- Describe the basic hardware, software and services components used in network systems.
- Compare and contrast the alternatives in LAN media, topologies, access methods, and media.
- Demonstrate a layered approach to networking. (For example the open connection (OSI) reference model).
- Identify and evaluate appropriate media for networks (such as cabling, wireless, fiber, etc.).
- Evaluate appropriate network media topologies.
- Describe the major network layer protocols with an emphasis on IPv4 and/or IPv6, including addressing, subnetting, network address translation and IP configuration.
- Given a scenario, perform subnetting.
- Describe the major functions of network operating systems and directory services.
- Troubleshoot networks using standard troubleshooting tools.
- Describe the advantages/disadvantages of various network protocols.
- Select or determine appropriate network security process or approach for given situations.
- Build a (simple) network using routers and switches.

IT 111 : Information Technology Foundations I
Credits 5
Quarter Offered Fall
This course provides an overview of information technology (IT) with emphasis on making technical and business decisions. The course will introduce students to a variety of IT areas and identify their connections. Course topics include: office productivity applications, basic computer hardware, networking and security, and webpage creation and programming. Problem-based learning will be used to stress employability skills such as teamwork, written and oral communication, problem solving, trouble shooting, and project management. Students will also research an IT career path and describe the opportunities and the requirements needed for employment. Course maps to CTCITC 110 course. This class may include students from multiple sections.
Course Outcomes
- Distinguish the functions of hardware, software, data, procedures, and people in a business computer system.
- Identify the major hardware elements of a computer system and describe the purpose of each element.
- Recognize the role of and use a variety of widely-used software packages including spreadsheets, word processors, databases, and presentation software.
- List the major functions of the operating system and demonstrate how to use its essential features and commands.
- Describe the programming process and the role of software in solving business-related problems.
Give examples of how communications and network technologies are used. Explain the role of and use of the Internet. Outline the requirements for choosing specific hardware systems and software packages. Discuss the role of information and how management information systems (MIS) are developed and used in an organization. Summarize what a database is including database terminology and the role it plays in a business environment including how it is used on the Web. Discuss how multimedia can be used to enhance communication. Recognize prominent computer-related ethical, security, privacy, and legal issues. Give examples of career opportunities in the technology sector.

**IT 114 : Database Design and Implementation**

**Credits** 5

**Quarter Offered** Spring

Introduction to the principles of database management systems. Topics include database system architecture, data models, theory of database design, query optimization, concurrency control, crash recovery, and storage strategies. This course maps to the CTCITC 114: Database Design and Implementation course. This class will include students from multiple sections.

**Course Outcomes**

- Summarize the purpose of database management systems and the role of database administrators.
- Describe the process of analysis of client needs, design of data models, and implementation of databases in modern relational database management system software.
- Analyze a scenario to identify the business rules and customer requirements to be included in a data model.
- Distinguish between conceptual data models, logical data models and physical data models.
- Describe the relational model and the principles of relational database design.
- Employ Entity-Relationship diagramming tools to model data.
- Demonstrate the process of normalizing relationships in tables.
- Apply database design patterns in data modeling.
- Use SQL statements to create a new database and modify an existing database.
- Use SQL statements to select, sort, and filter data within a database.
- Differentiate between an administrator/developer’s view of the database (tables, queries) versus a user’s view of the database (forms, reports, and custom user interfaces).
- Identify ethical issues and regulations relating to data and databases.
- Discuss database security issues (such as role-based access, data encryption, and SQL injection).
- Give examples of the various types of testing relating to databases (for example, application software testing, data integrity testing, user testing).

**IT 155 : Cloud Computing Essentials**

**Credits** 5

**Quarter Offered** Winter

This course covers the skills and knowledge required to make informed, critical decisions with cloud technologies and the impact they have on businesses. Learn the fundamentals of cloud technologies, deployment models, fiscal impact and use cases for businesses. This class may include students from multiple sections.

**Course Outcomes**

- Demonstrate understanding of basic cloud fundamentals including cloud networking, design considerations and storage approaches.
- Demonstrate skills operating within the cloud including data management and optimization, the role of DevOps with integration and provisioning.
- Describe how to assess cloud infrastructure options through feasibility studies, gap analysis, benchmarking, and cloud vendor analysis.
- Demonstrate basic risk management and response techniques as they relate to cloud services and the critical role of compliance with regulatory and international standards.

**IT 207 : Advanced Networking and Network Security**

**Credits** 5

**Quarter Offered** Fall
Covers advanced networking and network security concepts & skills including routing, switching, virtual LANs, network design, routing protocols, network management and software defined networking. Secure network design, implementation and monitoring/maintenance are taught using hands-on projects for students. This class may include students from multiple sections.

**Prerequisites**

IT 107

**Course Outcomes**

- Describe how routing and switching work by building a working, multi-zone network
- Demonstrate how to configure routers and switches for specific scenarios
- Describe and demonstrate the best practices in secure network design
- Describe and demonstrate best practices when maintaining a secure network
- Demonstrate how to automate network management tasks
- Demonstrate how to manage and configure network security devices such as firewalls and intrusion detection systems

**IT 211 : Information Technology Foundations II**

**Credits** 5  
**Quarter Offered** Winter

This course covers technical skills with mobile devices, networking technology, hardware, virtualization, cloud computing and network troubleshooting. Includes skills required for installing and configuring operating systems, expanded security, and software troubleshooting. This class may include students from multiple sections.

**Course Outcomes**

- Demonstrate how to Identify, connect, and utilize hardware components and devices, including the broad knowledge of different devices necessary to support the remote workforce.
- Demonstrate the ability to install, configure and support Windows including command line.
- Demonstrate skills with client operating system (OS) support, system configuration imaging and troubleshooting for Mac OS, Chrome OS, Android and Linux.
- Demonstrate the ability to troubleshoot PC and mobile device issues including common OS, malware and security issues.
- Demonstrate troubleshooting skills with real-world device and network issues.
- Describe how to Install and configure laptops and other mobile devices and support applications to ensure connectivity for end users.

**IT 225 : Windows Server and Windows Domains**

**Credits** 5  
**Quarter Offered** Spring

This course introduces Windows Server operating systems through the implementation and administration of Windows Servers in a virtual Network environment. Topics include server roles and features, best practices in server configuration and administration, and server participation in a network environment. This course tracks to Microsoft's MCSA Certification for Servers but does not cover all topics in those exams and is not designed to fully prepare students for certification. Recommended that students enter the course with some experience and prior knowledge of virtualization and the basics functions of operating systems. This class may include students from multiple sections. (Elective)

**Course Outcomes**

- Design a Windows Domain.
- Discuss common Windows Server Roles and Features.
- Build a Windows Domain within Hyper-V.
- Construct an Active Directory Structure within a Windows Domain.
- Discuss security considerations in the context of a Windows Domain.
- Compare backup strategies for different Windows Server roles and workloads.

**IT 260 : Introduction to Unix/Linux Systems Administration**

**Credits** 5  
**Quarter Offered** Winter
An introduction to the Unix/Linux operating system and Unix/Linux system administration. Prepares student for CompTIA Linux+ Part A exam. This class may include students from multiple sections.

**Course Outcomes**
- Analyze problems and design Linux/UNIX solutions using shell command files and scripts.
- Describe how Linux/UNIX supports processes, memory management, input/output, and the file system.
- Describe the functions of an operating system.
- Describe the main Linux/UNIX system administration tasks.
- Employ common Linux/UNIX shell features including I/O redirection, piping, command substitution, and simple job control.
- Explain shell-specific facilities including the use of environmental and local variables, and the built-in programming language.
- Set up a Linux/UNIX environment.
- Use common and advanced Linux/UNIX utilities.

**IT 275 : Scripting and Automation**
**Credits** 5
**Quarter Offered** Fall
An introduction to shell scripting and automation with Bash (Unix/Linux), Powershell (Windows) and how to automate systems administration and networking tasks in server, client and networking environments. This class may include students from multiple sections

**Course Outcomes**
- Demonstrate how to write a basic Bash script
- Demonstrate how to safely test and debug Bash scripts
- Demonstrate how to write a basic Powershell script
- Demonstrate how to safely test and debug Powershell scripts
- Describe and demonstrate how to ensure scripts are secure
- Demonstrate how to write scripts that use variables, conditions, loops, read and write to files
- Demonstrate how to schedule scripts to run on a regular interval in Linux, Unix and Windows

**IT 276 : Information Technology & Cybersecurity Internship**
**Credits** 1 - 5
This class will provide opportunities for Information Technology and Cybersecurity students to participate in internships with local businesses. This class may include students from multiple sections.

**Prerequisites**
IT 111 and IT 162 or instructor permission

**Course Outcomes**
- Acquire real world skills in a workplace setting based on the criteria identified.
- Apply Information Technology skills in a workplace setting based on the criteria identified in the learning contract agreed upon by the student, instructor, and the internship supervisor.
- Identify strengths and weaknesses related to workplace skills and behaviors based on the criteria identified in a learning contract agreed upon by the student, instructor and the internship supervisor.

**IT 285 : Cloud Infrastructure and DevOps**
**Credits** 5
**Quarter Offered** Fall
This course covers the concepts of cloud-based information technology infrastructure and how organizations deploy and maintain hybrid cloud and fully remote infrastructure. This course prepares students to complete industry leading cloud architect certifications. This class may include students from multiple sections.

**Course Outcomes**
- Describe three different cloud infrastructure platforms
- Demonstrate deploying servers and traditional on premises infrastructure on a cloud platform
- Demonstrate command line interface (CLI) skills to deploy, start, update and stop cloud instances and services
- Describe, troubleshoot and resolve networking issues unique to cloud based infrastructure
- Demonstrate operational understanding of the security principles required in any cloud-based infrastructure environment
- Develop, test and deploy automation scripts for basic infrastructure tasks
IT 287: Coding I - Coding with Python
Credits 5
Quarter Offered Fall
An introduction to the Python programming language. Learn software development best practices while learning the main Python libraries and programming fundamentals. Class covers syntax, variables, strings, conditions, flow control structures loops, switches, classes, database connections, utilities, and frameworks. Class also covers data structures using sets, frozen sets, lists, arrays and dictionaries. No prior coding experience necessary. Course utilizes hands-on projects rooted in real-world problems and exercises. This class may include students from multiple sections.

Course Outcomes
- Demonstrate the use of Python variables, expressions, and statements.
- Create and use functions, parameters, arguments, and recursion.
- Develop Python programs that use conditionals, Booleans, iteration, and looping.
- Describe and demonstrate the core concepts of object-oriented programming including classes and inheritance.

IT 288: Coding II - Front-End Development
Credits 5
Quarter Offered Winter, Spring
This course introduces front-end and user interface development. Course covers web application front-end programming with standards such as HTML, CSS, JavaScript, Node, React and more to help students learn to implement fast and functional user interfaces. No prior front-end development experience required. MEDIA 225 recommended. This class may include students from multiple sections.

Course Outcomes
- Demonstrate the proper use of HyperText Markup Language (HTML) elements including semantic elements.
- Implement custom styling of web front-ends.
- Describe the fundamental principles of implementing effective user interfaces.
- Demonstrate Bootstrap fundamentals.
- Create interactivity with JavaScript.
- Utilize Git to collaborate on projects with others.
- Demonstrate how to test that designs are cross-browser compatible.
- Demonstrate how to build websites with dynamic data from an Application Programming Interface (API).
- Demonstrate how to organize code using a front-end JavaScript Framework.
- Create a responsive website using Bootstrap or the Cascading Style Sheets (CSS) grid system.

IT 289: Coding III - Full Stack Development
Credits 5
Quarter Offered Spring
This course completes the full-stack picture by introducing back-end development including relational databases, API development and testing, deployment, and security. Builds on but does not require coding I or coding II if student has prior experience with programming fundamentals and front-end development. Students will build, test, and release a full stack web application from beginning to end. Completion of IT 287 and IT 288 or equivalent experience recommended. This class may include students from multiple sections.

Course Outcomes
- Demonstrate how to create a web application server.
- Create a web application that interacts with a database.
- Design and create RESTful Application Programming Interfaces (API)s.
- Demonstrate experience using cloud services for application deployment such as Amazon Web Services, Microsoft Azure or others.

IT 299: Integrated Study-Honors
Credits 2
In this capstone honors course, students will complete a project relevant to their career pathway and program. The project will integrate at least two business and IT programs (Business Administration, Administrative Office Systems, Multimedia Communications, Cybersecurity & Computer Forensics, or Information Technology) to provide breadth and relevance to the project. This class may include students from multiple sections.
Prerequisites
Completion of 60 credits in the BUS/IT program of study with a GPA of 3.5 or higher; and completion of the English course required in the BUS/IT program of study

**Course Outcomes**

- Complete a project relevant to learning pathway and program.
Information Technology Management (IT-BAS, Bachelor of Applied Science)

IT-BAS 310 : Technology and Management Problem Solving
Credits 5
Quarter Offered Spring
The ability to apply technology and problem-solving skills to complex management problems is essential in today's rapidly evolving digital landscape. This course offers an overview of various management problem-solving strategies, tools, and technologies, thus empowering students to tackle real-world challenges in diverse management situations. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas
Prerequisites Information Technology Management BAS Program Admittance
Course Outcomes
- Evaluate various problem-solving approaches to identify, analyze, and evaluate complex situations in a management realm.
- Evaluate the efficiency and suitability of diverse technologies in addressing problem-solving settings.
- Apply technologies effectively and aptly to solve problems in a variety of situations.
- Develop analytical skills and algorithmic thinking, enabling successful problem-solving of complex issues.
- Solve real-world problems using the appropriate problem-solving strategies and technology.
- Critically examine the ethical, social, and cultural implications of leveraging technology for problem-solving.

IT-BAS 320 : International Business and Technology
Credits 5
Quarter Offered Spring
Pending Curriculum Committee approval

IT-BAS 335 : Database Design
Credits 5
Quarter Offered Winter
This course will explore the principles and practices of creating efficient, scalable, and secure databases. The course includes an overview of different types of databases and their proper usage. Students will gain insight into relational and NoSQL databases. Students will learn database design, data modeling, query optimization, and database security needed for managers in IT. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas
Prerequisites Information Technology Management BAS Program Admittance
Course Outcomes
- Summarize the core principles and concepts involved in database design and management, including various types of databases and their applications in real-world scenarios.
- Design efficient, scalable, and secure databases. Understand data modeling techniques to translate complex real-world data into organized and structured database schemas.
- Illustrate the differences between relational and NoSQL databases, understanding their strengths, weaknesses, and appropriate use cases. Compare and contrast the advantages of each database type in various application scenarios.
- Explain query optimization for enhanced performance and efficiency. Explore how to retrieve, filter, organize, and manipulate data for relational, SQL, and NoSQL databases.
- Connect knowledge to real-world problems. Gain practical experience with popular database management systems through implementing database design, data manipulation, data retrieval, and data base security.

IT-BAS 345 : Programming Languages for Managers
Credits 5
Quarter Offered  Spring
Overview of the fundamental concepts underlying computer programming languages. Course covers the theory, design, and use of computer programming languages. Students start with a survey of computer programming languages and their various paradigms, syntax, and usages. Students will study computer programming languages’ history and emerging technologies. Students will learn the fundamentals and advanced usage of computer programming languages through a deep dive into one computer programming language. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

Prerequisites
Information Technology Management BAS Program Admittance

Course Outcomes
- Demonstrate an understanding of the fundamental concepts underlying computer programming languages, including formal theories, design principles, and practical applications.
- Conduct a survey of different computer programming languages, examining their paradigms, syntax, and usages. Analyze the strengths and weaknesses of each language in different contexts.
- Explore the evolution of computer programming languages, understanding the context in which different languages emerged. Explore emerging technologies and trends in the field of computer programming languages.
- Demonstrate understanding of one specific computer programming language, exploring both its fundamental concepts and advanced features. Develop practical skills in writing, debugging, and optimizing code in this language.
- Apply theoretical knowledge to solve real-world problems using the chosen programming language. Develop proficiency in using the language for algorithmic problem-solving, data manipulation, and software development.

IT-BAS 420: Strategies and Cloud Technologies
Credits  5
Quarter Offered  Winter
This course explores cloud technologies’ strategic implications and practical applications in contemporary business environments. The course examines cloud computing principles, including infrastructure as a service (IaaS), platform as a service (PaaS), and software as a service (SaaS), and their role in driving organizational agility, innovation, and cost-effectiveness. Emphasis is placed on understanding the strategic alignment of cloud initiatives with organizational goals, evaluating the economic and competitive impact of cloud solutions, and effectively managing cloud resources to maximize value. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

Prerequisites
Information Technology Management BAS Program Admittance

Course Outcomes
- Articulate fundamental principles of cloud computing and its strategic implications for modern businesses.
- Apply strategic thinking to the selection and implementation of cloud technologies.
- Demonstrate proficiency in leveraging cloud technologies to optimize business processes.
- Develop strategic plans for cloud migration and adoption.
- Evaluate the effectiveness of cloud strategies and technologies using appropriate metrics.

IT-BAS 430: Business Intelligence and Data Mining
Credits  5
Quarter Offered  Winter
The course covers business intelligence (BI), data mining, fundamental concepts, techniques, and applications to produce data-driven insights and inform strategic decision-making in contemporary business contexts. Topics include data warehousing, preprocessing, data mining algorithms (regression, classification, clustering), predictive modeling, and performance evaluation. Emphasis is placed on integrating BI with organizational decision-making processes and business strategy, with practical exercises using industry-standard tools for data visualization, reporting, and dashboard creation. This class may include students from multiple sections.

247
Peninsula College Catalog 2024-2025
Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

Prerequisites
Information Technology Management BAS Program Admittance

Course Outcomes
- Demonstrate understanding of the principles of business intelligence and data mining.
- Apply data warehousing techniques, including preprocessing and integration, to get data in place for analysis.
- Implement various data mining algorithms like regression, classification, and clustering.
- Develop forecasting models.
- Evaluate the results of business intelligence and data mining using appropriate metrics.

IT-BAS 440: Legal Environments in IT
Credits 5
Quarter Offered Spring
Pending Curriculum Committee approval

IT-BAS 460: Security Architectures for Managers
Credits 5
Quarter Offered Fall
This course teaches students how to ensure that the stakeholder security requirements necessary to protect the organization's mission and business processes are adequately addressed. All aspects of enterprise architecture including reference models, segment and solution architectures, and the resulting systems supporting those missions and business processes will be covered. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

Prerequisites
Information Technology Management BAS Program Admittance

Course Outcomes
- Develop/integrate cybersecurity designs for systems and networks with multilevel security requirements.
- Document and address organization's information security, cybersecurity architecture, and systems security engineering requirements throughout the acquisition life cycle.
- Employ secure configuration management processes.
- Ensure that acquired or developed system(s) and architecture(s) are consistent with organization's cybersecurity architecture guidelines.
- Identify and prioritize critical business functions in collaboration with organizational stakeholders.
- Perform security reviews, identify gaps in security architecture, and develop a security risk management plan.
- Define and document how the implementation of a new system or new interfaces between systems impacts the security posture of the current environment.
- Evaluate security architectures and designs to determine the adequacy of security design and architecture proposed or provided in response to requirements contained in acquisition documents.
- Determine the protection needs (i.e., security controls) for the information system(s) and network(s) and document appropriately.

IT-BAS 470-475: Business Management in Technology Capstone
Credits 5
Quarter Offered Spring
Pending Curriculum Committee approval
Integrated Indigenous Studies (IIS)

IIS 101: Introduction to American Indian Studies

Credits 5
Quarter Offered Fall, Spring

Introduction to American Indian and Indigenous Studies, a field of research grounded in the study of American Indian and indigenous peoples. This field emphasizes individual and community wellness, political self-determination, cultural revitalization and cross-cultural understanding. This course presents foundational terms, concepts and ideas and is recommended for all students but is particularly relevant for those who will pursue a degree in Native American Studies or Indigenous Studies or American Indian/Indigenous Studies. This class may include students from multiple sections. (Social Sciences, Elective)

Course Outcomes
- Demonstrate an understanding of key terms in American Indian Studies and identify their significance in this field.
- Present evidence of understanding the significance of individual and community wellness, political self-determination, cultural revitalization, and cross-cultural understanding.
- Demonstrate an understanding of treaties and their significance in Nation building and current legal and environmental tribal efficacy.
- Engage with different perspectives of other students in discussions and written responses.
- Improve critical thinking skills through engagement with and evaluation of a range of sources including text, video, audio, presentations, case studies, mixed media art, and other expressions.
Integrated Studies (IS)

**IS 101 : Understanding the Humanities**

*Credits* 5  
*Quarter Offered* Fall (odd year), Spring, Summer  
Introduction to a range of artistic and intellectual expressions of what it means to be human. Areas explored may include architecture, dance, film, language, literature, music, painting, philosophy, photography, sculpture, and/or theater. Discussion of these expressions, themes and styles, as well as their cultural, historical, and theoretical contexts. This class may include students from multiple sections. (Humanities, Elective)

**Course Outcomes**
- Identify and describe major forms of artistic and intellectual expression.
- Explain the history of the forms of expression, their principle elements and styles, and some of their best known examples.
- Discuss how the forms of expression affect human identity formation and emotional development.
- Explain how the forms of expression enhance the understanding of humanity's social and cultural development.
- Discuss the value of diversity in the forms of expression.

**IS 102 : Comparative Arts**

*Credits* 5  
*Quarter Offered* Fall (odd year)  
Exploration of thematic and stylistic connections between art forms, focusing on both theory and creative application. Art forms may include painting, photography, sculpture, dance, poetry, fiction, theater, film, and music. This class may include students from multiple sections. (Humanities, Elective)

**Course Outcomes**
- Identify major art forms and explain their development, their principle elements and styles, and some of the best known examples of each.
- Describe the thematic and stylistic connections between different art forms.
- Discuss the value of diversity in artistic expression.
- Discuss how art affects human beings, including why it occurs and how it functions in society.
- Explain how art enhances the understanding of what it means to be human.

**IS 103 : Women's Voices In The Arts and Humanities**

*Credits* 5  
*Quarter Offered* Winter  
Exploration of women's voices and works in the Arts and Humanities from specific time periods and mediums. This class may include students from multiple sections. (Humanities, Elective)

**Course Outcomes**
- Read actively and analytically about individuals’ and cultures’ values, practices, behaviors, and expectations;
- Read actively and analytically about intersectionality and how identity markers such as gender, race, economic class, education level, immigration status, nationality, religion, ability, and sexuality shape a sense of self, community, and world;
- Identify themes in contemporary women’s writing and art and reflect on and discuss art and literature with classmates, including acknowledging different viewpoints and respectfully engaging with course concepts and texts;
- Evaluate and challenge assumptions and conclusions—both one's own and others’;
- Accept personal academic responsibility including class participation and prompt and thorough completion of assignments;
- Use tools of self-assessment to evaluate knowledge and skills in reading, writing, and analysis.
- Explore, discover, and express ideas about the humanities;
- Write unified, coherent and well-developed pieces controlled by a central argument, supported with specific examples from texts, and edited for correct grammar, punctuation, mechanics, and usage.

**IS 105 : Popular Culture**

*Credits* 5  
*Quarter Offered* Spring
Historical as well as cross-cultural study of popular literary and nonliterary texts, such as novels, magazines, comic books, films, television shows, advertisements, social media, superhero tales, music videos, and fashion trends. Focus on popular myths, icons, heroes, and/or rituals that have affected peoples’ lives and attitudes. This class may include students from multiple sections. (Humanities, Elective)

**Course Outcomes**

- Explain what culture and popular culture are.
- Discuss the values, practices, behaviors, norms, and expectations of cultures.
- Discuss the structure and development of popular culture.
- Identify how people consume popular culture.
- Discuss the influence popular culture has on the identity of the individual, the community, the nation, and the world.
- Discuss the larger cultural trends in modern American society.
- Analyze the complexity of cultural texts, and analyze what the authors are communicating and how these texts relate to one’s own beliefs and experiences.
- Explain how the medium and genre of a text influences its meaning.

**IS 107 : History of Reason**

**Credits** 5

Exploration of a theme, area of knowledge, or period of intellectual history, focusing on seminal ideas and paradigm shifts. This class may include students from multiple sections. (Humanities, Elective)

**Course Outcomes**

- Discuss the processes involved in the advancement of knowledge.
- Discuss the seminal ideas associated with specific themes, area of knowledge, or periods of intellectual history.
- Explain the historical context within which important intellectual (ie. Scientific, sociological, cultural, philosophical, mathematical) breakthroughs were developed.
- Explain the paradigm shift that accompanies important intellectual discoveries.
- Discuss the impact, the breakthroughs, and discoveries have had on modern life.

**IS 109 : Introduction to Indigenous Humanities**

**Credits** 5

**Quarter Offered** Fall

Introduction to a range of artistic and intellectual expressions of what it means to be human with particular attention to distinct paradigms that reflect indigenous history, culture, arts, and philosophies. Areas of attention/concentration include but are not limited to architecture, dance, film, language, literature, music, painting, philosophy, sculpture, and performance. This class may include students from multiple sections. (Humanities, Elective)

**Course Outcomes**

- Read actively and analytically.
- Engage with the complexities of the humanities (including literature, film, performance) by thinking creatively and logically about what the creator is communicating.
- Analyze personal attitudes and knowledge reflecting one’s identity, including specific ways in which values shape ethics and participation in community.
- Engage in group discussions focused on various examples of arts and humanities.
- Compare conventional (western) humanities with indigenous humanities through studies of specific disciplinary and interdisciplinary examples of humanities discourse and expression.
- Evaluate and challenge assumptions and conclusions—both one’s own and others’.
- Employ accurate grammar and mechanics in written work.

**IS 120 : Indigenous Humanities: Language, Culture, and Indigenous Futures**

**Credits** 5

**Quarter Offered** Winter

Include the study of a range of artistic and intellectual expressions of what it means to be human with particular attention to language revitalization, place-based knowledge and expression, and interdisciplinary approaches to the humanities. Co-taught with an instructor of record and at least one but up to three co-teachers who are culture teachers or language teachers from indigenous tribes including but not limited to the Tribes of the Olympic Peninsula. This class may include students from multiple sections. (Humanities, Elective)

**Course Outcomes**
Engage with language learning, including both spoken and written dimensions of one or more revitalized Indigenous languages.
Read actively and analytically.
Engage with the complexities of the humanities and demonstrate an understanding of interdisciplinary learning.
Improve skills in speaking another language.
Engage in discussions that engage language learning in the context of relationality.
Reflect on active learning to better understand the interdisciplinary approach to language, culture, and knowledge.

**IS 150 : Foundations of Knowledge**

**Credits** 5  
**Quarter Offered** Winter  
An introductory course that explores the nature of knowledge and its pursuit from the primary academic disciplines of mathematics, humanities, natural sciences and social sciences. An emphasis is placed on establishing linkages across these disciplines to expand the realm of possible discourse. Students will develop and apply critical thinking, communication, and self-assessment skills, along with the ability to integrate multiple perspectives. As part of the class, students will engage in interdisciplinary readings and discussions of seminal ideas on a common theme to be determined by the instructor. This class may include students from multiple sections. (Humanities, Elective)

**Prerequisites**  
Eligibility for [ENGL& 101](#)

**Course Outcomes**  
Define and discuss major theories of knowledge.  
Apply, compare, and assess different disciplinary approaches as they apply to complex themes or problems.  
Develop and demonstrate critical thinking skills.  
Develop and demonstrate information literacy skills.  
Communicate ideas clearly in both oral and written form.  
Assess one’s own learning through ongoing self-assessment exercises.  
Demonstrate and develop strong interpersonal/team skills.  
Apply interdisciplinary perspectives to discussions of the course theme.

**IS 201 : Service Learning**

**Credits** 5  
**Quarter Offered** Occasionally  
This course combines meaningful service experience with selected resources, assignments and self-reflection to build real-world professional competencies. Through a service project with a local community partner, students will gain hands-on experience as it relates to their academic area of interest. This course goes beyond internships and volunteer work by empowering students to apply classroom learning to current social issues and community needs. Course meetings and activities are built around learner-centered reflection, peer discussion and field experiences for a variety of disciplines. This class may include students from multiple sections. (Elective)

**Prerequisites**  
[ENGL & 101](#)

**Course Outcomes**  
Develop a professional relationship with a nonprofit community partner, understanding its mission, programs, and people served, and emphasizing the social or environmental issues addressed by the partner.  
Identify how theories or concepts from your area of study have contributed to your understanding about the service placement you completed and issues/problems facing the community in which you served.  
Articulate the value of civic engagement through reflection and building self-awareness and personal contribution to practice and community.  
Demonstrate critical thinking through understanding developed during service, including the identification, framing, resolving, and readdressing of social issues or problems.  
Facilitate workplace behaviors and community engagement by combining personal responsibility, initiative, communication and emotional awareness and control.
Summarize the applied learning resulting from service experience, how it will be applied in the future, and
dividually and collectively reflect on the personal value of that experience.
Intensive English Language Studies (IELS)

IELS 81 : Intensive English-Basic Level-Reading
Credits 6
This course is for non-native English speakers who wish to improve their English. The course will focus on
reading comprehension and vocabulary development at the low-intermediate level. This class will include
students from multiple sections.
Prerequisites
On-campus assessment in all skill areas. Non-transferable.
Course Outcomes
  - Use a monolingual learner dictionary to identify word stress, word form, and word.
  - Develop vocabulary knowledge through identifying common stems and affixes, word form and word
    families.
  - Apply knowledge of grammar, punctuation, word parts and context clues to make guesses of target
    vocabulary of basic-level reading passages.
  - Apply pre-reading strategies to activate schemata and predict content of basic texts.
  - Identify topic sentences and main ideas and sequence of events in basic ESL texts.
  - Identify transition signals to determine patterns of organization in basic ESL texts.
  - Compose a controlled summary of 3-5 sentences which states the topic and main ideas from a short basic
    level ESL reading paragraph.
  - Identify the setting, main events, climax and resolution of ESL readers at the basic level.
  - Compose a controlled summary of the text in writing.
  - Respond verbally and in writing, to basic level texts by drawing connections between personal experiences
    and/or world knowledge to the assigned text.

IELS 82 : Intensive English-Basic Level-Writing
Credits 6
This course is for non-native English speakers who wish to improve their English. The course will focus on
writing and grammar skills at the low-intermediate level. This class will include students from multiple sections.
Prerequisites
On-campus assessment in all skill areas. Non-transferable.
Course Outcomes
  - Apply pre-writing techniques (such as listing and clustering) to generate ideas.
  - Write about topics related to personal interests with basic fluency and control.
  - Limit topics using logical subdivisions.
  - Compose short paragraphs based on a topic sentence.
  - Utilize basic cohesive devices (listing and sequence words).
  - Utilize simple and compound sentences in writing.
  - Demonstrate awareness of basic sentence structure.
  - Demonstrate control over basic grammatical structures and vocabulary.
  - Utilize appropriate punctuation to indicate sentence boundaries.
  - Develop level-appropriate self-editing strategies (use of dictionary and spell check for spelling,
    proofreading for capitalization and end punctuation).
  - Use basic writing and formatting conventions (punctuation, capitalization, margins, indentation, and typing).

IELS 83 : Intensive English-Basic Level-Listening
Credits 6
This course is for non-native English speakers who wish to improve their English. The course will focus on
listening and speaking skills at the low-intermediate level. This class will include students from multiple
sections.
Prerequisites
On-campus assessment in all skill areas. Non-transferable.
Course Outcomes
  - Express ideas fluently, accurately, and appropriately in spoken American English at a high-beginning level.
  - Comprehend and respond appropriately to spoken American English at a high-beginning level.
  - Demonstrate high-beginning knowledge and use of American cultural conventions in oral communications.
IELS 84 : Intensive English-Intermediate Level-Reading
Credits 6
This course is for non-native English speakers who wish to improve their English. The course will focus on reading comprehension and vocabulary development at the intermediate level. This course is for non-native English speakers who wish to improve their English. This class will include students from multiple sections.
Prerequisites
On-campus assessment in all skill areas or successful completion of IELS 81. Non-transferable.
Course Outcomes
- Use a monolingual learner dictionary to determine pronunciation, word form, and word meaning.
- Develop vocabulary knowledge through basic knowledge of stems/affixes, synonyms, and word families.
- Apply knowledge of grammar, punctuation, word parts, and context clues to make informed guesses of target vocabulary of intermediate level reading passages.
- Apply pre-reading strategies to activate schemata and predict content of intermediate texts.
- Identify topic sentences and main ideas; discern major from minor details in intermediate-level texts.
- Identify transition signals to determine patterns of organization in intermediate ESL textbooks.
- Compose a guided summary of 8-12 sentences which paraphrases the topic sentence, main ideas, and major details from a short, intermediate level ESL academic reading paragraph.
- Identify the setting, main events, climax and resolution of intermediate fictional texts.
- Compose a simple summary and critique of intermediate fictional texts.
- Respond thoughtfully, verbally and in writing, to intermediate level texts by drawing connections between personal experiences and/or world knowledge to the assigned texts.

IELS 85 : Intensive English-Intermediate Level-Writing
Credits 6
This course is for non-native English speakers who wish to improve their English. The course will focus on writing and grammar skills at the intermediate level. This class will include students from multiple sections.
Prerequisites
On-campus assessment in all skill areas or successful completion of IELS 82. Non-transferable.
Course Outcomes
- Apply pre-writing techniques (such as free-writing, listing, clustering, outlining) to generate ideas.
- Write about topics related to personal and academic interests with intermediate fluency and control.
- Limit topics using logical subdivisions.
- Write topic sentences with a specific topic and controlling idea.
- Compose organized and developed paragraphs.
- Utilize cohesive devices appropriately.
- Compose a relevant title.
- Utilize sentence variety (simple, compound, and complex) in paragraph writing.
- Demonstrate control of basic sentence structure.
- Demonstrate control over intermediate grammatical structures and vocabulary.
- Utilize appropriate punctuation to indicate sentence boundaries.
- Apply guided peer, self-revision and editing strategies to improve earlier drafts.
- Understand concepts of intellectual property and academic honesty.
- Recognize plagiarism and how to avoid it.
- Use standard writing and formatting conventions (punctuation, capitalization, margins, indentation, and typing).

IELS 86 : Intensive English-Intermediate Level-Listening
Credits 6
This course is for non-native English speakers who wish to improve their English. The course will focus on listening and speaking skills at the intermediate level. This class will include students from multiple sections.
Prerequisites
On-campus assessment in all skill areas or successful completion of IELS 83. Non-transferable.
Course Outcomes
- Express ideas fluently, accurately, and appropriately in spoken American English at an intermediate level.
- Comprehend and respond appropriately to spoken American English at an intermediate ESL level.
- Demonstrate intermediate knowledge and use of American cultural conventions in oral communications.
IELS 87: Intensive English-High Intermediate Level-Read

Credits 6
This course is for non-native English speakers who wish to improve their English. The course will focus on academic reading and vocabulary skills at the high-intermediate level.

Prerequisites
On-campus assessment in all skill areas or successful completion of IELS 84. Non-transferable.

Course Outcomes
- Competently and independently use a monolingual learner dictionary.
- Develop vocabulary knowledge through intermediate knowledge of stems/affixes, synonyms, word families.
- Apply knowledge of grammar, punctuation, word parts and context clues to make informed guesses of target vocabulary of academic texts.
- Apply pre- and during reading strategies to a variety of academic texts.
- Identify and articulate main ideas, both stated and inferred, and important details in academic, journalistic, and literary prose at the high-intermediate level.
- Annotate effectively for active reading and increased comprehension and retention.
- Identify transition signals and cohesive devices to identify patterns of organization and important ideas.
- Distinguish fact from opinion in level-appropriate texts.
- Compose a summary of high-intermediate level text in which the main ideas and major details are accurately paraphrased.
- Identify the setting, main events, climax, resolution and theme of high-intermediate level fictional texts.
- Summarize and critique high-intermediate-level fictional texts using textual support.
- Respond thoughtfully and critically, verbally and in writing, to high-intermediate texts by drawing connections between personal experiences, world knowledge and/or other readings to the assigned text.

IELS 88: Intensive English-High Intermediate Level-Writing

Credits 6
This course is for non-native English speakers who wish to improve their English. The course will focus on academic writing skills at the high-intermediate level.

Prerequisites
On-campus assessment in all skill areas or successful completion of IELS 85. Non-transferable.

Course Outcomes
- Apply pre-writing techniques (such as free-writing, listing, clustering, outlining), to generate ideas.
- Write about a variety of topics, both concrete and abstract, with high-intermediate fluency and control.
- Limit topics using logical subdivisions.
- Develop a thesis statement that addresses a specific purpose and audience.
- Compose organized and developed multi-paragraph essays.
- Utilize a variety of cohesive devices effectively.
- Utilize sentence variety (simple, compound, complex, compound-complex) in essay writing.
- Demonstrate control of sentence structure types.
- Demonstrate control over syntax.
- Demonstrate control over intermediate grammatical structures and vocabulary.
- Utilize complex grammatical structures.
- Demonstrate a high-intermediate understanding of usage and mechanics.
- Apply strategies of peer feedback, error analysis, revision, and editing of written work to strengthen earlier drafts.
- Demonstrate ability to proofread and edit text.
- Understand the principles and practices associated with academic integrity including research, borrowing strategies, and citation.
- Use standard writing and formatting conventions (punctuation, capitalization, margins, indentation, and typing).

IELS 89: Intensive English-High Intermediate Level-Learn

Credits 6
This course is for non-native English speakers who wish to improve their English. The course will focus on academic listening and speaking skills at the high-intermediate level.

Prerequisites
On-campus assessment in all skill areas or successful completion of IELS 86. Non-transferable.
Course Outcomes

Express ideas fluently, accurately, and appropriately in spoken American English at a level approaching that required in first-year college courses.
Comprehend and respond appropriately to spoken American English at a level approaching that required in first-year college courses.
Develop and demonstrate effective notetaking strategies of academic lectures at a level approaching that required in first-year college courses.
Demonstrate knowledge of and use American cultural conventions in oral communications at a level approaching that required in first-year college courses.
Klallam (KLA)

**KLA 121 : Introduction to the Klallam Language**

**Credits** 5  
**Quarter Offered** Fall  
An introduction to the basics of Coast Salish languages focusing on Klallam, the language of the northern Olympic Peninsula. After covering the sound system and alphabet with practice in listening, spelling, and pronunciation, the course will introduce the fundamental transitive and intransitive grammatical constructions with an emphasis on useful phrases. This class may include students from multiple sections. (Elective)

**Course Outcomes**
- Pronounce words properly in Klallam.
- Demonstrate accurate hearing and understanding of Klallam useful phrases.
- Demonstrate an understanding of the beauty and complexity of the language.

**KLA 122 : Klallam Language II**

**Credits** 5  
**Quarter Offered** Winter  
This is a continuation of KLA 121. The class will continue deepening and expanding students' understanding of the Klallam language. The class will intensify instruction with more emphasis on transitive, reciprocal, reflexive grammatical constructions, including question construction. These will be covered with ample practice in use. This class may include students from multiple sections. (Elective)

**Prerequisites**  
Completion of KLA 121

**Course Outcomes**
- Apply newly-learned Klallam grammatical constructions through a variety of written and oral assignments at the basic level.
- Demonstrate the ability to have basic conversations, asking and answering questions.
- Demonstrate an understanding of the beauty and complexity of the Coast Salishan languages.

**KLA 123 : Klallam Language III**

**Credits** 5  
**Quarter Offered** Spring  
This is a continuation of KLA 122. We will continue deepening and expanding our understanding of the Klallam language. More on transitive and passive constructions; expressions of time, place, and path; discourse structure and storytelling patterns will be covered with ample practice in use. This class may include students from multiple sections. (Humanities, Elective)

**Prerequisites**  
Completion of KLA 122

**Course Outcomes**
- Apply new Klallam language vocabulary through a variety of written and oral assignments.
- Demonstrate novice level of proficiency in listening, reading, writing, and speaking in Klallam.
- Demonstrate an understanding of the grammar of the Klallam language.

**KLA 221 : Klallam Language IV**

**Credits** 5  
**Quarter Offered** Fall  
Continuation of KLA 123. Mastery of listening, reading, writing, and speaking; review of previous material; introduction to Klallam traditional tales and lore. Learner-centered instruction focusing on translation and analysis of recorded Klallam narratives and conversation. This class may include students from multiple sections. (Elective)

**Prerequisites**  
Completion of KLA 123 or instructor permission

**Course Outcomes**
- Demonstrate intermediate level proficiency in listening, reading, speaking and writing in Klallam.
- Apply new Klallam vocabulary through a variety of written and oral assignments.
- Apply appropriate grammatical structures.
- Describe and discuss the sounds, grammar, and narrative style of the Klallam language.
Apply grammar, vocabulary, and style to continue the Klallam narrative tradition.

**KLA 222 : Klallam Language V**

**Credits** 5  
**Quarter Offered** Winter  
Continuation of KLA 221. Mastery of listening, reading, writing, and speaking; review of previous material; continued exploration of Klallam traditional tales and lore. Learner-centered instruction focusing on translation and analysis of recorded Klallam narratives and conversation. This class may include students from multiple sections. (Elective)  
**Prerequisites**  
Completion of KLA 221 or instructor permission  
**Course Outcomes**  
- Demonstrate intermediate level proficiency in listening, reading, speaking and writing in Klallam.  
- Apply new Klallam vocabulary through a variety of written and oral assignments.  
- Apply appropriate grammatical structures.  
- Describe and discuss the sounds, grammar, and narrative style of the Klallam language.  
- Apply grammar, vocabulary, and style to continue the Klallam narrative tradition.

**KLA 223 : Klallam Language VI**

**Credits** 5  
**Quarter Offered** Spring  
Continuation of KLA 222. Mastery of listening, reading, writing, and speaking; review of previous material; continued exploration into Klallam traditional tales and lore. Learner-centered instruction focusing on translation and analysis of recorded Klallam narratives and conversation. This class may include students from multiple sections. (Elective)  
**Prerequisites**  
Completion of KLA 222 or instructor permission  
**Course Outcomes**  
- Demonstrate intermediate level proficiency in listening, reading, speaking and writing in Klallam.  
- Apply new Klallam vocabulary through a variety of written and oral assignments.  
- Apply appropriate grammatical structures.  
- Describe and discuss the sounds, grammar, and narrative style of the Klallam language.  
- Apply grammar, vocabulary, and style to continue the Klallam narrative tradition.
Licensed Trades Apprenticeship Preparation (LTAP)

**LTAP 110 : Introduction to the Licensed Trades**

**Credits** 2

This course will provide exposure to a variety of different trades and applications to the jobsite. The focus will be on the licensed trades of Pipefitters and Electricians but will include information for other trades of interest. Included in the class will be guest speakers from different trades who will inform students of what it takes to be successful in their respective trade. Students will be provided with physical requirements needed, application requirements, wages, benefits, job opportunities, and any other information pertinent to that specific trade.

**Course Outcomes**
- Apply techniques for working safely in a shop and/or jobsite.
- Explain how to meet the physical requirement needed to enter the licensed trade apprenticeships.
- Describe the licensed trades apprenticeship programs available in Washington State.
- Describe application requirements, wages, benefits, and job opportunities available in a variety of trade unions.
- Describe processes to transfer between trades.
- Identify and use common tools properly and handle materials safely for Pipe Fitters and Electrical trade unions.
- Develop a student portfolio that includes application requirements.

**LTAP 120 : Worksite Behavior, Readiness and Safety**

**Credits** 3

This course will provide instruction in worksite behaviors and expectations: preparing for the workday, communications skills, teamwork skills, pro-active attitude, attendance expectations, integrity, resume writing, mock job interview, appropriate work attire, and what employers are really looking for when hiring. Safety training to include completion of OSHA 10, proper techniques in moving materials and going up and down ladders. Hands on skills testing will be completed as well as proper use and fit of personal protective equipment will be discussed.

**Course Outcomes**
- Explain how to meet the physical requirement needed to enter the licensed trades apprenticeships.
- Apply proper techniques for safe handling, and movement of materials and equipment.
- Demonstrate proper and safe techniques going up and down ladders.
- Describe the concepts of fall protection and apply safe practices in lab setting.
- Complete OSHA 10 Training for Jobsite Hazard Recognition for the Trades.
- Describe acceptable worksite behaviors and expectations.
- Document jobsite activities to employer verbally and in writing by the use of industry standard work records.
- Demonstrate the ability to work in teams and with others through classroom and lab activities.
- Demonstrate punctuality and jobsite readiness through classroom and lab attendance and activities.
- Write resume for a job in the licensed trades.
- Demonstrate successful interview techniques.
- Successfully complete hands-on testing specifically required for the pipe fitters and electrical trades.
- Complete Diversity, Equity and Inclusion Training.

**LTAP 130 : Trades Math**

**Credits** 5

This course will provide students with a solid foundation in mathematical principles needed for a variety of vocational trades. Trades included, but not limited to, Pipefitters, Electricians, Laborers, Ironworkers, Carpenters and Cement Masons. Students will practice the application of the principles in the shop through a variety of apprenticeship preparation activities and tasks.

**Course Outcomes**
- Add and subtract construction fractions
- Calculate and use percentages
- Convert between fractions and decimals
- Use and explain various measuring techniques
- Calculate volume from linear dimensions
- Explain and apply the concepts of lineal footage, square footage and board footage
Explain and apply the concepts of rise, run and diagonal
Calculate material and cost
Measure accurately as prescribed by trade union guidelines
Apply the concepts of construction math, measuring and calculation of materials and cost by passing a comprehensive test that meets the trade union benchmark
Use measuring devices correctly so that accurate measurements are obtained

**LTAP 140 : Plumbing Systems and Materials**

**Credits 10**

This course will provide students with a solid foundation in plumbing systems and the materials used for each system. Topics include material identification, piping systems, proper lifting techniques and skills assessment testing.

**Course Outcomes**

- Identify materials by type and usage.
- Describe types and components of mechanical systems highlighting their differences.
- Describe types of piping systems, differences with each system and materials used in each system.
- Demonstrate proper lifting and setting of varying lengths of pipe in above head hangers.
- Demonstrate successful completion of skills assessments:
  - Tape measure
  - Proper lifting and setting of lengths of pipe in above-head hangers
  - Sorting fittings
  - Climbing ladders
  - Lifting and carrying pipe weighing over 50 lbs
  - Measuring and cutting of materials with a focus on fundamentals
Makah (MAKAH)

MAKAH 121: Introduction to the Makah Language
Credits 5
Quarter Offered Fall
Introduction to the Makah Language is a beginning course in Makah focusing on the Makah Alphabet, pronunciation and accent. Useful phrases, expressions and dialogues at a beginner present tense level will be used. Vocabulary with specific Makah cultural context in balance with modern life situations will make for applicable language use. This class may include students from multiple sections. (Elective)

Course Outcomes
- Identify Makah letters and pronounce Makah sounds correctly.
- Demonstrate understanding of target vocabulary and application of the present tense.
- Categorize the language family and culture group to which Makah belongs.

MAKAH 122: Makah Language II
Credits 5
Quarter Offered Winter
Builds from the Introduction to Makah Language (MAKAH 121) foundation where speech was patterned in the moment. MAKAH 122 incorporates the past tense including functional words to slightly increase speech using words like but not limited to and, or, but, this, that, with, also. Furthermore, the use of past tense scenarios from select Makah historic incidents and traditional story examples will be used to enable learners to apply past tense to share stories from their own lives in Makah. This class may include students from multiple sections. (Elective)

Prerequisites
Completion of MAKAH 121 or instructor permission

Course Outcomes
- Identify spoken or written past and present tenses.
- Make use of Makah audio and written materials from select history and story narratives to examine past tenses usage.
- Construct past tense statements using a life experience to share.

MAKAH 123: Makah Language III
Credits 5
Quarter Offered Spring
Builds grammatically to future tense constructions. Target vocabulary expands to include the five senses and lead words like auxiliary verbs, size, degrees, adjectives, question words, location and emotion. Common phrases to express opinion, thought and planning will be used to help speakers express themselves in the language. This class may include students from multiple sections. (Humanities, Elective)

Prerequisites
Completion of MAKAH 122 or instructor permission

Course Outcomes
- Apply future tenses suffixes to create sentences about future events.
- Compare charts to aid understanding, speaking, reading, or writing in Makah.
- Increase descriptive and lead word vocabulary: auxiliary verbs, color, size, emotions, locations, question words.

MAKAH 221: MAKAH IV
Credits 5
Quarter Offered Fall
MAKAH 221 builds on the foundation of the tenses used in the 100 level classes, but with the conjunctions for making explanations. Target vocabulary will include more places and transportation, with some examples associated with Makah stories. This class may include students from multiple sections. (Elective)

Prerequisites
MAKAH 123

Course Outcomes
- Review Makah tenses and be able to identify the subordinate clause suffix or word in all tenses.
- Apply subordinate clause suffix or word to show the reason something happens, is, or is done.
- Construct dialogues in 1st and 2nd person interactive suffixes.
Demonstrate understanding of comments, phrases, and expressions in relation to place and transportation vocabulary.

**MAKAH 222 : MAKAH V**

**Credits** 5  
**Quarter Offered** Winter  
MAKAH 222 covers the use of conditional sentences, including a continuation of comments, phrases and expressions from MAKAH 221. An additional Makah story, including conditional sentences, will be included in this course. This class may include students from multiple sections. (Elective)  
**Prerequisites**  
MAKAH 221  
**Course Outcomes**  
- Apply the conditional suffix to Makah present tense sentences.  
- Identify past and future constructions which include the conditional suffix and the word for the 'reason why' or 'because'.  
- Construct dialogues with interactive pronouns (We to you and You to us).  
- Demonstrate understanding of comments, phrases, and expressing various emotions.  

**MAKAH 223 : MAKAH VI**

**Credits** 5  
**Quarter Offered** Spring  
MAKAH 223 focuses on the use of relative clauses. Students learn to use informational question words like who or where and use them as relative clauses. The course also focuses on the interactive pronoun suffixes. Traditional Makah stories will guide the curriculum. This class may include students from multiple sections. (Humanities, Elective)  
**Prerequisites**  
MAKAH 222  
**Course Outcomes**  
- Apply relative clause suffixes, basic future tense, using question words as statements to clarify and give pertinent information in sentences like who is doing what, or where something is taking place, etc.  
- Identify past or future tense sentences with the relative clause suffix attached.  
- Increase kitchen and cooking vocabulary using interactions between 3rd and 1st person dialogs by reading and practicing in small groups.  
- Demonstrate the reading of select sentences from the traditional story used in this course.
Management (BAS, Bachelor of Applied Science)

**BAS 301 : Managerial Accounting**

**Credits** 5  
**Quarter Offered** Fall  
This course is intended for students in the Bachelor of Applied Science (BAS) in Applied Management program where understanding the basic principles of financial and managerial accounting is essential in the successful execution of management responsibilities. The course defines financial statement interrelationships, financial analysis, product cost, budgetary control systems, and information reporting for the planning, coordinating, and monitoring of the performance of a business. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas  
**Prerequisites**  
BAS Management Programs Admittance

**Course Outcomes**
- Describe and apply managerial accounting concepts.
- Discuss the purpose of internal control systems in business and develop internal control policies and procedures.
- Read, interpret, and analyze the annual report of a publicly held company, including the primary financial statements (income statement, balance sheet, and the statement of cash flows) and related notes.
- Develop an operational budget and finance budget, describe how to interpret the differences from budgeted amounts when evaluating actual performance and explain how the differences would be investigated.
- Analyze, evaluate, and synthesize accounting information to support business decisions.

**BAS 315 : Management, Leadership, and Organizations**

**Credits** 5  
**Quarter Offered** Fall  
(Formerly BAS 310) People no longer work for a single organization for the duration of their career. With access to social media and the increased transparency into the quality of management and leadership in organizations, people can be more selective in the organizations they choose to work for. Additionally, society is placing an increasing value on work/life balance, diversity, and organizational justice. Entrepreneurs are experimenting with a variety of organizational structures that differ from the dominant pyramid structure with a single focus on shareholder value. In this course, students will learn management, leadership, and problem-solving techniques and be exposed to a variety of organizational cultures and structures. Learning about the variety of management and leadership styles and organizations allows students to determine what type of manager or leader they want to be or work for and what type of organization they want to work in. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas  
**Prerequisites**  
BAS Management Programs Admittance

**Course Outcomes**
- Apply critical thinking techniques to identify problems, understand the situation, define the end state, identify alternatives, decide on a solution, create a plan to implement the solution, and reflect to learn.
- Assess a situation, identify potential improvements in individual and group effectiveness, and determine if management or leadership skills are needed and what type of influence and motivation should be utilized to move the organization toward achieving the strategic goals.
- Practice effective communication to learn how to influence colleagues to improve the organization's structure, culture, and/or processes.
- Differentiate a variety of organizations' cultures and structures and assess their impacts on customer and employee satisfaction.
- Identify individual strengths and weaknesses in emotional intelligence as well as management, and leadership skills.
BAS 325: Legal Environments in Management
Credits 5
Quarter Offered Winter
An introduction to the traditional and emerging legal principles and theory involved in Business Management, Human Resource Management, Information Technology Management, Entrepreneur/Marketing Management and Tribal Management. Course outcomes will be applied to the student's specialization area: Human Resources, Information Technology, Entrepreneur/Marketing and Tribal Management. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas
Prerequisites
BAS Management Programs Admittance
Course Outcomes
- Define and describe Legal Principles in various managerial positions.
- Demonstrate how to apply the legal principles to avoid or mitigate lawsuits.
- Explain contractual relationships including the potential risk and liability when a contract is breached.
- Apply legal principles regarding consumer relations, damages, remedies, indemnification, and hold harmless agreements when negotiating workable business and consumer contracts.
- Demonstrate a knowledge of Equal Employment Opportunity Commission (EEOC), state safety and regulations that affect the workplace.

BAS 330: Management Information Systems
Credits 5
Quarter Offered Winter
The discipline of Management Information Systems (MIS) bridges the gap between computer science disciplines and business disciplines such as marketing, strategic management, and finance among others. The term Management Information Systems encompasses a multitude of definitions depending on the source. The definition applied in this course is that MIS consists of technologies and processes that are used to collect and analyze data, convert it into information, on which a decision can be made, and then disseminate the information to the appropriate people an organization. This course will focus on such topics as information technology (IT) infrastructure, Enterprise Applications, databases as decision support systems, and others. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas
Prerequisites
BAS Management Programs Admittance
Course Outcomes
- Understand how and where data is stored and how to access it including fundamental data concepts, database structures, types of databases, data warehouses, and database management.
- Analyze and synthesize the three types of searches for data, based on Simon's four phases of decision making, including unstructured, structured adhoc, and structured continuous.
- Assess the importance of computerized decision support systems.
- Understand and apply information types to assess the data and convert it into information.
- Assess the impact of information on the organization and communicate information via easily understood formats including reports and dashboards.

BAS 340: Applied Financial Management
Credits 5
Quarter Offered Spring
An introduction to the application of financial management principles. Includes the analysis of financial statements for planning and control, cash and capital budgeting, risk and return, capital structure, and financing the short- and long-term requirements of the firm. Students will apply basic tools and techniques used to value a firm and evaluate and fund prospective investment opportunities. This class may include students from multiple sections.
Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

Prerequisites
BAS Management Programs Admittance; BAS 301 or instructor permission

Course Outcomes
- Define and apply the basic finance concepts, principles, terminology, and techniques.
- Apply present value concepts to value a business and evaluate potential capital investments.
- Describe working capital management policies.
- Apply tools of financial analysis and planning.
- Demonstrate competency in excel to create a budget of financial and cash forecasting.

BAS 358: Marketing for Managers

Credits 5
Quarter Offered Winter
The preeminent business visionary, Peter Drucker, described marketing as one of the two most important elements of an organization's success. This is true for both nonprofit and for-profit organizations. Although social media is a new and highly valuable marketing tool, social media needs to augment, as opposed to replace, marketers’ foundational tools of TV, radio, and print media. Additionally, with the bombardment of marketing messages combined with the elimination of commercials, it’s more difficult than ever for marketers to construct engaging messages and get them to the right audience. In this course, students will learn about and assess the benefits and disadvantages of traditional marketing tools as well as social media. Students will also compose stories that will generate both long-term brand loyalty and short-term sales. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

Prerequisites
BAS Management Programs Admittance

Course Outcomes
- Discuss various concepts, theories, and principles of social media management.
- Understand and apply Metcalf’s Law.
- Understand and apply current social media trends.
- Research social media users, and design a social media for a site appropriate to users’ needs.
- Plan a social media marketing campaign.
- Identify and access the effects of mobile social media.
- Identify and apply change management techniques to the implementation of social media elements within an organization.

BAS 380: Project Management

Credits 5
Quarter Offered Spring
In management, projects are major undertakings that have a limited duration (i.e., finite completion point) and, as such, require a unique approach for administration. Course covers the theory and practice of project management in the context of technical and human resource constraints. Students learn to apply the knowledge, skills, tools, and techniques for project activities necessary to meet project requirements through the use of software and the approaches prescribed by the PMBOK. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

Prerequisites
BAS Management Programs Admittance

Course Outcomes
- Practice leadership and management techniques to incorporate a diversity of views and opinions to quickly move a team from the forming stage into the performing stage, creatively resolve issues, and achieve organizational objectives.
- Practice interpersonal communication techniques to share ideas, exchanging information; and effectively influence a variety of stakeholders.
Utilize a variety of tools to communicate team and individual deliverables, receive and provide project updates, and resolve problems to ensure the project remains on track.

Construct project plan consisting of a charter, project scope, identified stakeholders, communication plan, work breakdown structure and Gantt chart, human resource needs, budget, as well as risk assessment.

**BAS 390 : Human Resources Management**

**Credits** 5  
**Quarter Offered** Fall  

This course explores human resource management as a way to achieve high levels of organizational performance. In this class, we will evaluate the strategic importance, ethical issues, and organizational impact related to the following areas of human resources: talent acquisition and talent management; organizational development; the legal environment of business; global HR; training and development; diversity; and total rewards (compensation and benefits). This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas  

**Prerequisites**  
BAS Management Programs Admittance  

**Course Outcomes**  
- Understand the world of Human Resources.  
- Apply Human Resource principles to an organization.  
- Apply Human Resource policies to help an organization's strategy.

**BAS 435 : Operations Management**

**Credits** 5  
**Quarter Offered** Fall  

Unique aspects of managing and growing small- to medium-sized businesses, including strategic and operational planning, ethical issues, organizational controls and tools, marketing management and techniques, financial analysis and accounting, risk management, human resource management, and international opportunities. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas  

**Prerequisites**  
BAS Management Programs Admittance; BAS 301, BAS 315 and MATH& 146 or instructor permission  

**Course Outcomes**  
- Identify, analyze, and resolve cost related problems for producing goods and rendering services to increase an organization's market competitiveness.  
- Demonstrate interpersonal communication skills using negotiating techniques to build allian relationships and drive down costs.  
- Evaluate a variety of processes for delivering a service or constructing a product including outsourcing and the integration of such technology as automation and robotics to drive down costs.  
- Apply the LEAN methodology to identify activities that add value for the customer and assess the potential for reducing waste from processes without sacrificing productivity.

**BAS 461-465 : BAS Internship**

**Credits** 1 -5  

BAS students will experience the links between management theory and practice through the application, in a work setting, of the knowledge and skills gained in the classroom. They will demonstrate skills and knowledge in the focus area of their internship; effective management; time commitments and responsibilities of managers; the host organization's structure, policies and practices; and interpersonal skills. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas  

This class has a $7.21 liability insurance course fee.
Prerequisites
BAS Management Programs Admittance

Course Outcomes
- Apply skills that relate to management in the workplace.
- Identify individual strengths and weaknesses related to management skills and behaviors.
- Acquire new management-level skills and behaviors.
- Demonstrate effective communication and interpersonal behaviors in the workplace.
- Demonstrate initiative and time management in a workplace setting.

BAS 485 : Ethics for Managers
Credits  5  
Quarter Offered Winter
Managers will face many important and far-reaching decision making, ethical, and leadership situations in their professional lives. This course provides a systematic way to approach decisions, ethics, and leadership. It analyzes complex decision, ethical, and leadership problems by breaking them into manageable pieces and by providing important insights that will lead to clarity of thought and commitment to action. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

Prerequisites
BAS Management Programs Admittance

Course Outcomes
- Recognize and resolve potential and real ethical issues within an organization that may result in a tarnished brand and/or legal liabilities.
- Practice effective communication to influence colleagues to prevent and/or resolve ethical issues.
- Assess individual, personal ethical values using one or more of the theories of ethics to determine how to resolve ethical issues.
- Identify the multiple ethical interests at stake in real-world situations and articulate what makes a particular course of action ethically defensible and why.

BAS 490 : Strategic Management & Policy
Credits  5  
Quarter Offered Spring
Course explores strategic issues facing organizations, including top management decision making and social responsibility; environmental and industry analysis; establishing organizational mission and objectives; corporate, business and functional level strategy formulation; global and multi-domestic Strategies; strategic implementation and control; and integrating operations, finance, marketing and human resource strategies. Computer modeling to solve strategic problems is used throughout the class. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

Prerequisites
BAS Management Programs Admittance; BAS 358, BAS 340, and BAS 435

Course Outcomes
- Construct an organization with internal core capabilities including the enterprise’s culture, structure, compensation, the quality and pricing of products and services, ethical standards, operational efficiencies, and relationships with stakeholders to create a competitive advantage.
- Formulate a marketing plan to generate brand awareness and increase revenue.
- Design a financial plan to maintain the organization’s fiscal well-being.
- Develop external strategies such as cost leadership, product differentiation, vertical integration, and strategic alliances to increase long-term competitiveness.
Marine Technology (MTEC)

MTEC 101 : Outboard Motor Repair and Maintenance
Credits 7
Quarter Offered  Fall
Learn how to maintain and install outboard motors, rig new boats, select propellers, and repair two-stroke and four-stroke engines. Class includes hands-on routine maintenance and how to troubleshoot, diagnose, prepare estimates for outboard engine repair. Basic trailer repair and maintenance included. This class may include students from multiple sections.
Course Outcomes
- Repair, maintain, repower, and install outboard engines
- Demonstrate outboard engine safety protocols
- Select and test appropriate propeller for a given vessel
- Apply basic electronics to the installation of an outboard engine
- Apply rigging skills to connect outboard engine to boat systems such as steering, throttle, shift, and communication systems
- Prepare cost estimates for outboard motor repair and installation
- Maintain and repair a boat trailer

MTEC 102 : Marine Electronics
Credits 8
Quarter Offered  Fall
Introduction to basic electrical theory and marine electronics, repair, safety, rigging, and corrosion prevention. Learn how to read and interpret wiring diagrams. Includes Ohm’s law, cable installation, volt systems, and standards for wiring, battery installation and testing, inverters, AC and DC circuit installation and troubleshooting boat equipment and systems. This class may include students from multiple sections.
Course Outcomes
- Maintain, repair, test and install electrical controls and components involved with various main propulsion and power generation units and auxiliary systems
- Demonstrate the use of blueprints and schematics to layout wire ways, install cable trays and install hangers
- Select appropriate rigging systems for inboard and outboard engines
- Connect batteries, marine lighting, digital controls, power distribution and shore power systems
- Install marine network, navigation, and electronic control systems
- Develop a marine corrosion prevention plan

MTEC 103 : Marine Systems
Credits 8
Quarter Offered  Winter
Marine systems safety, maintenance and repair of shipboard mechanical systems. Includes propulsion and motor power principles, engines, propellers, steering systems, controls, instruments, and accessories. Students will learn hands-on routine maintenance and how to troubleshoot and service marine mechanical systems, plumbing, pumps, and rigging. Includes the proper methods of installation, safety, testing, trouble shooting, diagnostics and repair of marine mechanical equipment. This class may include students from multiple sections.
Course Outcomes
- Identify and install instruments, accessories, and control systems on a marine vessel
- Troubleshoot systems quickly and accurately and recommend appropriate course of action
- Test newly installed equipment for proper operations
- Upgrade existing systems and make adjustments to maximize performance
- Demonstrate use of proper safety protocols to recognize unsafe situations that may occur
- Identify proper safety precautions and determine appropriate protective equipment

MTEC 104 : Marine Finishing
Credits 6
Quarter Offered  Winter
Hands on class teaches students how to install interior components of an aluminum boat. Learn the causes of corrosion in the marine environment and methods of corrosion control and prevention. This class may include students from multiple sections.

**Course Outcomes**
- Properly install interior components, apply coatings, and perform detailing to manufacture vessels to appropriate specifications
- Demonstrate the use of carpentry tools to construct and install interior joinery and cabinetry
- Apply vessel coatings such as interior/bottom paint, non-skid, clear coat, and vinyl
- Properly install interior components such as seats/cushions, insulation, trim, paneling, flooring, and windows
- Properly install vessel accessories and hardware
- Apply appropriate marine coatings for corrosion prevention
- Properly install insulation, wall panels, seating, and marine deck systems

**MTEC 105 : Fiberglass and Composites**

**Credits** 6

**Quarter Offered** Spring

Prepare and use resin fiberglass panels and molds to produce and bond together marine components for vessel assembly. Class includes repair and finishing of resin surfaces. Prepare exterior surfaces of boats for priming and painting. This class may include students from multiple sections.

**Course Outcomes**
- Measure and cut materials to the required dimensions using hand and/or power tools
- Mix resin and catalyst in proper proportions and apply by hand or with spray tool
- Clean, wax and prepare molds for use
- Grind fiberglass and paint finished surfaces
- Demonstrate the use of techniques such as hand sanding, sanding blocks, long boarding, orbital sanders and other techniques to prepare surfaces for priming and painting
- Apply and work with putties, fiberglass, panels, and components to prepare for assembly

**MTEC 106 : Marine Spill Response**

**Credits** 4

**Quarter Offered** Spring

Oil spill responders protect marine ecosystems by minimizing the environmental impact of an oil spill. This class provides an introduction to marine oil spill response, risk management, chemical safety in clean-up, decontamination, and scientific discoveries and innovations that minimize damage to marine and coastal environments. Students will discuss the impact of oil spills on marine life, coastal preservation, and other issues that affect the wellbeing of oceans and waterways. Course aligns with International Convention on Oil Pollution Preparedness, Response, and Cooperation conventions for first-line marine spill responders. This class may include students from multiple sections.

**Course Outcomes**
- Apply a basic working knowledge of equipment used in marine oil spill response
- Demonstrate appropriate response to various types of oil spill cleanup activities
- Select appropriate containment boom to collect oil
- Deploy, retrieve, and process boom and sorbent materials
- Set up temporary storage capacity for recovered product
- Demonstrate how to use remote sensing tools for tracking and identification of recoverable oil
- Complete and submit appropriate paperwork and reports
- Compare and contrast open ocean, shoreline, inland, and non-floating oil spill scenarios and responses
- Describe the impact of oil spills on oceans, waterways, and coastal preservation
- Work effectively in team environment and provide support and assistance

**MTEC 107 : Boat Safety**

**Credits** 1

**Quarter Offered** Spring

Basic boating navigation, safety, emergency response, and legal requirements of boating in Washington State. Class includes overview of American Boat and Yacht Council (ABYC) standards and preparation for the Washington State boater's card. This class may include students from multiple sections.

**Course Outcomes**
Identify types of boats and common parts of a boat
Describe navigation rules and traffic laws of waterways
Discuss Washington's legal requirements of boating and safety
List boating safety standards and emergency response procedures

MTEC 291: Marine Technology Internship

Credits 1
-5
Quarter Offered Fall, Winter, Spring, Summer

This class will provide opportunities for students to participate in internships with local employers. This class may include students from multiple sections.

Course Outcomes
- Apply skills, concepts, and procedures used in the field and workplace setting
- Identify individual strengths and weaknesses related to workplace skills and behaviors
- Demonstrate effective communication and interpersonal behaviors in the workplace
- Demonstrate initiative and time management in a workplace setting
Math - Applied (AMATH)

AMATH 121: Applied Math for Professional & Tech Programs I

Credits  5
Quarter Offered  Fall, Winter, Spring, Summer

College mathematics used in professional and technical programs. Content includes mathematical modeling and applications employing numerical operations; measurements; geometry; linear and nonlinear equations; exponent, radical, and polynomial operations; functions; formulas; plane analytical geometry with graphing; and an introduction to trigonometry. This class may include students from multiple sections.

Prerequisites  MATH 63 or acceptable placement test score

Course Outcomes
- Simplify numerical expressions.
- Convert and compute measurements.
- Simplify algebraic expressions.
- Solve equations and formulas.
- Solve and graph linear functions.
- Analyze and interpret statistical data.
- Apply elementary geometric concepts.
- Apply elementary right triangle trigonometry concepts.
Mathematics (MATH/MATH&)

MATH& 107 : Math in Society

Credits  5
Quarter Offered  Fall, Winter, Spring, Summer
A study of a variety of mathematical topics for non-science majors. The topics covered may differ between sections, but may include problem solving strategies, logic, set theory, number theory, mathematics of finance, probability and statistics, or geometry. This class may include students from multiple sections. (Quantitative Skills, Natural Sciences, Elective)

Prerequisites
P in MATH 90 or equivalent

Course Outcomes
[MR] Mathematical Reasoning: Students will read a complex problem requiring quantitative and/or symbolic analysis, use flexibility in selecting a solution strategy, and impose an appropriate mathematical structure or mathematical procedure in solving the problem.
[MH] Mathematical Habits of Thought: Students will determine the reasonableness and implications of mathematical solutions, and will recognize the limitations of the methods used in context.
[MC] Mathematical Communication: Student will use appropriate representations to effectively communicate, orally and in writing, quantitative results and mathematical processes.
[MS] Mathematical Symbols, Techniques & Computation: Students will demonstrate proficiency in the skills supporting mathematical understanding.

MATH& 141 : Precalculus I

Credits  5
Quarter Offered  Fall, Winter
Analysis of linear, piecewise, quadratic, polynomial, rational, inverse, exponential, and logarithmic functions; their applications; and their graphs. This class may include students from multiple sections. (Quantitative Skills, Natural Sciences, Elective)

Prerequisites
P in MATH 98 or MATH& 148 or equivalent

Course Outcomes
Students who successfully complete this class should be able to:
- Demonstrate the use of function notation and terminology.
- Perform function arithmetic and composition.
- Analyze the graphical behavior of functions, including transformations.
- Find real and complex zeros of polynomials.
- Evaluate, graph, and identify important properties of linear, piecewise, quadratic, polynomial, rational, inverse, exponential, and logarithmic functions.
- Solve equations, inequalities and application problems related to the functions stated above.

MATH& 142 : Precalculus II

Credits  5
Quarter Offered  Winter, Spring
Conic sections; trigonometric functions; identities; inverse trigonometric functions; trigonometric equations; solutions of right triangles; laws of sines and cosines; vectors; polar coordinates; and complex numbers. This class may include students from multiple sections. (Quantitative Skills, Natural Sciences, Elective)

Prerequisites
2.0 or higher in MATH& 141 or equivalent

Course Outcomes
Students who successfully complete this class should be able to:
- Evaluate, analyze and graph trigonometric and inverse trigonometric functions.
- Apply the triangular and circular definitions of the trigonometric functions.
- Verify and apply trigonometric identities.
Solve trigonometric equations.
Analyze and graph conic sections, parametric equations, and polar equations.
Graph and perform basic operations with vectors.
Solve application problems.

**MATH& 146: Introduction to Stats**

**Credits** 5  
**Quarter Offered** Fall, Winter, Spring, Summer  
Introduction to methods and applications of elementary descriptive and inferential statistics; summarizing data graphically and numerically, probability, confidence intervals, hypothesis testing, correlation and linear regression. This class may include students from multiple sections. (Quantitative Skills, Natural Sciences, Elective)

**Prerequisites**  
P in MATH 90 or equivalent

**Course Outcomes**  
Communicate statistical ideas with appropriate notation and terminology.  
Describe, interpret and analyze data for one and two variables using verbal, numerical, and graphical representations.  
Examine populations by analyzing probability and randomness in data.  
Apply and interpret a variety of inferential statistical techniques.  
Determine, analyze, and apply correlation and linear regression models.  
Analyze and assess statistical arguments like those found in the popular press as well as in scholarly publications.  
Use technology appropriately and efficiently.

**MATH& 148: Business Calculus**

**Credits** 5  
**Quarter Offered** Winter  
Limits, rates of change, graphing, differentiating, optimizing, polynomials, integration, logarithmic and exponential functions, implicit differentiation, business applications. This class may include students from multiple sections. (Quantitative Skills, Natural Sciences, Elective)

**Prerequisites**  
2.0 or higher in MATH& 141 or MATH 111

**Course Outcomes**  
Evaluate the limit of a function, including the limit as x approaches infinity and one-sided limits, using graphical, numerical and algebraic methods.  
Compute and interpret the average rate of change and the instantaneous rate of change of a function.  
Compute the derivative of a function using the limit definition and derivative rules: power, constant multiple, sum and difference, product, quotient, chain, exponential, and logarithmic.  
Use differentiation to solve business application problems.  
Find extrema and solve optimization problems.  
Find inflection points (points of diminishing returns).  
Compute antiderivatives.  
Use the Fundamental Theorem of Calculus to compute definite integrals.  
Use integration to solve business application problems.

**MATH& 151: Calculus I**

**Credits** 5  
**Quarter Offered** Fall, Spring  
Limits and continuity; techniques and applications of derivatives of algebraic and transcendental functions; an introduction to antiderivatives. This class may include students from multiple sections. This class may include students from multiple sections. (Quantitative Skills, Natural Sciences, Elective)

**Prerequisites**  
2.0 or higher in MATH& 142 or equivalent

**Course Outcomes**  
Students who successfully complete this class should be able to:
Calculate limits of functions using graphs, numerical data, and algebraic methods; and use limits to determine continuity.
State the definition of a derivative and use it to find the derivative of functions.
Use the general differentiation rules to calculate derivatives of algebraic functions, transcendental functions, and combinations of those functions.
Apply derivatives to solve application problems and determine the behavior of functions.

**MATH& 152 : Calculus II**

*Credits 5*

*Quarter Offered* Winter

Integration involving algebraic and transcendental functions. Applications of integration, including an introduction to differential equations. This class may include students from multiple sections. (Quantitative Skills, Natural Sciences, Elective)

**Prerequisites**
2.0 or higher in MATH& 151 or equivalent

**Course Outcomes**
Students who successfully complete this class should be able to:

- State the Fundamental Theorem of Calculus and apply it to solve definite integrals.
- Use various integration techniques to calculate definite, indefinite, and improper integrals.
- Calculate areas between curves, volumes, arc lengths, and areas of a surface of revolution.
- Use integration to solve separable differential equations.

**MATH& 163 : Calculus III**

*Credits 5*

*Quarter Offered* Spring

Sequences and series, vector algebra and vector functions, functions of several variables, and partial derivatives. This class may include students from multiple sections. (Quantitative Skills, Natural Sciences, Elective)

**Prerequisites**
2.0 or higher in MATH& 152 or equivalent

**Course Outcomes**
Students who successfully complete this class should be able to:

- Apply basic convergence tests for series.
- Represent functions as a power, Maclaurin, or Taylor series.
- Apply calculus techniques to parametric equations.
- Find areas and arc lengths in polar coordinates.
- Perform vector operations, including dot and cross products.
- Find equations of lines and planes in three-space.
- Find derivatives, integrals, velocity, acceleration, arc length, and curvature of vector functions.
- Calculate partial derivatives and apply to find tangent planes, linear approximations, extrema, and saddle points.
- Calculate double integrals over rectangular and general regions, both in rectangular and polar coordinates.

**MATH 63 : Introduction to Algebra**

*Credits 5*

*Quarter Offered* Fall, Winter, Spring, Summer

Fundamentals of arithmetic using integers, fractions, decimals, exponents, and square roots; solving basic linear equations; solving problems using percents, proportions, and basic geometry. This class may include students from multiple sections.

**Prerequisites**
Placement exam

**Course Outcomes**

- Recognize the difference between a variable and a constant.
- Add, subtract, multiply, and divide integers.
- Follow the order of operations.
- Evaluate algebraic expressions given values for the variables.
Translate English statements into algebraic statements.
Add, subtract, multiply, divide, and simplify fractions.
Add, subtract, multiply, and divide decimal numbers.
Solve linear equations.
Use the rules of exponents.
Solve problems involving percent.
Solve proportions.
Apply and extend concepts to various problems.

**MATH 90: Essentials of Intermediate Algebra**

**Credits** 5

**Quarter Offered** Fall, Winter, Spring, Summer

This course develops proficiency with solving linear equations and inequalities, simplifying expressions using the rules of exponents, adding/subtracting/multiplying polynomials, graphing various types of equations and linear inequalities, solving systems of linear equations and inequalities, and finding the equations of lines. This class may include students from multiple sections.

**Prerequisites**
P in MATH 63 or equivalent

**Course Outcomes**
- Complete a variety of algebraic tasks including adding/subtracting/multiplying polynomials, simplifying exponential expressions, and solving linear equations, inequalities, absolute value equations and inequalities, systems of linear equations, and systems of linear inequalities graphically.
- Graph lines.
- Construct equations of lines.

**MATH 98: Intermediate Algebra for Calculus**

**Credits** 5

**Quarter Offered** Fall, Winter, Spring, Summer

This course will expose students to a variety of algebraic techniques that will prepare them for precalculus and calculus. Focus will be placed on quadratic, rational, radical, exponential, and logarithmic expressions and equations. Techniques will include factoring, simplifying (adding/subtracting/multiplying/dividing) polynomials, rational, radical, exponential and logarithmic expressions. This class may include students from multiple sections.

**Prerequisites**
P in MATH 90 or equivalent

**Course Outcomes**
- Apply mathematical operations to simplify a variety of mathematical expressions including polynomial, rational, radical, exponential, and logarithmic expressions.
- Apply mathematical operations to solve a variety of mathematical equations including absolute value, quadratic, rational, radical, exponential and logarithmic equations.

**MATH 106: Math for Elementary Teachers I**

**Credits** 5

**Quarter Offered** Winter (even year)

Designed for future K-6 teachers. Focus is on mathematical concepts, including counting, number sense, operations, algorithms, fractions, ratio, and proportion. Method topics include teaching strategies, assessment methods, and processes of doing mathematics as related to elementary mathematics. This course does not fulfill the quantitative skills requirement for the AA-DTA degree. This class may include students from multiple sections. (Elective)

**Course Outcomes**
- Understand and apply foundations of current pedagogical theories of the learning mathematics by elementary students, particularly with respect to the mathematical concepts in the K-8 curriculum.
- Analyze, understand, and apply the four fundamental operations of arithmetic.
- Analyze, understand, and apply number theory, including divisibility and factorization.
- Analyze, understand, and extend the number system to include fractions and rational numbers, decimals, exponents, and real numbers.
MATH 108 : Math for Elementary Teachers II  
Credits  5  
Quarter Offered  Spring (even year)  
Methods topics include teaching the usage of technology. Math topics include algebra, geometry, measurement, and statistics. This course satisfies the quantitative skills requirement for the AA-DTA degree, provided that Math for Elementary Teachers I has also been completed satisfactorily. This class may include students from multiple sections. (Quantitative Skills, Natural Sciences, Elective)  
Prerequisites  MATH 106 and P in MATH 90 or equivalent  
Course Outcomes  
Understand and apply foundations of current pedagogical theories of the learning mathematics by elementary students, particularly with respect to the mathematical concepts in the K-8 curriculum.  
Analyze, understand, and solve problems involving proportional reasoning and uncertainty and probability.  
Analyze, understand, and solve problems involving three facets of geometry: shapes, transformations of shapes, and measurement.  

MATH 111 : Finite Mathematics  
Credits  5  
Quarter Offered  Fall  
The study of linear, quadratic, rational, exponential, and logarithmic functions, and solving their related equations; systems of equations; matrices; linear programming (graphically); and the mathematics of finance. This class may include students from multiple sections. (Quantitative Skills, Natural Sciences, Elective)  
Prerequisites  P in MATH 90 or equivalent  
Course Outcomes  
Use function notation and terminology.  
Evaluate, interpret, and perform basic function operations on linear, quadratic, rational, exponential, and logarithmic functions.  
Solve linear, quadratic, rational, exponential, and logarithmic equations using symbolic and graphical techniques.  
Determine, solve, and interpret financial calculations related to compound interest, annuities, and loans.  
Solve systems of linear equations in two variables.  
Construct and interpret matrices; solve systems of equations using matrices; and perform basic matrix operations.  
Solve linear programming problems graphically.  

MATH 210 : Linear Algebra  
Credits  5  
Quarter Offered  Spring (even year)  
This course covers the following topics: linear equations, matrix algebra, use of technology, rigorous proof, vector spaces, linear independence, basis, orthogonality, linear transformations, eigenvalues/ vectors, Gram-Schmidt, least squares regression, and applications. This class may include students from multiple sections. (Quantitative Skills, Elective)  
Prerequisites  2.0 or higher in MATH& 152  
Course Outcomes  
Discuss mathematics verbally, algebraically, numerically, and graphically in a group setting.  
Write detailed solutions using appropriate mathematical language.  
Apply appropriate mathematical concepts to various problems.  
How do we achieve these goals?  
For #1, small discussion groups provide students with regular opportunities to discuss and present mathematics both formally and informally.  
For #2, students will be provided with regular opportunities to write detailed solutions on discussion sheets, homework, assessments/exams, computer algebra systems, etc.  
We approach #3 in two stages:  
Fundamentals: These are the building blocks of more complex concepts. We discuss and practice these in class.
Synthesis: At this next level, small discussion groups are used to focus on combining the building blocks into more complex techniques by breaking problems in smaller pieces, then solving each and combining the results.

**MATH 224 : Intermediate Analysis**

**Credits** 3  
**Quarter Offered** Occasionally  
Review of double integrals in Cartesian and polar coordinates; triple integrals in Cartesian, cylindrical, and spherical coordinates; vector fields; surface integrals; Green's theorem; divergence theorem; Stokes' theorem; sequences and series; Taylor's theorem. This class may include students from multiple sections. (Quantitative Skills, Elective)  
**Prerequisites**  
2.0 or higher in MATH& 163 or equivalent  
**Course Outcomes**  
Discuss a fourth course in calculus concepts verbally, algebraically, numerically, and graphically in a group setting.  
Write detailed solutions using appropriate mathematical language.  
Apply appropriate mathematical concepts to various problems.  
How do we achieve these goals?  
For #1, small discussion groups provide students with regular opportunities to discuss and present mathematics both formally and informally.  
For #2, students will be provided with regular opportunities to write detailed solutions on discussion sheets, homework, assessments/exams, computer algebra systems, etc.  
We approach #3 in two stages:  
Fundamentals: These are the building blocks of more complex concepts. We discuss and practice these in class.  
Synthesis: At this next level, small discussion groups are used to focus on combining the building blocks into more complex techniques by breaking problems in smaller pieces, then solving each and combining the results.

**MATH 238 : Differential Equations**

**Credits** 5  
**Quarter Offered** Spring (odd year)  
Introduction to applied problem solving with first and second order ordinary differential equations using analytical, numerical and graphic methods. This class may include students from multiple sections. (Quantitative Skills, Elective)  
**Prerequisites**  
2.0 in MATH& 152 or equivalent  
**Course Outcomes**  
Discuss mathematics verbally, algebraically, numerically, and graphically in a group setting.  
Write detailed solutions using appropriate mathematical language.  
Apply appropriate mathematical concepts to various problems.  
How do we achieve these goals?  
For #1, small discussion groups provide students with regular opportunities to discuss and present mathematics both formally and informally.  
For #2, students will be provided with regular opportunities to write detailed solutions on discussion sheets, homework, assessments/exams, computer algebra systems, etc.  
We approach #3 in two stages:  
Fundamentals: These are the building blocks of more complex concepts. We discuss and practice these in class.  
Synthesis: At this next level, small discussion groups are used to focus on combining the building blocks into more complex techniques by breaking problems in smaller pieces, then solving each and combining the results.
Medical Assisting (MED)

MED 101: Introduction to Clinical Medical Assisting
Credits 5
Quarter Offered Fall
This course is an introduction to the medical assisting profession. Students explore areas where they might find employment as medical assistants and begin developing employment related skills and documents while expanding their effective communication skills. Students will begin learning the foundations for clinical practice in providing patient care as medical assistants. This course includes a skills laboratory component. Students will be instructed in the use of an educational electronic medical record (EMR) system. This class may include students from multiple sections.

Prerequisites
Medical Assisting Program Admittance

Course Outcomes
Competencies/Objectives/Outcomes/Methods of Assessment/Assignment:

Foundations for Clinical Practice

I. Anatomy, Physiology, and Pharmacology
   I.C.11. Identify quality assurance practices in healthcare
   I.P.1. Accurately measure and record:
      a. blood pressure
      b. temperature
      c. pulse
      d. respirations
      e. height
      f. weight (adult)
      i. oxygen saturation
   I.P.8. Instruct and prepare a patient for a procedure or treatment
   I.P.9. Assist provider with patient exam

III. Infection Control
   III.C.5. Identify the principles of standard precautions
   III.C.6. Identify personal protective equipment (PPE)
   III.C.7. Identify the implications for failure to comply with Centers for Disease Control (CDC) regulations in health care settings
   III.P.2. Select appropriate barrier/personal protective equipment (PPE)
   III.P.3. Perform handwashing
   III.P.10. Demonstrate proper disposal of biohazardous material:
      a. sharps
      b. regulated wastes

Applied Communications

V. Concepts of Effective Communication
V.C.1. Identify types of verbal and nonverbal communication
V.C.2. Identify communication barriers
V.C.3. Identify techniques for overcoming communication barriers
V.C.4. Identify the steps in the sender-receiver process
V.C.5. Identify challenges in communication with different age groups
V.C.9. Identify the principles of self-boundaries
V.C.10. Identify the role of the medical assistant as a patient navigator
V.C.11. Identify coping mechanisms
V.C.12. Identify subjective and objective information
V.C.13. Identify the basic concepts of the following theories:
    a. Maslow
    b. Erikson
    c. Kubler-Ross
V.C.14. Identify issues associated with diversity as it relates to patient care
V.C.15. Identify the medical assistant’s role in telehealth Medical Law and Ethics

X. Legal Implications
    X.P.1. Locate a state’s legal scope of practice for medical assistants
    A.6. Recognize personal boundaries

MED 102: Medical Terminology for Medical Assistants
Credits 5
Quarter Offered Fall
Study of medical terminology using a body systems approach, relating terms to the anatomy and physiology of
the human body. Word parts are used to build, analyze, define, spell, and pronounce medical terms, including
abbreviations. Structural, directional, disease and disorder, surgical, and diagnostic terms will be covered for
body structures, body systems, and specialized areas of medicine such as oncology. This class may include
students from multiple sections.
Prerequisites
Medical Assisting, Medical Office Assisting or Phlebotomy Program Admittance

Course Outcomes
Competencies/Objectives/Outcomes/Methods of Assessment/Assignment: Foundations for Clinical Practice

I. Anatomy, Physiology, and Pharmacology
    I.C.1. Identify structural organization of the human body
    I.C.2. Identify body systems
        Body systems must include, but are not limited to, the following: circulatory, digestive, endocrine,
        integumentary, lymphatic, muscular, nervous, sensory, reproductive, respiratory, skeletal, and urinary
    I.C.3. Identify:
        a. body planes
        b. directional terms
        c. quadrants
        d. body cavities
    I.C.4. Identify major organs in each body system
        Body systems must include, but are not limited to, the following: circulatory, digestive, endocrine,
        integumentary, lymphatic, muscular, nervous, sensory, reproductive, respiratory, skeletal, and urinary
    I.C.5. Identify the anatomical location of major organs in each body system
        Body systems must include, but are not limited to, the following: circulatory, digestive, endocrine,
        integumentary, lymphatic, muscular, nervous, sensory, reproductive, respiratory, skeletal, and urinary
I.C.6. Identify the structure and function of the human body across the life span
I.C.7. Identify the normal function of each body system
   Body systems must include, but are not limited to, the following: circulatory, digestive, endocrine, integumentary, lymphatic, muscular, nervous, sensory, reproductive, respiratory, skeletal, and urinary

Applied Communications

V. Concepts of Effective Communication

V.C.8. Identify the following related to body systems:
   Body systems must include, but are not limited to, the following: circulatory, digestive, endocrine, integumentary, lymphatic, muscular, nervous, sensory, reproductive, respiratory, skeletal, and urinary

   a. Medical terms
   b. Abbreviations

V.P.2. Correctly use and pronounce medical terminology in health care interactions
A.1. Demonstrate critical thinking skills

MED 105 : HIV/AIDS and Other Bloodborne Pathogens for Medical Assistants
Credits 1
Quarter Offered Fall, Summer
This course offers training in the etiology, epidemiology, transmission, testing, and treatment of HIV/ AIDS, Hepatitis B and C, and many other bloodborne pathogens. Students will review infection control, counseling and confidential interviews with patients, and the legal, ethical, and psychosocial issues related to exposure to bloodborne pathogens and other potentially infectious materials. This class may include students from multiple sections.

Course Outcomes
Competencies/Objectives/Outcomes/Methods of Assessment/Assignment:

   Describe the etiology and epidemiology of HIV/AIDS, associated opportunistic infections, and side effects related to treatments for the virus/syndrome
   Articulate standard precautions, universal precautions and post-exposure prophylaxis for healthcare workers exposed to bloodborne pathogen
   Discuss confidentiality, incident reporting, and other legal and ethical issues related to bloodborne pathogen exposure
   Review a variety of bloodborne pathogens such as Hepatitis B and C including transmission risks, testing and treatment, and possible sequelae related to active or past infection

III.P.1. Participate in bloodborne pathogen training

MED 110 : Anatomy & Pathophysiology for Medical Assistants I
Credits 5
Quarter Offered Winter
Students are introduced to pathophysiology, the study of processes that disturb normal body function. Instruction in both basic disease processes and major organ-related diseases are incorporated into the study of the form (anatomy) and function (physiology) of the human body. This course has a laboratory component. This class may include students from multiple sections.

Prerequisites
Medical Assisting Program Admittance

Course Outcomes
Competencies/Objectives/Outcomes/Methods of Assessment/Assignment:

Foundations for Clinical Practice

I. Anatomy, Physiology, and Pharmacology

   I.C.8. Identify common pathology related to each body system including:
Body systems must include, but are not limited to, the following: circulatory, digestive, endocrine, integumentary, lymphatic, muscular, nervous, sensory, reproductive, respiratory, skeletal, and urinary

a. signs

b. symptoms

c. etiology

d. diagnostic measures

e. treatment modalities

I.C.9. Identify Clinical Laboratory Improvement Amendments (CLIA) waived tests associated with common diseases

III. Infection Control

III.C.1. Identify major types of infectious agents

III.C.2. Identify the infection cycle including:

a. the infectious agent

b. reservoir

c. susceptible host

d. means of transmission

e. portals of entry

f. portals of exit

III.C.4. Identify methods of controlling the growth of microorganisms

MED 115: Anatomy & Pathophysiology for Medical Assistants II

Credits 5

Quarter Offered Spring

This course continues to instruct students in the anatomy and pathophysiology of the human body using a body systems approach. Emphasis is placed on the study of multiple organ system diseases, infectious diseases, and microbiology. This course has a laboratory component. This class may include students from multiple sections.

Prerequisites

Medical Assisting Program Admittance

Course Outcomes

Competencies/Objectives/Outcomes/Methods of Assessment/Assignment:

Foundations for Clinical Practice

I. Anatomy, Physiology, and Pharmacology

I.C.8. Identify common pathology related to each body system including:

Body systems must include, but are not limited to, the following: circulatory, digestive, endocrine, integumentary, lymphatic, muscular, nervous, sensory, reproductive, respiratory, skeletal, and urinary

a. signs

b. symptoms

c. etiology
d. diagnostic measures

  e. treatment modalities

I.P.10. Perform a quality control measure
I.P.11. Collect specimens and perform:

  a. CLIA waived hematology test
  b. CLIA waived chemistry test
  c. CLIA waived urinalysis
  d. CLIA waived immunology test
  e. CLIA waived microbiology test

II. Applied Mathematics

  II.P.2. Record laboratory test results into the patient’s record

IV. Nutrition

  IV.C.1. Identify dietary nutrients including:

      a. carbohydrates
      b. fat
      c. protein
      d. minerals
      e. electrolytes
      f. vitamins
      g. fiber
      h. water

  IV.C.2. Identify the function of dietary supplements
  IV.C.3. Identify the special dietary needs for:

      a. weight control
      b. diabetes
      c. cardiovascular disease
      d. hypertension
      e. cancer
      f. lactose sensitivity
      g. gluten-free
      h. food allergies
i. eating disorders
IV.C.4. Identify the components of a food label
IV.P.1 Instruct a patient regarding a dietary change related to a patient’s special dietary needs
A.2. Reassure patients
A.3. Demonstrate empathy for patients’ concerns

MED 135: Medical Office Procedures
Credits 4
Quarter Offered Winter
This course is designed to provide instruction in general office administration duties. Topics to be covered include telecommunications, scheduling, filing, interpersonal communications, and professional correspondence. There will be review and discussion of various machines and equipment used in the business office, as well as exercises in the maintenance of office equipment, procurement of supplies, and maintenance of inventory. Students will be instructed in the use of an educational electronic health record (EHR) system. This class may include students from multiple sections.
Prerequisites
Medical Assisting or Medical Office Assisting Program Admittance
Course Outcomes
Competencies/Objectives/Outcomes/Methods of Assessment/Assignment:

Applied Communications

V. Concepts of Effective Communication

VC.7. Identify different types of electronic technology used in professional communication
VP.1. Respond to nonverbal communication
VP.3. Coach patients regarding:
   a. office policies
   b. medical encounters
VP.4. Demonstrate professional telephone techniques
VP.5. Document telephone messages accurately
VP.6. Using technology, compose clear and correct correspondence
VP.7. Use a list of community resources to facilitate referrals
VP.8. Participate in a telehealth interaction with a patient

Medical Business Practices

VI. Administrative Functions

VI.C.1 Identify different types of appointment scheduling methods
VI.C.2. Identify critical information required for scheduling patient procedures
VI.C.3. Recognize the purpose for routine maintenance of equipment
VI.C.4. Identify steps involved in completing an inventory
VI.C.5. Identify the importance of data backup
VI.C.6. Identify the components of an Electronic Medical Record (EMR) and a Practice Management System (PMS)
VI.P.1. Manage appointment schedule using established priorities
VI.P.2. Schedule a patient procedure
VI.P.3. Input patient data using an electronic system
VI.P.4. Perform an inventory of supplies
A.4. Demonstrate active listening

MED 140: Medical, Ethical, Legal Communication
Credits 4
Quarter Offered Spring
This course teaches medical assisting students how to incorporate cognitive knowledge in the performance of psychomotor and affective domains in their practice as medical assistants, and in providing patient care in
accordance with regulations, policies, laws, and patient rights. Students will be instructed in the legal implications and ethical considerations of the medical assisting profession. NOTE: Students need to have entry codes to register. This class may include students from multiple sections.

**Prerequisites**
Medical Assisting or Medical Office Assisting Program Admittance

**Course Outcomes**
Competencies/Objectives/Outcomes/Methods of Assessment/Assignment:

Medical Law and Ethics

X. Legal Implications

X.C.1. Identify scope of practice and standards of care for medical assistants
X.C.2. Identify the provider role in terms of standard of care
X.C.3. Identify components of the Health Insurance Portability & Accountability Act (HIPAA)
X.C.4. Identify the standards outlined in The Patient Care Partnership
X.C.5. Identify licensure and certification as they apply to healthcare providers
X.C.6. Identify criminal and civil law as they apply to the practicing medical assistant

X.C.7. Define:
   a. negligence
   b. malpractice
   c. statute of limitations
   d. Good Samaritan Act(s)
   e. Uniform Anatomical Gift Act
   f. living will/advanced directives
   g. medical durable power of attorney
   h. Patient Self Determination Act (PSDA)
   i. risk management

X.C.8. Identify the purpose of medical malpractice insurance
X.C.9. Identify legal and illegal applicant interview questions
X.C.10. Identify:
   a. Health Information Technology for Economic and Clinical Health (HITECH) Act
   b. Genetic Information Nondiscrimination Act of 2008 (GINA)
   c. Americans with Disabilities Act Amendments Act (ADAAA)

X.C.11. Identify the process in compliance reporting:
   a. unsafe activities
   b. errors in patient care
   c. conflicts of interest
   d. incident reports

X.C.12. Identify compliance with public health statutes:
a. communicable diseases
b. abuse, neglect, and exploitation
c. wounds of violence

X.C.13. Define the following medical legal terms:

a. informed consent
b. implied consent
c. expressed consent
d. patient incompetence
e. emancipated minor
f. mature minor
g. subpoena duces tecum
h. respondeat superior
i. res ipsa loquitur
j. locum tenens
k. defendant-plaintiff
l. deposition
m. arbitration-mediation

X.P.2. Apply HIPAA rules in regard to:

a. privacy
b. release of information

X.P.3. Document patient care accurately in the medical record
X.P.4. Complete compliance reporting based on public health statutes
X.P.5. Report an illegal activity following the protocol established by the healthcare setting
X.P.6. Complete an incident report related to an error in patient care

XI. Ethical Considerations

XI.C.1. Define:

a. ethics
b. morals

XI.C.2. Identify personal and professional ethics
XI.C.3. Identify potential effects of personal morals on professional performance
XI.C.4. Identify professional behaviors of a medical assistant

XI.P.1 Demonstrate professional response(s) to ethical issues

MED 150: Medical Billing and Coding I
Credits 5
Quarter Offered Fall
This course gives students an introduction to managed care and insurance coverage. Students will learn medical billing practices including electronic submission and computerized billing techniques and includes ICD, HCPCS, and CPT coding. This class may include students from multiple sections.

**Prerequisites**
Medical Assisting or Medical Office Assisting Program Admittance

**Course Outcomes**
Competencies/Objectives/Outcomes/Methods of Assessment/Assignment:

**Medical Business Practices**

**VII. Basic Practice Finances**

VII.C.1. Define the following bookkeeping terms:

a. charges
b. payments
c. accounts receivable
d. accounts payable
e. adjustments
f. end of day reconciliation

VII.C.2. Identify precautions for accepting the following types of payments:

a. cash
b. check
c. credit card
d. debit card

VII.C.3. Identify types of adjustments made to patient accounts, including:

a. non-sufficient funds (NSF) check
b. collection agency transaction
c. credit balance
d. third party

VII.C.4. Identify patient financial obligations for services rendered

VII.P.1. Perform accounts receivable procedures to patient accounts including posting:

a. charges
b. payments
c. adjustments

VII.P.2. Input accurate patient billing information in an electronic system

VII.P.3. Inform a patient of financial obligations for services rendered

**VIII. Third Party Reimbursement**

VIII.C.1. Identify:
a. types of third party plans
b. the steps for filing a third-party claim

VIII.C.2. Identify managed care requirements for patient referral

VIII.C.3. Identify processes for:

a. verification of eligibility for services
b. precertification/preauthorization
c. tracking unpaid claims
d. claim denials and appeals

VIII.C.4. Identify fraud and abuse as they relate to third-party reimbursement

VIII.C.5. Define the following:

a. Bundling and unbundling of codes
b. Advanced beneficiary notice (ABN)
c. Allowed amount
d. Deductible
e. Co-insurance
f. Co-pay

VIII.C.6. Identify the purpose and components of the Explanation of Benefits (EOB) and Remittance Advice (RA) Statements

MED 151: Medical Billing and Coding II

Credits 5
Quarter Offered Winter

This course gives medical assisting students advanced training in procedural and diagnostic coding and medical billing practices. Topics covered include ICD, HCPCS, and CPT coding and hospital and outpatient billing and coding procedures. This class may include students from multiple sections.

Prerequisites
Medical Assisting or Medical Office Assisting Program Admission

Course Outcomes
Competencies/Objectives/Outcomes/Methods of Assessment/Assignment:

Medical Business Practices

VIII. Third Party Reimbursement

VIII.P.1. Interpret information on an insurance card
VIII.P.2. Verify eligibility for services
VIII.P.3. Obtain precertification or preauthorization with documentation
VIII.P.4. Complete an insurance claim form
VIII.P.5. Assist a patient in understanding an Explanation of Benefits (EOB)

IX. Procedural and Diagnostic Coding

IX.C.1. Identify the current procedural and diagnostic coding systems, including Healthcare Common Procedure Coding Systems II (HCPCS Level II)
IX.C.2. Identify the effects of:

a. upcoding
MED 155: Medical Office Assistant Extern and Capstone

Credits 6
Quarter Offered Spring
Final core curriculum course for students seeking to become medical office assistants or specialists. The course prepares students to perform routine administrative medical office duties in an outpatient setting. Students completing this course will be expected to develop a professional portfolio, apply for a national credentialing exam of their choice, participate in job-seeking activities, and participate in a brief externship wherein they will be expected to perform tasks relevant to the MOA job description. This class may include students from multiple sections.

Prerequisites
Medical Office Assisting Program Admittance; eligibility for ENGL& 101 and MATH 90; MED 135 with a 2.0 or higher

Course Outcomes
Apply for a minimum of two real-world jobs.
Purchase and work through a study guide and/or interactive review package for the national credentialing exam of the student's choice. Exams they may be eligible to challenge include the NCMOA (NCCT) exam, the NCICS (NCCT) exam, and any national billing and coding exams they are qualified to challenge.
Develop a professional portfolio, including a resume, sample cover letter, letters of reference, reference list, samples of completed student work, unofficial transcripts, immunizations (if applicable), completed background checks (if applicable), and any other materials the student wishes to include.
Complete a minimum two-week supervised externship/practicum wherein the student will be assigned a supervisor and/or preceptor that will guide them through an on-the-job experience, performing the tasks and skills required for the job.

MED 160: Clinical Lab Seminar for Medical Assistants I

Credits 5
Quarter Offered Winter
Introduces the medical assisting student to basic clinical procedures and patient care. Subjects to be covered include, but are not limited to: infection control and asepsis, preparing the examination room, body measurements and vital signs, obtaining the medical history, assisting with the physical examination, electrocardiography, and therapeutic procedures. Some needle invasive procedures will be performed. This course includes a skills laboratory component. Students will be instructed in the use of an educational electronic medical record (EMR) system. This class may include students from multiple sections.

Prerequisites
Medical Assisting Program Admittance

Course Outcomes
Competencies/Objectives/Outcomes/Methods of Assessment/Assignment:

Foundations for Clinical Practice

I. Anatomy, Physiology, and Pharmacology

I.C.12. Identify basic principles of first aid
I.P.1. Accurately measure and record:

f. weight (infant)

g. length (infant)

h. head circumference (infant)
I.P.2. Perform the following procedures:
a. electrocardiography
d. pulmonary function testing

I.P.3. Perform patient screening following established protocols
I.P.11. Collect specimens and perform:

d. CLIA waived immunology test
I.P.13. Perform first aid procedures for:

a. bleeding
b. diabetic coma or insulin shock
c. stroke
d. seizures
e. environmental emergency
f. syncope

II. Applied Mathematics

II.P.3. Document on a growth chart

III. Infection Control

III.P.4. Prepare items for autoclaving
III.P.5. Perform sterilization procedures

Applied Communications

V. Concepts of Effective Communications

V.C.6. Identify techniques for coaching a patient related to specific needs

Safety and Emergency Practices

XII. Protective Practices

XII.C.1. Identify workplace safeguards
XII.C.5. Identify the purpose of Safety Data Sheets (SDS) in a healthcare setting
XII.C.6. Identify processes for disposal of:

a. Biohazardous waste
b. chemicals

XII.P.1. Comply with safety practices
XII.P.2. Demonstrate proper use of:

a. eyewash equipment
b. fire extinguishers
A.5. Respect diversity
A.8. Demonstrate self-awareness
MED 161: Clinical Lab Seminar for Medical Assistants II

Credits 5
Quarter Offered Spring

This course continues instructing medical assisting students in the clinical skills necessary to the medical assisting profession. Subjects to be covered include, but are not limited to: specialty diagnostic testing, phlebotomy, laboratory and microbiological testing in the physician's office, introduction to the concepts of pharmacology and medication administration, minor office surgery, and basic first aid in regard to medical office emergencies. Some needle invasive procedures will be performed. This course includes a skills laboratory component. Students will be instructed in the use of an educational electronic medical record (EMR) system. This class may include students from multiple sections.

Prerequisites
Medical Assisting Program Admittance

Course Outcomes
Competencies/Objectives/Outcomes/Methods of Assessment/Assignment:

Foundations for Clinical Practice

I. Anatomy, Physiology, and Pharmacology
   I.P.2. Perform the following procedures:
   b. venipuncture
   c. capillary puncture

I.P.4. Verify the rules of medication administration:
   a. right patient
   b. right medication
   c. right dose
   d. right route
   e. right time
   f. right documentation

I.P.5. Select proper sites for administering parenteral medication
I.P.6. Administer oral medications
I.P.7. Administer parenteral (excluding IV) medications

III. Infection Control

III.C.3. Identify the following as practiced within an ambulatory care setting:
   a. medical asepsis
   b. surgical asepsis
   III.P.6. Prepare a sterile field
   III.P.7. Perform within a sterile field
   III.P.8. Perform wound care
   III.P.9. Perform dressing change

Safety and Emergency Practices

XII. Protective Practices

XII.C.2. Identify safety techniques that can be used in responding to accidental exposure to:
a. blood
b. other body fluids
c. needle sticks
d. chemicals
XII.C.3. Identify fire safety issues in an ambulatory healthcare environment
XII.C.4. Identify emergency practices for evacuation of a healthcare setting
XII.C.7. Identify principles of:
   a. body mechanics
   b. ergonomics
XII.C.8. Identify critical elements of an emergency plan for response to a natural disaster or other emergency
XII.C.9. Identify physical and emotional manifestations on persons involved in an emergency
XII.P.3. Use proper body mechanics
XII.P.4. Evaluate an environment to identify unsafe conditions

MED 165: Clinical Practicum for Medical Assistants

Credits 6
Quarter Offered Fall
Provides students with at least 160 clock hours of externship experience in ambulatory care facilities. Students will be required to maintain and submit documentation of the psychomotor and affective domain competencies they experience at practicum sites. Students will also submit assignments online that demonstrate how they incorporate cognitive domain competencies and critical thinking skills into their daily practice as medical assistants. This class may include students from multiple sections.

Prerequisites
Medical Assisting Program Admittance

Course Outcomes
- Function professionally in a legal and ethical manner as a medical assistant
- Use medical terminology correctly
- Effectively communicate with other healthcare team members, patients, and physicians
- Procure and distribute both office supplies and medical supplies
- Manage documents, both paper and electronic, in a medical office
- Demonstrate proficiency with basic medical testing procedures
- Display knowledge and use of techniques for asepsis, workplace safety, and risk management
- Demonstrate knowledge and competency in electronic medical billing of multiple insurances
- Follow laws and regulations regarding patient privacy and confidentiality
- Demonstrate knowledge of ICD-10-CM coding for medical billing
- Integrate cognitive domain objectives and psychomotor and affective domain competencies into daily practice

MED 170: Principles of Pharmacology for Medical Assistants

Credits 5
Quarter Offered Summer
This course offers instruction in the principles of pharmacology. Students will use applied mathematics to prepare proper dosages of medication for administration and verify those doses/dosages prior to administration. Students will learn to update medication lists utilizing an educational electronic health record. Students will learn techniques to help them explain medication treatment plans to patients to ensure patient understanding and compliance. This class may include students from multiple sections.

Prerequisites
Medical Assisting Program Admittance

Course Outcomes
Competencies/Objectives/Outcomes/Methods of Assessment/Assignment:
Foundations for Clinical Practice

I. Anatomy, Physiology, and Pharmacology

I.C.10. Identify the classifications of medications including:

a. indications for use

b. desired effects

c. side effects

d. adverse reactions

II. Applied Mathematics

II.C.1. Define basic units of measurement:

a. the metric system

b. the household system

II.C.2. Identify abbreviations used in calculating medication dosages

II.C.3. Identify normal and abnormal results as reported in:

a. graphs

b. tables

II.P.1. Calculate proper dosages of medication for administration

II.P.4. Apply mathematical computations to solve equations

II.P.5. Convert among measurement systems

MED 200: Medical Assisting Capstone

Credits 3

Quarter Offered Fall

Overview of job readiness, medical assisting certification exam preparation, credentialing application preparation, portfolio development, and networking in the medical assisting field. Students should be enrolled in this course their last quarter of the program, either concurrently with MED 165 or after its completion. Former students seeking a ‘refresher’ on professional development or credentialing test preparation may register. This class may include students from multiple sections.

Prerequisites
Medical Assisting Program Admittance

Course Outcomes
- Produce up-to-date documentation of provider/professional level CPR
- List and discuss legal and illegal applicant interview questions
- Develop professional portfolio
- Draft resume
- Draft cover letter(s)
- Participate in mock interview(s)
- Develop reference lists and letters of reference
- Apply for two positions
- Participate in practice testing to prepare for national credentialing exam(s)
- Apply for MA-C credential

MED 201: Introduction to Patient Advocacy

Credits 5

Quarter Offered Fall
This course is designed to offer insights into patient advocacy and navigation, and the patient healthcare facilitation process. Students will learn how to facilitate communication among patients, caregivers, and physicians and how to develop care plans for patients. Emphasis is placed on methods of patient education and communication in regard to special populations. This class may include students from multiple sections.

**Prerequisites**
Medical Assisting Program Admittance

**Course Outcomes**
Competencies/Objectives/Outcomes/Methods of Assessment/Assignment:

Applied Communications

V. Concepts of Effective Communication

  V.C.10. Identify the role of the medical assistant as a patient navigator
  V.C.13. Identify the basic concepts of the following theories:
     a. Maslow
     b. Erikson
     c. Kubler-Ross
  V.C.14. Identify issues associated with diversity as it relates to patient care
  A.5. Respect diversity
  A.8. Demonstrate self-awareness
Multimedia Communications (MEDIA)

MEDIA 110 : Introduction to Multimedia Graphic
Credits 5
Quarter Offered  Fall, Spring
This course concentrates on the creative and practical exploration of computer graphics and page layout design. Students will explore basic concepts of digital media, terminology and acquire hands-on experience working with industry standard page layout and illustration software. This class may include students from multiple sections.

Course Outcomes
- Apply skills to create and understand the fundamentals of graphic design by translating design elements into new graphic design solutions.
- Practice the creative process by creating numerous ideas on a particular topic.
- Use traditional and digital tools to render letter forms, illustrations, and graphic designs.
- Operate with specific graphic design requirements while using a combination of typography and imagery.
- Create a hierarchy of information within a given space.

MEDIA 111 : Introduction to Multimedia Web
Credits 5
Quarter Offered  Fall
Learn fundamental concepts and skills of multimedia content development and website design. Students will create multimedia elements with Flash, Photoshop, Dreamweaver, and open-source applications. Manipulate photographs, design animated web banners and graphic rollover buttons. Explore interface design and embed multimedia presentations in a webpage. Good computer file management and typing skills is recommended. This class may include students from multiple sections.

Course Outcomes
- Define common multimedia terms and learn to differentiate between multimedia, web, and graphic file formats.
- Use Dreamweaver to create a web page with internal and external hyperlinks, graphics, animation, and other multimedia content.
- Publish websites to the internet using Wordpress and file transfer protocol.
- Edit and enhance photographs with Photoshop and optimize photographs for web display.
- Build a country showcase website to demonstrate awareness of unique cultures, examine multicultural perspectives, and their intercultural impact on our global society.

MEDIA 114 : Audio and Lighting Technology
Credits 5
Quarter Offered  Fall
Learn technical and artistic sound recording and lighting for theater and live stage performances. Students will explore theories, techniques, and equipment for stage lighting and audio production. Students will learn how to use lighting and sound systems and consoles and apply theories of light and sound in a final project. This class may include students from multiple sections.

Course Outcomes
- Use electrical lighting and sound systems for theater and stage.
- Explore the nature of light, perception, and color for stage lighting with lamps, luminaries, and controls/dimming.
- Hang and focus lighting instruments.
- Develop and use lighting tools to design a lighting plan for a live performance.
- Operate sound and lighting consoles.
- Set up a basic sound system for events.
- Apply theories of lighting and sound design in a final project.

MEDIA 115 : Introduction to Digital Video
Credits 5
Quarter Offered  Winter
This course introduces students to digital video, audio, motion graphics, and digital filming techniques. Students will plan, film, edit, and stream short digital videos on the internet. Students enrolling in this class must supply their own digital video camera and have good computer skills. This class may include students from multiple sections.

**Course Outcomes**
- Demonstrate an understanding of the digital video production workflow, storyboarding, video shooting techniques, and terminology.
- Transform clips into a coherent video sequence with video editing software to adjust color, modify audio, and insert special effects, titles and transitions.
- Identify issues related to digital video content creation as effective visual communication and investigate how the audience, purpose, and end goal impacts the final video production.
- Discuss and apply copyright and fair use of digital videos and music for public display.
- Compress and stream video for delivery on the internet and create an e-portfolio to showcase course projects.

**MEDIA 116 : Video and Live Projection**

**Credits** 5  
**Quarter Offered** Winter
Learn practical and aesthetic concepts of filming and syncing audio, video, and light for projections at live theater and events. Students will use video cameras and projection technologies for screens and projection mapping. This class may include students from multiple sections.

**Course Outcomes**
- Set up video equipment and film a live performance.
- Sync audio, video, and light during a live performance.
- Operate a video camera and video switcher.
- Set up projection equipment for events and theater usage.
- Cue sequences and simultaneously trigger multiple cues while filming a live performance.

**MEDIA 145 : Directing & Production**

**Credits** 5  
**Quarter Offered** Spring
Introduction to documentary styles, filmmaking, directing, and production management, web promotion, broadcast, and screening. Students will learn the critical production decisions involved in documentary digital video production while producing short films. An overview of production methods such as idea development, research, proposal and scriptwriting, budgeting, and working with cast and crew with innovative collaborative tools. Students will discuss rights clearances, common challenges, and ethical issues. This class may include students from multiple sections.

**Course Outcomes**
- Articulate problems, challenges, and ethical dilemmas involved in documentary filmmaking, as well as, describe and discuss the range of documentary styles, including expository, observational, interactive, reflexive, and performative documentaries.
- Demonstrate an understanding preproduction process, including idea development, proposal writing, researching, script writing, preparing budgets, planning of interviews and shoots, and media copyright clearance.
- Exhibit an understanding of director’s role and production team’s work in the shooting process by setting up and participating in shoots that require appropriate decisions regarding cinematography, including location choice, camera work, and lighting, sound recording, equipment use, and developing strong interviewing skills.
- Demonstrate an understanding of the director’s role in the post-production process by making appropriate decisions regarding editing, sound, color correction, using software, and transferring the digital media to various formats.
- Collaborate as teams to plan, write, shoot, and edit a short documentary with an emphasis on affecting social change, environmental science, globalization, sustainability, or local oral history, science, or culture.

**MEDIA 155 : E-Book Design and Publishing**

**Credits** 5  
**Quarter Offered** Spring
Design, publish and promote e-books and interactive publications for multiple devices on the web. Use digital publishing software to create and implement effects such as page rotation, scrolling text, and interactive images. Learn how to distribute an e-book or e-publication to an app store. Good computer and typing skills is recommended. This class may include students from multiple sections.

**Course Outcomes**
- Learn and implement mastery of eBook formatting by apply design decisions for multiple devices and audiences.
- Learn and understand publishing on major digital distribution platforms by comparing eBook formats and upload procedures for multiple e-book retailers.
- Differentiate between traditional and eMedia publishing models and workflows.
- Utilize various digital media publishing formats, such as EPUB, PDF, and XML.
- Master an understanding of eBook sales, marketing and promotion.

**MEDIA 170 : Introduction to Graphic Design**
**Credits** 5
**Quarter Offered** Fall
Introduction to the formal elements of graphic design. Explore contemporary design issues and examine the history and psychology behind design communications. Use page layout software to create materials for publication and produce a final printed portfolio of student work. This class may include students from multiple sections.

**Course Outcomes**
- Demonstrate and apply an understanding of graphic design principles used in visual communication projects.
- Have a basic understanding of typography and how it is best used in design.
- Be able to discuss and articulate reasons for composition, content, and themes of various design works and participate in critiques of design work.
- Develop an individual or personal style in ideas and image making.
- Use a variety of techniques and methods in creating publications to plan and design both simple and complex publications for print and web delivery.

**MEDIA 175 : Principles of Digital Photography**
**Credits** 4
**Quarter Offered** Fall
Designed to teach students the principles of digital photography with an emphasis on the discovery of solutions for artistic challenges to composition, lighting, color and photographic technology. Students will explore the cultural influences of visual communication and the evolution of traditional photography into the digital age. Good computer and file management skills are recommended. This class may include students from multiple sections.

**Course Outcomes**
- Demonstrate a thorough understanding of digital photography terminology, features, and concepts.
- Implement camera and photographic methods including measure and control natural lighting, adjust and control white balance, digital exposure, and the visual flow of a photograph using depth of field.
- Plan, compose, and photograph varied subjects while developing a unique visual artistry.
- Critique and evaluate basic composition and aesthetic elements of photographic images and participate in subject specific online discussions.
- Use industry standard digital imaging computer software, Adobe Photoshop, to manipulate photographs and use PowerPoint to create electronic presentations.

**MEDIA 195 : Infographic and Data Visualization**
**Credits** 5
**Quarter Offered** Fall
Learn the foundational elements of digital storytelling and infographics in various media for education, training, information and promotion. Create immersive, interactive, and engaging narratives that deliver moving and enduring messages through multimedia techniques. Develop persuasive and visually attractive graphics that communicate information more effectively in various digital media that deliver data audiences remember. Good computer file management skills is recommended. This class may include students from multiple sections.

**Course Outcomes**
- Research and analyze successful transmedia stories, marketing, infographics, and data visualizations.
Develop a unique interactive story, collaborate and collect data for an interactive design, and foster digital citizenship.
Build a visual vocabulary of icons and symbols while exploring various digital tools and techniques to illustrate, photograph, or film stories.
Devise nonlinear storyboards, style guides, mood boards, mockups, and wireframes an engaging narrative to educate and entertain.
Curate, produce, and present a collaborative digital storytelling project or infographics online to connect with social media.

**MEDIA 196 : Intro to 3D Design**

*Credits 5*

*Quarter Offered* Winter

Explore the fundamental techniques of 3D creation, capturing, and rendering. Create objects and characters that can be used for 3D environments, interfaces and printing. Good computer file management skills is recommended. This class may include students from multiple sections.

**Course Outcomes**
- Conceive 3D visual development and design concept art to apply polygon economics.
- Build models of 3D objects, architectural spaces, and characters.
- Study and apply materials, textures, and lighting strategies with various digital tools.
- Create files for rendering and output for 3D printing.
- Develop and integrate 3D objects into an immersive environment.

**MEDIA 201 : Digital Image Editing I**

*Credits 5*

*Quarter Offered* Winter

Provides fundamental digital imaging skills. Learn to scan, optimize, enhance, colorize, and combine photographs. Emphasis will be placed on editing photographs, color management, and acquiring a basic understanding of Adobe Photoshop. Good computer and file management skills are recommended. This class may include students from multiple sections.

**Course Outcomes**
- Use Photoshop tools to manipulate, enhance photographs, and apply styles, filters and adjustments to multiple layers.
- Explore Photoshop’s curves, levels, hue saturation commands, and use the histogram to identify contrast problems in a photograph.
- Remove dust and scratches from a photograph and color tint a black and white image.
- Differentiate between various graphic file formats for print and web display.
- Create a graphic website banner and save an optimized image.

**MEDIA 202 : Advanced Image Editing**

*Credits 5*

*Quarter Offered* Spring

Use practical techniques to professionally manipulate photographs and automate digital image production tasks. Create special effects for type, photos, and web graphics with industry standard software (Photoshop). Students will produce an informational multimedia presentation on the topic of a global issue, and design a webpage portfolio to showcase course projects. This class may include students from multiple sections.

**Prerequisites**
**MEDIA 201**

**Course Outcomes**
- Use advanced image editing techniques to repair and enhance photographs.
- Design digital artwork with layer masks, blend modes, layer styles, adjustment layers, and employ Smart Filters to create complex effects.
- Master vector tools including Pen tool and Paths Panel and transform and maximize Smart Objects.
- Apply professional-quality typography in Photoshop.
- Display projects in a website portfolio on the internet including a global issue online slideshow.

**MEDIA 203 : Advanced Digital Photography**

*Credits 5*

*Quarter Offered* Winter
Course takes students beyond the basics of digital photography as they increase the depth of their aesthetic expression and photographic technique. Students will complete a series of directed projects designed to stimulate creative ideas, expand visual communication skills, improve composition, and develop their own unique body of work using digital cameras and photographic technologies. Students supply their own camera. This class may include students from multiple sections.

**Prerequisites**

MEDIA 175

**Course Outcomes**

- Formulate and apply solutions to photographic and technical problems.
- Develop an understanding of visual literacy through an open exchange of ideas and criticism.
- Identify issues that influence individual perception of culture, place, and visual impact.
- Capture and preserve the essence of community, environment, and culture in digital photographs to exhibit a website gallery.
- Use Adobe Photoshop to process, adjust, optimize, and blend images.

**MEDIA 204 : Digital Illustration**

**Credits** 5

**Quarter Offered** Winter

Introduction to computer illustration with Adobe Illustrator. Learn basic through intermediate computer drawing skills, and use precision digital art production tools. Create professional quality vector graphics for printed materials, multimedia projects, and web presentation. This class may include students from multiple sections.

**Course Outcomes**

- Demonstrate a thorough understanding of vector graphic manipulation with Adobe Illustrator.
- Use Adobe Illustrator to translate hand drawings into vector art and knowledge of styles and effects.
- Apply the use of fonts, color, and typographic design for effective communication and designs for social awareness.
- Demonstrate a basic understanding of typography and how it is used in design.
- Create a well-planned and designed layouts, logos, Illustrations, or other design materials for print or web.

**MEDIA 212 : Digital Portfolio**

**Credits** 5

**Quarter Offered** Spring

Students will produce a website portfolio of digital media and artwork that showcases creative and technical skills. This capstone course is to guide students through the process of creating multimedia web portfolios for the need for college transfer applications and employment in related fields. Students will select, organize, develop, and present a collection of work that exhibits individual efforts, progress, and achievements. This class may include students from multiple sections.

**Prerequisites**

MEDIA 110 and web design skills

**Course Outcomes**

- Recognize how visual rhetoric is applied to support the purposes and goals of portfolio effectiveness while planning, organizing, and evaluating individual student portfolios.
- Plan, organize, and complete projects that demonstrate knowledge of multimedia communications.
- Plan, storyboard, edit and repurpose existing work, map hyperlinks, and create an original website portfolio that meets an appropriate and marketable standard.
- Write a personal resume and identify short and long term continuing education and career goals.
- Network with potential employers to identify specific requirements to achieve desired employment.

**MEDIA 215 : Digital Video Projects**

**Credits** 5

Learn advanced digital video production, editing, filming, and lighting in field situations. Explore multiple documentary genres, community outreach, video logging, and video podcasting. Work in teams to produce and edit video documentary shorts that capture a story to achieve informational or emotional ends. Basic digital video editing skills recommended. This class may include students from multiple sections.

**Course Outcomes**

- Research, propose, plan, organize, film, edit, and evaluate the full production of digital video interviews, public service announcements, original story, and documentary digital video projects.
- Identify audience, purpose, and perspective of public service announcements.
Collaborate to create a mini documentary and determine the documentary theme, audience, and goals. Control lighting effects, camera movement, and production effects during filming, as well as, apply advanced video editing techniques. Create and contribute to a video blog portfolio on the internet and market video projects.

**MEDIA 224 : Digital Storytelling**  
**Credits** 5  
**Quarter Offered** Spring  
Emerging technologies and new digital literacies require content creation that is retentive, absorbing, interactive, and social. Learn about media such as augmented reality that includes digital input overlapping the real-world environment, virtual worlds, and experiential projection spaces. Good computer file management skills recommended. This class may include students from multiple sections.  
**Course Outcomes**  
- Identify goals and objectives of immersive projects and devise strategy to satisfy the stakeholder and revise.  
- Build wireframes, vision statements, and mockups for project through effective storytelling and transformative design.  
- Create an immersive environment and interfaces that include functionality with specific esthetics that promote appreciation and education.  
- Demonstrate project management and rapid prototyping to execute relevant and effective brand placement.

**MEDIA 225 : User Interface and User Experience Design**  
**Credits** 5  
**Quarter Offered** Fall  
Learn how to develop user interfaces and user experiences that are inclusive, interactive, accessible, responsive, intuitive, and driven by human centered approaches that make products both functional and visually appealing. Students will use modern tools and principles of psychology to engage users as they interact with digital products and applications. This class may include students from multiple sections.  
**Course Outcomes**  
- Define and differentiate user interface (UI) experience (UX) design for digital projects and applications.  
- Develop user interfaces and user experiences with storytelling techniques that apply principles for accessibility, intention, and clear communication.  
- Identify the basics of human-computer interaction and the psychology behind user decision-making to identify problems and patterns, accelerate delivery, and communicate solutions.  
- Apply iterative design thinking methodology, user-centric design research, visual prototyping, web wireframing, style guides, interface design, storyboarding, and visual design theory to a project.  
- Create, test, analyze, refine process and purpose with industry-standard tools to improve audience engagement and satisfaction.  
- Develop a project portfolio of UI and UX assignments.  
- Create User Interfaces and User Experiences that are intuitive and connect with intended users from a target audience.

**MEDIA 226 : Digital Art and Generative AI**  
**Credits** 5  
**Quarter Offered** Winter  
In this course, discover how to imagine, compose and create meaningful digital art with the use of a narrative. Learn how to develop concept-based compositions from start to finish and convey ideas through lines, colors, and textures. Learn to create and execute an artistic concept born of your own imagination. Design artwork using AI prompts enhanced with digital editing. Explore the intersection where AI program art and digital painting are combined to create a composite of artwork rich in detail and texture. This class may include students from multiple sections.  
**Course Outcomes**  
- Conceptualize, design and compose digital artwork  
- Demonstrate the ability to transform narratives into digital art using lines, layers, colors and light  
- Combine digital art and AI generated graphics to create illustrations that visually communicate a story  
- Apply digital illustration creative process for visual storytelling, from the initial idea to the final composition  
- Create digital artwork that communicates ideas and artistic style
MEDIA 235: Multimedia Production for Performances
Credits 5
Quarter Offered Spring
Project based class teaches students how to create visual effects that enhance live performances through video, projection mapping, sequencing, lighting, music, and imagery. Apply special effects, best practices, and real-world considerations of integrating digital media and projections for theater, concerts, or live performances. This class may include students from multiple sections.
Course Outcomes
- Integrate digital media into a theatrical team and performance.
- Apply professional digital media/projection designer’s workflow from analyzing a script to creating content and live production.
- Integrate digital content from still images, video, animation, effects, and art in a multimedia projection.
- Use industry equipment, such as media servers, projectors, projection surfaces, emissive displays, cameras, and sensors in multimedia production.
- Apply technical effects such as converging, warping, blending projectors, calculating surface brightness/luminance, screen size, throw distance.
- Use masks, warping content, projection mapping, and cue sequencing in a multimedia projection design.

MEDIA 240: Business for Photography
Credits 5
Quarter Offered Spring
Learn the business skills needed to succeed as a professional photographer in today's competitive marketplace. Develop a professional photography portfolio and use social media to promote a photography business. This class may include students from multiple sections.
Course Outcomes
- Develop the ideal business structure and business plan.
- Design a strong visual brand and create your own trends.
- Develop a professional photography portfolio.
- Learn to use social media to grow your business and expand your influence.
- Master the artistry of quality, photo prints.

MEDIA 245: Nature and Macro Photography
Credits 5
Quarter Offered Fall
Learn the tools and techniques required for succeeding in capturing stunning nature and macro photography. An introduction to the equipment, exposure, focus, subjects, light, composition, and photographic process needed for expertise in nature photography. Fields trips when possible. This class may include students from multiple sections.
Course Outcomes
- Learn how to capture beautiful and controlled images.
- Fine-tune your eye for composition.
- Master close focusing with depth of field.
- Master setting the correct aperture and exposure.
- Confidently capture macro images of multiple size.

MEDIA 250: Photographic Lighting
Credits 5
Quarter Offered Winter
Learn how to capture, create, and place the proper lighting to capture timeless and classic imagery. Learn how to work with both natural and studio lighting. Field trips when possible. This class may include students from multiple sections.
Course Outcomes
- Manipulate available lighting to create a flattering light source.
- Learn to work with direct light, directional light, and backlight.
- Work with traditional studio lighting patterns.
- Design your own creative, complex multi-light setups.
- Learn to control the direction and quality of your light.
MEDIA 260: Internship
Credits 1
Quarter Offered Fall, Winter, Spring
Thirty-three hours per credit. Internship in a workplace setting of the student’s choice, based on needs and interests. This class may include students from multiple sections.
Course Outcomes
- Construct a Media 260 Internship Learning Contract with supervisor to cover duties and responsibilities the first week of the term.
- Devise a goal statement for activities to be completed during the internship.
- Work fifty-five hours per credit on devised projects.
- Provide an Employer/Supervisor Evaluation upon completion by the last week of the term.

MEDIA 275: Social Media Marketing
Credits 5
Quarter Offered Winter
Develop and market a business presence and webpage on the Internet with social media and open source web applications. Explore online consumer behavior and Internet marketing campaigns. This class may include students from multiple sections.
Course Outcomes
- Design and deploy a social media marketing action campaign.
- Compare and contrast online and traditional consumer behavior.
- Describe the significance of multi-channel content strategies, such as video, audio, interactive media, and impact of mobile technology on business and marketing.
- Evaluate search engine optimization tools and web analytics.
- Develop and market a unique online business presence with a blog and social media accounts.
- Discuss the impact of mobile technology on business and marketing.

MEDIA 299: Integrated Study-Honors
Credits 2
In this capstone honors course, students will complete a project relevant to their career pathway and program. The project will integrate at least two Business and IT programs (Business Administration, Administrative Office Systems, Multimedia Communications, Cybersecurity & Computer Forensics, or Information Technology) to provide breadth and relevance to the project. This class may include students from multiple sections.
Prerequisites
Completion of 60 credits in the BUS/IT program of study with a GPA of 3.5 or higher; and completion of the English course required in the BUS/IT program of study.
Course Outcomes
- Introduce the project and the program integration requirements.
- Define the individualized project components and outcomes.
- Demonstrate workplace skills based on criteria defined in a project created by the student and approved by the instructor.
- Work with faculty to evaluate the completion of project tasks.
- Present a final project to demonstrate the program learning outcomes of the relevant program of study.
- Analyze commercials, television shows, and films according to their underlying narrative structures and persuasive (propaganda) techniques.
Music (MUSC/MUSC&)

MUSC& 105 : Music Appreciation
Credits  5
Quarter Offered  Fall, Spring
Exploration of how and why we listen to music. Examination of the many roles that music plays in various world cultures. Musical examples drawn from Asia, Africa, Indonesia, North and South America (including Native American tribal groups), jazz, blues, and the Western classical tradition. No prior musical experience is necessary. This class may include students from multiple sections. (Humanities, Elective)

Course Outcomes
Demonstrate a deeper emotional and intellectual understanding of the various musical elements (melody, harmony, rhythm, meter, form, instrumentation) though listening, attending lectures, reading the text and participating in class discussions.
Identify, in a general way, where a piece of music might have originated by applying the knowledge of the musical elements listed above.
Recognize the different societal uses for which music has been employed in various cultures and at various time periods. These will include art music (concert music); functional music (music for dance, films, and theater); work songs; ceremonial music; protest music; spiritual music; and background music.
Identify his/her own physical/cognitive/emotional/spiritual responses to a given piece of music and be able to compare how those responses might differ from the responses of the performers/composers/listeners of that musical work in its original incarnation. This should also provide an increased enjoyment from, and connection to, music of all kinds.
Identify, in a general way, the historical periods in Western art music (Medieval, Renaissance, Baroque, Classical, Romantic, Modern). Also, he/she will gain an appreciation for the context of historical events and parallel developments in non-Western music, jazz and folk music of North America.
Write and speak clearly and intelligently about the following topics: the elements of music, the societal implication of music, types of individual responses to music, and significant identifying characteristics of selected musical cultures of the world.

MUSC& 141 : Music Theory I
Credits  5
Quarter Offered  Winter
Develops musicianship through study and application of compositional elements. Emphasis on musical notation, aural skills, and aesthetic musical values. Each quarter prerequisite to the next or by permission of instructor.
This class may include students from multiple sections. (Humanities, Elective)

Course Outcomes
Identify and apply musical pitch symbols.
Identify and apply musical rhythm symbols.
Classify various bodies of notational symbols.
Construct major scales on all pitches.
Identify tonal centers.
Alter tonal centers – transpose scales, works.

MUSC 110 : History of Rock N Roll
Credits  5
Quarter Offered  Fall, Winter, Spring, Summer
A cultural/sociological history of pop music in the USA. Musical antecedents (blues, country, rhythm and blues) and outside influences (African drumming, Latin rhythms, folksingers) will be included, but the focus will be on the pop music of this period. The music will be addressed within the context of societal issues such as racism, conformity, generational conflict, governmental repression and censorship. This class may include students from multiple sections. (Humanities, Elective)

Course Outcomes
Identify recorded examples of popular music by year, personnel, geographic origin and genre.
Comprehend the broad “family tree” of American popular music in detail and in general.
Explain how popular music helped to integrate America during the early days of rock’n’roll.
Explain the effect of race relations on the musicians and on the business of popular music.
Comprehend the role of federal and state governments in the area of artistic censorship.
Comprehend the positive and negative influences of popular music on intergenerational conflict. Recognize the many cultural influences on American popular music (blues, gospel, country music, rhythm and blues, Latin dance forms, Native American philosophies, Eastern religion, gay culture and disco/raves, Asian influences on techno/dance music).

**MUSC 136-138, 236-238 : Jazz Ensemble I, II, III, IV, V, VI**

**Credits** 1

-3

**Quarter Offered** Fall, Winter, Spring, Summer

Study jazz styles through performance of jazz literature. Emphasis on development of improvisational techniques. Course is contingent upon availability of qualified students. This class may include students from multiple sections. (Elective)

**Prerequisites**
Instructor permission

**Course Outcomes**
- Demonstrate improvement of skills in the following areas: music reading, improvisation, jazz theory, rhythmic concepts, and transposition (all).
- Perform a repertoire of jazz tunes and standards (through reading and memorization) drawn from the works of Billy Strayhorn, Thelonious Monk, Charlie Parker, Miles Davis, John Coltrane, Charles Mingus, Chick Corea, Herbie Hancock and popular songwriters such as Jerome Kern and Richard Rodgers (all).
- Play and sing the melodies and improvise on this repertoire as well as knowing the harmony (all).
- Perform the appropriate rhythm section role (comping) while others are soloing or playing the melody (rhythm section).
- Demonstrate appropriate concert etiquette/behavior during the scheduled performances. This will include: preparation of music, preparation of instruments/accessories as appropriate, showing up on time for all rehearsals and concerts (all).

**MUSC 139 : Jazz Improvisation Seminar**

**Credits** 1

-2

**Quarter Offered** Occasionally

Seminar focusing on development of skills and techniques in jazz improvisation. Students should be able to read notes and chord symbols and should be acquainted with basic music theory principles. Concurrent enrollment in Jazz Ensemble is suggested but not mandatory. This class may include students from multiple sections. (Elective)

**Prerequisites**
At least one quarter of Jazz Ensemble or by audition; proficiency on instrument

**Course Outcomes**
- Demonstrate improvement of skills in the following areas: jazz improvisation, jazz theory, and rhythmic concepts.
- Apply skills learned in class to improvised solos.
- Comprehend various topics in jazz theory/harmony as they relate to the construction and execution of a successful improvised solo.
- Perform the melodies and construct an improvised solo over the chord changes of several selected tunes.

**MUSC 146-148 : Vocal Ensemble I, II, III**

**Credits** 2

**Quarter Offered** Fall, Winter, Spring

The study and performance of specialized contemporary and jazz vocal music suitable for beginning and advanced students. This class may include students from multiple sections. (Elective)

**Prerequisites**
Instructor permission

**Course Outcomes**
- Sing jazz and contemporary music in various tempos, including the following: ballads, jazz swing, and Latin.
- Demonstrate appropriate stage presence in a performance setting, including the following: be able to introduce music performed by both soloist and ensemble to the audience, wear appropriate concert attire as prescribed by the instructor.
- Understand and use proper microphone technique while singing.
Understand and apply good breath control and tone while singing, including the following: the use of vibrato and song delivery.
Identify the key concepts in the articulation of song lyrics.
Name and identify the key concepts in the interpretation of jazz and contemporary vocal music, including the following: vowels, dynamics, message of songs performed, theoretical understanding of songs performed, historical information of songs performed.
Display memory of tunes performed in concert setting.
Display consistent attendance and participation in the twice weekly lab setting.

**MUSC 158 : Beginning Piano**
**Credits** 2
**Quarter Offered** Occasionally
This course is designed for the beginning student with little or no keyboard experience. Students will become proficient in note reading by interval and note name, rhythm/rest values, and use of chords in C, G and F.
Maximum enrollment, 8 students. This class may include students from multiple sections. (Elective)
**Prerequisites**
Instructor permission
**Course Outcomes**
- Note reading by interval and note name.
- Rhythm/rest values.
- Technique and hand position in major/minor keys.
- Use of primary chords in C, G and F.
- Additionally, students will receive an overview in music history, including the style periods: Baroque, Classical, Romantic, and Contemporary, and the primary composers of these eras.

**MUSC 161 : Beginning Instruction-Voice/Instruments**
**Credits** 2
**Quarter Offered** Occasionally
This course will focus on basic and intermediate music performance instruction (instrumental or vocal). This class may include students from multiple sections. (Elective)
**Course Outcomes**
- Tune the instrument; none of these are very specific, really can interpret them in a number of ways.
- Demonstrate proficiency in basic techniques.
- Read notes and chords.
- Perform at least three complete pieces.
- Demonstrate basic music theory knowledge.

**MUSC 179 : Concert Band**
**Credits** 2
**Quarter Offered** Fall, Winter, Spring
The Peninsula College Concert Band provides large ensemble experience for instrumentalists and gives Port Angeles a local concert band. Perform the finest wind band literature, both contemporary and traditional. Focus on musicianship, winds and percussion techniques, and performance skills through study of literature from all stylistic periods in various musical styles and cultures. Weekly rehearsals and one concert per quarter. This course may be repeated up to six times for a total of twelve credits. This class may include students from multiple sections. (Elective)
**Prerequisites**
Must be able to read music and play at the high school level, or better.
**Course Outcomes**
- Perform a variety repertoire of traditional and contemporary concert band music at designated quarterly concerts.
- Demonstrate improvement of skills in the following areas: music reading, rhythmic accuracy, musical expression, style, tone and intonation, ensemble balance and blend.
- Work effectively as a part of a team.
- Demonstrate a professional attitude towards practice, self-motivation, and self-evaluation as it pertains to the appropriate performance of music selected for each quarterly concert.
Demonstrate appropriate concert etiquette/behavior during the scheduled performances. This will include: preparation of music, preparation of instruments/accessories as appropriate, showing up on time for all rehearsals and concerts.

**MUSC 239: Jazz Improvisation Seminar**

**Credits** 1

**Quarter Offered** Occasionally

Seminar focusing on development of skills and techniques in jazz improvisation. Students should be able to read notes and chord symbols and should be acquainted with basic music theory principles. Concurrent enrollment in Jazz Ensemble is suggested but not mandatory. This class may include students from multiple sections. (Elective)

**Prerequisites**
At least one quarter of Jazz Ensemble or by audition; proficiency on instrument

**Course Outcomes**
- Demonstrate improvement of skills in the following areas: jazz improvisation, jazz theory, and rhythmic concepts.
- Apply skills learned in class to improvised solos.
- Comprehend various topics in jazz theory/harmony as they relate to the construction and execution of a successful improvised solo.
- Perform the melodies and construct an improvised solo over the chord changes of several selected tunes.

**MUSC 246-248: Vocal Ensemble IV, V, VI**

**Credits** 2

**Quarter Offered** Fall, Winter, Spring

Continuation of MUSC 148. This class may include students from multiple sections. (Elective)

**Course Outcomes**
- Sing jazz and contemporary music in various tempos, including the following: ballads, jazz swing, and latin.
- Demonstrate appropriate stage presence in a performance setting, including the following: be able to introduce music performed by both soloist and ensemble to the audience, wear appropriate concert attire as prescribed by the instructor.
- Understand and use proper microphone technique while singing.
- Understand and apply good breath control and tone while singing, including the following: the use of vibrato and song delivery.
- Identify the key concepts in the articulation of song lyrics.
- Name and identify the key concepts in the interpretation of jazz and contemporary vocal music, including the following: vowels, dynamics, message of songs performed, theoretical understanding of songs performed, historical information of songs performed.
- Display memory of tunes performed in concert setting.
- Display consistent attendance and participation in the twice weekly lab setting.

**MUSC 260: Special Topics**

**Credits** 1

**Quarter Offered** Fall, Winter, Spring

Special topics in music. This class may be repeated six times for up to thirty credits. This class may include students from multiple sections. (Elective)

**Course Outcomes**
Learning outcomes vary according to topic
Natural Resources (NATR)

**NATR 110 : Intro to Natural Resources**

**Credits** 5  
**Quarter Offered** Fall  
Sustainable natural resources are essential for future generations. This class includes foundations of natural resource management, policy, laws, renewable natural resource systems, administration, and introduction to scientific data collection. Students will explore natural resource history, issues, principles, and sustainable approaches to natural resource management. This class may include students from multiple sections.

**Course Outcomes**
- Define and discuss the concept of natural resources.  
- Explain the differences between renewable and exhaustible natural resources.  
- List the major governmental programs and agencies that regulate natural resources.  
- Describe the role of ecology in human efforts for sustainable natural resource management.  
- Demonstrate the use of scientific data collection methods to analyze and identify solutions to a natural resource problem.

**NATR 115 : Natural Ecosystems**

**Credits** 5  
**Quarter Offered** Fall  
This class focuses on ecosystems of the Olympic Peninsula in Washington State. Students will explore factors that influence ecosystem composition, disturbance-succession cycles, biodiversity, forests, and transformation of habitats. This class may include students from multiple sections.

**Course Outcomes**
- Discuss ecosystems and the tools used to analyze them.  
- Compare and contrast the main branches of ecosystem science.  
- Define ecological energetics and biogeochemistry.  
- Discuss sustainable natural ecosystems initiatives.  
- Define and summarize the cycles disturbance succession.  
- List causes of ecosystem disturbances.  
- Analyze the interrelationships between humans and natural ecosystems.

**NATR 130 : Water Quality Stream Habitat Monitoring**

**Credits** 3  
**Quarter Offered** Winter  
Healthy forests and communities rely on clean rivers and streams. Students will learn how to collect data to assess the conditions and quality of watersheds. Class includes sustainable practices that reduce the human impact on water quality and stream habitat. This class may include students from multiple sections.

**Course Outcomes**
- Describe key steps for designing an effective stream habitat monitoring system.  
- Discuss the human impacts on water quality and stream habitat.  
- Collect and analyze water quality data.  
- Develop a stream habitat monitoring and restoration plan.  
- Design a watershed assessment that analyzes causes of habitat and biological degradation.

**NATR 135 : Invasive Plant ID Prevention and Control**

**Credits** 2  
**Quarter Offered** Winter  
Invasive plants are capable of altering habitats and causing extinction of native plants and animals. This class includes invasive plant identification and methods to control and prevent invasive species in Washington State. This class may include students from multiple sections.

**Course Outcomes**
- Identify a minimum of 20 of the most common and problematic invasive plants in WA State using a dichotomous key or recognizable identifying characteristics.  
- Explain the ecological and economic impacts of invasive plants in the PNW.  
- Diagram the vectors and pathways of invasions for specific landscapes.
Distinguish between the various programs and agencies that address both noxious plants and invasive and non-native plants and describe their various missions. Describe current best-practice techniques for removal, control, and prevention of non-native plants.

**NATR 145: Restoration Ecology**

**Credits** 3  
**Quarter Offered** Spring  
Introduction to restoration ecology theory with a focus on the recovery of Pacific Northwest ecosystems. Students will explore the impact of economics, climate change, pollution, and other disturbances that degrade ecosystems. Class includes methods for reliably collecting and recording data, and methods for restoring damaged environments and sustaining healthy ecosystems. This class may include students from multiple sections.

**Course Outcomes**
- Discuss the human impact on restoration ecology and the land management practices that influence restoration ecology.
- Interpret maps, including land use maps and topographical maps.
- Compare and contrast restoration work in urban, DNR, USFS, and tribal land.
- Demonstrate the use of a map to identify land management agencies that manage specific sites, and the boundaries of that site.
- Record data and develop a plan for restoring an ecosystem.
- Analyze the scientific and logistical challenges of applying restoration ecology concepts into a restoration plan.

**NATR 150: Fisheries Management**

**Credits** 3  
**Quarter Offered** Spring  
Fish are important for their ecological, cultural, and economic impacts. However, reductions in habitat, over-fishing, and climate change have created challenges when managing this important resource. Students will explore the impacts of recreation fishing, commercial harvests, and the environment for fresh and saltwater fisheries with an emphasis on fish of the Pacific Northwest. This class may include students from multiple sections.

**Course Outcomes**
- Describe fishery systems and the role of management science in aquatic health and conservation.
- Analyze the effectiveness of feedback control and adaptive management in fisheries.
- List conservation and yield performance of harvest control rules for fisheries management.
- Identify control rules for threatened bycatch species.
- Discuss stakeholder participation in the development of management strategies.
- Define a responsible path forward for sustainable fisheries.
- Compare and contrast innovations in fisheries management.

**NATR 180: Natural Resources GIS and Maps**

**Credits** 4  
**Quarter Offered** Fall  
Global Information Systems (GIS) and mapping technologies provide tools to support restoration, protection, and preservation of natural resources and the environment. Students will learn how to use GIS for terrain and forest mapping. Class includes hands-on assignments with GIS software for computer mapping and data analysis. This class may include students from multiple sections.

**Course Outcomes**
- Define geographic information system terms and tools.
- Demonstrate the use of geographic information system tools to map forests and terrain.
- Develop and manage a geodatabase.
- Interpret and analyze mapped data.
- Add geotagged photos to a map.

**NATR 210: Timber Harvesting and Forest Road Management**

**Credits** 4  
**Quarter Offered** Spring
Introduction to timber harvesting, laws, policies, practices, contract preparation and administration, measurement, appraisal, logging systems, and forest road engineering. Learn how forestry operations and roads are an essential part of a well-managed forest. Class includes application of the Forest Practices Act and standards for timber harvesting. This class may include students from multiple sections.

**Course Outcomes**
- Identify timber harvesting systems and equipment.
- Locate and interpret timber harvesting and forest road policies, laws, and practices.
- Describe the Washington State Forest Practices Act (FPA) standards for timber harvesting, pre-commercial thinning, road construction, and safety.
- Demonstrate the use of forest tools to measure and calculate forest metrics, basal area, and relative density for use in timber appraisals.
- Identify and map proper road design and location for forest operations.

**NATR 215: River Restoration**

**Credits**: 4

**Quarter Offered**: Fall

Many of the streams and rivers of the Pacific Northwest have been altered from their historic conditions due to anthropogenic influences. Some of the negative impacts to streams include: impassable fish barriers, reductions of instream wood, disconnection of floodplains and off-channel habitat, removal or alterations of riparian forests, and the encroachment of invasive species. In this class, students will explore threats to healthy rivers in Washington State, and principles for sustainable river restoration. Includes methodologies, tools, and techniques for monitoring, assessing, and analyzing upstream conditions and data for river restoration. This class may include students from multiple sections.

**Course Outcomes**
- Discuss the political, social, ethical, economic issues in river restoration
- List principles for sustainable river conservation and restoration
- Compare and contrast natural and man made fish passage barriers
- Describe Washington State fish passage policies
- Develop a plan to monitor and analyze upstream conditions that affect river restoration

**NATR 220: Wildlife Habitat Management**

**Credits**: 5

**Quarter Offered**: Winter

Wildlife habitat management improves existing habitat for the benefits of animals and healthy ecosystems. This class focuses on wildlife habitat management, population demographics, interspecies interaction, analysis of contemporary wildlife management problems, and planning for sustainable wildlife habitat. This class may include students from multiple sections.

**Course Outcomes**
- Describe the development of wildlife management.
- Discuss the history of wildlife exploitation and the conservation movement.
- Identify effective wildlife habitat conservation methods.
- Describe the negative effects a lack of conservation can cause on wildlife habitat.
- Describe the basic habitat requirements of all wildlife.
- Explain how specific human activities harm and benefit wildlife and wildlife habitat.
- Describe management practices for sustainable wildlife habitat and endangered species.

**NATR 230: Wildland Fire Science**

**Credits**: 6

**Quarter Offered**: Spring

Wildland fire science examines the causes, consequences, and benefits of wildfire, and how to prevent and manage catastrophic wildfires. This class includes analysis of wildfire behavior, suppression tools, and human factors in wildland fire service. Class prepares students for Wildland Fire Incident Qualification Card Certification. This class may include students from multiple sections.

**Course Outcomes**
- Identify and discuss key characteristics of the primary wildland fire environment components - fuels, weather, and topography.
- Identify critical fire weather factors that, combined with receptive fuels, may result in extreme fire behavior.
Recognize how alignment of fuels, weather, and topography can increase the potential for extreme fire behavior.
Describe what the Lookouts, Communications, Escape Routes, and Safety Zones (LCES) system is and how it relates to the Standard Firefighting Orders.
Describe the methods for extinguishing a fire with or without the use of water.
Demonstrate the ability to construct fireline to required standards using various methods, tools and equipment, and techniques.
Discuss responsibilities of effective crews/teams operating in high risk, dynamic work environments.

NATR 250: Forest Management and Silviculture
Credits 4
Quarter Offered Winter
Silviculture is the art and science of controlling the growth and composition of a healthy forest. This class focuses on the principles of forest management and silviculture, forest protection, insect and disease control, stewardship of nonindustrial forests, rehabilitation, and cooperative forest management. Class emphasizes the science of establishing sustainable forests and woodlands. This class may include students from multiple sections.
Course Outcomes
- List effective silviculture management practices.
- Describe the kinds of plants that compose the vegetative strata found in a forest environment.
- List the most important species of trees in each of the regional forests.
- Distinguish between natural and artificial methods of regenerating forests.
- Identify the types of information needed to develop a long-term forest management plan based on sustained yields.
- Explain why forest management plans are needed to protect, renew, and sustain forest resources.

NATR 260: Natural Resources Internship
Credits 1-5
Quarter Offered Spring
Learn from natural resource professionals. This class provides opportunities for Natural Resource students to learn and apply new skills in a workplace and/or field experience setting. This class may include students from multiple sections.
Course Outcomes
- Apply skills, concepts, and procedures used in the field and workplace setting.
- Identify individual strengths and weaknesses related to workplace skills and behaviors.
- Demonstrate effective communication and interpersonal behaviors in the workplace.
- Demonstrate initiative and time management in a workplace setting.

NATR 260: Natural Resources Internship
Credits 1-5
Quarter Offered Spring
Learn from natural resource professionals. This class provides opportunities for Natural Resource students to learn and apply new skills in a workplace and/or field experience setting. This class may include students from multiple sections.
Course Outcomes
- Apply skills, concepts, and procedures used in the field and workplace setting.
- Identify individual strengths and weaknesses related to workplace skills and behaviors.
- Demonstrate effective communication and interpersonal behaviors in the workplace.
- Demonstrate initiative and time management in a workplace setting.
Nursing (NURS)

HUM 131: Policy and Ethics in Healthcare I
Credits: 1
Quarter Offered: Fall
Policy and Ethics in Healthcare I introduces legal, ethical and regulatory issues in healthcare with an emphasis in professional nursing. Identifies an approach to ethical decision making in healthcare with utilization of the Jonsen model. This class may include students from multiple sections.
Prerequisites
Nursing Program Admittance
Course Outcomes
- Discuss legal, ethical and regulatory issues in professional nursing.
- Identify a structured approach for ethical decision making in healthcare.
- Discuss scope of nursing practice and scope of nurse decision making.

HUM 232: Policy and Ethics in Healthcare II
Credits: 2
Quarter Offered: Winter
Policy and Ethics in Healthcare II is the second in a series of three courses. Focus is on policies related to management and leadership principles in health care, including but limited to: disparity of healthcare, resources, and the Affordable Care Act. This class may include students from multiple sections.
Prerequisites
Nursing Program Admittance; HUM 131
Course Outcomes
- Apply the scope of decision making to scenarios related to delegation, management and clinical practice.
- Apply the nurse practice act, standards of care and agency policies and procedures that affect the scope of nursing practice and management and leadership in nursing.
- Apply legal/ethical issues in professional nursing, to include but not limited to the role of the student nurse, nurse technician, the professional nurse and the nursing manager; including statutory, regulatory and common laws as they relate to the practice settings.

HUM 233: Policy and Ethics in Healthcare III
Credits: 2
Quarter Offered: Spring
Policy and Ethics in Healthcare III is the third in a series of three courses. Focus is on policies, ethics, and legal issues related to overall practice in healthcare professions. Includes local, state, national, and global perspectives of policies, legalities and ethics in healthcare. This class may include students from multiple sections.
Prerequisites
Nursing Program Admittance; HUM 232
Course Outcomes
- Explore how laws, ethical practice and policies are changed in nursing and healthcare.
- Apply principles of ethical decisions using the Jonsen Model in the profession of nursing to various scenarios across the lifespan.
- Apply the principles of policies and ethics to scenarios for the patient who is critically ill, experiencing disaster and in the context of community health.
- Explore national and global policies and ethics in healthcare and nursing with comparison to our regional policies and ethics.

NURS 101: Nursing I
Credits: 5
Quarter Offered: Fall
Nursing 101 introduces concepts and theories basic to the art and science of the nursing role. Provides an introduction to holistic assessment and care management, evidence based clinical decision making, concepts of caring, safety, patient teaching, collaboration, therapeutic communication, and professionalism. This class may include students from multiple sections.
Prerequisites
Nursing Program Admittance

Course Outcomes
- Identify relevant and abnormal data from a physical assessment.
- Identify the principles of evidence based practice and research application.
- Identify concepts of caring.
- Identify principles of safety in patient care.
- Identify teaching interventions in the context of a nursing care plan.
- Describe elements of the nursing process.
- With assistance, develop a concept map and nursing care plan.
- Identify members of the healthcare team.
- Identify communication techniques in the professional relationship.
- Identify historical and contemporary issues influencing the development of professional nursing practice.

NURS 102 : Nursing II - Theory
Credits 6
Quarter Offered Winter
Nursing 102 is a nursing theory course with a focus on chronic illness. Chronic alterations in health are considered in the context of holistic assessment and care management, pharmacology, evidence based clinical decision making, concepts of caring, safety, patient teaching, collaboration, therapeutic communication, and professionalism. This class may include students from multiple sections.
Prerequisites
Nursing Program Admittance
Course Outcomes
- Identify relevant and abnormal data in the assessment of chronically ill patient.
- Identify evidence based information to make clinical judgments and management decisions to ensure accurate and safe care for chronically ill clients.
- Apply caring concepts when providing care to patients with chronic alterations in health.
- Applying principles of safety, correlate the performance of nursing care with desired physiologic and psychologic outcomes in the chronically ill patient.
- Apply principles of patient teaching in the context of chronic illness.
- Apply the nursing process in the context of the chronic illness.
- Apply principles of collaborative decision making in the context of chronic illness.
- Identify appropriate communication to achieve positive client outcomes in the context of chronic illness.

NURS 103 : Nursing III - Theory
Credits 6
Quarter Offered Spring
Nursing 103 is a nursing theory class where students explore acute and chronic alterations in health across the lifespan are considered in the context of holistic assessment and care management, pharmacology, evidence based clinical decision making, concepts of caring, safety, patient teaching, collaboration, therapeutic communication, and professionalism. This class may include students from multiple sections.
Prerequisites
Nursing Program Admittance
Course Outcomes
- Apply relevant and abnormal data in the assessment of the well, chronically ill and acutely ill adult and pediatric client.
- Apply evidence based information to make clinical judgments for chronically and acutely ill adult clients, as well as pediatric clients.
- Apply caring concepts when providing care to patients with chronic and acute alterations in health.
- Applying principles of safety, correlate the performance of nursing care with desired physiologic and psychologic outcomes for clients in chronic, acute care and pediatric settings.
- Identify areas of patient teaching in the context of chronic and acute illness, as well as the pediatric client.
- Apply the nursing process in the context of acute and chronic illness, as well as the pediatric client.
- Apply principles of collaborative decision making in the context of acute and chronic illness, as well as the pediatric client.
- Identify appropriate communication to achieve positive client outcomes in the context of chronic illness and acute illness, as well as in the context of pediatric client.
Identify ethical, legal and regulatory frameworks of nursing and standards and scope of nursing practice in the context of acute and chronic illness, as well as in the context of the pediatric client.

**NURS 111: Fundamental Clinical Nursing Skills**

**Credits** 2

**Quarter Offered** Fall

Nursing 111 is a basic nursing skills lab course. Students demonstrate basic nursing skills using principles of holistic assessment, evidence based standards of practice, caring, safety, patient teaching, organizing and managing care, collaboration, therapeutic communication, and professionalism. This class may include students from multiple sections. Requires admission to the nursing program.

**Prerequisites**
Nursing Program Admittance

**Course Outcomes**
- Perform a basic physical and cognitive assessment in the skills lab setting.
- Identify evidence-based information and accepted standards of practice related to the performance of basic nursing skills.
- Identify aspects of holistic caring behavior as it relates to the performance of basic nursing skills.
- Adhere to principles of safety when performing basic nursing skills.
- Identify areas of patient teaching related to basic nursing skills.
- Demonstrate self organization in the performance of basic nursing skills.
- Work collaboratively with other students in the skills and simulation lab.
- Identify non-therapeutic and therapeutic communication skills.
- Demonstrate professional behavior in the skills lab and simulation lab.

**NURS 112: Nursing II - Lab**

**Credits** 5

**Quarter Offered** Winter

Nursing 112 is a clinical/lab course where students begin to demonstrate competencies necessary to meet the physical and psychosocial needs of those experiencing alterations in health across the lifespan. Integrated concepts include holistic assessment, evidence based practice, caring, safety, patient teaching, organizing and managing care, collaboration, therapeutic communication, and professionalism. This class may include students from multiple sections.

**Prerequisites**
Nursing Program Admittance

**Course Outcomes**
- With cuing assess the client for basic changes in health status.
- With cuing assess at a basic level, the emotional, cultural, religious and spiritual influences on the client’s health status.
- With cuing apply evidence based information to make clinical judgments and management decisions to ensure accurate and safe care in the long term care setting.
- With cuing demonstrate holistic caring behavior towards the client, significant support person(s), peers, and other members of the health care team.
- Provide accurate and safe nursing care in long-term care setting for one client.
- With cuing provide teaching based on an individualized teaching plan in the long term care setting.
- With cuing organize and manage the holistic care of one client in the long-term care setting.
- With cuing collaborate with the client and other members of the healthcare team to achieve outcomes in the long term care setting.
- With cuing utilize appropriate verbal and written channels of communication to achieve positive client outcomes in the long term care setting.
- With cuing utilize therapeutic communication skills when interacting with clients in the long term care setting.
- Practice within the ethical, legal and regulatory frameworks of nursing and standards and scope of professional nursing practice in the long term care setting.
- Demonstrate professional behavior in the long term care setting.

**NURS 113: Nursing III - Lab**

**Credits** 5

**Quarter Offered** Spring
Nursing 113 is a clinical/lab course where students continue to demonstrate competencies necessary to meet the needs of physical and psychosocial needs of those experiencing alterations in health across the lifespan. Focus on the acute care and community setting. Integrated concepts include holistic assessment, evidence based practice, caring, safety, patient teaching, organizing and managing care, collaboration, therapeutic communication, and professionalism. This class may include students from multiple sections.

**Prerequisites**
Nursing Program Admittance

**Course Outcomes**
- Assess the adult and pediatric client for basic changes in health status in acute care and community settings.
- Assess at a basic level, the emotional, cultural, religious and spiritual influences on the client’s health status.
- With minimal cuing apply evidence based information to make clinical judgments and management decisions to ensure accurate and safe care of adult and pediatric patients in acute care and community settings.
- Demonstrate, with minimal cuing, holistic caring behavior towards the adult and pediatric client, significant support person(s), peers, and other members of the health care team in the acute care and community settings.
- Provide holistic accurate and safe nursing care in pediatric community settings and in the acute care setting with one to two patients.
- With minimal cuing provide teaching based on an individualized teaching plan for adult and pediatric clients in acute care and community settings.
- With minimal cuing organize and manage the holistic care of pediatric clients in the community setting and of one to two adult clients in the acute care setting.
- With minimal cuing, collaborate with the adult and pediatric client, significant support person(s) and other members of the healthcare team to achieve client outcomes in acute care and community settings.
- With minimal cuing utilize appropriate verbal and written channels of communication to achieve positive client outcomes in acute care and community setting.
- With minimal cuing utilize therapeutic communication skills when interacting with adult and pediatric clients and support persons in the acute care and community setting.
- Practice within the ethical, legal and regulatory frameworks of nursing and standards and scope of professional nursing practice in the acute care and community setting.
- Demonstrate professional behavior in the acute care and community setting.

**NURS 201 : Nursing IV-Theory**

**Credits** 6
**Quarter Offered** Fall

Nursing 201 is a nursing theory course where student continue to explore complex alteration in health across the lifespan in the context of holistic assessment and care management, pharmacology, evidence based clinical decision making, concepts of caring, safety, patient teaching, collaboration, therapeutic communication, and professionalism. This class may include students from multiple sections.

**Prerequisites**
Nursing Program Admittance

**Course Outcomes**
- Analyze relevant and abnormal data in the assessment of normal and high risk obstetric patient, the normal newborn and acutely ill adult clients.
- Apply evidence based information to make clinical judgments for the normal and the high risk obstetric client, as well as acutely ill adult clients.
- Apply concepts of caring to clients with acute alterations in health and obstetric clients, and adapt care to in consideration of the client’s values, customs, culture, and/or habits.
- Correlate and analyze the performance of safe nursing care with desired physiologic and psychologic outcomes for clients in obstetric and acute care settings.
- Identify components of patient teaching in the context of chronic and acute illness, as well as the obstetric client.
- Apply the nursing process in the context of acute illness and the obstetric client.
- Apply principles of collaborative decision making in the context of acute illness, as well as the obstetric client.
Identify appropriate communication to achieve positive client outcomes in the context of acute illness, as well as the obstetric client.
Identify ethical, legal and regulatory frameworks of nursing and standards and scope of nursing practice in the context of acute illness as well as the obstetric client.

NURS 202: Nursing V-Theory
Credits 4
Quarter Offered Winter
Nursing 202 is a nursing theory course where student continue to explore increasingly complex alteration in health across the lifespan in the context of holistic assessment and care management, pharmacology, evidence based clinical decision making, concepts of caring, safety, patient teaching, collaboration, therapeutic communication, and professionalism. This class may include students from multiple sections.
Prerequisites
Nursing Program Admittance
Course Outcomes
- Analyze relevant and abnormal data in the assessment of the acute and critically ill patient.
- Analyze evidence based information to make clinical judgments for acute and critically ill patients.
- Apply concepts of caring to clients with acute and critical alterations in health, and adapt care to in consideration of the client’s values, customs, culture, and/or habits.
- Correlate and analyze the performance of safe nursing care with desired physiologic and psychologic outcomes for acutely and critically ill clients.
- Identify components of patient teaching in the context of chronic and acute illness and critical illness.
- Apply the nursing process in the context of the acute illness and critical illness.
- Apply principles of collaborative decision making in the context of acute and critical illness.
- Identify appropriate communication to achieve positive client outcomes in the context of acute and critical illness.
- Identify ethical, legal and regulatory frameworks of nursing and standards and scope of nursing practice in the context of acute and critical illness.

NURS 203: Nursing VI - Theory
Credits 4
Quarter Offered Spring
Nursing 203 is a nursing theory course where student continue to explore complex alteration in health across the lifespan in the context of holistic assessment and care management, pharmacology, evidence based clinical decision making, concepts of caring, safety, patient teaching, collaboration, therapeutic communication, and professionalism. This class may include students from multiple sections.
Prerequisites
Nursing Program Admittance
Course Outcomes
- Analyze relevant and abnormal data in the assessment of the critically and emergently ill patient.
- Use evidence based information and the nursing process to critically think and make clinical judgments and management decisions to ensure accurate and safe care.
- Apply concepts of caring to clients with critical and emergent alterations in health, and adapt care to in consideration of the client’s values, customs, culture, and/or habits.
- Correlate and analyze the performance of safe nursing care with desired physiologic and psychologic outcomes for critically and emergently ill clients.
- Provide teaching based on individualized teaching plan.
- Apply the nursing process in the context of critical illness, emergency care and community setting.
- Apply principles of collaborative decision making in the context of critical illness, emergency care and community setting.
- Identify appropriate communication to achieve positive client outcomes in the context of critical illness, emergency care and community settings.
- Identify ethical, legal and regulatory frameworks of nursing and standards and scope of nursing practice in the context of critical illness, emergency care and community setting.
- Analyze changes in health status in acute care and mental health settings.
- Assess the impact of developmental, emotional, cultural, religious and spiritual influences on the client’s health status.
Apply evidence based information to make clinical judgments and management decisions to ensure accurate and safe care for clients in acute care and mental health settings.
Demonstrate holistic caring behavior towards the client, significant support person(s), peers, and other members of the health care team in the acute care and mental health setting.
Provide holistic accurate and safe nursing care in mental health settings and in acute care setting with two patients.
Provide teaching based on an individualized teaching plan in the acute care and mental health setting.
Organize and manage the holistic care of clients in the mental health setting and in the acute care setting for two clients.
Collaborate with the client, significant support person(s) and other members of the healthcare team to achieve client outcomes in the acute care setting and mental health setting.
Utilize appropriate verbal and written channels of communication to achieve positive client outcomes in the acute care setting and mental health setting.
Utilize therapeutic communication skills when interacting with clients and support persons in the acute care and mental health setting.
Practice within the ethical, legal and regulatory frameworks of nursing and standards and scope of professional nursing practice in the acute care and mental health setting.
Demonstrate professional behavior in the acute care and mental health setting.

NURS 211: Nursing IV - Lab
Credits 5
Quarter Offered Fall
Nursing 211 is a clinical/lab course where students continue to demonstrate competencies necessary to meet the physical and psychosocial needs of those experiencing alterations in health across the lifespan. Focus on the acute care and mental health setting. Integrated concepts include holistic assessment, evidence based practice, caring, safety, patient teaching, organizing and managing care, collaboration, therapeutic communication, and professionalism. This class may include students from multiple sections.
Prerequisites Nursing Program Admittance
Course Outcomes
- Analyze changes in health status in acute care and mental health settings.
- Assess the impact of developmental, emotional, cultural, religious and spiritual influences on the client’s health status.
- Apply evidence based information to make clinical judgments and management decisions to ensure accurate and safe care for clients in acute care and mental health settings.
- Demonstrate holistic caring behavior towards the client, significant support person(s), peers, and other members of the health care team in the acute care and mental health setting.
- Provide holistic accurate and safe nursing care in mental health settings and in acute care setting with two patients.
- Provide teaching based on an individualized teaching plan in the acute care and mental health setting.
- Organize and manage the holistic care of clients in the mental health setting and in the acute care setting for two clients.
- Collaborate with the client, significant support person(s) and other members of the healthcare team to achieve client outcomes in the acute care setting and mental health setting.
- Utilize appropriate verbal and written channels of communication to achieve positive client outcomes in the acute care setting and mental health setting.
- Utilize therapeutic communication skills when interacting with clients and support persons in the acute care and mental health setting.
- Practice within the ethical, legal and regulatory frameworks of nursing and standards and scope of professional nursing practice in the acute care and mental health setting.
- Demonstrate professional behavior in the acute care and mental health setting.

NURS 212: Nursing V-Lab
Credits 6
Quarter Offered Winter
Nursing 212 is a clinical/lab course where students continue to demonstrate competencies necessary to meet the physical and psychosocial needs of those experiencing alterations in health across the lifespan. Focus on
the acute care and obstetric health setting. Integrated concepts include holistic assessment, evidence based practice, caring, safety, patient teaching, organizing and managing care, collaboration, therapeutic communication, and professionalism. This class may include students from multiple sections.

**Prerequisites**
Nursing Program Admittance

**Course Outcomes**
- Analyze changes in health status in acute care and obstetric settings.
- Analyze the impact of complex developmental, emotional, cultural, religious and spiritual influences on the client’s health status.
- Analyze evidence based information to make clinical judgments and management decisions to ensure accurate and safe care for increasingly complex clients in acute care and obstetrics.
- Demonstrate holistic caring behavior towards the increasingly complex client, significant support person(s), peers, and other members of the health care team in the acute care and obstetric setting.
- Provide holistic accurate and safe nursing care in obstetric settings and in acute care setting with two increasingly complex patients.
- Provide teaching based on an individualized teaching plan for the increasingly complex client in the acute care and obstetric setting.
- Organize and manage holistic care in the obstetric setting and in the acute care setting for two increasingly complex clients.
- Supervise a group of students in the long-term care facility, delegating, monitoring, and evaluating appropriately.
- Collaborate with the increasingly complex client, significant support person(s) and other members of the healthcare team to achieve client outcomes in the acute care setting and obstetric setting.
- Utilize appropriate verbal and written channels of communication to achieve positive client outcomes for the increasingly complex client in the acute care setting and obstetric setting.
- Utilize therapeutic communication skills when interacting with increasingly complex clients and support persons in the acute care and obstetric setting.
- Practice within the ethical, legal and regulatory frameworks of nursing and standards and scope of professional nursing practice for the increasingly complex client in the acute care and obstetric setting.
- Demonstrate professional behavior in the acute care and obstetric setting.

**NURS 213 : Nursing VI-Lab**

**Credits** 6

**Quarter Offered** Spring

Nursing 213 is a clinical/lab course where students continue to demonstrate competencies necessary to meet the physical and psychosocial needs of those experiencing alterations in health across the lifespan. Focus on the transition to the novice registered nurse role. Integrated concepts include holistic assessment, evidence based practice, caring, safety, patient teaching, organizing and managing care, collaboration, therapeutic communication, and professionalism. This class may include students from multiple sections.

**Prerequisites**
Nursing Program Admittance; **NURS 212** with a 2.0 or higher

**Course Outcomes**
- Holistically assess the biopsychosocial-spiritual-cultural dynamic needs of the client.
- Use evidence based information and the nursing process to critically think and make clinical judgments and management decisions to ensure accurate and safe care.
- Demonstrate holistic caring behavior towards the client, significant support person(s), peers, and other members of the health care team.
- Provide accurate and safe nursing care in diverse settings.
- Provide teaching based on individualized teaching plan.
- Organize and manage the holistic care of clients.
- Work cooperatively with others in the decision-making process to achieve client and organizational outcomes.
- Utilize appropriate verbal and written channels of communication to achieve positive client outcomes.
- Practice within the ethical, legal and regulatory frameworks of nursing and standards and scope of nursing practice.
- Demonstrate professional behavior in diverse settings.
**NUTR 121 : Nutrition in Healthcare I**

**Credits** 3

**Quarter Offered** Fall

Nutrition in Healthcare I provides an introduction to nutritional concepts in healthcare with a focus on holistic assessment, health promotion and wellness across lifespan. The role of the nurse is emphasized. This class may include students from multiple sections.

**Prerequisites**
Nursing Program Admittance

**Course Outcomes**
- Identify nutritional concepts in the context of health and wellness across the lifespan.
- Discuss nutrition-related health promotion topics with a focus on wellness.
- Identify the influence of ethnicity, culture and spiritual/religious beliefs on food choice.

---

**NUTR 122 : Nutrition in Healthcare II**

**Credits** 1

**Quarter Offered** Winter

Nutrition in Healthcare II is the second in a series of three courses. In this course, nutrition concepts are applied to various chronic alterations in health across the lifespan. This class may include students from multiple sections.

**Prerequisites**
Nursing Program Admittance; NUTR 121

**Course Outcomes**
- Identify relevant and abnormal data in the assessment of nutritional problems in the chronically ill client.
- Apply nutritional principles to adults experiencing various chronic alterations in health.
- Apply drug and nutrient interaction principles to maintain safety.
- Discuss nutrition-related health promotion topics with a focus on wellness.

---

**NUTR 123 : Nutrition in Healthcare III**

**Credits** 1

**Quarter Offered** Spring

Nutrition in Healthcare III is the third in a series of three courses. In this course, nutrition concepts are applied to various chronic and acute alterations in health across the lifespan. This class may include students from multiple sections.

**Prerequisites**
Nursing Program Admittance; NUTR 122

**Course Outcomes**
- Identify relevant and abnormal data in the assessment of nutritional problems in children and adults experiencing various acute and chronic alterations in health.
- Apply evidence based nutritional principles to children and adults experiencing various acute and chronic alterations in health.
- Apply drug and nutrient interaction principles to maintain safety in the context of children and adults experiencing various acute and chronic alterations in health.

---

**PSYC 141 : Psychosocial Issues in Healthcare I**

**Credits** 3

**Quarter Offered** Fall

Psychosocial Issues in Healthcare I examines determinants of health and illness including social, psychological, environmental, spiritual, and cultural dimensions across the lifespan and within the context of health care. This class may include students from multiple sections.

**Prerequisites**
Nursing Program Admittance

**Course Outcomes**
- Identify the influences of ethnicity, culture, and spiritual/religious beliefs to health practices.
- Identify one’s own psychosocial-spiritual-cultural beliefs, values and biases.
- Discuss evidence of health disparities among racial, ethnic, gender, and socioeconomic groups.
- Discuss concepts of self-care.
- Discuss principles of teaching, learning and behavioral change in the context of health and wellness.
- Apply the nursing process to the concept of stress, grief, bereavement, and end of life care.
Identify ways to collaborate with other members of the healthcare team to meet a client’s psychosocial needs.
Apply communication and teaching concepts in developing helping relationships with individuals, families, and groups.

**PSYC 242: Psychosocial Issues in Healthcare II**

**Credits** 2

**Quarter Offered** Fall

Psychosocial Issues in Healthcare II is the second in a series of two courses. Focus is on advanced determinants of mental health and illness, including social, psychological, environmental, spiritual and cultural dimensions across the lifespan and within the context of health care. Topics include violence and substance abuse. This class may include students from multiple sections.

**Prerequisites**
Nursing Program Admittance; [PSYC 141](#), [NURS 103](#)

**Course Outcomes**
- Analyze relevant and abnormal data in the assessment of mental health clients.
- Apply evidence based information to make clinical judgments for the mental health patient.
- Apply concepts of caring to clients with alterations in mental health and adapt care to in consideration of the client’s values, customs, culture, and/or habits.
- Correlate and analyze the performance of safe nursing care with desired physiologic and psychologic outcomes for clients in mental health settings.
- Identify components of patient teaching in the context of alterations in mental health.
- Apply the nursing process to the client with mental illness, substance abuse or to clients affected by violence.
- Apply principles of collaborative decision making in the context of alterations in mental health.
- Identify appropriate therapeutic communication related to mental health, mental illness, substance abuse, and violence to clients across the lifespan.
- Identify ethical, legal and regulatory frameworks of nursing and standards and scope of nursing practice in the context of with mental illness, substance abuse, and violence.
Nursing Assistant (NAC)

**NAC105 : Nursing Assistant Certified**

**Credits** 6

**Quarter Offered** Fall, Winter, Spring, Summer

Course studies the role of the nursing assistant, including basic nursing skills, emergency procedures, and laws and regulations affecting nursing assistants. Course consists of classroom, laboratory, and clinical experiences needed to become a nursing assistant. On completion, students are eligible to take the Washington State Certificate Exam, making them employable in many settings such as hospitals, skilled nursing facilities (long term care and rehab), and assisted living facilities. To meet the hours of education required by the state, attendance for all classes and clinicals is mandatory. Students must complete application process, including a Washington State Patrol background check, and be accepted into the course. This class may include students from multiple sections.

For more information, go to pencol.edu/proftech/nursing-assistant.

**Course Outcomes**

- Apply skills and knowledge of high quality nursing assistant care, as a member of a LTC professional team.
- Articulate accurate objective medical information verbally and in writing to other professional team members.
- Demonstrate proficient assistance to a wide variety of residents in a safe, clean environment.
- Create a care environment that encourages independence, while maintaining dignity, for each resident in their care.
- Demonstrate competence with care assistance, and decision making.
- Identify potential hazards and infectious agents to help with facility safety.
- Demonstrate an understanding of the health care system.
- Identify the facility policies and procedures and adhere with high self-expectations and standards.
- Identify healthy care practices for themselves and their families, using the new skills learned in care giving.
Nutrition (NUTR&)

NUTR& 101 : Introduction to Human Nutrition

Credits 5

Quarter Offered Fall, Winter, Spring

Basic principles of nutrition across the lifespan. Details the digestive process, the digestion and absorption of macro and micronutrients including vitamins, minerals, and phytonutrients. Examines the role of nutrition in the maintenance of optimal health and disease prevention. Includes analysis of personal dietary habits and the components of a healthful diet. This class may include students from multiple sections. (Natural Sciences, Elective)

Prerequisites
Eligibility for ENGL& 101 and P (2.0 or higher) in MATH 63 or equivalent

Course Outcomes
- Explore the relationship of diet to health and fitness.
- Analyze and design the components of a healthful diet.
- Explain how carbohydrates, proteins, and lipids are used in the body.
- Discuss the role of vitamins, minerals and phytonutrients in the human body.
- Describe the digestion and absorption of nutrients in the body.
- Explore and compare the metabolism of different macronutrients.
- Evaluate current nutrition issues and popular diets.
Oceanography (OCEA&)

OCEA& 101: Introduction to Oceanography

Credits 5
Quarter Offered Winter
General survey of geological, physical, chemical, and biological oceanography. Includes history of oceanography, origin of ocean basins, plate tectonics, sea floor, waves, tides, currents, properties of water, composition of seawater, ocean productivity, pelagic environment, benthic environment, coastal processes, marine resources, and pollution. This class may include students from multiple sections. (Natural Sciences)

Prerequisites
Eligibility for both ENGL& 101 and MATH 90

Course Outcomes
- Applied an understanding of fundamental ocean processes to explain how the ocean is structured and how ocean characteristics shape life.
- Described at least one major finding about the oceans developed via an application of the scientific method.
- Identified at least one major relationship between oceans and human communities.
- Considered career/education opportunities in ocean sciences, technology or education.
- Extracted and manipulated subsets of ocean data from online databases, or field collected data, in order to answer a research question.
- Communicated concepts in ocean science via writing and speaking.
- Extract the main concepts from a variety or readings in ocean science, including primary, secondary, and tertiary sources, demonstrating strong reading comprehension skills.
Paralegal (LEGAL)

LEGAL 100 : Introduction to Paralegal Studies
Credits 5
Quarter Offered Fall
A comprehensive introduction to the basic, key areas of paralegal studies. Develop a comprehensive understanding of the laws in our society, the importance of ethical and professional responsibility, and the skills needed to thrive in the legal environment. This class may include students from multiple sections.

Course Outcomes
- Describe the key skills and attributes of the professional paralegal.
- Describe the types of firms and organizations that hire paralegals.
- Explain typical policies and procedures governing paralegal employment.
- Describe the ethical and professional responsibilities of a paralegal.
- Explain how legal professionals are regulated.
- Demonstrate how to find some of the best legal resources available on the internet.

LEGAL 150 : Law Office Technology
Credits 5
Quarter Offered Winter
This course introduces computer hardware and software basics that apply to the legal environment. Students will learn and apply Microsoft Office components including Teams, Word, Excel, OneNote, PowerPoint, and Outlook, as they are used in the day-to-day life of paralegals. Students will also explore legal-specific software. This class may include students from multiple sections.

Course Outcomes
- Create and edit word processing documents that are unique to the legal environment, including the use of templates, macros, creation of table of contents and table of authorities.
- Create and edit spreadsheets that are unique to the legal environment using multiple data types and Excel functions.
- Draft and manage professional correspondence through email software programs.
- Coordinate calendar meetings and events with multiple attendees.
- Demonstrate an understanding of electronic discovery software and procedures.
- Learn the proper method and procedures involved in document collaboration.
- Organize the timely completion of all assignments, exercises, and projects.

LEGAL 210 : Legal Research, Analysis, and Writing
Credits 5
Quarter Offered Fall
Learn essential research and writing skills, that include identifying key facts, issue spotting, analysis and counter analysis, traditional and online research, secondary authorities and citating. Apply writing principles for writing legal briefs and memoranda. This class may include students from multiple sections.

Course Outcomes
- Define legal research, legal analysis, and law.
- Summarize the history of the U.S. legal system.
- Describe the 4-step process of legal research and the analysis process.
- Identify the legal issue(s) presented by the fact situation.
- Analyze the process used to determine if a court opinion applies to a legal question.
- Discover the counterargument to a legal position or argument.
- Identify secondary legal research sources.
- Apply legal principles to the drafting of legal research memoranda, court briefs, and legal correspondence.
- Summarize the rules of citing legal resources in documents prepared for filing in court or for use in a law office.

LEGAL 220 : Real Estate Law
Credits 5
Quarter Offered Winter
Learn the role of today's real estate paralegal and examine real estate law and transactions. Topics include contemporary real estate law and legal principles that use practical application, case example, and the latest real
estate legal forms. Examine all areas of transactional real estate—from contracts and brokerage relationships to surveys, title insurance, taxation and real estate finance related to residential and commercial processes in the United States. This class may include students from multiple sections.

**Course Outcomes**
- Introduce the key concepts and practical principles of real estate law.
- Summarize the issues a paralegal will experience in dealing with concurrent ownership.
- Describe the types of surveys and how they are prepared.
- Describe the objectives and process for the zoning of private real property.
- Describe the various types of easements and their uses.
- Explain the requirements of a valid real estate contract.
- Describe the basic terms of a real estate contract.
- Write and complete the sections of a deed.
- Identify the various sources of mortgage loans.
- Summarize the role of a paralegal in the preparation of mortgage loan documents.
- Identify the differences among condominium ownership, cooperative ownership, and leases.

**LEGAL 225 : Family Law**

**Credits 5**

**Quarter Offered** Winter

Learn the legal principles that govern marital and nonmarital families. Principles cover rights and duties as families are created, maintained, and dissolved. Examine the laws that defines relationships, rights, and duties in the formation, ongoing existence, community property, and dissolution of marriage and other family units. This class may include students from multiple sections.

**Course Outcomes**
- Identify the major themes of family law in the twenty-first century.
- List the variety of paralegal roles in various family-law offices and settings.
- Identify some of the major roles of paralegals in the compilation of a family history.
- Define the four major kinds of agreements that can be entered into by persons in intimate relationships: (1) cohabitation agreement, (2) premarital agreement, (3) postnuptial agreement, and (4) separation agreement.
- Examine the laws governing the formation of marriage.
- Define and distinguish among annulment, divorce, and legal separation.
- Describe the termination of a marriage by divorce process.
- List the characteristics of an effective separation agreement.
- Identify the major kinds of custody.
- State the role of state law and federal law on child support.

**LEGAL 230 : Wills, Trusts, and Estate Administration**

**Credits 5**

**Quarter Offered** Spring

Learn the basics of estate planning and bequeathing property to others through wills and trusts. Designed specifically for paralegals, this course familiarizes you with the latest laws and procedures, including the Uniform Probate Code, the new Uniform Electronic Wills Act and the Uniform Partition of Heirs’ Property Act. Examine the latest relevant laws, review court procedures, and learn about tax implications and ethical choices. This class may include students from multiple sections.

**Course Outcomes**
- Explain the need for and purpose of an estate plan and the procedures and documents used to create a plan.
- Identify, explain, and classify the various kinds of property, such as real and personal property or probate and non-probate property.
- Recognize the basic terms, including the difference between orthodox (traditional) and UPC terminology, associated with testacy and intestacy.
- Use the terminology associated with the validity, modification, and revocation of wills.
- Select the relevant facts in preparation for the preliminary draft of a will.
- Analyze the collected data and make sure that the information conforms to the client’s objectives when preparing a draft of the will.
- Identify the participants who are essential for drafting wills and trusts and for administering the estate of a decedent.
Define the essential elements of trusts.
Explain the uses and functions of the various kinds of trusts.
Describe the components of estate planning.

**LEGAL 235: Tort Law**

**Credits** 5

**Quarter Offered** Spring

Learn key concepts and practical principles of tort law. Apply tort concepts in current cases. Distinguish how to carefully consider variables in a case and potential resolutions. Realistic situations are designed to improve legal understanding and skills. Identify the principles of tort law needed for a successful career as a paralegal. This class may include students from multiple sections.

**Course Outcomes**
- Introduce the key concepts and practical principles of tort law.
- Identify the types of liability.
- Identify the elements of intentional torts.
- Identify the criteria used to assess the reasonableness of a person's conduct.
- Recognize the components of negligence damages.
- Identify the elements of negligence defenses.
- Understand what constitutes negligence.
- Distinguish among intentional, negligent, and innocent misrepresentation.
- Identify possible areas of liability.

**LEGAL 240: Civil Litigation**

**Credits** 5

**Quarter Offered** Spring

Introduction to the litigation process and the relationship of litigation to other legal specialties. Learn the civil litigation process and identify different types of civil litigation cases. Topics include commencement of a civil action, pleadings and motions, parties to a case, discovery of evidence, trials, judgments, and appeals, as well as alternatives to litigation. This class may include students from multiple sections.

**Course Outcomes**
- Describe the roles of legal personnel in the civil litigation process.
- Identify the proper court in which to initiate a lawsuit.
- Research and analyze the evidence in the case.
- Locate, preserve, and organize evidence in a civil case.
- Explain the process of filing a complaint.
- List the possible responses and consequences of a complaint response.
- Explain the purpose of serving and filing motions in court.
- Relate the paralegal's duties in compiling a settlement brochure.
- Determine the paralegal's responsibilities for trial preparation.
- Describe the paralegal's role in post-trial appeals.

**LEGAL 250: Paralegal Internship**

**Credits** 1-5

**Quarter Offered** Fall, Winter, Spring

Work-place learning in a legal services office. Aid attorneys with legal research, interview and provide advice to clients, and assist in case planning. Assist with development of self-help materials for pro-se litigants, training materials for staff and clients, and work on other special projects depending on the needs of the office. This class may include students from multiple sections.

**Course Outcomes**
- Conduct legal research and analysis.
- Conduct scientific research and analysis.
- Draft memoranda, affidavits and briefs.
- Research prospects for new litigation, including both factual and legal claims.
- Assist with the development of litigation strategies.
- Prepare reports, training and advocacy materials.
PE PROFESSIONAL (PEPRO)

PEPRO 101: Coaching Youth Soccer

Credits 2
Quarter Offered Spring
The Washington State E coaching course is an introduction to the methodology of coaching and the four components of coaching soccer: Technique, Tactics, Fitness, and Psychology. This course provides elementary information in the management and preparation of coaching youth soccer. This class may include students from multiple sections. (Elective)

Course Outcomes
- Demonstrate competency in planning an age-appropriate activity and lesson plan.
- Understand laws of the game, prevention and care of injuries, nutrition, sleep and hydration.
- Demonstrate the essential competencies to execute a team training session that is focused on a technical function of the game using small sided games and facilitator games.

PEPRO 102: Advanced Coaching for Youth Soccer

Credits 5
The D coaching course prepares students by expanding their knowledge and understanding of the technical and tactical demands of soccer and the developmental process necessary for players. It also provides an understanding of practical coaching methodology and the framework necessary to prepare players and a team for competition. This class may include students from multiple sections. (Elective)

Course Outcomes
- Teach the Principles of Play in a training environment.
- Apply the Principles of Play to functional group roles in a full team system.
- Plan a sequence of training and development of youth players.

PEPRO 110: Sports Officiating

Credits 3
Quarter Offered Fall
Weekend seminar covering rules, mechanics, and procedures for competitive sports officiating; enforcement of rules; use of signals; personal appearance and conduct, and qualifications for officials’ ratings. This class may include students from multiple sections. (Elective)

Course Outcomes
- Teach the Principles of Play in a training environment (7v7 to 9v9).
- Apply the Principles of Play to functional group roles in a full team system.
- Plan a sequence of training and weekly cycles to complete a seasonal plan.
Philosophy (PHIL/PHIL&)

**PHIL& 101 : Introduction to Philosophy**

**Credits** 5  
**Quarter Offered** Fall (odd year), Winter (odd year)  
Examination of central issues from each major branch of philosophy. Emphasis on understanding and evaluating diverse answers to philosophical questions about human knowledge, existence, and moral values. This class may include students from multiple sections. (Humanities, Elective)

**Prerequisites**  
Eligibility for or completion of ENGL& 101

**Course Outcomes**
- Explain the nature, method, and value of philosophy.
- Explain, defend, apply, and evaluate various solutions to problems in metaphysics, such as the paradox of free and determinism, the existence of God, and the nature of mind and body.
- Explain, defend, apply, and evaluate philosophically important moral theories, such as ethical relativism, utilitarianism, Kantianism, and elitism.
- Explain, defend, apply, and evaluate various conceptions of the legitimate purpose of the state, such as anarchist, democratic, libertarian, and rights conceptions.
- Explain, defend, apply, and evaluate traditional theories of knowledge, such as the theories developed by Descartes, Locke, and Hume.

**PHIL& 115 : Critical Thinking**

**Credits** 5  
**Quarter Offered** Occasionally  
Study of informal logic. Emphasis on methods for identifying arguments, detecting common fallacies, and applying principles of correct inductive reasoning. Designed to improve rational thinking skills as applied to both belief and action. This class may include students from multiple sections. (Humanities, Elective)

**Course Outcomes**
- Define and apply concepts of truth, validity, and soundness.
- Define and apply concepts of ambiguity and vagueness.
- Define and apply various informal fallacies.
- Define and apply induction by enumeration, statistical syllogism, and argument from analogy.
- Define and apply principles of correct causal reasoning.
- Define and apply sources of truth.

**PHIL& 120 : Symbolic Logic**

**Credits** 5  
**Quarter Offered** Fall (odd year)  
Introduction to first-order symbolic logic. Topics include symbolizing, truth tables, truth trees, proofs for sentence and predicate logic with identity, conditional and indirect proof, and invalidating interpretations. This class may include students from multiple sections. (Quantitative Skills, Natural Sciences, Elective)

**Prerequisites**  
P (2.0 or higher) in MATH 90 or equivalent

**Course Outcomes**
- Define the concepts of truth, validity, and soundness.
- Symbolize truth-functional sentences using symbolic notation.
- Construct proofs using the rules of propositional logic.
- Apply the methods of conditional and indirect proof.
- Symbolize quantified, predicate, and relational sentences using symbolic notation.
- Construct proofs using the rules of predicate logic.
- Providing interpretations to establish invalidity.

**PHIL 130 : Ethics and Contemporary Moral Issues**

**Credits** 5  
**Quarter Offered** Spring (odd year)
Introduction to moral theory and its application to contemporary moral issues. Potential topics include nihilism, relativism, utilitarianism, Kant, legal punishment, distributive justice, terrorism, abortion, animal rights, and euthanasia. This class may include students from multiple sections. (Humanities, Elective)

**Prerequisites**
Eligibility for or completion of [ENGL& 101](#)

**Course Outcomes**
- Explain the nature, justification, and limitations of various ethical theories, such as Ethical Nihilism, Ethical Skepticism, Ethical Relativism, the Divine Command Theory, Utilitarianism, and Kantianism.
- Explain the nature, justification, and limitations of various diverse views on moral issues relating to particular moral problems, such as legal punishment, economic justice, discrimination, abortion, and animal rights.
Phlebotomy (MED)

MED 125 : Introduction to Phlebotomy
Credits  5
Quarter Offered  Fall
This course introduces students to phlebotomy and is intended to provide an overview of the profession, discuss ethical issues regarding patient care, review job duties, and explore professional organizations, laws, and standards relevant to the profession. This class may include students from multiple sections.
Prerequisites
Phlebotomy Program Admittance
Course Outcomes
- Review standards and guidelines relevant to patient care and the phlebotomy profession.
- Learn how to use an educational electronic medical record system to document patient care, orders, and lab results.
- Explore regulatory issues and legal considerations relevant to the profession.
- Discuss issues related to patient confidentiality and patient rights.
- Review and discuss human anatomy and blood collection sites and techniques.
- Describe physical requirements of the profession.

MED 126 : Intermediate Phlebotomy with Lab
Credits  9
Quarter Offered  Winter
This course continues to instruct students in the study of phlebotomy and includes a skills laboratory component. Students will perform their clinical tasks under supervision in the lab and will put into practice the techniques and skills reviewed and discussed in the preceding course. IBEST instructor(s) will review math, writing, and communication subjects within the context of the phlebotomy profession. Topics to be covered, include, but are not limited to capillary, venous, and arterial blood withdrawal procedures, EKGs, CLIA-waived tests, blood borne pathogen and workplace safety training, aseptic handwashing and appropriate use of personal protective equipment. This class may include students from multiple sections.
Prerequisites
Phlebotomy Program Admittance; MED 102 and MED 125 with a 2.0 or higher
Course Outcomes
- Perform tasks within their scope of practice.
- Respond to verbal and nonverbal cues when interacting with patients, providers, and staff.
- Adhere to regulations regarding workplace safety.
- Perform capillary, venous, and arterial invasive procedures related to blood withdrawal.
- Perform electrocardiograms.
- Complete blood borne pathogen training and comply with safety signs, symbols, and protocols.
- Perform CLIA-waived tests.
- Perform aseptic handwashing.
- Implement critical thinking skills in various areas, including infection control and documenting or reporting test results.
- Identify quality assurance and quality control practices in the medical setting.

MED 127 : Advanced Phlebotomy with Externship/Capstone
Credits  10
Quarter Offered  Spring
This course is the final of three phlebotomy courses and includes a clinical externship and a capstone/job readiness component. Students will perform their clinical skills under supervision in the lab, at a contracted practicum site, and will perform the minimum number and type of blood withdrawal procedures required to earn eligibility for their Phlebotomy Technician Certification through the National Center for Competency Testing. Students will complete a capstone project to ensure their readiness to enter the workforce. This class may include students from multiple sections.
Prerequisites
Phlebotomy Program Admittance; MED 126 with a 2.0 or higher
Course Outcomes
Comply with laws and standards governing specimen collection as related to reliability and accuracy in lab testing.
Select appropriate equipment for the test ordered and type of patient.
Review and clarify orders and identify patients according to regulatory standards.
Recognize commonly ordered tests and the tubes needed for collection.
Perform appropriate post-test patient care.
Report results and critical values for point of care procedures.
Develop professional portfolio, including resume, cover letter, reference list, and letters of reference.
Complete a clinical externship, earning a minimum of 100 hours of patient care experience in the lab.
Participate in practice sessions to prepare for the national credentialing exam and job interviews.
Apply for MA-P credential.
Physical Education (PE)

PE 108/109 : Conditioning & Wellness I, II
Credits 1
Quarter Offered Fall, Winter, Spring
Applies health and wellness principles, cardiovascular fitness, and strength training for a comprehensive fitness program. Emphasis on circuit training. This class may include students from multiple sections. (Elective)
Course Outcomes
- Learn and apply the fundamentals of body conditioning i.e. warm-up, stretching and proper cardiovascular training techniques.
- Participate in a variety of conditioning opportunities to discover how cross training enhances cardiovascular development and interest in fitness.
- Demonstrate increased knowledge of proper health and fitness practices.
- Identify and develop habits that can lead to a life of good health and fitness.

PE 142-144 : Yoga I-III
Credits 1
Quarter Offered Fall, Winter, Spring
Introduction to the practice of Hatha Yoga, including the physical postures (asanas), breathing exercises (pranayama), meditation, and deep relaxation. Yoga improves strength, flexibility, balance, concentration, stress management, and overall health. This class may include students from multiple sections. (Elective)
Course Outcomes
- Perform yoga poses such as inversion, twisting, and balancing variation.
- Execute proper alignment in physical poses.
- Perform yoga flow (vinyasa) combinations.
- Discuss the benefits of poses, breathing, and relaxation techniques used in class.
- Apply meditation/mindfulness techniques to center and calm.

PE 151 : Tae Kwon Do
Credits 1
Quarter Offered Fall, Winter, Spring
Self-defense, self-discipline, and physical development. Safe and controlled use of kicks, punches, and blocks. This class may include students from multiple sections. (Elective)
Course Outcomes
Level 151-153 (Beginning) cover Tae Kwon Do Forms 1-3. Students will:
- Demonstrate correct form when executing moves that include kicks, stepping, jumping, “Sir Form”, crane stance, and kick variations
- Recognize basic Korean words associated with Tae Kwon Do
- Demonstrate safe sparring techniques
- Demonstrate how to use safety gear correctly
- Demonstrate the required forms for earning yellow, orange and green belts

Levels 154, 159 (Intermediate) builds on skills achieved in Levels 151-153 and adds new forms from Tae Kwon Do 4-5. Students will:
- Perform all new moves accurately
- Demonstrate the required forms for earning blue, purple and brown belts

PE 162-164 : Weighttraining I, II, III
Credits 1
Quarter Offered Fall, Winter, Spring
Fundamentals of strength training with emphasis on proper lifting techniques, development of individualized workout programs, knowledge of muscles in the body, and proper use of machines and equipment. This class may include students from multiple sections. (Elective)
Course Outcomes
- Learn and apply the fundamentals of weight training, i.e. warm-up, stretching and proper lifting technique.
Identify the basic muscle groups and determine how best to strengthen and tone them. Demonstrate increased knowledge of strength training and proper health and fitness practices. Identify and develop habits that can lead to a life of good health and fitness.
Physics (PHYS&)

PHYS& 110 : Physics for Non-Science Majors with Lab

Credits 5
Quarter Offered Fall
An introduction to physics intended for students not majoring in science. Topics include basic coverage of motion, force, energy, momentum, gravity, electricity and magnetism, light, waves, and relativity. Course includes one lab credit. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)

Course Outcomes
To build models of real-world phenomena using physics concepts, then use those models to analyze/predict phenomena.
To be able to identify and analyze interactions between objects in terms of the underlying physics, and to show/explain this to another person.
To carry out and interpret experiments in the laboratory, and to correctly answer questions related to the content covered.
To successfully communicate ideas through classroom participation, writing, and graphics.

PHYS& 114 : General Physics I with Lab

Credits 5
Quarter Offered Fall
Basic principles of physics presented without use of calculus. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Mechanics. Working knowledge of algebra and trigonometry: one year high school physics is recommended. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)

Prerequisites
Eligibility for ENGL& 101; MATH 98 or equivalent high school mathematics

Course Outcomes
Describe, explain, and use concepts of one-dimensional motion to solve 1-d motion problems.
Describe, explain, and use concepts of momentum and energy (and their associated conservation laws), along with Galilean relativity in solving complex motion problems, including collisions between objects.
Describe, explain, and use Newton’s laws with the concept of forces in explaining everyday phenomena, as well as solving dynamics problems, including work-related problems.
Describe and explain movement in a plane versus rotational motion and be able to translate linear kinematics and dynamics to angular kinematics and dynamics to solve problems in an accelerated reference frame.
Carry out and interpret experiments in the laboratory to answer mechanics-related questions during lab, as well as on assessments.

PHYS& 115 : General Physics II with Lab

Credits 5
Quarter Offered Winter
Basic principles of physics presented without use of calculus. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Heat and electromagnetism. This class may include students from multiple sections. (Elective)

Prerequisites
PHYS& 114 or instructor permission

Course Outcomes
Describe, explain, and use concepts relating to fluids to analyze and solve problems.
Describe, explain, and use principles of thermodynamics to solve thermodynamics problems, including heat, entropy, and atomic models.
Describe, explain, and use concepts surrounding electric interactions for static charge distributions.
Describe, explain, and use concepts of electric potential, current, and resistance in solving electrical circuits problems.
Describe, explain, and use concepts magnetism for permanent magnets and electromagnets, including changing electric and magnetic fields.
Carry out and interpret experiments in the laboratory to answer electricity and magnetism questions during lab, as well on assessments.

**PHYS& 116 : General Physics III with Lab**

**Credits** 5

**Quarter Offered** Spring

Basic principles of physics presented without use of calculus. Suitable for students majoring in technically oriented fields other than engineering or the physical sciences. Sound, light, and modern physics. This class may include students from multiple sections. (Elective)

**Prerequisites** PHYS& 115 or instructor permission

**Course Outcomes**
- Describe, explain, and use concepts and formulas to analyze and solve problems relating to superposition, oscillations, traveling and standing waves, and sound waves.
- Describe, explain, and use the concepts of the particle and wave models of light to solve problems and design and build optical instruments.
- Describe, explain, and use Einstein's special relativity and quantum mechanics to analyze and solve problems dealing with relativistic speeds and quantized energies.
- Describe, explain, and use the Bohr model to analyze and solve problems about atoms, molecules, and nuclear decay.
- Carry out and interpret experiments in the laboratory to answer waves, optics, and modern physics questions during lab, as well on assessments.

**PHYS& 221 : Engineering Physics I with Lab**

**Credits** 5

**Quarter Offered** Fall

Basic principles of mechanics and experiments in mechanics for physical science and engineering majors. One year high school physics is recommended. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)

**Prerequisites** Eligibility for ENGL& 101; MATH& 151 or taken concurrently

**Course Outcomes**
- Describe, explain, and use concepts of one-dimensional motion to solve 1-d motion problems.
- Describe, explain, and use concepts of momentum and energy (and their associated conservation laws), along with Galilean relativity in solving complex motion problems, including collisions between objects.
- Describe, explain, and use the concept of forces in explaining everyday phenomena, as well as solving dynamics problems, including work-related problems.
- Describe and explain movement in a plane versus rotational motion and be able to translate linear kinematics and dynamics to angular kinematics and dynamics to solve problems in an accelerated reference frame.
- Design, carry out, and interpret experiments in the laboratory to answer mechanics-related questions during lab, as well on assessments.

**PHYS& 222 : Engineering Physics II with Lab**

**Credits** 5

**Quarter Offered** Winter

Basic principles of electromagnetism, the mechanics of oscillatory motion, and experiments in these topics for physical science and engineering majors. This class may include students from multiple sections. (Elective)

**Prerequisites** MATH& 152 which may be taken concurrently; PHYS& 221

**Course Outcomes**
- Describe, explain, and use Einstein's special theory of relativity solve relativistic motion problems, especially as relates to conservation of momentum and energy.
- Describe, explain, and use concepts surrounding electric interactions for static charge distributions.
- Describe, explain, and use concepts of electric fields in deriving and using Gauss's law, work, energy, and capacitance in solving electrical problems.
- Describe, explain, and use concepts magnetism for permanent magnets and electromagnets, including changing electric and magnetic fields, and how this relates to special relativity.
Describe, explain, and use Maxwell's equations to understand changing electric and magnetic fields, especially in the context of AC circuits.
Design, carry out, and interpret experiments in the laboratory to answer electricity and magnetism questions during lab, as well on assessments.

**PHYS& 223 : Engineering Physics III with Lab**

**Credits** 5  
**Quarter Offered** Spring  
Electromagnetic waves, optics, waves in matter, and experiments in these topics for physical science and engineering majors. This class may include students from multiple sections. (Elective)

**Prerequisites**  
Concurrent enrollment or successful completion of MATH& 163, PHYS& 222 or instructor permission

**Course Outcomes**  
Describe, explain, and use the relationship between periodic motion and waves in one, two, and three dimensions to analyze and solve problems of energy transport.  
Describe, explain, and use concepts of geometric optics to understand principles of wave vs particle optics, and analyze and solve problems about wave-particle duality.  
Describe, explain, and use concepts relating to fluids to analyze and solve problems.  
Describe, explain, and use principles of thermodynamics to solve thermodynamics problems, including entropy and energy degradation.  
Design, carry out, and interpret experiments in the laboratory to answer electricity and magnetism questions during lab, as well on assessments.
Political Science (POLS/POLS&)

POLS& 101: Intro Political Science
Credits 5
Quarter Offered Fall, Winter, Spring
Nature and function of political institutions in major national systems. ENGL& 101 or concurrent enrollment is recommended. This class may include students from multiple sections. (Social Sciences, Elective)
Course Outcomes
- Identify the ideologies and political philosophies that shape political science.
- Explain the major concepts of political science.
- Describe the development and role of the modern nation-state.
- Explain the role of political and economic policies in the modern state.
- Examine the differences between democratic and non-democratic states.
- Assess the place of political culture in shaping a nation's political institutions.
- Describe the basic functions of a nation's political and social institutions.
- Analyze group interactions within a state, including political parties and elections.

POLS& 202: United States Government
Credits 5
Quarter Offered Fall, Winter, Spring
Popular government in United States; theory and practice of national institutions. This class may include students from multiple sections. (Social Sciences, Elective)
Course Outcomes
- Analyze the formation, concepts, and components of the United States Constitution.
- Explain the idea of federalism and explain the role of states and the national government in America's political environment.
- Demonstrate an understanding of America's political culture and examine the traits and beliefs of the American voter.
- Identify America's major political parties, the core beliefs, and the impact special interest groups can have on their actions.
- Explain the electoral process in the United States.
- Analyze the organization and purpose of the Legislative, Executive, and Judicial branches of government.
- Explain the modern media and its impact on public opinion.

POLS& 203: International Relations
Credits 5
Quarter Offered Winter
Introduction to the core issues and approaches used to understand the international system. The study of international relations broadly encompasses the fields of political economy and international security, both of which will be covered in this course, along with increasingly prominent cross-border issues that require global governance (countries working together to resolve problems). This class may include students from multiple sections. (Social Sciences, Elective)
Course Outcomes
- Identify and discuss the main theoretical perspectives used to analyze international relations.
- Apply theoretical concepts and perspectives to concrete, contemporary world events and issues.
- Analyze the roles played by state and non-state actors in the international system.
- Understand significant events in the history of international relations (e.g., the two World Wars, colonialism, and the Cold War).
- Recognize and evaluate the increasing importance of issues that transcend state boundaries such as the environment, terrorism, etc.
- Analyze how globalization is making the world “shrink” by leading to an increasingly interconnected and interdependent world.
- Identify and locate countries, continents, etc. on a map.

POLS& 204: Comparative Government
Credits 5
Quarter Offered Spring (even year)
This course introduces us to political systems and governments in different countries. We will learn some core approaches, concepts, themes, and theories that will help us understand, analyze, and compare domestic politics and institutions seen around the world. This class may include students from multiple sections. (Social Sciences, Elective)

**Course Outcomes**
- Demonstrate an understanding of various forms of political systems of countries in the world.
- Demonstrate familiarity with, and knowledge of, basic concepts, ideas, theories, and controversies in the field of comparative politics.
- Learn how historical and cultural differences influence the practice of politics in various countries.
- Recognize and evaluate some qualitative differences between various types of governance systems.
- Compare and contrast variations across countries systematically and analytically.
- Apply reading, writing, and verbal communication skills to examine and analyze important social, economic, and political issues of various countries.
- Apply knowledge gained in the class to think critically about current events and global affairs.
- Identify and locate continents, countries, capitals, etc. on a map.

**POLS 125 : Political Ideas and Ideologies**

**Credits** 5

**Quarter Offered** Fall (odd year)

Introductory course aimed at familiarizing the student with important ideas and ideologies that have shaped the contemporary world. Ideologies to be explored include Liberalism, Conservatism, Socialism, Nationalism, Fascism, etc. We will explore the philosophical foundations that undergird different political and economic systems in the world. To promote a deeper understanding, we will also read a selection of original works of major contributors within the ideological traditions. **ENGL 101** is recommended. This class may include students from multiple sections. (Social Sciences, Elective)

**Course Outcomes**
- Understand the importance of ideas to the study of politics.
- Be familiar and conversant with the basic features of the political ideologies found in the international system.
- Think critically and compare and contrast the different ideologies, both verbally and through written exercises.
- Understand and explain the political ideologies that inform the two major political parties in the US (Democrat and Republican).
- Recognize the shortcomings of various ideologies in theory and practice as they relate to nation-state governance.
Psychology (PSYC/PSYC&)

PSYC& 100 : General Psychology
Credits 5
Quarter Offered Fall, Winter, Spring, Summer
Introduction to science of behavior. Emphasis on biological foundations of behavior, cognition, learning, intelligence, motivation, memory, personality, and psychological disorders. This class may include students from multiple sections. (Social Sciences, Elective)
Prerequisites Completion of ENGL& 101 or concurrent enrollment
Course Outcomes
- Describe the principles of psychology's major paradigms and understand the influence of major theorists on the role psychology plays in western civilization.
- Identify the methods of research and theory building in psychology.
- Describe basic neuron structure and function, and the function of the brain in rudimentary form.
- Demonstrate mastery of the learning foundation of behavior.
- Describe the basic stages, cognitive processes, functions and limitations of human memory.
- Demonstrate an understanding of the importance of the concept of Consciousness.
- Understand the role cognition plays in language, decision making, and basic problem solving.
- Demonstrate a basic understanding of social forces and their influence on behavior.
- Identify important symptoms and features of major mental disorder categories.
- Describe basic approaches to treatment of psychological disorders and the characteristics of treatment providers.

PSYC& 200 : Lifespan Psychology
Credits 5
Quarter Offered Fall, Winter, Spring
Scientific study of human growth, development, and change throughout life cycle. Physical, cognitive, social, personality, and other aspects of the individual examined through successive stages, from prenatal development until death. This class may include students from multiple sections. (Social Sciences, Elective)
Prerequisites PSYC& 100
Course Outcomes
- Identify the major theories of development used in the fields of developmental and lifespan psychology.
- Understand the research methods used to investigate development across the lifespan.
- Explain the influence of biology and genetics on development.
- Describe major events during prenatal development and childbirth.
- Identify the major physical/biological, cognitive, social, and emotional changes that take place during each of the following stages of development: Infancy, Early Childhood, Middle Childhood, Adolescence, Emerging and Early Adulthood, Middle Adulthood, Late Adulthood.
- Understand and describe death and dying, and be able to identify major end of life issues.

PSYC& 220 : Abnormal Psychology
Credits 5
Quarter Offered Fall
Applies principles of science to study of abnormal behavior. Develop broad understanding of origin, characteristics, and classification of mental disorders from perspectives of psychological theory and research. Introduction to applied areas of diagnosis and assessment incorporated. This class may include students from multiple sections. (Social Sciences, Elective)
Prerequisites PSYC& 100
Course Outcomes
- Be able to define and explain the concept of abnormality.
- Explain how disorders are caused and influenced by many different factors including biology, culture, psychology, genetics, and more.
- Understand the nature, use, advantages, and limitations of diagnostic tools for psychological disorders, including but not limited to the DSM-5 (or any future updated edition of the DSM).
Recognize and explain major research methods and techniques used to investigate disorders in abnormal psychology.
Identify and describe the symptoms, etiologies, features, and treatments of the following disorder families:

a. Anxiety disorders, including phobias and generalized anxiety disorder;
b. Stress disorders, including post traumatic stress disorder and acute stress disorder;
c. Mood disorders, including the various forms of depression and bipolar disorder;
d. Suicide and suicidal behavior;
e. Psychotic disorders, with an emphasis on schizophrenia;
f. Neurocognitive disorders including but not limited to Alzheimer’s disease, Parkinson’s disease, Huntington’s disease, Lewy Body Dementia, Frontotemporal dementia, and Vascular dementias;
g. Personality disorders;
h. Dissociative disorders and somatoform disorders;
i. Eating disorders, with an emphasis of anorexia nervosa and bulimia nervosa;
j. Substance abuse disorders;
k. Developmental disorders, with particular emphasis on ADHD and Autism;
l. Sexual disorders

**PSYC 205 : Human Growth and Development**

**Credits** 5

Survey of human development, focusing on sequences and concepts of physiological, cognitive, social, and emotional development from conception through adolescence. This class may include students from multiple sections. (Elective)

**Prerequisites**

*PSYC& 100* or instructor permission

**Course Outcomes**

- Demonstrate an increase in psychological mindedness.
- Demonstrate an increase in the use of psychological terminology.
- Demonstrate an increase in tolerance and understanding of the complexity of the human situation.
- Demonstrate the ability to express in writing one’s philosophy of life and explain it verbally.
- Understand and appreciate Human Nature, including the satisfaction of needs, the role of habit, and the potential humans have for mental and emotional growth.
- Apply a goal orientation to one’s life plan.
- Appreciate the value and skills included in communication and intimacy.
- Apply the “creative” system to one’s career development.
- Apply principles of scientific method to the study of human experience.
- Discuss the major theoretical schools in the field of psychology to a limited extent.
- Apply basic psychological principles to the analysis of human experience.
- Comprehends experimental research within the field of social psychology.
- Identify a range of topics that can be applied to increase understanding of vital but complex social issues.
- Grow in capacity for empathy and understanding as he/she increases their store of psychological constructs that can be applied to the human condition.
- Develop an affirmative plan of action.

**PSYC 210 : Cognitive Psychology**

**Credits** 5

**Quarter Offered** Spring (odd year)
Cognitive Psychology explores the mind and brain as information processing systems. We will explore how the brain and mind are designed to collect and interpret data from the environment and then use that data to perceive the world, create memories, make decisions, plan actions, and act in the environment in such a way as to accomplish a required goal. This course explores the cognitive approach to psychology as it studies the topics of memory, attention, perception, problem solving, decision making, and language, among others. This class may include students from multiple sections. (Social Sciences, Elective)

**Prerequisites**
PSYC& 100

**Course Outcomes**
- Develop and apply critical thinking skills by understanding the scientific method and how it is applied to cognitive psychology.
- Describe the advantages and disadvantages of cognitive models as they help us understand the relationship between the mind and the brain.
- Apply the ecological perspective to the relationship between perception and action.
- Explain the role of attention in cognitive processing.
- Use evidence from memory research to identify the differences between short term memory, working memory, and long term memory.
- Explore research on the reconstructive nature of memory to better understand memory errors.
- Explain the different cognitive models used to define knowledge and learning to understand the means by which the brain organizes knowledge.
- Investigate the way that the brain processes language, and the role language plays in shaping our cognitions.
- Apply cognitive principles to better understand the processes of decision making and problem solving.

**PSYC 250 : Social Psychology**

**Credits** 5

**Quarter Offered** Spring (even year)

Study of impact of social situations on individual thought processes, emotions, and behavior. Experimental investigation of interpersonal attraction, attitude formation, conformity, aggression, social perception, helping behavior, and prejudice. This class may include students from multiple sections. (Social Sciences, Elective)

**Prerequisites**
PSYC& 100 or SOC& 101

**Course Outcomes**
- Expand knowledge of major social psychological studies and theories.
- Identify social psychological questions and hypotheses from daily life.
- Develop basic ability to find, comprehend, and think critically about social psychological research.

**PSYC 294 : Research Topics in Psychology**

**Credits** 1 - 2

Students will engage in guided individual study of original, seminal psychology sources and will submit formal written summary and analysis paper (or papers) as primary assessment of learning outcome at terminus of academic quarter. They will meet weekly with course instructor to monitor progress and discuss theoretical principles being covered in their research. This class may include students from multiple sections. (Elective)

**Course Outcomes**
- Develop and implement a Psychology research project.
Quileute (QUIL)

QUIL 121: Introduction to the Quileute Language

Credits 5  
Quarter Offered Fall, Winter  
This course is an introduction to the language of the Quileute-speaking tribes (the Quileute and Hoh). Students will begin by learning the phonetics (pronunciation and writing) of Quileute sounds and basic grammar. Emphasis will be on practical vocabulary, phrases and sentence-building for social interaction and public speaking as well as writing the Quileute language. Classes will also include Quileute cultural content and relevant language. (Elective)

Course Outcomes
- Demonstrate the use of the Quileute language in daily social and family settings, as emphasized in the lesson content, and to read and write Quileute.
- Develop conversational ability with regard to a variety of topics.
- Discuss appropriate behavior and speeches for ceremonial settings, meetings and intertribal activities such as the Paddle Journeys.
- Discuss language in the context of tribal culture, history and territory (including the Chemakum people).

QUIL 122: Quileute Language II

Credits 5  
Quarter Offered Winter, Spring  
This intermediate course builds on QUIL 121, the introduction to the language of the Quileute-speaking tribes (the Quileute and Hoh). Students will continue studying the phonetics (pronunciation and writing) of Quileute sounds and basic grammar. Emphasis will be on practical vocabulary, phrases and sentence-building for social interaction and public speaking as well as writing the Quileute language. Content will also feature translation exercises based on traditional Quileute stories in Andrade’s 1931 reprint Quileute Texts. This class may include students from multiple sections. (Elective)

Prerequisites
- QUIL 121

Course Outcomes
- Use the Quileute language in daily social and family settings, as emphasized in the lesson content.
- Develop and demonstrate more conversational ability with regard to a variety of topics.
- Discuss appropriate behavior and speeches for ceremonial settings, meetings and intertribal activities.
- Analyze and reflect on the Quileute language in the context of traditional storytelling, history, contemporary tribal culture, and territory (including the Chemakum people).
- Apply grammatical understanding of the Quileute language through translation exercises.
- Demonstrate ability to read and write the Quileute language

QUIL 123: Quileute Language III

Credits 5  
Quarter Offered Spring  
 Builds grammatically to “intentional” (future) tense constructions. Target vocabulary expands to include the five senses and lead words like auxiliary verbs, size, degrees, adjectives, question words, location and emotion. Common phrases to express opinion, thought and planning will be used to help speakers express themselves in the language. This class may include students from multiple sections. (Humanities, Elective)

Prerequisites
- QUIL 122 or instructor permission

Course Outcomes
- Discuss how Spirit World considerations created a distinctive Intitative tense in Quileute rather than a Future tense. Discuss the Intitative marker and how it is used to signal wishes, hopes, goals, or actions.
- Compare texts and charts to aid understanding, speaking, reading, listening, or writing in Quileute.
- Increase descriptive and lead word vocabulary: auxiliary verbs, color, size, emotions, locations, question words, three sets of object pronouns, and situational dialogues.
Social Sciences (SOCSI)

**SOCSI 101: Contemporary Global Issues**

**Credits**  5  
**Quarter Offered** Fall, Winter, Spring, Summer

Introductory course to develop the analytical skills necessary to understand major developments in the contemporary world and to provide the basis for more advanced study in the field of world politics. The course deepens students’ understanding of globalization and the need for common solutions to global problems that transcend borders. This class will include students from multiple sections. (Social Sciences, Elective)

**Course Outcomes**
- Understand and discuss—both verbally and in written form—major issues and problems confronting the world today.
- Understand and be able to communicate how these issues affect the global commons, i.e., all societies and peoples everywhere, and the common future faced by humankind.
- Develop a clear understanding of what globalization is and how it links the fates of nations and individuals in the world.
- Apply basic concepts and theories to real-life events and problems.
- Think critically and analytically about these issues and be able to form your own judgment regarding them.
Sociology (SOC/SOC&)

SOC& 101 : Introduction to Sociology
Credits  5  
Quarter Offered  Fall, Spring, Summer  
Human social behavior, social institutions, and society from sociological perspective. Includes introduction to sociological theory and research and application to topics such as social structure, socialization, deviance, inequality, and stratification. Completion of ENGL& 101 or concurrent enrollment recommended. This class may include students from multiple sections. (Social Sciences, Elective)  
Course Outcomes  
Demonstrate an understanding of the sociological perspective, the theoretical foundations (Functionalism, Conflict, and Symbolic Interactionism), and the contributions of major theorists to the development of these perspectives.  
Identify the ways in which sociologists gather, interpret, and evaluate data, including both quantitative and qualitative methodologies.  
Analyze and explain the components of culture and their impact on shaping human behavior and one’s own world view.  
Describe systems of stratification, including global inequality, racial stratification, social class, and gender stratification.  
Demonstrate an understanding of society as constructed, maintained, and changed through human action.  
Develop what C. Wright Mills called a "sociological imagination", enabling you to understand your life in the context of broader historical trends and social processes.  
Apply knowledge of societal structures and processes in critically examining problems facing various social institutions (i.e. family, education, media, economy, government, criminal justice, etc.).

SOC& 201 : Social Problems
Credits  5  
Quarter Offered  Winter  
This course explores the definition, causes, consequences, and solutions to social problems in U.S. society. We use sociological perspectives to examine some of the most critical problems facing society such as gun violence, racism, climate change, income inequality and poverty. The course examines how race, class, and gender inequalities contribute to and manifest as social problems. We also examine the roles of policymakers, social advocates, and the media in the process of defining social problems. This class may include students from multiple sections. (Social Sciences, Elective)  
Course Outcomes  
Demonstrate understanding of the structural and historic roots of social problems.  
Examine critically “taken for granted” societal arrangements and learn how they contribute to or cause social problems.  
Demonstrate how various social problems are interrelated.  
Apply a sociological imagination to understanding social problems.  
Acquire knowledge of the range of major social problems impacting the United States.  
Analyze the role of power in the definition and labeling of social problems.  
Describe a specific local or regional social problem and explain its causes and propose solutions.  
Demonstrate an awareness of the complexities of social problems and the difficulties in resolving them.  
Identify various sociological perspectives used to analyze social problems.

SOC 115 : Understanding Diversity
Credits  5  
Quarter Offered  Fall, Winter, Spring  
Examines elements that create differences within society and exposes learners to a variety of cultural ideas that will lead to a better understanding of people who are different. Culture, ethnicity, lifestyle, religion, disabilities, age, and gender issues will be examined. This class may include students from multiple sections. (Social Sciences, Elective)  
Course Outcomes  
Distinguish between difference and inequality.  
Evaluate the sociological perspectives on racial, ethnic, and religious groups in the United States.  
Explain the social construction of inequality by race, ethnicity and religious groups.
Analyze the stereotypes, images, prejudices, and behaviors regarding racial, ethnic and religious groups. Compare and contrast the similarities and differences in the experience of selected racial, ethnic and religious groups in the United States. Analyze the important issues related to diverse population groups in the United States. Evaluate the current indicators of discriminatory practices against diverse populations in the United States.

SOC 120 : Sociology of Deviance
Credits  5
Quarter Offered  Occasionally
Study of social deviance, including sociological perspectives on the definition, nature, and control of deviance in society, with a focus on selected problems associated with social deviance. This class may include students from multiple sections. (Elective)
Prerequisites  SOC& 101 or instructor permission
Course Outcomes  
Define societal deviance and interpret its relation to social norms and values.  
Identify historical ideas and trends regarding the nature, causes, and treatment of deviance. 
Apply basic sociological perspectives to the causes and occurrence of societal deviance. 
Identify and interpret the relationship between deviance, power and social control in contemporary society. 
Critically analyze contemporary issues associated with deviance and social control. 
Identify and interpret social controls on deviance, including their history and application.

SOC 205 : The Contemporary Family
Credits  3
Exploration of social and historical development of American family. Includes cross-cultural perspectives on family structures, sex and marriage, changing gender roles, impact of changing work-place on families at risk for violence, and substance abuse. This class may include students from multiple sections. (Elective)
Prerequisites  SOC& 101, or 10 credits of ECE, or instructor permission
Course Outcomes  
Exhibit an understanding of professional ethics and behaviors. 
Assess individual strengths and limitations as a "Helping Professional." 
Develop basic diagnostic and data gathering skills. 
Identify various types of counseling techniques. 
Develop an understanding of the various community resources 
Identify, understand, and apply general principles of Sociological theory. 
Have some acquaintance with Sociological method, theory, and terminology 
Have a deeper understanding of how (and why) humans behave in groups.

SOC 215 : Human Sexuality
Credits  5
Quarter Offered  Winter, Spring
An introduction to contemporary aspects of human sexuality, including development of sexuality over the lifespan, beginning with prenatal gender differentiation and proceeding through adulthood and aging. We will also cover related topics, such as interpersonal aspects of sexual relationships, sexual orientation, pregnancy, parenting choices, and STDs, including HIV/AIDS. ENGL& 101 strongly recommended. This class may include students from multiple sections. Co-listed with H ED 215. (Elective)
Course Outcomes  
Discuss sexuality research and education. 
Explain how sexuality influences history, culture, art, media, and the law. 
Define and label female and male reproductive anatomy. 
Explain human sexual response. 
Discuss gender and gender roles in society. 
Explain how sexuality encompasses an individual's life. 
Describe the process of how an individual develops their sexual individuality, attitudes, and values. 
Effectively communicate about sexuality and relationships. 
Discuss reproduction, pregnancy, and the birth process. 
Discuss the impact of parenthood.
List various birth control methods.
Discuss the impact of unintended pregnancy.
Discuss the diversity of human sexual behavior.
Discuss sexual coercion, rape, and abuse.
Describe how to prevent sexually transmitted diseases.
List sexually transmitted diseases and describe their symptoms.
Discuss sexual dysfunctions and their treatments.

SOC 230: Sociology of Gender and Sexuality

Credits  5
Quarter Offered  Fall
This class explores gender and sexuality as organizing principles of identity, interactions, and social institutions. The class emphasizes the intersection of gender, sexuality, race, class, and age in shaping contemporary inequalities. Major theoretical approaches to gender and sexuality will also be introduced. Other topics include media, family, culture, relationships, work, and social movements. This class may include students from multiple sections. (Social Sciences, Elective)

Course Outcomes
Upon successful completion of this course, students will be able to:

Apply major sociological perspectives, theories, and concepts to the analysis of issues related to gender and sexuality.
Explain the meaning of gender as a social construction.
Analyze how gender is an organizing principle of society and its institutions like the economy, politics, and the family.
Analyze how social structure and culture shape gendered identities and experiences.
Apply sociological concepts and theories to your personal experiences and to your observations of others.
Identify how imbalances in power shape gender dynamics at the interpersonal and structural levels.
Identify the main agents of gender socialization and their impact on children’s and adults’ gender construction.
Explain and analyze the intersections of gender with race and ethnicity, social class, sexuality, and other social identities.
Explain and evaluate the ways in which individuals’ social positions and identities shape their attitudes and views regarding gender.

SOC 235: Sociology of Food

Credits  5
Quarter Offered  Spring
This class explores society’s relationship with food and agriculture. We examine practices of production, distribution, preparation, and consumption of food. From seeds to the waste stream, we learn what social, political, and economic factors shape our food system and our food choices. Our focus will be both global and local as we investigate the relationships between food, culture, inequality, and ecology. Food justice and food security are organizing themes of the course. This class may include students from multiple sections. (Social Sciences, Elective)

Course Outcomes
Demonstrate a general knowledge and comprehension of food and culture from a sociological perspective.
Discuss the social construction of food as a form of cultural expression.
Demonstrate understanding of food access, consumption, and politics as an issue of justice.
Assess the ecological implications of the current global food system, especially industrial agricultural production.
Describe the complexities of the modern industrial food complex.
Identify sustainable and alternative models of food production.
Demonstrate structural explanations for food insecurity and hunger.
Examine our own eating habits through a sociological lens.
Explain how the production, distribution, and consumption of food reflect deeper social patterns and inequalities.
Describe how food patterns vary according to race, class, and gender.
SOC 245: Indians and Museums

Credits 5
Quarter Offered Spring

An introduction to types of museums, with a focus on Indigenous museums and indigenized museums, and the roles of such institutions within society. This course explores historical and current issues of power structures forming narratives and representations about identity, race, ethnicity, culture, history, and gender within museums. Social justice and social change are important themes for this course. This class may include students from multiple sections. (Social Sciences, Elective)

Course Outcomes

Identify how power structures shape narratives and representations of identity, race, gender, culture, ethnicity, and history within mainstream museums and indigenous museums in North America.

Explain how multiple social institutions such as politics, the legal system, and education influence the museum field within Indian Country and in mainstream North America.

Analyze important issues and perspectives across diverse communities and build an understanding of tribal, regional, state, and national museum involvement in social work and social change in North America.

Apply sociological concepts and theories to the analysis of historical and current issues within the museum field in regard to decolonizing museums, integrating perspectives of Indigenous museum professionals, and the uniqueness of indigenized museums in North America.

Examine conventional Western methodologies as having shaped museums and compare and contrast museums that implement Indigenous pedagogies, methodologies, and “ways of knowing”.
Spanish (SPAN/SPAN&)

SPAN& 121: Spanish I
Credits 5
Quarter Offered Fall
Begins the four skills of mastering a second language—listening, reading, writing, speaking. Introduction to culture of the Spanish-speaking countries. Learner-centered instruction. This class may include students from multiple sections. (Elective)
Course Outcomes
Demonstrate an awareness of cultural elements and understand their role in communication at the basic level.
Apply new Spanish vocabulary through a variety of written and oral assignments at the basic level.
Demonstrate novice level proficiency in listening, reading, speaking and writing in Spanish and the ability to function effectively in Spanish in a variety of real-life situations.
Apply appropriate grammatical structures.
Demonstrate an understanding of cultural elements and their role that influences the language and the culture of the Spanish-speaking countries.

SPAN& 122: Spanish II
Credits 5
Quarter Offered Winter
Continues from Spanish I the four skills of mastering a second language—listening, reading, writing, speaking. Introduction to culture of the Spanish-speaking countries. Learner-centered instruction. This class may include students from multiple sections. (Elective)
Prerequisites
SPAN& 121, one year of high school Spanish, the equivalent, or instructor permission
Course Outcomes
Demonstrate an awareness of cultural elements and understand their role in communication at the basic level.
Apply new Spanish vocabulary through a variety of written and oral assignments at the basic level.
Demonstrate novice level proficiency in listening, reading, speaking and writing in Spanish and the ability to function effectively in Spanish in a variety of real-life situations.
Apply appropriate grammatical structures.
Demonstrate an understanding of cultural elements and their role that influences the language and the culture of the Spanish-speaking countries.

SPAN& 123: Spanish III
Credits 5
Quarter Offered Spring
Continues Spanish I and II emphasis on the four skills of mastering a second language, listening, reading, writing, speaking. Introduction to culture of the Spanish-speaking countries. Learner-centered instruction. This class may include students from multiple sections. (Humanities, Elective)
Prerequisites
SPAN& 122, two years high school Spanish, the equivalent, or instructor permission
Course Outcomes
Demonstrate an awareness of cultural elements and understand their role in communication at the basic level.
Apply new Spanish vocabulary through a variety of written and oral assignments at the basic level.
Demonstrate novice level proficiency in listening, reading, speaking and writing in Spanish and the ability to function effectively in Spanish in a variety of real-life situations.
Awareness of the importance of foreign languages to professions and careers.
Demonstrate an understanding of cultural elements and their role that influences the language and the culture of the Spanish-speaking countries.

SPAN& 221: Spanish IV
Credits 5
Continuation of Spanish III. Mastery of listening, reading, writing, and speaking; review of previous material; introduction to Spanish literature and history; continued study of culture. Learner-centered instruction. This class may include students from multiple sections. (Elective)

Prerequisites
SPAN& 123, two years of high school Spanish, the equivalent, or instructor permission

Course Outcomes
- Demonstrate intermediate level proficiency in listening, reading, speaking and writing in Spanish.
- Apply new Spanish vocabulary through a variety of written and oral assignments.
- Apply appropriate grammatical structures.
- Describe and discuss the richness and diversity of Hispanic cultures.
- Identify and discuss a broadened knowledge of the people, places, art, literature, current issues, and daily life of Spanish-speaking countries through interaction with culturally rich readings, video and audio segments, and web-based activities.

SPAN& 222 : Spanish V

Credits 5
Continuation of Spanish IV. Mastery of listening, reading, writing, and speaking; review of previous material; introduction to Spanish literature and history; continued study of culture. Learner-centered instruction. This class may include students from multiple sections. (Elective)

Prerequisites
SPAN& 221 or instructor permission

Course Outcomes
- Demonstrate intermediate level proficiency in listening, reading, speaking and writing in Spanish.
- Recall and apply new Spanish vocabulary through a variety of written and oral assignments.
- Recall and apply appropriate grammatical structures.
- Describe and discuss the richness and diversity of Hispanic cultures.
- Identify and discuss a broadened knowledge of the people, places, art, literature, current issues, and daily life of Spanish-speaking countries through interaction with culturally rich readings, video and audio segments, films, and web-based activities.

SPAN& 223 : Spanish VI

Credits 5
Continuation of Spanish V. Mastery of listening, reading, writing, and speaking; review of previous material; introduction to Spanish literature and history; continued study of culture. Learner-centered instruction. This class may include students from multiple sections. (Humanities, Elective)

Prerequisites
SPAN& 222 or instructor permission

Course Outcomes
- Demonstrate intermediate level proficiency in listening, reading, speaking and writing in Spanish.
- Apply new Spanish vocabulary through a variety of written and oral assignments.
- Apply appropriate grammatical structures.
- Describe and discuss the richness and diversity of Hispanic cultures.
- Identify and discuss a broadened knowledge of the people, places, art, literature, current issues, and daily life of Spanish-speaking countries through interaction with culturally rich readings, video and audio segments, and web-based activities.

SPAN 104 : Beginning Spanish Conversation I

Credits 1
Quarter Offered Fall
A mixture of grammar, culture, pronunciation, listening and speaking at a beginner level. For beginning and ongoing students of the Spanish language. This class may include students from multiple sections. (Elective)

Course Outcomes
- Write and speak in Spanish for a variety of purposes and audiences at a beginner level.
- Listen actively and respond in Spanish at a beginner level.
- Discuss diverse societies and cultures.

SPAN 105 : Beginning Spanish Conversation II

Credits 1
Quarter Offered Winter
A continuation from SPAN 104. A mixture of grammar, culture, pronunciation, listening and speaking at a beginner level. For beginning and ongoing students of the Spanish language. SPAN 104, equivalent or instructor permission recommended. This class may include students from multiple sections. (Elective)

Course Outcomes
- Write and speak in Spanish for a variety of purposes and audiences at a beginner level.
- Listen actively and respond in Spanish at a beginner level.
- Discuss diverse societies and cultures.

SPAN 106: Beginning Spanish Conversation III
Credits 1
Quarter Offered Spring
A continuation from SPAN 105. A mixture of grammar, culture, pronunciation, listening and speaking at a beginner level. For beginning and ongoing students of the Spanish language. SPAN 105, equivalent or instructor permission recommended. This class may include students from multiple sections. (Elective)

Course Outcomes
- Write and speak in Spanish for a variety of purposes and audiences at a beginner level.
- Listen actively and respond in Spanish at a beginner level.
- Discuss diverse societies and cultures.

SPAN 107: Intermediate Spanish Conversation I
Credits 1
Quarter Offered Fall
A continuation from SPAN 106. A mixture of grammar, culture, pronunciation, listening and speaking at an intermediate level. For intermediate and ongoing students of the Spanish language. SPAN 106, equivalent or instructor permission recommended. This class may include students from multiple sections. (Elective)

Course Outcomes
- Write and speak in Spanish for a variety of purposes and audiences at an intermediate level.
- Listen actively and respond in Spanish at an intermediate level.
- Discuss diverse societies and cultures.

SPAN 108: Intermediate Spanish Conversation II
Credits 1
Quarter Offered Winter
A continuation from SPAN 107. A mixture of grammar, culture, pronunciation, listening and speaking at an intermediate level. For intermediate and ongoing students of the Spanish language. SPAN 107, equivalent or instructor permission recommended. This class may include students from multiple sections. (Elective)

Course Outcomes
- Write and speak in Spanish for a variety of purposes and audiences at an intermediate level.
- Listen actively and respond in Spanish at an intermediate level.
- Discuss diverse societies and cultures.

SPAN 109: Intermediate Spanish Conversation III
Credits 1
Quarter Offered Spring
A continuation from SPAN 108. A mixture of grammar, culture, pronunciation, listening and speaking at an intermediate level. For intermediate and ongoing students of the Spanish language. SPAN 108, equivalent or instructor permission recommended. This class may include students from multiple sections. (Elective)

Course Outcomes
- Write and speak in Spanish for a variety of purposes and audiences at an intermediate level.
- Listen actively and respond in Spanish at an intermediate level.
- Discuss diverse societies and cultures.

SPAN 110: Advanced Spanish Conversation I
Credits 1
Quarter Offered Fall
A continuation from SPAN 109. Continue your knowledge of the Spanish language at an advanced level. Class is conducted completely in Spanish. SPAN 109, equivalent or instructor permission recommended. This class may include students from multiple sections. (Elective)

**Course Outcomes**
- Write and speak in Spanish for a variety of purposes and audiences at an advanced level.
- Listen actively in Spanish and respond at an advanced level.
- Discuss diverse societies and cultures.

**SPAN 111 : Advanced Spanish Conversation II**

**Credits** 1

**Quarter Offered** Winter

A continuation from SPAN 110. Continue your knowledge of the Spanish language at an advanced level. Class is conducted completely in Spanish. SPAN 110, equivalent or instructor permission recommended. This class may include students from multiple sections. (Elective)

**Course Outcomes**
- Write and speak in Spanish for a variety of purposes and audiences at an advanced level.
- Listen actively in Spanish and respond at an advanced level.
- Discuss diverse societies and cultures.

**SPAN 112 : Advanced Spanish Conversation III**

**Credits** 1

**Quarter Offered** Spring

A continuation from SPAN 111. Continue your knowledge of the Spanish language at an advanced level. Class is conducted completely in Spanish. SPAN 111, equivalent or instructor permission recommended. This class may include students from multiple sections. (Elective)

**Course Outcomes**
- Write and speak in Spanish for a variety of purposes and audiences at an advanced level.
- Listen actively in Spanish and respond at an advanced level.
- Discuss diverse societies and cultures.

**SPAN 240 : Introduction to Latin American Literature**

**Credits** 5

SPAN 240 introduces students to a variety of short stories and songs from Latin America. The course emphasizes the four communicative skills of listening, reading, speaking, and writing. Basic grammar skills are reviewed. This course is entirely in Spanish. This class may include students from multiple sections. (Humanities, Elective)

**Prerequisites**
- SPAN& 123, two years of high school Spanish, or instructor permission

**Course Outcomes**
- Students will be able to demonstrate an understanding of the complexity of knowledge by discussing current issues, identifying patterns and points of view, sharing opinions, making predictions, and analyzing similarities and differences between the cultures of Latin American and their own.
- Students will gain cultural knowledge by researching the life and work of various Latin American writers and musicians, reading linguistically authentic and culturally rich texts, and studying the geographical, historical and cultural contexts of Latin American short stories and songs. Students will develop language proficiency by completing a variety of written and oral assignments, studying new vocabulary, and reviewing grammatical structures.
- Students will develop insights into their own self-identity by selecting an author and a song to present to the class, writing an original short story, and using analytical skills and creative expression to interpret the meaning of a story.
- Students will develop respect and acceptance of cultural perspectives different from their own and increase their level of confidence in processing encounters with other cultures through course content and discussions involving themes of diversity and cultural identity.
- Students will engage in social interactions and increase their level of cultural sensitivity towards others who are different from themselves by participating in pair and group activities, games, debates, role-plays, and a final group project, and by interacting with guest speakers from Spanish-speaking countries.
Students will show evidence of social responsibility by conducting peer reviews of the assigned composition, selecting and voting on the final two stories to be read by the class, and attending a cultural event related to Spanish outside of class.
Tribal Management (TM-BAS, Bachelor of Applied Science)

TM-BAS 300 : Introduction to Grant Writing
Credits 5
Quarter Offered Winter
Strategic grant writing aligns the needs of a nonprofit with funding sources, whether foundations, government agencies, corporations, or individuals. This introductory-level course offers a guide to the basics of grant writing. The course explores the relationship between grant writing and an organization’s strategy for fundraising. It also outlines the stages of grant writing and highlights grant writing best practices. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

Course Outcomes
- Identify government, corporate, and foundation funding opportunities.
- Explain the seven core elements of an effective project proposal.
- Develop a sustainable grant project budget.
- Demonstrate effective use of research and data in proposal development.
- Articulate issues of diversity, equity, and inclusion in grant seeking.
- Create a comprehensive project evaluation plan, including logic model.
- Write a competitive grant proposal.

TM-BAS 310 : Principles of Tribal Planning
Credits 5
Quarter Offered Spring
This course is for someone that wants to learn the complexities of land and planning within Indian country, focusing on planning and management. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

Course Outcomes
- Define and explain contemporary tribal organization theory.
- Describe the importance of effective and efficient tribal planning.
- Evaluate economic, political, and cultural variables that affect organizational development.
- Summarize leadership roles and responsibilities related to effective tribal organizational development and operation.

TM-BAS 320 : Introduction to Sovereignty
Credits 5
Quarter Offered Spring
This course will outline the unique context of tribal governments as sovereign nations and relationship with the federal government, examine the history and evolution of tribal government institutions within the unique tribal systems and describe the unique role and relationship between the federal government and Native Americans/Alaskan Natives. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

Course Outcomes
- Describe the evolving history of tribal sovereignty.
- Identify and explain how a tribe’s sovereignty is affected economically, politically, and culturally.
- Summarize historic and modern activism demanding sovereignty.
- Construct continued efforts to ensure and retain sovereignty.

TM-BAS 335 : Tribes, Jurisdiction and Land
Credits 5
Quarter Offered  Spring
This course will explore and analyze lands of tribal government and jurisdiction laws as they overlap with federal, state/provincial and local levels of government in the region of North America. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

Course Outcomes
Examine jurisdiction and property uses.
   Explain the different agencies that could get involved with the different property types.
   Identify the different types of properties and some pros and cons of those properties.

TM-BAS 395 : Citizen Entrepreneurship  
Credits 5 
Quarter Offered  Winter 
Pending Curriculum Committee approval

TM-BAS 410 : Tribal Economics  
Credits 5 
Quarter Offered  Fall 
This class will expose students to the processes and key economic principles and understand how these principles work in action with US and Tribal markets. Students will learn strategies and policies that pertain to economic performance. Using a capitalist lens, the class will deconstruct and decolonize this economic paradigm to see how different market models fit with Tribes. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

Prerequisites
Tribal Management BAS Program Admittance

Course Outcomes
Describe the core knowledge base of economics and economic development.
   Explain the interactions of the components, strategies, and policy objectives for tribal economics.
   Analyze the dynamic interaction of systems, culture, and capital.
   Evaluate the economic merging of Tribal opportunity, issues, and complexities.

TM-BAS 420 : Tribal History, Language, Literature and Icons  
Credits 5 
Quarter Offered  Winter 
Pending Curriculum Committee approval

TM-BAS 430 : Tribal Government and Politics  
Credits 5 
Quarter Offered  Fall 
This course will identify the interrelationships between federal and tribal governments and the methods used by Native Nations to administer programs. Students will learn the history of federal-tribal-state relations; the roles of tribal leaders and administrators; and the laws, policies, and issues that impact tribal governments. This class may include students from multiple sections.

Must be seeking a Bachelor of Applied Science in Management degree to enroll. If interested, visit pencol.edu/bas

Prerequisites
Tribal Management BAS Program Admittance

Course Outcomes
Summarize, compare, and contrast tribal governance practices, constitutions, and statutes.
   Demonstrate an understanding of settler policies and legal principles concerning Indian nations as well as settler governmental relationships with tribal governments.
   Formulate effective approaches to strategic, project, and operations management in tribal contexts.
Apply the fundamentals of relevant business practices for tribal administration.
Summarize, analyze, synthesize, and apply the leadership qualities required of tribal administrators.

**TM-BAS 450 : Federal Indian Law**
**Credits** 5  
**Quarter Offered** Spring  
Pending Curriculum Committee approval

**TM-BAS 460 : Capstone A**
**Credits** 5  
**Quarter Offered** Winter  
Pending Curriculum Committee approval

**TM-BAS 470 : Capstone B**
**Credits** 5  
**Quarter Offered** Spring  
Pending Curriculum Committee approval
Washington Association for Community Health Apprenticeship Program

CMAA 101: Basic Medical Assisting Skills
This course is part of the registered Medical Assistant Apprenticeship program offered through the Washington Association for Community Health. Students learn entry-level medical assisting skills such as patient engagement, working with electronic health records, medical sepsis and OSHA standards, taking vital signs, collecting lab specimens, assisting with patient exams, preparing immunizations and giving injections and urinalysis. Each module also contains an introduction to the anatomy and physiology of a related body system. This class may include students from multiple sections.
Prerequisites
Acceptance into WACH Apprenticeship Program

CMAA 102: Advanced Medical Assisting Skills
This course is part of the registered Medical Assistant Apprenticeship program offered through the Washington Association for Community Health. Students learn advanced medical assisting skills such as phlebotomy, advanced lab skills, administration of medications, cardiopulmonary procedures, and assisting with specialty exams. Each module also contains an introduction to the anatomy and physiology of a related body system. This class may include students from multiple sections.
Prerequisites
Acceptance into WACH Apprenticeship Program

CMAA 103: Acute Care and Intro to Chronic Diseases
This course is part of the registered Medical Assistant Apprenticeship program offered through the Washington Association for Community Health. Students learn advanced medical assisting skills to address acute conditions, such as setting up a sterile field, assisting with minor office surgery and wound care, identifying and sterilizing instruments, and applying physical healing agents such as bandages and splints. Students learn to assist in medical emergencies and disasters, and to provide effective patient education. Students learn about common chronic diseases and their management. Some modules also contain an introduction to anatomy and physiology of a related body system. This class may include students from multiple sections.
Prerequisites
Acceptance into WACH Apprenticeship Program

CMAA 104: Principles of Patient-Centered Care
This course is part of the registered Medical Assistant Apprenticeship program offered through the Washington Association for Community Health. Students learn the principles of patient-centered care and how to operate as a key member of an integrated care team. Students are introduced to basic administrative skills such as scheduling, billing and coding. Finally, students will participate in a self-paced targeted review for the Certified Clinical Medical Assistant (CCMA) exam. This class may include students from multiple sections.
Prerequisites
Acceptance into the WACH Apprenticeship Program

CMAA 105: MA Apprenticeship Clinicals
The WACH apprenticeship program requires the apprentices to complete a minimum of 2,000 clock hours of paid on-the-job training with a 1:1 apprentice coach. These hours are completed at the place of employment and the hours are tracked via time sheets by the employers and the WACH. This class may include students from multiple sections. Prerequisite: Acceptance into the WACH Apprenticeship Program. Hours are to be completed concurrently with the online didactic material offered by the WACH and the in-person skills days are scheduled and conducted by the employers and the WACH.
Welding (WELD)

WELD 110: Beginning Welding and Metal Fabrication I
Credits 15
Quarter Offered Fall
First quarter of three-quarter series to produce trade welders qualified to enter the job market. Introduction to American Welding Standards (AWS) in shielded metal arc welding (SMAW), oxy-acetylene flame cutting, welding symbols, joint design, and welding terminology. Learn to lay out, cut, prepare, fit-up, and weld together metal to repair parts and fabricate projects using SMAW. This class may include students from multiple sections.

This class has a $200 welding lab supplies course fee.

Course Outcomes
- Identify some common hazards in welding.
- Explain and identify proper person protection used in welding.
- Describe how to avoid welding fumes.
- Explain how to avoid electrical shock.
- Identify and explain the use of oxyfuel cutting equipment.
- Operate oxyfuel station safely.
- Explain the plasma arc cutting processes.
- Prepare and set up plasma arc cutting equipment.
- Identify and explain the carbon arc cutting process.
- Prepare the work area and CAC equipment for safe operation.
- Clean base metal for welding or cutting.
- Identify and explain joint design.
- Mechanically bevel the edge of a mild steel plate.
- Identify and explain codes governing welding.
- Identify and explain weld imperfections and their causes.
- Perform a visual inspection of fillet welds.
- Identify electrodes and their design purpose.
- Set up shielded metal arc equipment.
- Describe methods of striking an arc.
- Make stringer welds in the flat and horizontal position.
- Identify and explain groove welds.
- Set up and weld a groove weld in the flat and horizontal position.

WELD 120: Beginning Welding and Metal Fabrication II
Credits 15
Quarter Offered Winter
Continuation of WELD 110. Includes the shielded metal arc welding (SMAW) process, electrodes, oxy-acetylene flame cutting, introduction to plasma and carbon arc cutting, gouging, and the fundamentals of metallurgy. Learn to layout, cut, prepare, fit-up, and weld together metal to repair parts and fabricate projects using SMAW. This class may include students from multiple sections.

This class has a $200 welding lab supplies course fee.

Prerequisites
WELD 110 or instructor permission

Course Outcomes
Upon completion of studying Metallurgy, the student will fully understand how Metals and Alloys are used in the greatest variety of applications of all engineering materials. It is important to understand how metals (ferrous and non-ferrous) can be made stronger, how they can be shaped by casting, forging, forming, machining processes, and how also welding can alter properties of metals and alloys.

Details:
- a. History in development of Metals both ferrous and nonferrous
- b. Solidification of metals, alloys and phases
c. Production and forming of metals

d. Mechanical properties and their measurement

e. Strengthening mechanisms

f. Heat Treatment of Steel

g. Materials characterization and selection

h. Failure Analysis

**WELD 130 : Beginning Welding and Metal Fabrication III**

**Credits** 15

**Quarter Offered** Spring

Continuation of WELD 110 and WELD 120. Includes preparation for American Welding Society (AWS SMAW) certification. Learn metallurgy and how to layout, cut, prepare, fit-up, and weld together metal to repair parts and fabricate projects. This class may include students from multiple sections.

This class has a $200 welding lab supplies course fee.

**Prerequisites**

WELD 110 and WELD 120

**Course Outcomes**

Upon completion of studying Metallurgy, the student will fully understand how Metals and Alloys are used in the greatest variety of applications of all engineering materials.

It is important to understand how metals (ferrous and non-ferrous) can be made stronger, how they can be shaped by casting, forging, forming, machining processes, and how also welding can alter properties of metals and alloys.

Details:

a. History in development of Metals both ferrous and nonferrous

b. Solidification of metals, alloys and phases

c. Production and forming of metals

d. Mechanical properties and their measurement

e. Strengthening mechanisms

f. Heat Treatment of Steel

g. Materials characterization and selection

h. Failure Analysis

**WELD 145 : Aluminum Welding**

**Credits** 8

**Quarter Offered** Summer

Learn gas metal arch welding (GMAW) and gas tungsten arch welding (GTAW) in aluminum welding design, safety, metal preparation, welding codes and standards for aluminum welding and control of aluminum weld quality. Class emphasizes marine welding and prepares students for the American Welding Society (AWS D1.2) aluminum welding certification exam. This class may include students from multiple sections.

This class has a $200 welding lab supplies course fee and a $250 welding certification course fee.

**Prerequisites**

Completion of WELD 110 or above or instructor permission
Course Outcomes
- Use of safety equipment and demonstrate lab safety practices.
- Assemble and skip weld plates, stiffeners, girders, and prefabricated parts into panels.
- Use hand tools, power tools, and various welding equipment for assembly, handling, welding and fabricating parts, and subassemblies.
- Grind, air arc, bevel, or otherwise prepare joints for welding.
- Grind seams and edges to a specified standard.
- Test and repair of bulkheads, tanks, and pipes.
- Describe American Bureau of Shipping/Non-Destructive Testing (ABS/NDT) standards.
- Weld aluminum fillets in multiple positions with wire feeder.
- Weld aluminum butt joints in multiple positions with stick or wire feeder using weld symbols and in accordance with specified Welding Standards.
- Use TIG and MIG weld for general pipe applications.
- Apply certification standards for the aluminum processes.

WELD 210: Advanced Welding and Metal Fabrication I

Credits 15
Quarter Offered Fall
Class includes preparation for American Welding Society (AWS) certification and introduction to flux cored arch and gas metal arc welding process. Learn to layout, cut, prepare, fit-up, and weld together metal to repair parts and fabricate projects using the flux cored arch welding (FCAW) and gas metal arc welding (GMAW). This class may include students from multiple sections.

This class has a $200 welding lab supplies course fee.

Prerequisites
WELD 130; enrollment on space-available basis

Course Outcomes
- Define Flux Cored Arc Welding and Gas Metal Arc Welding.
- List the advantages and disadvantages of Flux Cored Arc Welding and Gas Metal Arc Welding.
- Explain the difference between fully and semi-automatic welding.
- Name the industries where Flux Cored Arc Welding and Gas Metal Arc Welding are used the most.
- Learn the set up and operation of each component of both wire feed processes.
- Safety practices specific to working with electricity, shielding gases, and other welding hazards.
- Perform various types of welds and weld joints.
- Describe techniques and procedures for all positions.

WELD 220: Advanced Welding and Metal Fabrication II

Credits 15
Quarter Offered Winter
Continuation of welding program designed to increase skills in the gas tungsten arc welding (GTAW) process and provide preparation for the American Welding Society (AWS) certification. Learn to layout, cut, prepare, fit-up, and weld together metal to repair parts and fabricate projects in the GTAW process. This class may include students from multiple sections.

This class has a $200 welding lab supplies course fee.

Prerequisites
WELD 210; enrollment on space-available basis

Course Outcomes
- Define Gas Tungsten Arc Welding.
- Distinguish among manual, semiautomatic, and automatic modes of operation.
- Identify where GTAW is used in industry.
- Describe advantages and disadvantages.
- Explain the different types of current needed to weld different types of metal.
- Recall safety precautions regarding GTAW.
- Discuss the correct procedures for the care and maintenance of welding machines.
- Identify and explain functions of shielding gases in a GTAW system.
- Follow precautions for gas regulation procedures.
- List characteristics of aluminum.
Explain aluminum welding procedures and techniques with DCEP, DCEN and ACHF.
Explain welding procedures for welding steel using DCEN.
Explain welding procedures for GTAW of nickel products. (Stainless Steel).
Explain Torch Manipulation and a variety of welding techniques for pipe.

WELD 230 : Advanced Welding and Metal Fabrication III
Credits 15
Quarter Offered Spring
Continuation of welding program designed to increase skills and provide preparation for several welding processes including AWS Pipe Welding certification. Learn to layout, cut, prepare, fit-up, and weld together metal to repair parts and fabricate projects. This class may include students from multiple sections.

This class has a $200 welding lab supplies course fee.
Prerequisites
WELD 220; enrollment on space-available basis

Course Outcomes
- List characteristics of aluminum.
- Prepare an aluminum joint for welding with the GMAW and GTAW process.
- Demonstrate proper techniques of welding aluminum with the GMAW and GTAW process.
- Explain power supplies, gases, electrodes, and techniques for ACHF welding on aluminum.
- Identify procedures for GTAW practice and production.
- Prepare and weld a 6” pipe according to ASME sect 9 with TIG or SMAW root.
- Prepare and weld a 8” pipe according to ASME sect 9 with TIG or SMAW root.
- Prepare and weld an aluminum pipe to ASME sect 9.
- Prepare and weld a stainless pipe to ASME sect 9.

WELD 290 : Welding Certification Prep
Credits 1
-6
One credit provides 22 hours of practice time for experienced welders to prepare for American Welding Society (AWS) Certification. Instructor will target skills needed to pass certification. This class may include students from multiple sections.

This course has a $30 welding lab supplies course fee.
Prerequisites
Instructor permission required; entry is on a space-available basis

Course Outcomes
- Practice welding techniques in a lab setting.
- Apply welding skills to certification standards.
Zoology (ZOOL)

ZOOL 101: Introduction to Zoology with Lab

Credits 5
Quarter Offered Winter
Introduction to the animal phyla. Studies of animal anatomy, physiology, behavior, ecology, and evolution illustrate the diversity and unity of animal life. Emphasis on animals of the Pacific Northwest. This class may include students from multiple sections. (Natural Sciences with Lab, Elective)

Prerequisites
Eligibility for both ENGL 101 and MATH 90

Course Outcomes
Communication

Present the results of student-generated experiment in written and oral form.
Conduct literature research on current topics in zoology and the impact humans are having on the biosphere.

Quantitative Reasoning

Interpret graphs and generate simple graphs that summarize their data.
Summarize data collected in a synthesis within a research project.

Information

Describe some of the central organizing concepts of biology, with an emphasis on the Animal Kingdom.
Classify novel organisms to their current classification by using the basic concepts of comparative animal anatomy and physiology, and evolution.
Identify the major animal phyla along with certain important subphyla or classes.

Critical Thinking

Design a non-lethal experiment involving invertebrate behavior.
Practice and apply observation skills to a novel question in zoology and critically evaluate and summarize observations.

Personal/Interpersonal

Connect concepts in ecology and animal biology to locate animals in local environments (with an emphasis in biodiversity).
### Distribution Lists

#### Communication Skills

Addiction Studies, Associate in Applied Science (AAS) Degree

Program Description

Complete your Addiction Studies, Associate in Applied Science (AAS). This program competencies can be attained through an extensive array of educational courses offered. The program contains classes suggested to begin internships in chemical dependency agencies in the public and private sectors and fulfill chemical dependency professional status in accordance with current certification requirements. Course content includes counseling, case management, psychology, sociology, ethics, law, and physiology as well as internships in a variety of work environments. Students are encouraged to begin the program in either fall or winter quarter.

Program Length: 6 Quarters
Program Code: SAAASAPT

Career Opportunities and Earnings

Clallam and Jefferson counties offer internships in inpatient and outpatient treatment facilities for students to gain experience as they transition to a chemical dependency professional. There continues to be a strong need for addiction professionals throughout the state.

- Case manager at emergency shelter
- Case worker for state agencies (i.e., Department of Social and Health Service, mental health agencies, etc.)
- Chemical dependency counselor
- Intervention specialist
For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes/.

**Program Outcomes**

- Identify basic facts on addiction and effect on individual, family, and society; chemical dependency theory and therapy models; dynamics of teenage substance abuse
- Maintain accurate case management records
- Utilize knowledge of state laws and court procedures regarding alcohol/drug offenses
- Apply basic counseling skills in a therapeutic setting
- Explore dynamics of chemically dependent family
- Recognize the relapse process and its impact on recovery and family-of-origin issues
- Examine ethical principles and rules of conduct for the chemical dependency counselor
- Address cultural awareness as it relates to working with others
- Apply basic computer skills to practical applications
- Communicate in writing for a variety of purposes and audiences
- Demonstrate competencies to succeed in the selected career pathway workplace
- Interpret human interaction with others
- Recognize and formulate an information need
- Report the actions of drugs on the body
- Identify AIDS and Hepatitis C as diseases
- Summarize assessment and treatment issues specific to individuals with co-occurring disorders

**Special Features**

- This program offers a special 14-credit certificate for persons interested in enhancing their potential entry into training positions. Coursework includes Introduction to Addiction Studies, Physiology of Drugs, and Counseling I.
- The Addiction Studies program offers the student a unique opportunity to develop self-awareness regarding valuable choices for a healthy lifestyle.
- Students interested in pursuing both an Addiction Studies AAS degree and an Associate in Arts, Direct Transfer Agreement (AA-DTA) degree simultaneously should contact the program advisor.
- Students can continue their academic studies at Peninsula College in the Bachelor of Applied Science in Behavioral Healthcare degree (BHAV). Students interested in this option should complete MATH& 107 or above instead of AMATH 121. Please contact the program advisor for additional prerequisite requirements at BAS@pencol.edu.

**Approximate Additional Costs**

- Books, supplies and miscellaneous fees (per quarter): $250 - $300
- Application for Chemical Dependency Professional: $250
- Initial Chemical Dependency Professional Certificate: $275
- Chemical dependency counselor trainee application: $110

**Sample Schedule**

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AAS. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

### Addiction Studies, Associate in Applied Science-Transfer (AAS-T) Degree

**Program Description**

Complete your Addiction Studies, Associate in Applied Science-Transfer (AAS-T). This program competencies can be attained through an extensive array of educational courses offered. The program contains classes suggested to begin internships in chemical dependency agencies in the public and private sectors and fulfill chemical dependency professional status in accordance with current certification requirements. Course content includes counseling, case management, psychology, sociology, ethics, law, and physiology as well as internships in a variety of work environments. Students are encouraged to begin the program in either fall or winter quarter. The AAS-T option may improve the transferability of Associate in Applied Science (AAS) degrees to some four-year programs.
Career Opportunities and Earnings

Clallam and Jefferson counties offer internships in inpatient and outpatient treatment facilities for students to gain experience as they transition to a chemical dependency professional. There continues to be a strong need for addiction professionals throughout the state.

- Case manager at emergency shelter
- Case worker for state agencies (i.e., Department of Social and Health Service, mental health agencies, etc.)
- Chemical dependency counselor
- Intervention specialist

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes/.

- Apply basic counseling skills in a therapeutic setting
- Explore dynamics of chemically dependent family
- Recognize the relapse process and its impact on recovery and family-of-origin issues
- Examine ethical principles and rules of conduct for the chemical dependency counselor
- Address cultural awareness as it relates to working with others
- Apply basic computer skills to practical applications
- Communicate in writing for a variety of purposes and audiences
- Demonstrate competencies to succeed in the selected career pathway workplace
- Interpret human interaction with others
- Recognize and formulate an information need
- Report the actions of drugs on the body
- Identify AIDS and Hepatitis C as diseases
- Summarize assessment and treatment issues specific to individuals with co-occurring disorders

Special Features

- This program offers a special 14-credit certificate for persons interested in enhancing their potential entry into training positions. Coursework includes Introduction to Addiction Studies, Physiology of Drugs, and Counseling I.
- The Addiction Studies program offers the student a unique opportunity to develop self-awareness regarding valuable choices for a healthy lifestyle.
- Students interested in pursuing both an Addiction Studies, Associate in Applied Science (AAS) degree and an Associate in Arts, Direct Transfer Agreement (AA-DTA) simultaneously should contact the program advisor.
- Students can continue their academic studies at Peninsula College in the Bachelor of Applied Science in Behavioral Healthcare degree (BHAV). Please contact the program advisor for additional prerequisite requirements at BAS@pencol.edu.

Approximate Additional Costs

- Books, supplies and miscellaneous fees (per quarter): $250 - $300
- Application for Chemical Dependency Professional: $250
- Initial Chemical Dependency Professional Certificate: $275
- Chemical dependency counselor trainee application: $110
Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AAS-T. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

Administrative Office Systems Accounting, Associate in Applied Science (AAS) Degree

Program Description

Complete your Administrative Office Systems Accounting, Associate in Applied Science (AAS). This program provides up-to-date curriculum that adapts to the rapidly changing workplace. In an interactive online learning environment, students master Microsoft 365 and digital literacy. They observe, practice, and train, then apply their skills in a real-world business environment.

Technology skills are combined with writing and specialty courses. The program is designed to prepare students to work in a wide variety of office settings: Accounting, Administrative Support, Computer Applications Support, Legal, and Medical.

Program Length: 6 Quarters
Program Code: ATBACAPT

Career Opportunities and Earnings

Previous graduates are employed by legal and medical offices, government agencies, schools, hospitals, and private enterprises. New opportunities are very likely in the future and the occupation is projected to have a large number of job openings in Washington state. Potential positions include:

- Accounting assistant
- Computer applications support
- Executive assistant
- Legal assistant
- Medical office assistant

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes/.

Program Outcomes

- Demonstrate advanced skills in cloud-based Microsoft 365
- Demonstrate ability to create, format, and modify word processing documents
- Communicate information and ideas (verbal & written) for a variety of business purposes and audiences
- Create workbooks, analyze data, and use mathematical functions
- Create tables, relationships, forms, and reports in a relational database
- Demonstrate an ability to organize and present information in visual presentations
- Demonstrate competencies to succeed in an administrative office career
- Exhibit effective interpersonal skills

Special Features

- Intermediate and advanced training in Microsoft 365.
- Interactive training and skill-based assessments completed in a virtual environment.
- Projects are based on real-world business situations.
- Writing skills for a variety of technical and business applications.
- Personalized tutoring for all AOS students.
- Wide array of short-term certificates of proficiency that provide benchmarks toward the completion of a degree.
- Reduced cost for AOS course textbooks, online learning tools, and software (see Approximate Additional Costs).

Program Goals

- Prepare students for a variety of administrative related job opportunities.
• Prepare students for a rapidly changing workplace.
• Monitor and improve relevancy of course curriculum to ensure a high-quality program.
• Monitor the needs of the community and the relevancy of curriculum through Advisory Committee meetings.

Program Prerequisites

Students entering this program should have basic knowledge of a computer and touch-typing skills. It is recommended that online students complete HUMDV 101. Writing classes are embedded in the program.

Students are required to place into the English and math/applied math courses required for this program. Learn more about placement options by visiting the Assessment and Placement website: pencol.edu/placement-testing.

Approximate Additional Costs

• AOS textbooks and online learning tools are purchased by subscription. Subscriptions can be purchased for one semester, one year, or two years. If a two year subscription is purchased, the average cost per AOS class is $27.
• Software: Office 365 (free for PC students)

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AAS. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Administrative Office Systems Certificate

Program Description

Complete your Administrative Office Systems Certificate. This program provides up-to-date curriculum that adapts to the rapidly changing workplace. In an interactive online learning environment, students master Microsoft Office 365 and digital literacy. They observe, practice, and train, then apply their skills in a real-world business environment.

Technology skills are combined with writing and specialty courses. The program is designed to prepare students to work in a wide variety of office settings: Accounting, Administrative Support, Computer Applications Support, Legal, and Medical.

Program Length: 3 Quarters
Program Code: OOCAOC45

Career Opportunities and Earnings

Previous graduates are employed by legal and medical offices, government agencies, schools, hospitals, and private enterprises. New opportunities are very likely in the future and the occupation is projected to have a large number of job openings in Washington state. Potential positions include:

- Accounting assistant
- Computer applications support
- Executive assistant
- Legal assistant
- Medical office assistant

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes/.

Program Outcomes

- Demonstrate advanced skills in cloud-based Microsoft 365
- Demonstrate ability to create, format, and modify word processing documents
- Communicate information and ideas (verbal & written) for a variety of business purposes and audiences
- Create workbooks, analyze data, and use mathematical functions
- Create tables, relationships, forms, and reports in a relational database
- Demonstrate an ability to organize and present information in visual presentations
- Demonstrate competencies to succeed in an administrative office career
- Exhibit effective interpersonal skills

Special Features

- Intermediate and advanced training in Microsoft 365
- Interactive training and skill-based assessments completed in a virtual environment
- Projects are based on real-world business situations
- Writing skills for a variety of technical and business applications
- Personalized tutoring for all AOS students
• Wide array of short-term certificates of proficiency that provide benchmarks toward the completion of a degree
• Reduced cost for AOS course textbooks, online learning tools, and software (see Approximate Additional Costs)

Program Goals

• Prepare students for a variety of administrative related job opportunities
• Prepare students for a rapidly changing workplace
• Monitor and improve relevancy of course curriculum to ensure a high-quality program
• Monitor the needs of the community and the relevancy of curriculum though Advisory Committee meetings

Program Prerequisites

Students entering this program should have basic knowledge of a computer and touch-typing skills. It is recommended that online students complete HUMDV 101. Writing classes are embedded in the program.

Students are required to place into the English and math/applied math courses required for this program. Learn more about placement options by visiting the Assessment and Placement website: pencol.edu/placement-testing.

Approximate Additional Costs

• AOS textbooks and online learning tools are purchased by subscription. Subscriptions can be purchased for one semester, one year, or two years. If a two year subscription is purchased, the average cost per AOS class is $27.
• Software: Office 365 (free for PC students)
• Tuition and fees: $5,402.85 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  ◦ First quarter (15 credits): $1,800.95
  ◦ Second quarter (15 credits): $1,800.95
  ◦ Third quarter (15 credits): $1,800.95

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

Administrative Office Systems Virtual Administrative Assistant Certificate

Program Description

The Peninsula College Virtual Administrative Assistant Certificate prepares students to provide administrative support to office managers and other office personnel both in person and remote. The certificate includes instruction in business correspondence, office technology, communications skills, Microsoft 365, Word, Excel, Outlook, PowerPoint, Teams, Zoom, survey development, and Adobe forms.

Program Length: 3 Quarters
Program Code: OOCVAC45

Program Outcomes

- Manage Microsoft Outlook emails, use calendars to schedule appointments, create contact and email distribution lists
- Use virtual communication tools to organize and manage remote meetings.
- Use business collaboration tools such as Google Workspace
- Develop and administer surveys
- Collect and present survey data in table and graphical formats
- Create digital business forms and distribute for digital signatures

Program Prerequisites

Students entering this program should have basic knowledge of a computer and touch-typing skills.

Approximate Additional Costs
Textbooks and online learning tools are purchased by subscription. Subscriptions can be purchased for one semester, one year, or two years. If a two-year subscription is purchased, the average cost per AOS class is $27.

- Software: Microsoft 365 (free for PC students)
- Tuition and fees: $5,783.90 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  - First quarter (15 credits): $1,800.95
  - Second quarter (18 credits): $2,029.58
  - Third quarter (17 credits): $1,953.37

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

Associate in Arts, Direct Transfer Agreement (AA-DTA)

The Associate in Arts degree is a Direct Transfer Agreement (DTA) designed for students who plan to transfer to a university after completing the first two years of study at Peninsula College. The degree is recommended for students who have not yet decided the field they will enter or the university they will attend. It gives students the broad background they need before beginning more specialized, upper-division courses and indicates that a student has completed a two-year liberal arts program.

Students who have a particular major in mind can focus their distribution choices and elective credits toward meeting their transfer institution plan. Students should include some 200 level coursework in their program of study. Explore our areas of emphases and make an individualized educational plan with an advisor.

This degree meets the Intercollege Relations Commission (ICRC) guidelines for direct transfer degrees, an inter-institutional agreement adopted to facilitate student transfer between Washington state community colleges and baccalaureate institutions.

To earn this degree, students must complete 90-quarter credits in courses numbered 100 or above (from approved distribution list) and meet specific distribution requirements. No more than 25 percent of credit requirements may be taken on a pass/no credit basis. Students should be aware that courses with “Pass” grades may not satisfy the requirements in their major field. Students must attain a cumulative college-level grade point average of 2.0, and earn a minimum of 30 credits at Peninsula College.

Students must select credits from three distribution lists: Natural Sciences, Social Sciences, and Humanities. A specific course may be credited toward no more than one distribution requirement. A minimum of fifteen credits in two separate subject areas must be selected from each list. For Natural Sciences, at least five credits must be a lab. For Humanities, no more than five credits can be a Humanities-Performance course and no more than five credits may be applied in world languages at the 100 level.

Students are responsible for knowing transfer requirements and policies, as well as specific course choices and GPA requirements, are urged to consult the catalog of the institution for which they plan to transfer.

Program Plan Code: LASDTAA

- Demonstrate academic skills at the college level, e.g., literacy, quantitative and critical thinking, composition, and the acquisition of information
- Employ modes of inquiry basic to philosophical, scientific, mathematical, social, historical, and literary studies
- Demonstrate knowledge in the humanities and arts, natural and physical sciences, mathematics, and the social sciences
- Integrate knowledge drawn from diverse areas of study

Associate in Business, Direct Transfer Agreement/Major Related Program (DTA/MRP)

The Associate in Business degree is designed as a Direct Transfer Agreement/Major Related Program (DTA/MRP) for transfer with junior standing to baccalaureate institutions. It is generally pursued by students who plan to transfer to a four-year university as a business major after completing their first two years at Peninsula College.

Students are responsible for checking specific requirements of their intended transfer institution, including overall minimum GPA and course choices. A higher GPA in a selected subset of courses or a specific minimum grade in one or more courses, such as math or English, may be required. Students are urged to consult the catalog of the institution for which they plan to transfer. To earn this degree you must complete a minimum of 90 credits in courses required by the DTA.

View the Associate in Business DTA/MRP document for specific university requirements and confer with your advisor.
Communication Competencies

- Demonstrate ability to communicate effectively utilizing the language, tools, concepts, and models applicable to business and/or management disciplines.
- Exhibit an ability to communicate business and/or management concepts to diverse audiences through visual presentation.
- Display professional written and oral communication skills as a team member.
- Apply effective written and oral communication skills as a team leader.

Quantitative Reasoning

- Develop and evaluate options to problems using quantitative analysis and decision making skills.
- Devise solutions based on the outcomes of the quantitative data analyses.

Information Competencies

- Identify relevant information to develop, evaluate options, and implement solutions.
- Recognize the relative costs and benefits of potential actions.
- Research and demonstrate proficiency in assessing and selecting information technology.
- Demonstrate proper citations from reference information.
- Evaluate the credibility and authenticity of research information.

Critical Thinking

- Identify complex problems and review relevant information.
- Exhibit critical thinking using logic and reasoning to identify the strengths and weaknesses of alternative solutions, conclusions, or approaches to problems.
- Demonstrate judgment and decision making skills to assess the relative costs and benefits of potential actions to select the appropriate solution.
- Analyze key legal principles that apply in organizational transactions.
- Demonstrate an understanding of legal risk management.

Personal and Interpersonal Competencies

- Interact collaboratively and engage respectfully with team members to successfully achieve team goals.
- Demonstrate an understanding of management and/or team member roles.
- Exhibit effective interpersonal skills.
- Formulate and articulate a code for ethical behavior.

**Associate in Computer Science, Direct Transfer Agreement/Major Related Program (DTA/MRP)**

**Degree Requirements**

The Associate in Computer Science, Direct Transfer Agreement/Major Related Program (DTA/MRP) is applicable to students planning to prepare for computer science and related majors at universities and colleges in Washington. This degree guide meets all of the requirements of the Direct Transfer Agreement (DTA).

Students should check specific requirements of their intended transfer institution, including overall minimum GPA, a higher GPA in a selected subset of courses or a specific minimum grade in one or more courses such as math or English. To qualify for this degree, you must complete a minimum of 90 credits in courses numbered 100 or above, with a cumulative grade point average (GPA) of 2.0 or better. Computer Science programs are competitive and may require a higher GPA overall or a higher GPA in specific courses.

View the **Associate in Computer Science DTA/MRP document** for specific university requirements and confer with your advisor.

Program Code: CSACSA

**Communication Competencies**

- Comprehend the difference between written opinions vs ideas supported by scientific inquiry.
- Demonstrate the ability to communicate scientific ideas and the process of science.

**Quantitative Reasoning**

- Manipulate numbers (large and small), use common measurement systems, and solve simple linear algebraic problems.
- Recognize functional relationships between and among measurable phenomena.
- Apply systematic approaches and logic to solving quantitative problems.
- Translate mathematical symbols into words and words into mathematical symbols.
- Demonstrate the ability to use modeling and simulation to solve scientific problems.

**Information Competencies**

- Recognize the difference between questions of high scientific impact vs those unlikely to provide critical information about a scientific phenomenon or process.
- Ability to apply the process of science.

**Critical Thinking**

- Identify and troubleshoot scientific problems.
• Demonstrate the ability to use quantitative reasoning and analyze data.
• Demonstrate the ability to apply the process of science.

**Personal and Interpersonal Competencies**

• Gain an understanding of the relationships between science and society.
• Gain familiarity with and an appreciation for the interdisciplinary nature of science.
• Demonstrate the ability to collaborate and understand the importance of collaboration in science.

## Associate in General Studies

The Associate in General Studies degree is appropriate for students whose primary goal is to earn a two-year college degree. This degree is not designed to be a transfer degree. It is strongly recommended that students seeking to earn this degree and plan to transfer to a four-year college or university seek the assistance of an advisor to plan an appropriate course of study.

**Associate in Nursing, Direct Transfer Agreement/Major Related Program (DTA/MRP)**

**Program Description**

The Washington State Nursing Care Quality Assurance Commission approves the nursing program, and the program is accredited by National League for Nursing Commission for Nursing Education Accreditation. Students who complete the two-year associate degree program are eligible to take national board exams for registered nurses. The curriculum provides a strong foundation in applied and social sciences and an understanding of the fundamentals of patient care in a variety of settings. Throughout the program students integrate experience caring for patients in acute care hospitals, long-term care facilities, and community agencies. Successful completion of this program leads to an Associate in Nursing, Direct Transfer Agreement/Major Related Program (DTA/MRP). Students with this degree need only to complete senior level courses at select universities in the state of Washington to achieve a Bachelor’s of Science in Nursing. Courses transfer as defined by the Associate in Nursing, Direct Transfer Agreement/Major Related Program (DTA/MRP) agreement. Students who plan to transfer to a four-year program should review the university’s requirements for senior-year standing in the Bachelor of Science in nursing program.
Program Length: 9 Quarters  
Program Code: RENDTAA

The Nursing Program is accredited by the National League for Nursing Commission for Nursing Education Accreditation (NLN CNEA, The Watergate, 2600 Virginia Ave, NW, 8th Floor, Washington, DC 20037).

**Important Note:** Individuals who would like to study nursing at Peninsula College must complete non-nursing academic requirements and prerequisite courses prior to entering the program or be in the final quarter of their completion. Prospective students must apply to the program.

Application information is available on the nursing program web page at pencol.edu/nursing.

Only 10 credits of Humanities may be completed after application and prior to the second year of the nursing program. Nursing courses may be started only in the fall quarter and only after making application to, and being accepted into, the nursing program. Application to the nursing program can be made only during the spring quarter prior to enrolling in nursing courses.

**Career Opportunities and Earnings**

Potential positions include hospital or nursing home staff nurse, clinic nurse, and home health nurse. With additional training and education, potential positions include critical care nurse, obstetrical nurse, pediatric nurse, emergency department nurse, or operating room nurse. Obtaining advanced academic degrees may lead to positions in administration, education, and advanced practice positions such as nurse practitioner. The demand for nurses should remain strong over the next decade.

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes

**Program Outcomes**

Upon completion of this program, students will be able to:

- Holistically assess the biopsychosocial-spiritual-cultural dynamic needs of the client
- Use evidence based information and the nursing process to critically think and make clinical judgments and management decisions to ensure accurate and safe care
- Demonstrate holistic caring behavior towards the client, significant support person(s), peers, and other members of the health care team
- Provide accurate and safe nursing care in diverse settings
- Provide teaching based on individualized teaching plan
- Organizes and manages the holistic care of clients
- Work cooperatively with others in the decision-making process to achieve client and organizational outcomes
- Utilize appropriate verbal and written channels of communication to achieve positive client outcomes
- Practice within the ethical, legal, and regulatory frameworks of nursing and standards and scope of nursing practice

**Special Features**

- Students in the nursing program have the advantage of a low faculty to student ratio.
- The Associate in Nursing DTA/MRP also facilitates entering senior level BSN courses.
- Graduates of this program experience high placement success both locally and throughout the state of Washington.
- Graduates of this program consistently score higher than the national average on the NCLEX licensure exam.

**Program Prerequisites**

---

Peninsula College Catalog 2024-2025
College-level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the prerequisite courses required in this program. Students may need to complete additional prerequisite coursework. Learn more about placement options by visiting the Assessment and Placement website: pencol.edu/testing-center/accuplacer-placement

**Approximate Additional Costs**

- TEAS test fee (for application): $90
- HESI test fee ($99/quarter x 6 quarters): $594
- Books, supplies and miscellaneous fees: $3000
- Equipment (uniforms, stethoscope, watch, etc.): $300
- Laptop computer: $1000
- Malpractice insurance: $15.62 per year
- Personal health insurance (recommended): $39- $190 per quarter
- Required immunizations: varies depending on vaccination status and insurance coverage, estimated $0-$1000
- CPR card: varies
- Travel/Transportation: varies
- WA State licensing fee: $92
- NCLEX: $200

### Associate in Science, Transfer Track 1

The Associate in Science, Transfer Track 1 is designed to fulfill the requirements of baccalaureate institutions for transfer with junior standing. The requirement of the degree is completion of a minimum of 90 credits with a specific number in each of English/Humanities distribution, Social Sciences distribution, Science, and Quantitative Skills courses.

Students completing this Associate in Science, Transfer Track 1 will receive the same priority consideration for admission to the baccalaureate institution as they would for completing the direct transfer associate degree and will be eligible for junior status by the receiving institution.

Advising is a critical element in implementation of the Associate in Science Transfer degree. Sequences should not be broken up between institutions (e.g., the typical three-quarter physics sequence should be taken entirely at one institution).

Program Plan Code: LRST1AS

- Demonstrate academic skills at the college level, e.g., literacy, quantitative and critical thinking, composition, and the acquisition of information
- Employ modes of inquiry basic to philosophical, scientific, mathematical, social, historical, and literary studies
- Demonstrate knowledge in the humanities and arts, natural and physical sciences, mathematics, and the social sciences
- Integrate knowledge drawn from diverse areas of study
- Demonstrate mastery of field-specific knowledge in preparation for successful transfer to an upper-division science program
### Communication Skills

### Automotive Service Technician Certificate

**Program Description**
The Peninsula College Automotive Service Technician Certificate is a 6-month hands-on program designed to prepare students for employment in the Automotive Industry. Coursework includes automotive repair, electrical vehicle repair, gas and diesel vehicles, diagnostics, and preventative maintenance and repair. The program emphasizes student success through equity-minded educational experiences that engage students from entry to attainment of high-demand automotive careers. The curriculum aligns with standards set forth by the National Institute for Automotive Service Excellence (ASE) Educational Foundation, employer input, and best practices in automotive service education. The courses were designed to develop competent entry level Auto Service Technicians who are familiar with a variety of common automotive servicing and repair skills.

Program Length: 2 Quarters
Program Code: AUMASC20

Career Opportunities and Earnings

There is a growing demand for Automotive Service Technicians. Graduates may find positions with a variety of automotive service shops and dealerships.

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes

- Recognize unsafe situations that may occur in an automotive repair shop; identify the safety precautions that should be taken; relate the proper application of safety procedures; demonstrate safe operation of available equipment
- Identify electrical/electronic system components and configurations
- Using standard diagnostic equipment, swiftly diagnose common automotive issues and recommend/perform proper repairs
- Research vehicle service information such as fluid type, internal combustion engine operation, vehicle service history, service precautions, technical service bulletins, and recalls including vehicles equipped with advanced driver assistance systems (ADAS)
- Demonstrate basic understanding of how to service, diagnose and repair hybrid-electric vehicles, plug-in hybrid-electric vehicles, and battery-electric vehicles

Special Features

- Curriculum combines theory and hands-on experience with the technical and interpersonal skills necessary to be a productive member of the automotive industry workforce
- Inclusive curriculum that accommodates the needs of all students
- Collaborative learning that ensures all students are part of shared learning experiences and receive equal opportunities regardless of learner differences
- Short two quarter certificate provides training for students to quickly step into a high demand career field with skills employers are looking for
- Free academic and tutoring support from the Peninsula College Center for Equity, Teaching, and Learning
- Workforce program funding for tuition, books, class materials, and childcare is available to eligible students
- Course includes curriculum in soft skills and opportunities for manufacturer specific training as well as intern opportunities with local employers

Program Goals

- Ready students for a career in the automotive service industry
- Prepare students for certain components of ASE certification
- Foster equity and inclusion by removing barriers to underrepresented students pursuing careers in the automotive industry
- Provide local employers with work-ready auto technicians in a high demand career field

Approximate Additional Costs
• Tuition and fees: $3,601.90 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  ◦ First quarter (15 credits): $1,800.95
  ◦ Second quarter (15 credits): $1,800.95

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

Bachelor of Applied Science in Behavioral Healthcare

Program Description

The Bachelor of Applied Science (BAS) in Behavioral Healthcare degree builds on an existing two year degree adding upper division coursework to complete a four-year degree. Applicants are accepted year round. Some courses are offered in a hyflex format and students have the option to attend in person or online. This program starts in fall quarter and can be completed online.

This degree is designed to provide program graduates with the practical knowledge and skills necessary to enter the behavioral health workforce. The curriculum of the BAS in Behavioral Healthcare degree includes a combination of core courses, specialized courses, and practical experiences. These courses provide students with a strong understanding of human behavior, mental health disorders, and the principles of counseling. After completing the first year of the program, each student completes two five-credit practicums in the behavioral health field.

Program Code: SAABHBAS

Career Opportunities and Earnings

Graduates can pursue roles such as case managers, behavioral health technicians, community outreach specialists and a variety of other roles. These positions involve working directly with individuals facing mental health challenges, providing support, guidance, and implementing treatment plans. Furthermore, opportunities exist in non-profit organizations, government agencies, hospitals, rehabilitation centers, and community health centers. Graduates can choose to continue their education and pursue advanced degrees to expand their career prospects, such as becoming licensed therapists, counselors, or pursuing administrative roles within behavioral
health organizations. The demand for professionals in behavioral health continues to grow, making it an exciting and fulfilling field for graduates to make a positive impact on individuals’ lives and contribute to the betterment of society.

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes

Program Outcomes

Upon completion of Peninsula College BAS Behavioral Healthcare program students will successfully satisfy the following program outcomes:

- Demonstrate clear, concise, and effective written, electronic, and verbal communication skills with clients, families, and interdisciplinary team members to enhance personal centered care and health outcomes.
- Demonstrate the ability to function effectively as a member of a multi-disciplinary team in coordinating services and resources to meet the needs of diverse populations.
- Effectively analyze, evaluate, and conduct behavioral health research and use to benefit the consumer and family members. Including an abiding hope for recovery for every person.
- Identify the structures, functions, and organizations which comprise the local healthcare system with a particular focus on behavioral healthcare organizations.
- Complete both brief screenings and biopsychosocial assessments to include co-occurring disorders and develop and monitor client-centered treatment plans in the context of family, community, and cultural identities.
- Analyze behavioral health concepts such as current trends, theories, approaches, and best practices for the individual consumer and their families.
- Recognize institutional and social barriers that impede access, equity, and success for individuals and families within behavioral health systems.
- Demonstrate the ability to adhere to professional, ethical standards, including confidentiality and sensitivity when working with diverse populations within the behavioral health field.
- Demonstrate proper use of technologies and processes used to collect and analyze data and easily disseminate to appropriate parties.

Special Features

- Students in the BAS program have the advantage of a low faculty to student ratio.
- The BAS program does not currently have a waiting list.
- The BAS Behavioral Healthcare program curriculum is designed to prepare students for completing master’s degrees in similar fields.

Program Prerequisites

Students entering this program should have basic knowledge of a computer and touch-typing skills. It is recommended that online students complete HUMDV 101. Writing classes are embedded in the program. Excel, Word, PowerPoint, and the use of email are tools BAS students will use throughout the program. Those who are not familiar with or comfortable using those programs should locate online, self-study resources or consider enrolling in courses offered by the college. Students may need to complete prerequisite coursework prior to full admittance to the program.

- Completion of a two-year degree or 90 transferrable credits with a minimum cumulative GPA of a 2.0 or higher
- 5 credits of ENGL& 101 with a GPA of 2.0 or higher

Approximate Additional Costs

- Request official transcripts from outside colleges (estimated): $20
- Books, supplies and miscellaneous fees: $2400
- Laptop computer: $1000
- Personal health insurance (recommended): $39- $190 per quarter
• Travel/Transportation: varies

Current tuition and fee information is published on the College website at pencol.edu or by calling the Student Services Office at (360) 417-6340.

Financial aid is available to all students who qualify. To learn more about these opportunities, visit pencol.edu/financial.

Application Process

Applications for admission are accepted year-round. Once accepted into the program, students may start taking courses in fall quarter. To learn more about the application process, visit pencol.edu/applying-program/bas-application-form.

Bachelor of Applied Science in Management

Program Description

The Bachelor of Applied Science (BAS) in Management degree builds on an existing two year degree, adding upper division coursework to complete a four-year degree. Applicants are accepted year round. The program can be completed in a two or three-year track and online. Students can enter the program in the fall, winter, spring, or summer.

This degree is designed to provide program graduates with the knowledge and skills needed to move into management or supervisory positions or create new employment opportunities and entrepreneurial ventures in a rapidly changing global economy. The Bachelor’s curriculum includes a mix of required core management and general studies courses. After completing the first year of the program (45 credits), each student also completes a five-credit internship which is developed by the student and employer partner.

Program Code: BAMAMBAS

Career Opportunities and Earnings

Potential positions include management, accounting, project management, or entrepreneurial. Obtaining advanced academic degrees may lead to administrative positions in business administration, education, and management. The demand for managers should remain strong over the next decade.

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes

Program Outcomes

• Demonstrate ability to communicate effectively and use the language, tools, concepts and models of management applicable to the professional/technical discipline
• Demonstrate ability to apply critical thinking and knowledge in a field specific context
• Demonstrate an understanding of management roles and the nature of leadership
• Apply the principles and philosophy of management systems
• Analyze systems for planning and decision-making
• Prepare and complete cost control processes including the ability to establish a budget, prepare cost reports, and forecast expenditures
• Employ new and developing information technologies
• Acquire, organize, analyze, and interpret information and data to make informed, reasoned, equitable decisions
• Identify and describe human behavior in an organizational setting
• Identify and analyze human resource systems for employment, compensation and training
• Institute and facilitate team-based problem-solving environments
• Develop and articulate a statement of values or code of ethics
• Demonstrate a knowledge of the community and an understanding of issues related to diversity

Special Features

• Students in the BAS program have the advantage of a low faculty to student ratio.
• The BAS program does not currently have a waiting list.
• The BAS program curriculum is designed to prepare students for completing a Master of Business Administration or similar degree.

Program Prerequisites

Students entering this program should have basic knowledge of a computer and touch-typing skills. It is recommended that online students complete HUMDV 101. Writing classes are embedded in the program. Excel, Word, PowerPoint, and the use of email are tools BAS students will use throughout the program. Those who are
not familiar with or comfortable using those programs should locate online, self-study resources or consider enrolling in courses offered by the college. Students may need to complete prerequisite coursework prior to full admittance to the program.

- Completion of a two-year degree or 90 transferrable credits with a minimum cumulative GPA of a 2.0 or higher
- 5 credits of ENGL& 101 with a GPA of 2.0 or higher

**Approximate Additional Costs**

- Request official transcripts from outside colleges (estimated): $20
- Books, supplies and miscellaneous fees: $2400
- Laptop computer: $1000
- Personal health insurance (recommended): $39- $190 per quarter
- Travel/Transportation: varies

Current tuition and fee information is published on the College website at pencol.edu or by calling the Student Services Office at (360) 417-6340.

Financial aid is available to all students who qualify. To learn more about these opportunities, visit pencol.edu/financial.

**Application Process**

Applications for admission are accepted year-round. Once accepted into the program, students may take courses fall, winter, or spring quarters. All required courses are offered online. To learn more about the application process, visit pencol.edu/applying-program/bas-application-form.

Note: This schedule is based on full-time enrollment for two academic years. Students who enter the program mid-year will adjust their schedules accordingly.

Biology Emphasis, Associate in Science, Transfer Track 1

Overview

Complete your Associate in Science, Transfer Track 1 while exploring our biology program.

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the Associate in Science, Transfer Track 1. The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

Your personal educational plan will vary based on many factors including:

- The quarter you begin
- How many classes/credits you plan to take in each quarter
- Your math and English placement
- If you have credits you have already taken and plan to transfer them
- The college you are interested in transferring to
- If you start in our Transitional Studies program

Sample Career Options

- Educator
- Field Technician
- Park Ranger
Transfer and Degree Requirements

Students working toward their transfer degree typically take a variety of courses designed to fulfill the general requirements of most four-year colleges and universities. **Students intending to transfer to a four-year college for further study are encouraged to work closely with their advisor and transfer institution to explore the requirements of the college they wish to attend after Peninsula.** Most institutions have separate admission criteria, which may be based on grades, prerequisite coursework, test scores, and other considerations. Our sample schedule is designed to provide you with faculty recommended courses to complete your Associate in Science, Transfer Track 1 degree with an emphasis in biology, but is not a major ready pathway.

Transfer Institution Information

Program Outcomes

Program outcomes are listed on the Area of Study webpage.

First Quarter
Meet with your advisor to talk about your long-term schedule, taking into account your transfer plans.

**Business Administration Accounting, Associate in Applied Science (AAS) Degree**

**Program Description**

Complete your Business Administration Accounting, Associate in Applied Science (AAS). The Washington State Workforce Training & Education Coordinating Board reports a skill gap in accounting jobs where the accounting jobs exceed worker supply. Jobs in business administration exist in a wide variety of career paths. Students develop a foundation of knowledge in accounting, management, business, entrepreneurship and application software related to business and communication.

Program Length: 6 Quarters
Program Code: ATBBAAPT

**Career Opportunities and Earnings**

Previous graduates have found employment in education, government, private industry, and self-employment. The accounting-related occupation has been identified as a high demand field in Washington state. Many of the new accounting positions will be created in small, rapidly growing businesses. The demand for persons trained in this field should remain strong over the next several years.

• Accounting
• Accounts payable/receivable
• Banking
• Bookkeeping
• Paraprofessional position in CPA firm
• Payroll
• Tax preparer

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

**Program Outcomes**

When this program is completed, the student will be able to:

• Prepare and analyze company financial statements
• Prepare budgets for a company using Microsoft Excel
• Apply qualitative and quantitative methods for critical thinking and problem solving
• Formulate a personal code of ethical behavior as it relates to a modern business environment
• Utilize electronic technology, including accessing information from various sources
• Recognize and analyze how economic forces shape the environment of business and decision making
• Demonstrate competency in written and oral communication
• Identify key legal principles that apply in business transactions and demonstrate an understanding of legal risk management
• Identify and apply management skills and concepts that can be applied in a wide variety of situations
- Demonstrate proficiency in Quickbooks
- Demonstrate required payroll and business record keeping procedures and prepare federal and state tax reports
- Apply basic computational skills to practical applications
- Communicate in writing for a variety of purposes and audiences
- Demonstrate competencies to succeed in the selected career pathway workplace
- Demonstrate an understanding of marketing principles to promote a company

Special Features

- Short-term certificates of proficiency, which include courses within the program, are offered to provide students benchmarks of achievement leading to degree completion
- Classroom instruction and practical experiences are combined into a course of study that provides students with broad exposure to the principles and philosophies of business and management
- Students can continue their academic studies at Peninsula College in the Bachelor of Applied Management degree (BAS). Please contact the BAS advisor for additional prerequisite requirements at BAS@pencol.edu

Program Goals

- Prepare students for a variety of business related job opportunities.
- Prepare students for a rapidly changing business environment.
- Measure and assess student learning and implement improvements to ensure a high quality program.
- Monitor the needs of the business community and maintain the relevancy of program curriculum through advisory committee meetings and program reviews.

Approximate Additional Costs

- Books, supplies and miscellaneous fees (per quarter): $200 - $500
- Calculator (recommended): $30

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AAS. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

- Formulate a personal code of ethical behavior as it relates to a modern business environment
- Utilize electronic technology, including accessing information from various sources
- Demonstrate competency in written and oral communication
- Apply basic computational skills to practical applications
- Demonstrate an understanding of management principles

Special Features

- Short-term certificates of proficiency, which include courses within the program, are offered to provide students benchmarks of achievement leading to degree completion
- Classroom instruction and practical experiences are combined into a course of study that provides students with broad exposure to the principles and philosophies of business and management
Students can continue their academic studies at Peninsula College in the Bachelor of Applied Management degree (BAS). Please contact the BAS advisor for additional prerequisite requirements at BAS@pencol.edu.

Program Goals

- Prepare students for a variety of business related job opportunities
- Prepare students for a rapidly changing business environment
- Measure and assess student learning and implement improvements to ensure a high quality program
- Monitor the needs of the business community and maintain the relevancy of program curriculum through advisory committee meetings and program reviews

Approximate Additional Costs

- Books, supplies and miscellaneous fees (per quarter): $200 - $500
- Calculator (recommended): $30
- Tuition and fees: $5,402.85 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  - First quarter (15 credits): $1,800.95
  - Second quarter (15 credits): $1,800.95
  - Third quarter (15 credits): $1,800.95

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

Business Administration Economics and Finance Short Term Certificate

Program Code: BAMEFC01

Program Outcomes

- Recognize and analyze how economic forces shape the environment of business and decision making
Business Administration Entrepreneurship Foundations, Associate in Applied Science (AAS) Degree

Program Description

Program Length: 6 Quarters
Program Code: BAMBEAPT

Career Opportunities and Earnings

Previous graduates have found employment in education, government, private industry, and self-employment. The accounting-related occupation has been identified as a high demand field in Washington state. Many of the new accounting positions will be created in small, rapidly growing businesses. The demand for persons trained in this field should remain strong over the next several years.

- Accounting
- Accounts payable/receivable
- Banking
- Bookkeeping
- Paraprofessional position in CPA firm
- Payroll
- Tax preparer

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes

When this program is completed, the student will be able to:

- Prepare and analyze company financial statements
- Prepare budgets for a company using Microsoft Excel
- Apply qualitative and quantitative methods for critical thinking and problem solving
- Formulate a personal code of ethical behavior as it relates to a modern business environment
- Utilize electronic technology, including accessing information from various sources
- Recognize and analyze how economic forces shape the environment of business and decision making
- Demonstrate competency in written and oral communication
- Identify key legal principles that apply in business transactions and demonstrate an understanding of legal risk management
- Identify and apply management skills and concepts that can be applied in a wide variety of situations
- Demonstrate proficiency in Quickbooks
• Demonstrate required payroll and business record keeping procedures and prepare federal and state tax reports
• Apply basic computational skills to practical applications
• Communicate in writing for a variety of purposes and audiences
• Demonstrate competencies to succeed in the selected career pathway workplace
• Demonstrate an understanding of marketing principles to promote a company

Special Features

• Short-term certificates of proficiency, which include courses within the program, are offered to provide students benchmarks of achievement leading to degree completion
• Classroom instruction and practical experiences are combined into a course of study that provides students with broad exposure to the principles and philosophies of business and management
• Students can continue their academic studies at Peninsula College in the Bachelor of Applied Management degree (BAS). Please contact the BAS advisor for additional prerequisite requirements at BAS@pencol.edu

Program Goals

Business Administration Management, Associate in Applied Science (AAS) Degree

Program Description

Complete your Business Administration Management, Associate in Applied Science (AAS). The Washington State Workforce Training & Education Coordinating Board reports a skill gap in accounting jobs where the accounting jobs exceed worker supply. Jobs in business administration exist in a wide variety of career paths. Students develop a foundation of knowledge in accounting, management, business, entrepreneurship and application software related to business and communication.

Program Length: 6 Quarters
Program Code: BAMAMAPT

Career Opportunities and Earnings

Previous graduates have found employment in retail, wholesale, and service industries. The greatest expansion in the job market over the next ten years is expected to occur in the small business sector including employment prospects for business managers. Opportunities for advancement are enhanced by a student’s motivation and desire to succeed. The demand for persons trained in this field should remain strong over the next several years.

• Assistant manager
• Buyer
• Department manager
• Management trainee
• Sales manager
• Store manager
• Supervisor

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes

When this program is completed, the student will be able to:

• Prepare and analyze company financial statements
• Prepare analytical Excel schedules to support business decisions
• Apply qualitative and quantitative methods for critical thinking and problem solving
• Formulate a personal code of ethical behavior as it relates to a modern business environment
• Utilize electronic technology, including accessing information from various sources
• Recognize and analyze how general and specific forces shape the environment of business and decision making
• Demonstrate competency in written and oral communication
• Apply basic computational skills to practical applications
• Communicate in writing for a variety of purposes and audiences
• Demonstrate competencies to succeed in the selected career pathway workplace

Special Features

• Short-term certificates of proficiency, which include courses within the program, are offered to provide students benchmarks of achievement leading to degree completion
• Classroom instruction and practical experiences are combined into a course of study that provides students with broad exposure to the principles and philosophies of business and management
• Students can continue their academic studies at Peninsula College in the Bachelor of Applied Management degree (BAS). Please contact the BAS advisor for additional prerequisite requirements at BAS@pencol.edu
Program Goals

- Prepare students for a variety of business related job opportunities
- Prepare students for a rapidly changing business environment
- Measure and assess student learning and implement improvements to ensure a high quality program

### Commercial Driver's License (CDL)

The Commercial Driver's License certificate program consists of a 10 credit course which prepares you to take the written and driving portion of the Washington State Commercial Driving Class A test. Preparation includes 40 hours of lecture, hands-on demonstrations, video, and computerized practice tests as well as 120 hours of driver training. The course will also prepare students to enter the field of Commercial Vehicle Operators. The course will have an emphasis on safety and a basic knowledge of the rules and regulations as required by the Federal Motor Carrier Safety Administration and the Washington State Patrol. Students will be prepared to operate commercial vehicles safely and to begin employment as over-the-road drivers upon completion of course.

Program Code: TBDCDC01
Program Outcomes

- Safely operate a commercial vehicle
- Inspect a commercial vehicle
- Take the Washington State Commercial Driving Class A test

Construction Technology Carpentry Certificate

Program Description

Peninsula College’s Construction Technology program is an important component to the college’s commitment to workforce training in sustainable industries. The certificate in Construction Technology offers a comprehensive program designed to prepare students for employment in sustainable green construction trades, alternative building materials and methods and construction management. Foundation classes cover basic woodworking, foundations framing, roof systems and alternative energy. Core courses teach students green building concepts and design, engineered building materials, blueprint reading and alternative building methods. Capstone classes include jobsite management, construction leadership and estimation. Instruction consists of classroom presentations, hands-on training in lab settings and online learning modules.

Program Length: 3 Quarters
Program Code: CARCTC45

Career Opportunities and Earnings

Graduates of the Construction Technology program may find entry-level positions in residential and small commercial carpentry businesses and other related companies. Some graduates may elect to start their own green-based building business. The demand for carpenters with these skills is expected to increase over the next decade.

- Cabinetmaker
- Carpenter
- Construction management
• Form builder
• Framer

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes

When this program is completed, the student will be able to:

• Use hand tools and power machinery safely
• Perform all aspects of basic carpentry
• Perform an energy analysis on an existing structure
• Work in teams to plan and build carpentry projects

Approximate Additional Costs

• Books, supplies and miscellaneous fees (per quarter): $150
• Tools and equipment: Most tools are provided. Students may choose to purchase their own tools and equipment at their own expense. Costs vary, but may be $300 or more.
• Tuition and fees: $5,631.48 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  ◦ First quarter (12 credits): $1,572.32
  ◦ Second quarter (18 credits): $2,029.58
  ◦ Third quarter (18 credits): $2,029.58

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

Construction Technology, Associate in Applied Science (AAS) Degree

Program Description

Peninsula College’s Construction Technology program is an important component to the college’s commitment to workforce training in sustainable industries. The Associate in Applied Science (AAS) degree in Construction Technology offers a comprehensive program designed to prepare students for employment in sustainable green construction trades, alternative building materials and methods and construction management. Foundation classes cover basic woodworking, foundations framing, roof systems and alternative energy. Core courses teach students green building concepts and design, engineered building materials, blueprint reading and alternative building methods. Capstone classes include jobsite management, construction leadership and estimation. Instruction consists of classroom presentations, hands-on training in lab settings and online learning modules.

Program Length: 6 Quarters
Program Code: CARCTAPT

Career Opportunities and Earnings

Graduates of the Construction Technology program may find entry-level positions in residential and small commercial carpentry businesses and other related companies. Some graduates may elect to start their own green-based building business. The demand for carpenters with these skills is expected to increase over the next decade.

- Cabinetmaker
- Carpenter
- Construction management
- Form builder
- Framer

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes

When this program is completed, the student will be able to:

- Use hand tools and power machinery safely
- Perform all aspects of basic carpentry
• Perform energy efficient tasks on a new residential structure
• Perform an energy analysis on an existing structure
• Research, plan, design and implement an energy efficient retrofit plan
• Develop and design a building retrofit that meets Leadership in Energy Environmental Design (LEED) and International Living Building Institute (ILBI) standards

Approximate Additional Costs

• Books, supplies and miscellaneous fees (per quarter): $150
• Tools and equipment: Most tools are provided. Students may choose to purchase their own tools and equipment at their own expense. Costs vary, but may be $300 or more.

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AAS. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Creative Writing Emphasis, Associate in Arts Direct Transfer Agreement (AA-DTA)

Overview

Complete your Associate in Arts Degree, Direct Transfer Agreement (AA-DTA) while exploring your love of creative writing.

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AA-DTA. The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

**Your personal educational plan will vary based on many factors including:**

- The quarter you begin
- How many classes/credits you plan to take in each quarter
- Your math and English placement
- If you have credits you have already taken and plan to transfer them
- The college you are interested in transferring to
- If you start in our Transitional Studies program

Sample Career Options

- Creative writer
- Editor
- Grant writer
- K-12 teacher or college professor
- Technical writer

Transfer and Degree Requirements
Students working toward their transfer degree typically take a variety of courses designed to fulfill the general requirements of most four-year colleges and universities. **Students intending to transfer to a four-year college for further study are encouraged to work closely with their advisor and transfer institution to explore the requirements of the college they wish to attend after Peninsula.** Most institutions have separate admission criteria, which may be based on grades, prerequisite coursework, test scores, and other considerations. Our sample schedule is designed to provide you with faculty recommended courses to complete your AA-DTA degree with an emphasis in creative writing, but is not a major ready pathway for every institution.

**Transfer Institution Information**

Students must select credits from three **distribution lists:** Natural Sciences, Social Sciences, and Humanities. A specific course may be credited toward no more than one distribution requirement. A minimum of fifteen credits in two separate subject areas must be selected from each list. For Natural Sciences, at least five credits must be a lab. For Humanities, no more than five credits can be a Humanities-Performance course and no more than five credits may be applied in world languages at the 100 level.

**Program Outcomes**

Program outcomes are listed on the [Area of Study webpage](#).

**First Quarter**

Meet with your advisor to talk about your long-term schedule, taking into account your transfer plans.

Criminal Justice Certificate

Program Description

This one year program is designed to provide the student with a broad exposure to criminal justice theory and process as well as contemporary issues and problems. It consists of selected Criminal Justice courses and general education requirements. All of these courses are also required for the Associate in Applied Science (AAS) degree in Criminal Justice so that students who wish to continue their education may pursue the two year degree program. Successful completion of this program leads to a certificate in Criminal Justice.

Program Length: 3 Quarters
Program Code: CJLCJC45

Career Opportunities and Earnings

The employment outlook is very good with job growth expected to continue over the next decade. Graduates typically can be employed by local and federal law enforcement, juvenile and adult correction facilities, and private and corporate security/investigation firms. Successful employment in some positions is dependent upon passing competitive entrance examinations and meeting various medical requirements. Good performance and additional training can enhance opportunities for advancement. The demand for persons trained in criminal justice is expected to remain strong over the next several years.

Prospective criminal justice students should be aware of the fact that criminal justice and security employment candidates are subject to extensive background checks that may include drug screening, polygraph testing, physical and psychological examinations, and oral and/or written proficiency examinations. Successful completion of the program does not necessarily guarantee that students will obtain employment in the field of criminal justice. The goal of the program is to provide students with an educational opportunity that prepares them for the rigors of employment competition within the scope of criminal justice career planning. The criminal justice program manager will work diligently to assist qualified students in finding meaningful employment.

• Correctional officers
• Law enforcement officers
• Private security officers

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.
Program Outcomes

When this program is completed, the student will be able to:

- Correctly identify the major steps of the criminal justice process
- Develop an understanding of the function of each step of the criminal justice system and the key decisions that are made at each step
- Define each step and critically analyze how a case proceeds through the criminal justice system
- Articulate the functions of policing in the United States in terms of its historical roots, structure, and contemporary issue
- Develop an understanding of the court system in the United States in terms of constitutional issues and historical precedents
- Identify and understand correctional practices in the United States in relation to philosophies of punishment, sentencing practices, victim's rights and institutional limitations
- Demonstrate knowledge of the purpose, function, and historical evolution of the American criminal justice system in terms of the three major branches of criminal justice: police, courts, and corrections
- Articulate the differences between the major criminological theories of the causes of crime and how those theories relate to policies toward crime and criminal behavior
- Apply individual criminological theories to specific types of offending and criminal behaviors
- Demonstrate an understanding of the steps in the research process as it relates to the scientific method
- Apply basic computational skills to practical applications
- Communicate in writing for a variety of purposes and audiences
- Demonstrate competencies to succeed in the selected career pathway workplace

Special Features

- Students in the Criminal Justice program receive intense individual attention to student needs and academic development

Program Prerequisites

College-level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English, math, or applied math courses required in this program. Students may need to complete prerequisite coursework. The placement test will help determine placement level if not known. Previous coursework may also indicate placement level.

Approximate Additional Costs

- Books, supplies and miscellaneous fees (per quarter): $230
- Tuition and fees: $5,479.06 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  - First quarter (16 credits): $1,877.16
  - Second quarter (15 credits): $1,800.95
  - Third quarter (15 credits): $1,800.95

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

Criminal Justice, Associate in Applied Science (AAS) Degree

Program Description

The Criminal Justice program is comprised of professional and general education courses and is designed to provide the student with a broad exposure to criminal justice theory and process as well as contemporary issues and problems. The curriculum provides a balanced approach to both law enforcement and corrections, with supporting courses that enhance both perspectives. The program has been developed in conjunction with active professionals in the field of criminal justice who serve as members of an advisory committee.

Program Length: 6 Quarters
Program Code: CJLCJAPT

Career Opportunities and Earnings

The demand for trained personnel has grown significantly over the past several years and is expected to continue as police agencies expand to meet the demands for crime control. Graduates typically find employment in the criminal justice system at the federal, state, and local levels of government. Security-related employment in the private sector also provides a wide variety of career possibilities. The demand for persons trained in criminal justice is expected to remain strong over the next several years.

Prospective criminal justice students should be aware of the fact that criminal justice and security employment candidates are subject to extensive background checks that may include drug screening, polygraph testing, physical and psychological examinations, and oral and/or written proficiency examinations. Successful completion of the program does not necessarily guarantee that students will obtain employment in the field of criminal justice. The goal of the program is to provide students with an educational opportunity that prepares them for the rigors of employment competition within the scope of criminal justice career planning. The criminal justice program manager will work diligently to assist qualified students in finding meaningful employment.

- Adult and juvenile probation officers
- Correctional officers
- Law enforcement officers
- Parole officers
- Private security officers

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Criminal Justice, Associate in Applied Science-Transfer (AAS-T) Degree

Program Description

The Criminal Justice program is comprised of professional and general education courses and is designed to provide the student with a broad exposure to criminal justice theory and process as well as contemporary issues and problems. The curriculum provides a balanced approach to both law enforcement and corrections, with supporting courses that enhance both perspectives. The program has been developed in conjunction with active professionals in the field of criminal justice who serve as members of an advisory committee. Successful completion of the two-year program described on this guide leads to an Associate in Applied Science-Transfer (AAS-T) degree in Criminal Justice. The AAS-T option may improve the transferability of Associate in Applied Science degrees to some four-year programs.

Program Length: 6 Quarters
Program Code: CJLCJAAS

Career Opportunities and Earnings

The demand for trained personnel has grown significantly over the past several years and is expected to continue as police agencies expand to meet the demands for crime control. Graduates typically find employment in the criminal justice system at the federal, state, and local levels of government. Security-related employment in the private sector also provides a wide variety of career possibilities. The demand for persons trained in criminal justice is expected to remain strong over the next several years.

Prospective criminal justice students should be aware of the fact that criminal justice and security employment candidates are subject to extensive background checks that may include drug screening, polygraph testing, physical and psychological examinations, and oral and/or written proficiency examinations. Successful completion of the program does not necessarily guarantee that students will obtain employment in the field of...
criminal justice. The goal of the program is to provide students with an educational opportunity that prepares them for the rigors of employment competition within the scope of criminal justice career planning. The criminal justice program manager will work diligently to assist qualified students in finding meaningful employment.

- Identify and understand correctional practices in the United States in relation to philosophies of punishment, sentencing practices, victim's rights and institutional limitations
- Demonstrate knowledge of the purpose, function, and historical evolution of the American criminal justice system in terms of the three major branches of criminal justice: police, courts, and corrections
- Articulate the differences between the major criminological theories of the causes of crime and how those theories relate to policies toward crime and criminal behavior
- Apply individual criminological theories to specific types of offending and criminal behaviors
- Demonstrate an understanding of the steps in the research process as it relates to the scientific method
- Apply basic computational skills to practical applications
- Communicate in writing for a variety of purposes and audiences
- Demonstrate competencies to succeed in the selected career pathway workplace

Program Prerequisites

College-level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English, math, or applied math courses required in this program. Students may need to complete prerequisite coursework. The placement test will help determine placement level if not known. Previous coursework may also indicate placement level.

Approximate Additional Costs

Books, supplies and miscellaneous fees (per quarter): $230

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn an AAS-T. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

### Cybersecurity and Computer Forensics Short Term Certificate

**Program Code:** CISCCC01

**Program Outcomes**

- Demonstrate an understanding of the core concepts, tools, and methods used to secure computer systems
- Collect, process, analyze, and present computer forensic evidence
- Identify, analyze, and mitigate threats to internal computer systems
Cybersecurity and Computer Forensics, Associate in Applied Science (AAS) Degree

Program Description

Increased cybersecurity threats and new homeland security policies have produced a growing national demand for cybersecurity professionals with knowledge of cybersecurity, ethical hacking, intrusion testing, vulnerability assessment, and computer forensics. In addition, the growth of universal and mobile computing require new approaches to information security and the protection of information systems from unauthorized access, modification, or destruction. The Cybersecurity and Computer Forensics program prepares students for entry level employment in cybersecurity and computer forensics careers including cyber incident and response, vulnerability detection and assessment analyst, computer forensic analyst, and computer forensics investigator. Foundation courses introduce students to the legal, ethical, and theoretical issues in cybersecurity and computer forensics technology. Core courses expand student depth and skills in ethical hacking, criminal justice, evidentiary analysis, and the development of a forensically sound environment. Capstone courses provide practicum experience and opportunity to participate in the Collegiate Cyber Defense Competition (CCDC). Successful completion of this program leads to an Associate in Applied Science (AAS) degree Cybersecurity and Computer Forensics. Students are required to have access to computer, internet, and browser.

(Students who plan to transfer to Western Washington University’s BS in Computer and Information Systems Security program must complete MATH& 141 Pre Calculus I, MATH& 142 Pre Calculus II and MATH& 151 Calculus: Analytic Geometry. Please note these Math classes are not always offered online.)

Program Length: 6 Quarters
Program Code: CISCCAPT

Career Opportunities and Earnings

There is a high demand for talented people with cybersecurity skills; and an increasing number of employers are seeking workers with knowledge of Computer forensics tool. Graduates may find positions with a variety of critical infrastructure companies and organizations in the public and private sectors. Some employers may require employee background checks.

• Computer forensic analyst
• Cybersecurity specialist
• Incident responder
• Information security analyst
• Security monitoring and event analysis
• System and network penetration tester

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes

When this program is completed, the student will be able to:

• Demonstrate an understanding of the core concepts, tools, and methods used to secure computer systems
• Identify and present indicators that a cybersecurity incident has occurred
• Apply criminal justice methods to cybersecurity and computer forensic investigations
• Plan, implement, and evaluate penetration testing and ethical hacking of computer systems
• Identify, analyze, and mitigate threats to internal computer systems
• Collect, process, analyze, and present computer forensic evidence
• Work in teams to analyze and resolve cybersecurity issues
• Apply critical thinking skills to risk analysis of computer systems

Special Features

• The program encourages students to explore the legal, ethical, and global impact of cybercrime on private, public, and personal computing infrastructures
• The courses are based on the CNSSI standards established by the U.S. National Security Agency (NSA) for training information systems security professionals
• The program provides up to date curriculum that adapts to the rapidly changing field of cybersecurity and computer forensics
• The Peninsula College Cybersecurity and Computer Forensics program is significantly more cost effective than most private and public schools

Approximate Additional Costs

• Books, supplies and miscellaneous fees (per quarter): $200 - $250

Drama and Speech Emphasis, Associate in Arts Direct Transfer Agreement (AA-DTA)

Overview

Complete your Associate in Arts Degree, Direct Transfer Agreement (AA-DTA) while exploring your love of drama.

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AA-DTA. The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

Your personal educational plan will vary based on many factors including:

- The quarter you begin
- How many classes/credits you plan to take in each quarter
- Your math and English placement
- If you have credits you have already taken and plan to transfer them
- The college you are interested in transferring to
- If you start in our Transitional Studies program

Sample Career Options

- Actor
Transfer and Degree Requirements

Students working toward their transfer degree typically take a variety of courses designed to fulfill the general requirements of most four-year colleges and universities. **Students intending to transfer to a four-year college for further study are encouraged to work closely with their advisor and transfer institution to explore the requirements of the college they wish to attend after Peninsula.** Most institutions have separate admission criteria, which may be based on grades, prerequisite coursework, test scores, and other considerations. Our sample schedule is designed to provide you with faculty recommended courses to complete your AA-DTA degree with an emphasis in drama and speech, but is not a major ready pathway for every institution.

Transfer Institution Information

Students must select credits from three distribution lists: Natural Sciences, Social Sciences, and Humanities. A specific course may be credited toward no more than one distribution requirement. A minimum of fifteen credits in two separate subject areas must be selected from each list. For Natural Sciences, at least five credits must be a lab. For Humanities, no more than five credits can be a Humanities-Performance course and no more than five credits may be applied in world languages at the 100 level.

Program Outcomes

Program outcomes are listed on the Area of Study webpage.

First Quarter

Meet with your advisor to talk about your long-term schedule, taking into account your transfer plans.

### Early Childhood Education Administration Specialization Short Term Certificate

Program Code: ECEADC20

**Program Outcomes**

- Apply the professional code of ethics for early care and education to resolve dilemmas
- Practice ideals of professionalism in work with children, families and peers
- Develop strategies for working with culturally, linguistically, and ability diverse families in accessing health, nutritional, and dental services
- Explain individual differences in development
- Plan environment supportive of children’s development with focus on attachment, self-help, relationships, and executive function
- Plan for appropriate staffing, meals, equipment and materials and programming for specific age groups and settings

As of Fall 2019, this program requires students to achieve a grade of 2.0 or above in all ECED and EDUC classes to progress through and complete the program.

Early Childhood Education Family Child Care Specialization Short Term Certificate

Program Code: ECEFCC20

Program Outcomes

• Apply the professional code of ethics for early care and education to resolve dilemmas
• Practice ideals of professionalism in work with children, families and peers
• Develop strategies for working with culturally, linguistically, and ability diverse families in accessing health, nutritional, and dental services
• Explain individual differences in development.
• Plan environment supportive of children’s development with focus on attachment, self-help, relationships, and executive function
• Articulate knowledge and skills that define Family Childcare Providers as professionals

As of Fall 2019, this program requires students to achieve a grade of 2.0 or above in all ECED and EDUC classes to progress through and complete the program.

Early Childhood Education State Certificate

Program Description

This Early Childhood Education (ECE) program is designed to prepare students to meet Washington state requirements to become a program coordinator for a licensed child care center or a teacher or teacher assistant in an early childhood classroom. Courses include understanding child development, behavior, and guidance; planning activities for children; managing safe healthy learning environments, working with families; and participation in early childhood centers. Successful completion of this program leads to a certificate in Early Childhood Education. Prospective ECE students should be aware of the fact that they will have to complete a background check.

Program Length: 3 Quarters
Program Code: ECESEC45

Career Opportunities and Earnings

A variety of child care, preschool, school district, Headstart/ECEAP, recreational, and community programs offer career opportunities in early childhood education and paraprofessional in education. With additional experience, training, and education, graduates may pursue a variety of career pathways in education and administration. The demand for persons trained in early childhood education should remain strong over the several years. Standard Occupational Classification 39-9011 Childcare Workers.

- Assistant director
- Childcare center director or program coordinator
- Childcare supervisor
- Family child care provider
- Lead teacher
- Nanny
- Respite care provider for children with special needs
- School age care staff and education assistant in preschools or primary K-3

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes/.

Program Outcomes

When this program is completed, the student will be able to:

- Use evidence-based information about child development and learning to critically think and implement equitable teaching practices
- Demonstrate effective relationship building skills with children, families, and community members
- Utilize appropriate observation, documentation, and assessment information to support children's development and families
- Apply developmentally appropriate practices when working with children and families
- Plan, implement, and evaluate meaningful curriculum for young children
- Demonstrate personal characteristics, knowledge, and skills necessary to provide programs that facilitate children's learning in a professional manner

Special Features

- ECE students may pursue an Associate in Arts, Direct Transfer Agreement (AA-DTA) either independently of or simultaneously with the Associate in Applied Science (AAS) degree. Contact program advisors for guidance on degree opportunities. Demonstrate effective relationship building skills with children, families, and community members.
- In addition to the 90 credit degree and the 47 credit one-year certificate, short-term certificates are also available.
• The ECE program is open entry with few prerequisite course requirements. Courses are offered online and may have a virtual class meeting in late afternoons and evenings to accommodate working students. Most courses are open to students for personal enrichment, elective, and continuing education credit.
• ECE students may begin the program during any quarter and enroll part-time or full-time.
• The on-campus childcare center serves as one of the primary ECE laboratories for students. Lab experiences may also be arranged in other locations.
• All courses have an online component.

Approximate Additional Costs

• Books, supplies and miscellaneous fees (per quarter): $500
• TB Test: $15
• Food Handler’s Permit: $10
• HIV/AIDS Training: $79
• First Aid Card: $120
• Background Check: $55.50
• Tuition and fees: $5,555.27 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  ◦ First quarter (17 credits): $1,953.37
  ◦ Second quarter (16 credits): $1,877.16
  ◦ Third quarter (14 credits): $1,724.74

Program Prerequisites

College-level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English, math, or applied math courses required in this program. Students entering this program should have good computer and typing skills. Students may need to complete prerequisite coursework. The placement test will help determine placement level if not known. Previous coursework may also indicate placement level.

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

Early Childhood Education, Associate in Applied Science (AAS) Degree

Program Description

Course work in the Early Childhood Education (ECE) program combines theory and practical experience for work with young children and their families. Courses include child development, child behavior and guidance, children with special needs, planning early childhood learning environments, planning developmentally appropriate curriculum, and working with families. Practicum courses provide opportunities to apply theoretical knowledge to planning and presenting curriculum, and for working with children and staff in early childhood centers. Successful completion of this program leads to an Associate in Applied Science (AAS) degree in Early Childhood Education. Prospective ECE students should be aware of the fact that they will have to complete a background check.

As of fall 2019, this program requires students to achieve a grade of 2.0 or above in all ECED and EDUC classes to progress through and complete the program.

Program Length: 6 Quarters
Program Code: CCMECAPT

Career Opportunities and Earnings

A variety of child care, preschool, school district, recreational, and community programs offer career opportunities in early childhood education. Also, opportunities are increasing for family support
paraprofessionals in human service and mental health agencies. With additional experience, training, and education, graduates may pursue a variety of career pathways in education and administration. The demand for trained early childhood educators is increasing and should remain strong over the next several years.

- Child care specialists
- Curriculum program managers
- Head Start/ECEAP preschool teachers/home visitors/family service advocates and school-age care staff
- Paraprofessional educators in elementary schools
- Teachers in childcare centers
- Teacher’s assistant

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes/.

Program Outcomes

When this program is completed, the student will be able to:

- Use evidence-based information about child development and learning to critically think and implement equitable teaching practices

Early Childhood Education, Associate in Applied Science-Transfer (AAS-T) Degree

Program Description

Course work in the Early Childhood Education (ECE) program combines theory and practical experience for work with young children and their families. Courses include child development, child behavior and guidance, planning early childhood learning environments, planning developmentally appropriate curriculum, and working with families. Practicum courses provide opportunities to apply theoretical knowledge to planning and presenting curriculum, and for working with children and staff in early childhood settings. Successful completion of this program leads to an Early Childhood Education, Associate in Applied Science-Transfer (AAS-T) degree. Prospective ECE students should be aware of the fact that they will have to complete a background check.

As of fall 2019, this program requires students to achieve a grade of 2.0 or above in all ECED and EDUC classes to progress through and complete the program.

Program Length: 6 Quarters
Program Code: CCMECAAS

Career Opportunities and Earnings

A variety of child care, preschool, school district, recreational, and community programs offer career opportunities in early childhood education. Also, opportunities are increasing for family support paraprofessionals in human service and mental health agencies. With additional experience, training, and education, graduates may pursue a variety of career pathways in education and administration. The demand for trained early childhood educators is increasing and should remain strong over the next several years.

- Director of childcare center
- Child care specialists
- Curriculum program managers
- Head Start/ECEAP preschool teachers/home visitors/family service advocates and school-age care staff
- Paraprofessional educators in elementary schools
- Teachers in childcare centers
- Teacher’s assistant

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes

When this program is completed, the student will be able to:

- Create and maintain a developmentally appropriate safe, healthy learning environment for children.
- Support the growth, development and diverse individual needs of each child.
- Plan, provide and evaluate developmentally appropriate programming and curriculum to meet diverse group needs.
- Provide support to meet the diverse needs of families and build family partnerships.
- Build community partnerships and advocate for early learning and child care issues.
- Participate in on-going professional development and contribute to a professional team environment.

Special Features

- Contact program advisors for guidance on degree options.
- In addition to the 90 credit degree and the 47 credit one-year certificate, short-term certificates are also available.
- The ECE program is open entry with few prerequisite course requirements. Courses are offered online and in the evenings to accommodate working students. Most courses are open to students for personal enrichment, elective, and continuing education credit.
• ECE students may begin the program during any quarter and enroll part-time or full-time.
• The on-campus childcare center serves as the primary ECE laboratories for students. Lab experiences may also be arranged at the students local School Districts or approved childcare center.
• All courses have an online component.
• Students can continue their academic studies at Peninsula College in the Bachelor of Applied Management degree (BAS). Please contact the BAS advisor for additional prerequisite requirements at BAS@pencol.edu.

Program Prerequisites

College-level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English and math courses required in this program. Students entering this program should have good computer and typing skills. Students may need to complete prerequisite coursework. The placement test will help determine placement level if not known. Emergency Medical Technician Short Term Certificate

The Emergency Medical Technician (EMT) program prepares individuals to assist EMT Paramedics, under the supervision of a physician, to prepare and transport ill or injured patients, and to operate emergency vehicles and equipment such as life support units. Includes instruction in first aid and emergency medicine field techniques; patient stabilization and care; medical field communications; equipment operation and maintenance; and applicable standards and regulations.

There are two parts to enrolling in the EMT class:

1. Apply to Peninsula College.
2. Apply to the EMT Program by filling out the EMT Class Application.

Entrepreneurship and Marketing Specialization, Bachelor of Applied Science in Management

Program Description

The Entrepreneurship and Marketing Specialization for the Bachelor of Applied Science (BAS) in Management degree builds on an existing two year degree, adding upper division coursework to complete a four-year degree. Applicants are accepted year-round. The program can be completed in a two or three-year track and online. Students can enter the program in the fall, winter, or spring.

This degree is designed to provide program graduates with the knowledge and skills needed to move into management or supervisory positions or create new employment opportunities and entrepreneurial ventures in a rapidly changing global economy. The Bachelor’s curriculum includes a mix of required core management and general studies courses.

Program Code: BAMAMBAS

Career Opportunities and Earnings
Potential careers include:

- Business/management consultant
- Business manager
- Business planner
- Marketer
- Recruiter
- Sales development representative
- Sales manager

For current employment and wage estimates, please visit and search for the relevant occupational term: [bls.gov/oes](https://www.bls.gov/oes)

**Program Outcomes**

- Demonstrate ability to communicate effectively and use the language, tools, concepts and models of management applicable to the professional/technical discipline
- Demonstrate ability to apply critical thinking and knowledge in a field specific context
- Demonstrate an understanding of management roles and the nature of leadership
- Apply the principles and philosophy of management systems
- Analyze systems for planning and decision-making
- Prepare and complete cost control processes including the ability to establish a budget, prepare cost reports, and forecast expenditures
- Employ new and developing information technologies
- Acquire, organize, analyze, and interpret information and data to make informed, reasoned, equitable decisions
- Identify and describe human behavior in an organizational setting
- Identify and analyze human resource systems for employment, compensation and training
- Institute and facilitate team-based problem-solving environments
- Develop and articulate a statement of values or code of ethics
- Demonstrate a knowledge of the community and an understanding of issues related to diversity

**Special Features**

- Students in the BAS program have the advantage of a low faculty to student ratio.
- The BAS program does not currently have a waiting list.
- The BAS program curriculum is designed to prepare students for completing a master's degree.

**Program Prerequisites**

Students entering this program should have basic knowledge of a computer and touch-typing skills. It is recommended that online students complete HUMDV 101. Writing classes are embedded in the program. Excel, Word, PowerPoint, and the use of email are tools BAS students will use throughout the program. Those who are not familiar with or comfortable using those programs should locate online, self-study resources or consider enrolling in courses offered by the college. Students may need to complete prerequisite coursework prior to full admittance to the program.

- Completion of a two-year degree or 90 transferrable credits with a minimum cumulative GPA of a 2.0 or higher
- 5 credits of ENGL& 101 with a GPA of 2.0 or higher

**Approximate Additional Costs**

- Request official transcripts from outside colleges (estimated): $20
- Books, supplies and miscellaneous fees: $2400
- Laptop computer: $1000
- Personal health insurance (recommended): $39- $190 per quarter
- Travel/Transportation: varies
Current tuition and fee information is published on the College website at pencol.edu or by calling the Student Services Office at (360) 417-6340.

Financial aid is available to all students who qualify. To learn more about these opportunities, visit pencol.edu/Financial.

**Application Process**

Applications for admission are accepted year-round. Once accepted into the program, students may take courses fall, winter, or spring quarters. To learn more about the application process, visit pencol.edu/applying-program/bas-application-form.

Entrepreneurship Certificate

Program Description

The Entrepreneurship Certificate program prepares students for new venture planning, entrepreneurial start-up, social media marketing, and entrepreneurial finance. The program teaches students how to build a successful entrepreneurial venture from the ground up including analysis of an entrepreneurial mind set, market assessment, how to write a business plan, and innovative social media marketing strategies. This program is designed to allow students in Energy Technology and other innovation programs the opportunity to gain the knowledge and understanding of entrepreneurship.

Program Length: 2 Quarters
Program Code: ENRENC20

Career Opportunities and Earnings

Recent economic trends indicate a major increase in small business start-ups. Many successful entrepreneurs become employers. This program allows students in an energy or innovative program to add the entrepreneurship skills to their education to either start a small business or understand how to market an idea from start to finish.

Small business owners perform a variety of tasks including business planning, sales, accounting, finance, and social media marketing. Earnings for small business owners vary.

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes/.

Program Outcomes

When this program is completed, the student will be able to:

- Write and present a business plan
- Identify business start-up funding sources
- Demonstrate an entrepreneurial mind-set and the skills required to be a successful entrepreneur
- Analyze market trends and innovation for new opportunities
- Work in teams to cultivate ideas into a working plan for an entrepreneurial venture
- Apply critical thinking skills to entrepreneurial and new venture processes
- Develop and market a business presence and webpage on the Internet

Goals

- Encourages students to develop a roadmap to successful entrepreneurship and business ventures
- Provides up to date curriculum that adapts to entrepreneurial trends
- Significantly more cost effective than most private and public schools

Program Prerequisites

Prerequisite requirements must be fulfilled prior to enroll in some courses. Prerequisite requirements are listed together with course titles and descriptions of required program courses in the catalog. All core classes for this certificate are available either online or as a hybrid class. This certificate is designed for future entrepreneurs in conjunction with their degree or certificate.

Approximate Additional Costs

- Books, supplies and miscellaneous fees (per quarter): $200 - $250
- Tuition and fees: $3,297.06 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  - First quarter (16 credits): $1,877.16
  - Second quarter (10 credits): $1,419.90
Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

Environmental Science Emphasis, Associate in Science, Transfer Track 1

Overview

Complete your Associate in Science, Transfer Track 1 while exploring our Environmental Science program.

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the Associate in Science, Transfer Track 1. The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

Your personal educational plan will vary based on many factors including:

- The quarter you begin
- How many classes/credits you plan to take in each quarter
- Your math and English placement
- If you have credits you have already taken and plan to transfer them
- The college you are interested in transferring to
- If you start in our Transitional Studies program

Sample Career Options

- Educator
- Field Technician
- Park Ranger
- Research Scientist

Transfer and Degree Requirements

Students working toward their transfer degree typically take a variety of courses designed to fulfill the general requirements of most four-year colleges and universities. Students intending to transfer to a four-year college for further study are encouraged to work closely with their advisor and transfer institution to explore the requirements of the college they wish to attend after Peninsula. Most institutions have separate admission criteria, which may be based on grades, prerequisite coursework, test scores, and other considerations. Our
sample schedule is designed to provide you with faculty recommended courses to complete your Associate in Science, Transfer Track 1 degree with an emphasis in Environmental Science, but is not a major ready pathway. This sample schedule prepares students to transfer to the Bachelor of Science in Environmental Science at Western Washington University.

Transfer Institution Information

Program Outcomes

Program outcomes are listed on the Area of Study webpage.

First Quarter
Meet with your advisor to talk about your long-term schedule, taking into account your transfer plans.

Family Life Education Leadership Skills Short Term Certificate

Program Description

Peninsula College offers parent education programs for families with young children in Clallam and Jefferson Counties. Each program offers developmentally appropriate learning activities for young children ranging in age from birth to five years of age.

Parents become active partners in their children’s education by assisting teachers in the classroom on a scheduled rotating basis. Because these are parent run organizations, parents are also actively involved in the day-to-day operation of the preschool programs.

Parent Education instructors from Peninsula College facilitate parenting discussions on topics appropriate for each age group. These programs support parents in an environment where they can enhance and develop effective parenting and leadership skills. Parents receive college credits for attendance and participation in the program and have the opportunity to earn short-term certificates. Parents/students who complete a combination of 18 credits of Family Life Education courses can apply for a Leadership Skills Certificate.

Program Code: PCELSC01

Program Outcomes

• Implement healthy, safe practices for young children
• Explain and apply early childhood development and developmentally appropriate practices/environments for young children within a context of social and cultural influences
• Apply strategies for working with children, within a culturally relevant, anti-bias approach in order to promote social-emotional competence
• Determine and utilize appropriate resources for family support, within a social, cultural and anti-bias framework

Program Code: COPDDC20
History Emphasis, Associate in Arts Direct Transfer Agreement (AA-DTA)

Overview

Complete your Associate in Arts Degree, Direct Transfer Agreement (AA-DTA) with an emphasis in History. Explore regional, national, and world history in a traditional classroom setting, online, or hybrid combining both classroom and online experiences.

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AA-DTA. The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

Your personal educational plan will vary based on many factors including:

- The quarter you begin
- How many classes/credits you plan to take in each quarter
- Your math and English placement
- If you have credits you have already taken and plan to transfer them
- The college you are interested in transferring to
- If you start in our Transitional Studies program

Sample Career Options

- Archivist
- Lawyer
- Research
- Teacher
- Writer

Transfer and Degree Requirements

Students working toward their transfer degree typically take a variety of courses designed to fulfill the general requirements of most four-year colleges and universities. Students intending to transfer to a four-year college for further study are encouraged to work closely with their advisor and transfer institution to explore the requirements of the college they wish to attend after Peninsula. Most institutions have separate admission criteria, which may be based on grades, prerequisite coursework, test scores, and other considerations. Our sample schedule is designed to provide you with faculty recommended courses to complete your AA-DTA degree with an emphasis in history, but is not a major ready pathway for every institution.

Transfer Institution Information

Students must select credits from three distribution lists: Natural Sciences, Social Sciences, and Humanities. A specific course may be credited toward no more than one distribution requirement. A minimum of fifteen credits in two separate subject areas must be selected from each list. For Natural Sciences, at least five credits must be a lab. For Humanities, no more than five credits can be a Humanities-Performance course and no more than five credits may be applied in world languages at the 100 level.
Program Outcomes

Homeland Security Emergency Management Certificate

The Homeland Security Emergency Management (HSEM) Certificate program is designed to prepare the next generation of homeland security and emergency management leaders. The Homeland Security Emergency Management certificate is designed to prepare students to coordinate disaster response and recovery efforts and navigate the administrative and technical demands of disaster and emergency management efforts. The Federal Department of Labor identifies homeland security as a high-demand field, one that requires a large number of trained professionals across a number of industry sectors. Students are required to have access to computer, internet, and browser. This degree can be completed online. Visit the HSEM website at pencol.edu/program/homeland-security-emergency-management.

Program Length: 2 Quarters
Program Code: CMRHSC20

Program Goals

• Encourages students to question, search for answers and meaning, and develop ideas that lead to action.
• Provides up to date curriculum that adapts to the rapidly changing field of Homeland Emergency Management.
• The Peninsula College Homeland Security Emergency Management certificate is significantly more cost effective than most private and public schools.

Special Features

Careful consideration is given to help students understand related socio-economic and cultural diversity issues, preparing them to succeed in all situations and environments. Graduates of this program may apply to the Peninsula College Homeland Security and Emergency Management Associate in Applied Science (AAS) degree.

Program Outcomes

When this program is completed, the student will be able to:

• Apply effective interpersonal communication, critical thinking and decision making skills commensurate with a defined level of responsibility.
• Demonstrate knowledge of the coordination and collaboration within the structured system or location used to address HSEM incidents.
• Apply the theory and application of planning strategies.
• Demonstrate effective, efficient and timely communication for professionals working in the HSEM field.
• Develop a plan communicating HSEM assessment and appropriate delivery of information to the public.
• Identify terrorism, causes of terrorism, preventing terrorist attacks, responding to terrorism attacks and avoidance in communication and leadership collapse.
• Analyze the context of public administration: the political system, the role of federalism, bureaucratic politics and power, and the various theories of administration that guide public managers.

Program Prerequisites

Students entering this program should have good familiarity with computer software and hardware in the Windows or MAC environment. College-level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English, math, or applied math courses in this program. Students may need to complete prerequisite coursework. The ASSET or COMPASS test will help determine placement level if not known. Previous coursework may also indicate placement level. 2.0 minimum grade in all HSEM courses.

Career Opportunities and Earnings

The Federal Department of Labor identifies homeland security as a "high-demand field", one that requires a large number of trained professionals across a number of industry sectors.
Emergency management specialists coordinate disaster response or crisis management activities, provide disaster preparedness training, and prepare emergency plans and procedures. Wages often begin around 36.00/hour.

*Prospective Homeland Security Emergency Management students should be aware of the fact that HSEM employment candidates may be subject to background checks.

**Approximate Additional Costs**

- Books, supplies and miscellaneous fees (per quarter): $200-$250
- Tuition and fees: $3,144.64 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  - First quarter (12 credits): $1,572.32
  - Second quarter (12 credits): $1,572.32

**Sample Schedule**

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

*A criminal history may inhibit your ability to find employment in the Homeland Security and Emergency Management fields. In addition, any recent history of drug use, including marijuana, may preclude you from federal employment. If you have any concerns please speak with an advisor.*

**Homeland Security Emergency Management Tribal Certificate**

The Tribal Homeland Security Emergency Management Certificate (Tribal HSEM) is specifically designed for tribal emergency management professionals. Graduates of this certificate are prepared for leadership roles in the rapidly evolving Tribal HSEM profession for their tribe and its neighboring communities. Students are required to have access to computer, internet, and browser. This certificate can be completed online. Visit the HSEM website at pencol.edu/program/homeland-security-emergency-management.

Program Length: 3 Quarters
Program Code: CRMTHC20

**Program Goals**

- Encourages students to question, search for answers and meaning, and develop ideas that lead to action.
• Provides up to date curriculum that adapts to the rapidly changing field of Tribal Homeland Emergency Management.
• The Peninsula College Tribal Homeland Security Emergency Management certificate is significantly more cost effective than most private and public schools.

Special Features
Careful consideration is given to help students understand related socio-economic and cultural diversity issues, preparing them to succeed in all situations and environments. Graduates of this program may apply to the Peninsula College Homeland Security and Emergency Management Associate in Applied Science (AAS) degree.

Program Outcomes
When this program is completed, the student will be able to:

• Apply effective interpersonal communication, critical thinking and decision making skills commensurate with a defined level of responsibility
• Identify the various laws, policies, roles and responsibilities of Emergency Tribal Management
• Describe hazard mitigation and the Disaster Declaration Process as applicable to federally recognized Native American Tribes
• Recognize incident management structures that Tribes and Alaska Native Villages utilize in emergency management
• Identify the key elements that must be in place for technology to enhance the emergency management process
• Prepare, coordinate, and disseminate information released during emergency operations
• Examine the critical role of an Emergency Operations or Coordination Center (EOC/ECC) when disasters strike or in support of pre-planned events
• Describe the importance of protecting, preserving, and restoring both tangible and intangible cultural heritage in the face of disasters and emergencies
• Articulate how emergency management professionals can inform their disaster planning utilizing traditional knowledge
• Design, develop and review exercises and selected training against the most current emergency management standards and policies

Program Prerequisites
Students entering this program should have good familiarity with computer software and hardware in the Windows or MAC environment. College-level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English, math, or applied math courses in this program. Students may need to complete prerequisite coursework. The ASSET or COMPASS test will help determine placement level if not known. Previous coursework may also indicate placement level. 2.0 minimum grade in all HSEM courses.

Career Opportunities and Earnings
Potential positions include: executive assistant, legal assistant, medical The Federal Department of Labor identifies homeland security as a “high-demand field,” one that requires a large number of trained professionals across a number of industry sectors.

Emergency management specialists coordinate disaster response or crisis management activities, provide disaster preparedness training, and prepare emergency plans and procedures. Wages often begin around $36.00/hour.

*Prospective Homeland Security Emergency Management students should be aware of the fact that HSEM employment candidates may be subject to background checks.

Approximate Additional Costs
• Books, supplies and miscellaneous fees (per quarter): $200-$250
• Tuition and fees: $3,555.50 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  ◦ First quarter (10 credits): $1,419.90
  ◦ Second quarter (7 credits): $997.38
  ◦ Third quarter (8 credits): $1,138.22

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

A criminal history may inhibit your ability to find employment in the Homeland Security and Emergency Management fields. In addition, any recent history of drug use, including marijuana, may preclude you from federal employment. If you have any concerns please speak with and advisor.

Homeland Security, Associate in Applied Science (AAS) Degree

Program Description

The Homeland Security Emergency Management (HSEM) associate degree program is designed to prepare the next generation of emergency management and policy leaders with the knowledge and skills they need to improve outcomes in disasters of all types. This online degree program includes instruction in policy as well as planning and operational components of emergency management and homeland security, including opportunities to gain practical experience and work with current incident management technologies. The curriculum provides policy foundations and advances students through core competencies in hazard identification; risk and vulnerability assessment; planning; terrorism; mitigation, preparedness, response and recovery; and planning for diverse populations. This degree will prepare students with the competencies to work in an all-hazards preparedness environment, including an understanding of socioeconomic and cultural diversity issues. Students are required to have access to computer, internet, and browser. This degree can be completed online.

Visit the HSEM website at pencol.edu/program/homeland-security-emergency-management.
Students must earn a minimum of a 2.0 in each HSEM course.

Prospective Homeland Security and Emergency Management students should be aware that Homeland Security and Emergency Management employment candidates are subject to extensive background checks.

Program Length: 6 Quarters
Program Code: CRMHSAPT

Career Opportunities and Earnings

The Federal Department of Labor identifies homeland security as a “high-demand field,” one that requires a large number of trained professionals across a number of industry sectors. The Bureau of Labor Statistics predicts a 22% increase in emergency management specialist positions by 2014. Graduates may find positions with a variety of organizations in the public and private sectors.

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes

When this program is completed, the student will be able to:

- Apply effective interpersonal communication, critical thinking and decision-making skills commensurate with a defined level of responsibility
- Develop agency/organization specific tools to evaluate specific domestic security challenges for the 21st century that face the United States and other industrialized nations
- Design and modify plans and programs at federal, state, and/or local levels to reflect the evolving strategic policy issues associated with a statutory and presidential direction for homeland security
- Interpret ethical and legal issues that impact emergency management and homeland security
- Recognize how to access and disseminate information through multiple agencies in order to forecast the risks, types, and orders of magnitude of terrorist threats most likely to confront the nation/state
- Define the interdisciplinary nature of Homeland Security/Emergency Management functions and be able to assess and integrate various functional areas
- Apply a solid foundation of knowledge and skills to assume leadership roles in emergency management, homeland security, and/or public policy
- Participate in employer-directed training for performance enhancement and career advancement

Special Features

On the job training is critical to giving students the insight and information they need to succeed once their education is complete. The Homeland Security Emergency Management program includes five credits of work-based experience for students completing the associate's degree option. This work-based training provides opportunities to directly connect with potential employers. Graduates of this program can continue their academic studies at Peninsula College in the Bachelor of Applied Management degree (BAS). Please contact the BAS advisor for additional prerequisite requirements at BAS@pencol.edu.

Goals

- The program encourages students to question, search for answers and meaning, and develop ideas that lead to action
- The program provides up to date curriculum that adapts to the rapidly changing field of Homeland Security Emergency Management
- The Peninsula College Homeland Security Emergency Management program is significantly more cost effective than most private and public schools

Program Prerequisites
Students entering this program should have good familiarity with computer software and hardware in the Windows or MAC environment. College-level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English, math, or applied math courses in this program.

**Approximate Additional Costs**

- Books, supplies and miscellaneous fees (per quarter): $200 - $250

**Sample Schedule**

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn an AAS. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

### Honors Emphasis, Associate in Arts Direct Transfer Agreement (AA-DTA)

#### Overview

Stand out as a curious and ambitious university transfer applicant by graduating with Honors.

Complete your Associate in Arts Degree, Direct Transfer Agreement (AA-DTA) with Honors. This unique educational program is for highly motivated students who seek to be engaged in an intensive learning process where they make connections among ideas while developing critical thinking skills.

#### Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AA-DTA. The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

**Your personal educational plan will vary based on many factors including:**

- The quarter you begin
- How many classes/credits you plan to take in each quarter
- Your math and English placement
- If you have credits you have already taken and plan to transfer them
- The college you are interested in transferring to
- If you start in our Transitional Studies program

#### Transfer and Degree Requirements

Students working toward their transfer degree typically take a variety of courses designed to fulfill the general requirements of most four-year colleges and universities. **Students intending to transfer to a four-year college for further study are encouraged to work closely with their advisor and transfer institution to explore the requirements of the college they wish to attend after Peninsula.** Most institutions have separate admission criteria, which may be based on grades, prerequisite coursework, test scores, and other considerations. Our sample schedule is designed to provide you with faculty recommended courses to complete your AA-DTA degree with an emphasis in honors, but is not a major ready pathway for every institution.

#### Transfer Institution Information

Students must select credits from three **distribution lists:** Natural Sciences, Social Sciences, and Humanities. A specific course may be credited toward no more than one distribution requirement. A minimum of fifteen credits in two separate subject areas must be selected from each list. For Natural Sciences, at least five credits must be a lab. For Humanities, no more than five credits can be a Humanities-Performance course and no more than five credits may be applied in world languages at the 100 level.

- Develop familiarity with theories of knowledge, with how knowledge is pursued in different academic disciplines, and with how to apply – or integrate – that knowledge across disciplines to better understand the world, the challenges humanity confronts, and possible avenues for reconciliation.

• Demonstrate interdisciplinary knowledge through thoughtful communication, which emphasizes listening, thinking, and expressing understanding of ideas.
• Learn how to use and apply technology to define information needs, to identify and critically evaluate sources, and to incorporate information into one's own knowledge base to accomplish a learning objective.
• Develop awareness and respect for cultural differences and demonstrate the ability to work with/within diverse groups to better engage the community and the world.
• Demonstrate breadth and depth in learning through the application of critical thinking across and within academic disciplines.
• Critically assess their own work and learn to develop the skills necessary to be self-directed and self-reflective learners.
• Work with college faculty and/or other mentors in developing, implementing, and presenting project work, thus expanding learning beyond the classroom by actively advancing knowledge.
• Complete their capstone experience by exploring the significance of their project using integrative knowledge through a written statement and by producing a video that reflects upon the value of the experience in promoting their educational objectives.

**Hospitality & Event Planning Certificate**

**Program Description**

Clallam and Jefferson counties are full of natural wonders, cultural experiences, local events, and outdoor activities that have transformed the Olympic Peninsula into the premiere destination for outdoor enthusiast in Washington State. Olympic National Park averages over 3 million visitors per year creating a high demand for customer service oriented hospitality and event planners, who appreciate nature, promote conservation and are environmentally and culturally responsible. The Hospitality and Event Planning certificate is designed to prepare students for entry level work in fields that serve visitors on the Olympic Peninsula. Foundation courses introduce students to hospitality, event management and budget spreadsheets. Core courses expand student knowledge and skills in marketing, tourism policy and planning. Students are required to have access to computer, internet, and browser. This degree can be completed online.

Program Length: 3 Quarters
Program Code: HAMHPC45

**Career Opportunities and Earnings**

There is a high demand for talented people with hospitality and event planning skills; and an increasing number of employers are seeking workers with knowledge of customer service, banquet planning and marketing for the tourism industry. Graduates may find positions with a variety of hospitality companies and organizations in the public and private sectors. Wages often begin around $16.14/hour.
• Front desk agent
• Hotel registration clerk
• Event and banquet coordinator

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes/.

Program Outcomes

When the Hospitality and Event Planning certificate is completed the student will be able to:

• Demonstrate an understanding of the concepts related to hospitality services
• Plan, organize and facilitate events
• Apply customer service skills in a business setting
• Develop an operational and marketing plan for an event
• Apply critical thinking skills to solve problems related to hospitality and event planning

Goals

• The program prepares students for a variety of hospitality event planning related jobs
• The program teaches sustainable ecotourism that emphasizes responsible travel in natural areas, conservation and improves the well-being of local people
• The courses are based on recommendations from local employers and industry trends
• The Hospitality certificate is significantly more cost effective than most private and public schools

Program Prerequisites

Students entering this program should have good familiarity with computer software and hardware in the Windows or MAC environment. Students are required to place into the English and math/applied math courses required for the program. Learn more about placement options by visiting the Assessment and Placement website: pencol.edu/placement-testing.

Approximate Additional Costs

• Books, supplies and miscellaneous fees (per quarter): $300-$700
• Tuition and fees: $5,402.85 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  ◦ First quarter (15 credits): $1,800.95
  ◦ Second quarter (15 credits): $1,800.95
  ◦ Third quarter (15 credits): $1,800.95

Hospitality and Ecotourism Associate in Applied Science (AAS) Degree

Program Description

Clallam and Jefferson counties are full of natural wonders, cultural experiences, local events, and outdoor activities that have transformed the Olympic Peninsula into the premiere destination for outdoor enthusiast in Washington state. Olympic National Park averages over 3 million visitors per year creating a high demand for customer service oriented hospitality, ecotourism and recreational workers, who appreciate nature, promote conservation and are environmentally and culturally responsible.

The Hospitality and Ecotourism program is designed to prepare students to work in fields that serve visitors on the Olympic Peninsula. Foundation courses introduce students to hospitality, ecotourism, marketing, and human relations. Core courses expand student knowledge and skills in hotel facilities and technology, event management, marketing, ecotourism, tourism policy and planning, and accounting. Capstone courses provide practicum experience and opportunity for service learning projects with local employers. Students are required to have access to computer, internet, and browser. This degree can be completed online.

Program Length: 6 Quarters
Program Code: HAMHEAPT

Career Opportunities and Earnings

There is a high demand for talented people with hospitality and tourism skills; and an increasing number of employers are seeking workers with knowledge of customer service, recreational planning, hotel management, and tourism industry trends. Graduates may find positions with a variety of hospitality companies and organizations in the public and private sectors. Wages often begin around $17.88/hour.

- Banquet services
- Catering sales manager
- Concierge
- Food service managers
- Front desk associate
- Guest services coordinator
- Hotel services
- Meeting convention and event planners

Program Outcomes

When the Hospitality and Tourism program is completed the student will be able to:

- Demonstrate an understanding of the concepts related to the tourism sector and hospitality services
• Plan, organize and facilitate recreational and business related events
• Apply customer relations in a business setting
• Develop an operational plan for hospitality services, tourist accommodations, green lodging, facilities, technology and sustainable ecotourism
• Evaluate technology utilized in the Hospitality industry
• Apply critical thinking skills to solve problems related to hospitality, tourism and food service management
• Apply basic computational skills to practical applications
• Communicate in writing for a variety of purposes and audiences
• Work cooperatively and collaboratively with others
• Demonstrate competencies to succeed in the selected career pathway workplace

Goals

• The program prepares students for a variety of hospitality and tourism service related jobs
• The program teaches sustainable ecotourism that emphasizes responsible travel in natural areas, conservation and improves the well-being of local people
• The courses are based on recommendations from local employers and industry trends
• The Peninsula College Hospitality and Tourism program is significantly more cost effective than most private and public schools

Program Prerequisites

Students entering this program should have good familiarity with computer software and hardware in the Windows or MAC environment. Students are required to place into the English and math/applied math courses required for the program. Learn more about placement options by visiting the Assessment and Placement website: pencol.edu/placement-testing.

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AAS. The typical student schedule is based on entering the program during the fall quarter. Students can enter this program any quarter.

#### Hospitality Ecotourism and Adventure Travel Leadership Short Term Certificate

Program Code: HAMEAC01

**Program Outcomes**

- Describe the socio-cultural, ecological, economic and community impacts of ecotourism on public and protected areas and identify core indicators of sustainable tourism such as site protection, social impact, critical ecosystems and local economy
- Identify trends in consumer behavior related to the tourism industry such as travel-based learning and ecotourism and analyze the interconnections between different elements of tourism including accommodation, transport, attractions and tourism services
- Develop plans for sustainable ecotourism programs and for managing the impact of tourism on communities and the environment
- Develop and present a plan for creating and delivering a guide experience using key principles of adventure travel guiding and applying the core concepts of customer service, interpretive guiding principles and practices and risk management and assessment to the role of guide

#### Hospitality Media Technician Certificate

The Peninsula College Media Technician certificate prepares students for employment in a variety of jobs including theater technician for live events and performances, technical director, audio and video, lighting, and
sound engineering technician. The program emphasizes both technical and artistic training in audio, video, lighting, set design, basic carpentry, rigging, and multimedia. Internships provide practicum experiences and opportunity for service-learning experiences with local employers.

Program Length: 3 Quarters
Program Code: HAMMTC45

Career Opportunities and Earnings

There is a growing demand for talented people with media, audio, and video technical skills; and an increasing number of employers are seeking workers with creative technical skills. Graduates may find positions with a variety of companies and organizations in the public and private sectors. Potential positions include:

- Audio technician
- Media technician
- Multimedia developer
- Technical director
- Video technician

Wages often begin around $28.70 per hour.

Program Outcomes

When this program is completed, the student will be able to:

- Operate, monitor, and adjust audio, video, sound, and lighting equipment to ensure consistent quality
- Set up and take down equipment for events and live performances
- Record speech, music, and other sounds on recording equipment or computers, sometimes using complex software
- Synchronize sounds and dialogue with action taking place in productions
- Convert video and audio recordings to digital formats for editing on computers
- Install audio, video, and lighting equipment for events and performances
- Communicate effectively and collaborate with groups and clients

Goals

- Prepares students for a variety of media, audio, video, and theater technician jobs
- The courses are based on recommendations from local employers and industry trends
- The Peninsula College Media Technician certificate is significantly more cost effective than most private and public schools

Program Prerequisites

Students entering this program should have good familiarity with computer software and hardware in the Windows or MAC environment. College level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English, math, or applied math courses in this program. Students may need to complete prerequisite coursework.

Required Software and Equipment

- Subscription to Adobe Creative Cloud Account
- Personal website including domain and webhosting for portfolio and subdomains for web based projects
- Digital camera for photography and video
- Books for courses

Approximate Additional Costs

- Tuition and fees: $5,860.11 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  - First quarter (15 credits): $1,800.95
Second quarter (18 credits): $2,029.58  
Third quarter (18 credits): $2,029.58

**Sample Schedule**

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

Human Resources Specialization, Bachelor of Applied Science in Management

Program Description

The Human Resources Specialization for the Bachelor of Applied Science (BAS) in Management degree builds on an existing two year degree, adding upper division coursework to complete a four-year degree. Applicants are accepted year-round. The program can be completed in a two or three-year track and online. Students can enter the program in the fall, winter, or spring.

This degree is designed to provide program graduates with the knowledge and skills needed to move into Human Resources management or supervisory positions. The Bachelor’s curriculum includes a mix of required core management and general studies courses.

Program Code: BAMAMBAS

Career Opportunities and Earnings

Potential careers include:

• Compensation and benefits managers
• Compensation, benefits and job analysis specialists
• Human resources managers
• Human resources specialists
• Training and development managers
• Training and development specialists

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes

Program Outcomes

• Demonstrate ability to communicate effectively and use the language, tools, concepts and models of management applicable to the professional/technical discipline
• Demonstrate ability to apply critical thinking and knowledge in a field specific context
• Demonstrate an understanding of management roles and the nature of leadership
• Apply the principles and philosophy of management systems
• Analyze systems for planning and decision-making
• Prepare and complete cost control processes including the ability to establish a budget, prepare cost reports, and forecast expenditures
• Employ new and developing information technologies
• Acquire, organize, analyze, and interpret information and data to make informed, reasoned, equitable decisions
• Identify and describe human behavior in an organizational setting
• Identify and analyze human resource systems for employment, compensation and training
• Institute and facilitate team-based problem-solving environments
• Develop and articulate a statement of values or code of ethics
• Demonstrate a knowledge of the community and an understanding of issues related to diversity

Special Features

• Students in the BAS program have the advantage of a low faculty to student ratio.
• The BAS program does not currently have a waiting list.
• The BAS program curriculum is designed to prepare students for completing a master's degree.

Program Prerequisites

Students entering this program should have basic knowledge of a computer and touch-typing skills. It is recommended that online students complete HUMDV 101. Writing classes are embedded in the program. Excel,
Word, PowerPoint, and the use of email are tools BAS students will use throughout the program. Those who are not familiar with or comfortable using those programs should locate online, self-study resources or consider enrolling in courses offered by the college. Students may need to complete prerequisite coursework prior to full admittance to the program.

- Completion of a two-year degree or 90 transferrable credits with a minimum cumulative GPA of a 2.0 or higher
- 5 credits of ENGL& 101 with a GPA of 2.0 or higher

**Approximate Additional Costs**

- Request official transcripts from outside colleges (estimated): $20
- Books, supplies and miscellaneous fees: $2400
- Laptop computer: $1000
- Personal health insurance (recommended): $39- $190 per quarter
- Travel/Transportation: varies

Current tuition and fee information is published on the College website at pencol.edu or by calling the Student Services Office at (360) 417-6340.

Financial aid is available to all students who qualify. To learn more about these opportunities, visit pencol.edu/financial.

**Application Process**

Applications for admission are accepted year-round. Once accepted into the program, students may take courses fall, winter, or spring quarters. To learn more about the application process, visit pencol.edu/applying-program/bas-application-form.

Information Technology Systems Administration, Associate in Applied Science (AAS) Degree

Program Description
The Associate in Applied Science (AAS) degree in Information Technology Systems Administration trains students, using industry-based skill standards. Students will design, implement, secure and support Microsoft, Unix/Linux and other industry standard network, client and server systems. Students will learn about the fundamental business context where IT systems function including business communication skills. Classroom instruction and practical experiences are combined into a course of study that provides students with broad exposure to the principles of network management and basic understanding of the current information technology business environment.

Program Length: 6 Quarters
Program Code: SYASAAAPT

Career Opportunities and Earnings

The Information Technology field continues to evolve. Information Technology plays an integral part in achieving management goals and objectives. Network and computer support personnel with experience and education earn living wages that vary depending on many factors, including but not limited to: specific skill set, supply and demand, location, and current business and economic conditions. Job openings vary across the country.

- Network engineer
- Systems administrator
- Systems support specialist

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes

When this program is completed, the student will be able to:

- Determine the type of software or hardware necessary to complete an objective; understand the functions of different operating systems
- Access information from various storage mediums to locate and provide access to information in subdirectories
- Consider ideas that conflict with individual value systems
- Design, configure, troubleshoot and deploy computer networks
- Use an operating system to access a variety of software
- Solve problems using the appropriate operating system utilities; apply systematic approaches and logic to solving problems
- Synthesize and apply information to meet an identified need
- Ask questions and give answers using discipline-specific vocabulary
- Respond to a heterogeneous technology climate
- Plan, install, configure and manage resources; connect and run applications; monitor, optimize and troubleshoot network software and hardware
- Provide organizations a safe, secure, and redundant information system

Special Features

- This program helps prepare the student for a life-long learning process that accommodates rapidly changing technologies
- This program can be completed online, or face to face depending on the mode that best fits each student’s needs
- The practice examination used in this program is based on content that follows guidelines established by industry leaders

Program Goals

For the education program to be effective, the curriculum is designed to promote the following outcomes:
• Prepare students for a variety of Information Technology, network support, computer support and business related job opportunities
• Prepare students for professional certification exams, where applicable
• Prepare students to communicate effectively with management, including Chief Information Officers (CIO), and Chief Financial Officers (CFO)

Program Prerequisites

Students entering this program should have good familiarity with computer software and hardware in the Windows or MAC environment. College level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English, math, or applied math courses in this program. Students may need to complete prerequisite coursework. The placement test will help determine placement level if not known. Previous coursework may also indicate placement level.

Approximate Additional Costs

• Books, supplies and miscellaneous fees (per quarter): $200-$300
• Computer/software: $1,500-$2,500 (optional, recommended)

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AAS. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

Information Technology Systems Administration, Associate in Applied Science-Transfer (AAS-T) Degree

Program Description

The Associate in Applied Science-Transfer (AAS-T) degree in Information Technology Systems Administration trains students, using industry-based skill standards. Students will design, implement, secure and support Microsoft, Unix/Linux and other industry standard network, client and server systems. Students will learn about the fundamental business context were IT systems function including business communication skills. Classroom instruction and practical experiences are combined into a course of study that provides students with broad exposure to the principles of network management and basic a basic understanding of the current information technology business environment.

Program Length: 6 Quarters
Program Code: SYASAAAS

Career Opportunities and Earnings

The Information Technology field continues to evolve. Information Technology plays an integral part in achieving management goals and objectives. Network and computer support personnel with experience and education earn living wages that vary depending on many factors, including but not limited to: specific skill set, supply and demand, location, and current business and economic conditions. Job openings vary across the country.

- Network engineer
- Systems administrator
- Systems support specialist

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes

When this program is completed, the student will be able to:

- Determine the type of software or hardware necessary to complete an objective; understand the functions of different operating systems
- Access information from various storage mediums to locate and provide access to information in subdirectories
- Consider ideas that conflict with individual value systems
- Design, configure, troubleshoot and deploy computer networks
- Use an operating system to access a variety of software
• Solve problems using the appropriate operating system utilities; apply systematic approaches and logic to solving problems
• Synthesize and apply information to meet an identified need
• Ask questions and give answers using discipline-specific vocabulary
• Respond to a heterogeneous technology climate
• Plan, install, configure and manage resources; connect and run applications; monitor, optimize and troubleshoot network software and hardware
• Provide organizations a safe, secure, and redundant information system

Special Features

• This program helps prepare the student for a life-long learning process that accommodates rapidly changing technologies
• This program can be completed online, or face to face depending on the mode that best fits each student’s needs
• The practice examination used in this program is based on content that follows guidelines established by industry leaders

Program Goals

For the education program to be effective, the curriculum is designed to promote the following outcomes:

• Prepare students for a variety of Information Technology, network support, computer support and business related job opportunities
• Prepare students for professional certification exams, where applicable
• Prepare students to communicate effectively with management, including Chief Information Officers (CIO), and Chief Financial Officers (CFO)

Program Prerequisites

Students entering this program should have good familiarity with computer software and hardware in the Windows or MAC environment. College level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English, math, or applied math courses in this program. Students may need to complete prerequisite coursework. The placement test will help determine placement level if not known. Previous coursework may also indicate placement level.

Approximate Additional Costs

• Books, supplies and miscellaneous fees (per quarter): $200-$300
• Computer/software: $1,500-$2,500 (optional, recommended)

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AAS-T. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

### Integrated Indigenous Studies Emphasis, Associate in Arts Direct Transfer Agreement (AA-DTA)

#### Overview

Complete your Associate in Arts Degree, Direct Transfer Agreement (AA-DTA) while exploring Integrated Indigenous Studies (IIS). The IIS emphasis at Peninsula College is open to all students and offers the diverse student population the unique opportunity to experience college curriculum rooted in indigenous perspectives, pedagogies, and experiences. It welcomes those with no previous interactions with indigenous perspectives, as well as those who arrive with past academic knowledge, lived experience, and/or expertise.

#### Sample Schedule

This Sample Schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the Associate in Arts Direct Transfer Agreement (AA-DTA). The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

**Your personal Educational Plan will vary based on many factors including:**
• The quarter you begin
• How many classes/credits you plan to take in each quarter
• Your Math and English placement
• If you have credits you have already taken and plan to transfer them
• The college you are interested in transferring to
• If you start in our Transitional Studies program

Transfer and Degree Requirements

Students working toward their transfer degree typically take a variety of courses designed to fulfill the general requirements of most four-year colleges and universities. **Students intending to transfer to a four-year college for further study are encouraged to work closely with their advisor and transfer institution to explore the requirements of the college they wish to attend after Peninsula.** Most institutions have separate admission criteria, which may be based on grades, prerequisite coursework, test scores, and other considerations. Our Sample Schedule is designed to provide you with faculty recommended courses to complete your Associate in Arts Direct Transfer Agreement (AA-DTA) degree with an emphasis in Integrated Indigenous Studies, but is not a major ready pathway for every institution.

Transfer Institution Information

Students can continue their academic studies at Peninsula College in the Bachelor of Applied Management degree (BAS) with a Tribal Management specialization. Please contact the BAS advisor for additional information at BAS@pencol.edu.

Students must select credits from three distribution lists: Natural Sciences, Social Sciences, and Humanities. A specific course may be credited toward no more than one distribution requirement. A minimum of fifteen credits in two separate subject areas must be selected from each list. For Natural Sciences, at least five credits must be a lab. For Humanities, no more than five credits can be a Humanities-Performance course and no more than five credits may be applied in world languages at the 100 level.

Program Outcomes

Program outcomes are listed on the Area of Study webpage.

First Quarter

Meet with your advisor to talk about your long-term schedule, taking into account your transfer plans.

<table>

Journalism Emphasis, Associate in Arts Direct Transfer Agreement (AA-DTA)

Overview
Earn the Associate in Arts Degree, Direct Transfer Agreement (AA-DTA) while exploring your passion for creative storytelling, photography, design, and community outreach—also known as Journalism.

Sample Schedule
This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AA-DTA. The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

Your personal educational plan will vary based on many factors including:

- The quarter you begin
- How many classes/credits you plan to take in each quarter
• Your math and English placement
• If you have credits you have already taken and plan to transfer them
• The college you are interested in transferring to
• If you start in our Transitional Studies program

Sample Career Options

• Advertising and promotions manager
• Emergency management director
• Marketing and public relations manager
• Reporter
• School teacher

Transfer and Degree Requirements

Students working toward their transfer degree typically take a variety of courses designed to fulfill the general requirements of most four-year colleges and universities. **Students intending to transfer to a four-year college for further study are encouraged to work closely with their advisor and transfer institution to explore the requirements of the college they wish to attend after Peninsula.** Most institutions have separate admission criteria, which may be based on grades, prerequisite coursework, test scores, and other considerations. Our sample schedule is designed to provide you with faculty recommended courses to complete your AA-DTA degree with an emphasis in journalism, but is not a major ready pathway for every institution.

**Transfer Institution Information**

Students must select credits from three **distribution lists**: Natural Sciences, Social Sciences, and Humanities. A specific course may be credited toward no more than one distribution requirement. A minimum of fifteen credits in two separate subject areas must be selected from each list. For Natural Sciences, at least five credits must be a lab. For Humanities, no more than five credits can be a Humanities-Performance course and no more than five credits may be applied in world languages at the 100 level.

Literature Emphasis, Associate in Arts Direct Transfer Agreement (AA-DTA)

Overview
Complete your Associate in Arts Degree, Direct Transfer Agreement (AA-DTA) while exploring your love of literature. Studying English offers opportunities for students interested in writing, editing, or teaching as a career path, but it also assists people whose career pathways focus on thinking critically and creatively to solve problems, analyzing specific details, and supervising or collaborating with fellow employees.

Sample Schedule
This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AA-DTA. The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

Your personal educational plan will vary based on many factors including:

- The quarter you begin
- How many classes/credits you plan to take in each quarter
- Your math and English placement
- If you have credits you have already taken and plan to transfer them
- The college you are interested in transferring to
- If you start in our Transitional Studies program

Sample Career Options

- Creative writer
- Editor
- Grant writer
- K-12 teacher or college professor
- Technical writer

**Low-Cost Associate in Arts Direct Transfer Agreement (AA-DTA)**

**Overview**
Complete your Associate in Arts Degree, Direct Transfer Agreement (AA-DTA) with low-cost educational resources. Low-cost educational resources mean that textbooks and materials cost less than $50 per class (Note: lab fees may still be required). Classes on this pathway are offered in-person, hybrid, and/or fully online.

**Sample Schedule**
This Sample Schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the Associate in Arts Direct Transfer Agreement (AA-DTA). The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

**Your personal Educational Plan will vary based on many factors including:**

- The quarter you begin
- How many classes/credits you plan to take in each quarter
- Your Math and English placement
- If you have credits you have already taken and plan to transfer them
- The college you are interested in transferring to
- If you start in our Transitional Studies program

**Transfer and Degree Requirements**

Students working toward their transfer degree typically take a variety of courses designed to fulfill the general requirements of most four-year colleges and universities. Students intending to transfer to a four-year college for further study are encouraged to work closely with their advisor and transfer institution to explore the requirements of the college they wish to attend after Peninsula. Most institutions have separate admission criteria, which may be based on grades, prerequisite coursework, test scores, and other considerations. Our Sample Schedule is designed to provide you with faculty recommended courses to complete your Associate in Arts Direct Transfer Agreement (AA-DTA) degree, but is not a major ready pathway.

**Transfer Institution Information**

Students must select credits from three **distribution lists**: Natural Sciences, Social Sciences, and Humanities. A specific course may be credited toward no more than one distribution requirement. A minimum of fifteen credits in two separate subject areas must be selected from each list. For Natural Sciences, at least five credits must be a lab. For Humanities, no more than five credits can be a Humanities-Performance course and no more than five credits may be applied in world languages at the 100 level.

**Low-cost courses vary by quarter. To ensure the course is offered as low-cost, follow this link to the Class Search page or use this guide to search.**

Mathematics Emphasis, Associate in Arts Direct Transfer Agreement (AA-DTA)

Overview

Complete your Associate in Arts Degree, Direct Transfer Agreement (AA-DTA) while exploring our mathematics program. We offer courses in a traditional classroom setting, online, or hybrid combining both classroom and online experiences.

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AA-DTA. The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.
Your personal educational plan will vary based on many factors including:

- The quarter you begin
- How many classes/credits you plan to take in each quarter
- Your math and English placement
- If you have credits you have already taken and plan to transfer them
- The college you are interested in transferring to
- If you start in our Transitional Studies program

Sample Career Options

- Actuary
- Data scientists
- Financial planner
- Mathematician
- Systems engineer

Transfer and Degree Requirements

Students working toward their transfer degree typically take a variety of courses designed to fulfill the general requirements of most four-year colleges and universities. Students intending to transfer to a four-year college for further study are encouraged to work closely with their advisor and transfer institution to explore the requirements of the college they wish to attend after Peninsula. Most institutions have separate admission criteria, which may be based on grades, prerequisite coursework, test scores, and other considerations. Our sample schedule is designed to provide you with faculty recommended courses to complete your AA-DTA degree with an emphasis in mathematics, but is not a major ready pathway for every institution.

Transfer Institution Information

Students must select credits from three distribution lists: Natural Sciences, Social Sciences, and Humanities. A specific course may be credited toward no more than one distribution requirement. A minimum of fifteen credits in two separate subject areas must be selected from each list. For Natural Sciences, at least five credits must be a lab. For Humanities, no more than five credits can be a Humanities-Performance course and no more than five credits may be applied in world languages at the 100 level.

Program Outcomes

Program outcomes are listed on the Area of Study webpage.

First Quarter

Meet with your advisor to talk about your long-term schedule, taking into account your transfer plans.

Medical Assisting Certificate

Program Description

The Peninsula College Medical Assisting program provides training for employment in medical offices, clinics, and other healthcare settings. Graduates are likely to find employment in these areas, while advanced degrees may provide access to a wider range of career opportunities in healthcare. The Medical Assisting Associate in Applied Science (AAS) degree includes transfer coursework in math, English, psychology, sociology, and chemistry. Courses include medical terminology, anatomy and physiology, clinical skills, medical office administration, electronic medical records, and medical billing and coding. Medical ethics, patient safety, and patient care are taught throughout the program, as well as the rules and regulations mandated by HIPAA and OSHA. Technology skills are integrated to prepare students for medical office employment, including electronic billing and coding, bookkeeping and accounting, and charting in patient records. Graduates are eligible to take their national exam in order to obtain their Washington State Department of Health Medical Assistant-Certified credentials.

The Medical Assisting Program at Peninsula College prepares medical assistants who are competent in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains to enter the profession.
Application to the program is required. Applicants who plan to begin the program Fall Quarter must submit their application packet by 5:00 pm on June 1st of the preceding Spring Quarter. Prospective Medical Assisting students should be aware of the fact that they will have to complete a background check and provide documentation of required immunizations prior to enrolling in medical assisting courses.

Program Length: 5 Quarters
Program Code: MLAMAC45

Career Opportunities and Earnings

The Medical Assisting program provides training for employment in medical offices, clinics, and other healthcare settings. Advanced degrees may provide access to a wider range of health career opportunities. The demand for medical assistants should remain strong over the next several years.

- Medical assistant
- Medical billing

For current employment and wage estimates, please visit and search for Medical Assistant: bls.gov/oes.

Program Outcomes

When this program is completed, the student will be able to:

- Function professionally in a legal and ethical manner as a medical assistant.
- Use medical terminology correctly.
- Effectively communicate with other health-care team members, patients, and physicians.
- Procure and distribute both office supplies and medical supplies.
- Manage documents, both paper and electronic, in a medical office.
- Demonstrate proficiency with basic medical testing procedures.
- Display knowledge and use of techniques for asepsis, workplace safety, and risk management.
- Demonstrate knowledge and competency in electronic medical billing of multiple insurances.
- Follow laws and regulations regarding patient privacy and confidentiality.
- Demonstrate knowledge of ICD-10 coding for medical billing.
- Integrate cognitive objectives and psychomotor and affective domain competencies into daily practice.

Program Prerequisites

College-level skills in math and English are required before registering for communications and computation courses at Peninsula College. The placement test will help determine placement level if not known. Medical Assisting program prerequisites ENGL 90, INFO 101, and MATH 63.

Approximate Additional Costs

- Books, uniforms, supplies and miscellaneous fees (per quarter): $300-$700
- MA-C credential application, national exam fees and background check fees: $250-$300
- Insurance and immunizations fees: $150-$300
- Total Additional Cost Estimate, excluding tuition: $700-$1300

Student Expenses

Costs are approximations only and do not include tuition or associated classroom/student fees.

Medical Assisting Program expenses, in addition to tuition, placement testing, or any other college-related fees or expenditures.

<table>

### Medical Office Assisting Certificate

**Program Description**

The Peninsula College Medical Office Assistant Certificate program provides training for adults seeking employment in the administrative areas of medical offices, clinics, hospitals, home health, extended care facilities, and other healthcare settings. Technology skills are integrated to prepare students for medical office employment, including electronic medical billing and coding, bookkeeping and accounting, and charting in patient records. Immunizations & background checks must be completed prior to the student being placed into a local healthcare facility for their required externship/practicum experience(s).

Program Length: 4 Quarters
Program Code: MOMOAC45
Career Opportunities and Earnings

There is a high demand for professional medical office assistants and an increasing number of employers are seeking skilled medical office assistants. Graduates may find positions in a variety of healthcare settings including medical offices, clinics, hospitals, home health and extended care facilities. Potential positions include:

- Admissions coordinator
- Billing coordinator
- Medical office assistant
- Medical secretary
- Patient coordinator

For current employment and wage estimates, please visit and search for Medical Secretary: [bls.gov/oes](http://bls.gov/oes).

Program Outcomes

Upon completion of the Medical Office Assistant program, students will be able to:

- Perform the duties of a professional medical office assistant/specialist
- Identify legal and ethical issues related to medical office assistant duties and responsibilities
- Use medical terminology correctly
- Effectively communicate with other healthcare team members, patients, and physicians
- Procure and distribute office supplies
- Manage documents, both paper and electronic, in a medical office
- Demonstrate knowledge and competency in ICD-10 coding and electronic medical billing of multiple insurances
- Follow laws and regulations regarding patient privacy and confidentiality
- Format and generate various documents required in a medical office setting

Goals

- Prepare students for a variety of medical office related jobs
- Offer a medical office assistant program that aligns with recommendations from local employers and industry trends
- Meet the growing need for trained Rotating Allied Health Program Planning medical office assistants

Approximate Additional Costs

- Placement test fee: $20
- Books, supplies and miscellaneous fees: $250-$300
- Tuition and fees: $6,822.75 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  - First quarter (12 credits): $1,572.32
  - Second quarter (15 credits): $1,800.95
  - Third quarter (15 credits): $1,800.95
  - Fourth quarter (13 credits): $1,648.53

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.
# Medical Office Assisting, Associate in Applied Science (AAS) Degree

## Program Description

The Peninsula College Associate in Applied Science (AAS) Medical Office Assisting program provides training for adults seeking employment in the administrative areas of medical offices, clinics, hospitals, home health, extended care facilities, and other healthcare settings. Graduates are likely to find employment in these areas, while advanced degrees may provide access to a wider range of career opportunities in healthcare. Technology skills are integrated to prepare students for medical office employment, including electronic medical billing and coding, bookkeeping and accounting, and charting in patient records. Immunizations and background checks must be completed prior to the student being placed into a local healthcare facility for their required externship/practicum experience(s).

Program Length: 6 Quarters  
Program Code: MOAMAAAPT

## Career Opportunities and Earnings

There is a high demand for professional medical office assistants and an increasing number of employers are seeking skilled medical office assistants. Graduates may find positions in a variety of healthcare settings including medical offices, clinics, hospitals, home health and extended care facilities. Wages often begin around $20.71 per hour. Potential positions include:

- Medical office assistant
- Medical secretary

For current employment and wage estimates, please visit and search for Medical Office Assistant: [bls.gov/oes](https://bls.gov/oes).
Program Outcomes

Upon completion of the Medical Office Assistant program, students will be able to:

• Function professionally in a legal and ethical manner as a medical office assistant/specialist
• Use medical terminology correctly
• Effectively communicate with other healthcare team members, patients, and physicians
• Procure and distribute office supplies
• Manage documents, both paper and electronic, in a medical office

Multimedia Communications Graphics, Associate in Applied Science (AAS) Degree

Program Description

Complete your Multimedia Communications Graphics, Associate in Applied Science (AAS). This program prepares students for entry level employment in a variety of digital media careers including graphic design, digital photography, e-book design and publishing, content development for websites, and design for print publications. Foundation courses provide individuals with hands-on experience using a number of multimedia and graphic software applications. Core courses teach students an understanding of visual communications and provide a strong foundation of multimedia concepts and skills. Capstone courses offer a unique opportunity for students to interact with local businesses, entrepreneurs, and clients while creating a collective portfolio of student work. Some courses in this degree concentration are not offered online. Students are required to have access to Adobe Design Premium software, supply their own digital still and video camera, Adobe Creative Cloud, personal website including domain and webhosting for Portfolio and subdomains for web-based projects, a digital camera for photography and video, and books for this degree option. Visit our web site at: pencol.edu/program/multimedia-communications.

Program Length: 6 Quarters
Program Code: DMWGCAPT

Career Opportunities and Earnings

There is a high demand for talented people with digital media skills and an increasing number of employers are seeking workers with knowledge of multimedia communication tools. Graduates may find positions with a variety of multimedia oriented companies and organizations in the public and private sectors.

- Digital illustrator
- Graphic designer
- Multimedia developer
- Photographer
- Print production artist
- Web content developer
For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

**Program Outcomes**

When this program is completed, the student will be able to:

- Demonstrate an understanding of the core concepts, terms, tools, and methods used to create digital video, illustrations, page layout documents, and web based multimedia content
- Plan, film, and edit, and publish digital videos on the internet
- Digitize, manipulate, and prepare photographic files for print and web publication
- Plan, create, implement, test, and manage multimedia tasks
- Produce a website portfolio that showcases individual multimedia competencies

**Special Features**

- Encourages students to explore how multimedia technologies impact art, business, and education
- Up to date curriculum that adapts to the rapidly changing field of multimedia
- Significantly more cost effective than most private and public schools

**Program Prerequisites**

Students entering this program should have good computer knowledge and skills to type and operate a computer. Online students should complete HUMDV 101 or have successfully completed an online course. College-level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English, math, or applied math courses in this program. Students may need to complete prerequisite coursework. The placement test will help determine placement level if not known. Previous coursework may also indicate placement level.

**Approximate Additional Costs**

- Books, supplies and miscellaneous fees (per quarter): $250
- Computer which meets the system requirements of required software*: approximately $1,400-$1,700
- ‘Adobe Creative Cloud for Education’ or ‘Adobe Creative Cloud’ (Education edition available with use of Peninsula College student email address): approximately $20 per month
- Digital camera: $500-$1000

*Please confirm the computer you have access to meets the system requirements for Adobe Premiere Pro: helpx.adobe.com/premiere-pro/system-requirements.html

**Sample Schedule**

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AAS. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

**Multimedia Communications Photography Certificate**

**Program Description**

The Peninsula College Photography certificate prepares students for employment in a variety of photographic and visual arts related jobs including portrait, landscape, event, travel, sports, advertising, documentary, and
commercial photographer. The hands-on program emphasizes technical, artistic, and business training in photographic technology, lighting, image editing, visual communication, and business planning for photographers.

Program Length: 3 Quarters  
Program Code: PHOPHC45

Program Goals

- The program prepares students for a variety of photography jobs  
- The courses are based on recommendations from local employers and industry trends  
- The Peninsula College Photography certificate is significantly more cost effective than most private and public schools

Program Outcomes

When this program is completed, the student will be able to:

- Market or advertise photography services to attract clients  
- Analyze and plan the composition of photographs  
- Use various photographic techniques and lighting equipment  
- Capture subjects in professional-quality photographs  
- Enhance the subject’s appearance with natural or artificial light  
- Use photo-enhancing software  
- Maintain a digital portfolio to demonstrate their work  
- Archive and manage imagery

Career Opportunities and Earnings

There is a growing demand for talented photographers. Graduates may find positions with a variety of companies and organizations in the public and private sectors. Potential positions include: portrait, landscape, event, travel, sports, advertising, documentary, and commercial photographer. Wages often begin around $25.87 per hour.

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes/.

Program Prerequisites

Prerequisite requirements must be fulfilled prior to enroll in some courses. Prerequisite requirements are listed together with course titles and descriptions of required program courses in the catalog. All core classes for this certificate are available either online or as a hybrid class. This certificate is designed for future entrepreneurs and Energy Technology students in conjunction with their degree or certificate.

Approximate Additional Costs

- Books, supplies and miscellaneous fees (per quarter): $250  
- Computer which meets the system requirements of required software*: approximately $1,400-$1,700  
- ‘Adobe Creative Cloud for Education’ or ‘Adobe Creative Cloud’ (Education edition available with use of Peninsula College student email address): approximately $20 per month  
- Digital camera: $500-$1000  
- Tuition and fees: $5,555.27 total based on total based on 2024-25 WA resident tuition rates (additional fees may apply)
  - First quarter (17 credits): $1,953.37  
  - Second quarter (15 credits): $1,800.95  
  - Third quarter (15 credits): $1,800.95
*Please confirm the computer you have access to meets the system requirements for Adobe Premiere Pro: helpx.adobe.com/premiere-pro/system-requirements.html

**Required Software and Equipment**

- Access to Adobe Photoshop Creative Suite or Creative Cloud.
- Digital camera
- Media card
- Batteries

**Recommended Equipment**

- Tripod
- Polarizing Filter
- Neutral Density Filter

**Sample Schedule**

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. Multimedia Communications, Associate in Applied Science (AAS) Degree

Program Description

Complete your Multimedia Communications, Associate in Applied Science (AAS). In an age where creativity is the engine of economic growth the job market needs imaginative individuals with strong technical and visual communication skills. This program prepares students for entry level employment in a variety of multimedia careers including digital video, multimedia content development for the web, digital photography, digital illustration, and design for print and web publications. Foundation courses provide students with hands-on experience using a number of multimedia and graphic software applications. Core courses teach students visual literacy and a solid foundation of multimedia concepts and skills. Capstone courses offer a unique opportunity for students to interact with business while creating a collective portfolio of student work. Students are required to have access to Adobe Creative Suite Master Collection software (student edition), supply their own digital still and video camera, Adobe Creative Cloud, personal website including domain and webhosting for Portfolio and subdomains for web-based projects, a digital camera for photography and video, and books for this degree option. Students can choose to complete this degree entirely online or on campus. Visit our website at: pencol.edu/program/multimedia-communications.

Program Length: 6 Quarters
Program Code: DMWMCA

Career Opportunities and Earnings

There is a high demand for talented people with digital video and web graphic design skills; and an increasing number of employers are seeking workers with knowledge of multimedia communication tools. Graduates may find positions with a variety of multimedia oriented companies and organizations in the public and private sectors.

- Digital illustrator
- Digital photographer
- Digital videographer
- Multimedia content developer
- Print production artist

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes

When this program is completed, the student will be able to:

- Demonstrate an understanding of the core concepts, terms, tools, and methods used to create digital video, illustrations, page layout documents, and web based multimedia content
- Plan, film, and edit, and publish digital videos on the internet
- Digitize, manipulate, and prepare photographic files for print and web publication
- Plan, create, implement, test, and manage multimedia tasks
- Produce a website portfolio that showcases individual multimedia competencies

Special Features
• Encourages students to explore the role interactive and multimedia technologies play in society and how they contribute to art, business and education
• Up to date curriculum that adapts to the rapidly changing field of multimedia
• Significantly more cost effective than most private and public schools
• Degree can be earned online or face-to-face at the Port Angeles campus

Program Prerequisites

Students entering this program should have good computer knowledge and skills to type and operate a computer. Online students should complete HUMDV 101 or have successfully completed an online course. College-level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English, math, or applied math courses in this program. Students may need to complete prerequisite coursework. The placement test will help determine placement level if not known. Previous coursework may also indicate placement level.

Approximate Additional Costs

• Books, supplies and miscellaneous fees (per quarter): $250
• Computer which meets the system requirements of required software*: approximately $1,400-$1,700
• ‘Adobe Creative Cloud for Education’ or ‘Adobe Creative Cloud’ (Education edition available with use of Peninsula College student email address): approximately $20 per month
• Digital camera: $500-$1000

*Please confirm the computer you have access to meets the system requirements for Adobe Premiere Pro: helpx.adobe.com/premiere-pro/system-requirements.html

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AAS. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

---

**Multimedia Digital Image Editing Short Term Certificate**

**Program Description**

This certificate will provide students with a solid understanding of Adobe Photoshop. Students will learn how to optimize, compress, restore, enhance, colorize, and combine photographs. Courses will emphasize workflow, analysis of image quality, contrast, color, and histogram data. Students will also differentiate between various graphic file formats while designing digital artwork with layer masks and layer styles.

Program Code: DMWDIC01

**Program Outcomes**

- Develop skills to professionally enhanced and manipulated photographs for use in graphic design and multimedia projects using Photoshop
- Produce informational global issue multimedia presentation and online creative portfolio of digitally edited images that are both educational and artistically inspiring

---

**Multimedia Digital Layout and Design Short Term Certificate**

**Program Description**
This certificate will provide students with page layout skills. Students will learn how to create newsletters, flyers, and other print materials with Adobe InDesign, Illustrator, and Photoshop. Emphasis will be placed on vector illustration and page design fundamentals.

Program Code: DMWDLC01

Program Outcomes

- Demonstrate and apply an understanding of graphic design principles with industry standard page layouts and illustration software through visual communication projects
- Plan, design, and produce publications for print and online delivery using various techniques and methods
- Create a portfolio of professional quality vector graphics, typography use, and multimedia projects

**Multimedia Digital Photography Short Term Certificate**

Program Description

This certificate will provide students with basic digital photography skills. Students will learn the terminology, features, and concepts of digital photographic technology while formulating solutions for technical problems. Plan, compose, and photograph portraits. Adjust and control white balance, natural lighting, depth of field, and digital exposure methods. Students will manipulate photographic images with Adobe Photoshop.

Program Code: DMWDPC01

Program Outcomes

- Demonstrate digital camera and photography proficiently in lighting, exposure, color, composition, and visual communication and artistry
- Apply aesthetic expression and enhanced photographic editing techniques using Photoshop to produce an online portfolio

**Multimedia Digital Storytelling and 3D Design Short Term Certificate**

Program Description

Peninsula College’s Digital Storytelling & 3D Design Short Term Program prepares students for jobs related to the digital media, web content development and 3D design. Students will learn interactive multimedia, digital literacy and how to develop media for engagement, education, and entertainment for augmented reality, immersive environments, transformative design, and interactive interfaces. Emphasis will be placed on the aesthetics, structured storylines, and success with graphics, video and 3D design software.

Program Code: DMWDSC01
Program Outcomes

- Research, identify goals, and analyze objectives of interactive digital storytelling to develop successful engagement in online promotion and virtual learning environments
- Create multimedia and 3D objects, curate, and produce collaborative, immersive digital storytelling projects
- Demonstrate cooperative project management and persuasive design creation with a professional online portfolio and social media marketing

Multimedia Digital Video Short Term Certificate

Program Description

This certificate will provide students with beginning and advanced digital video skills. Students will plan, film, edit, and stream short digital videos on the internet. Produce documentary shorts that capture a story to achieve informational or emotional ends. Explore documentary styles, filmmaking, directing, and production management.

Program Code: DMWDVC01

Program Outcomes

- Collaborate with community members and classmates to research, propose, plan, organize, film, edit, and evaluate various course digital video productions
- Demonstrate an understanding of the technology skills required to produce short digital video interviews, public service announcements, original stories, and documentaries
- Create an online video blog portfolio and develop transmedia campaigns to market video projects

Multimedia Journalism Foundations Short Term Certificate

Program Description

This certificate will provide students with an understanding of professional communications grounded in Mass Media. Students will learn how print, visual and broadcast communications are created, edited and published on a variety of media platforms. Courses will emphasize workflow, publication of media, analysis of news, entertainment, and persuasive storytelling. Students will differentiate between facts, opinion, and analysis.

Program Code: DMWJFC01

Program Outcomes
• Demonstrate responsible skills for collaboration in management, ethical writing, and editing with use of graphic design fundamentals and production to assemble publications for print and online delivery
• Research, plan, use photography principles, and creative techniques to execute and assemble a photo stories and newspaper layouts comprised of aesthetic compositions and journalistic integrity

**Multimedia Web Design Short Term Certificate**

**Program Description**

This certificate will provide students with advanced web design skills. Students will learn how to optimize websites for usability and search engine optimization compatibility. Emphasis will be placed on the creation of designs with Adobe software and deployment of web content managements systems.

Program Code: DMWWDC01

**Program Outcomes**

• Design web interfaces and multimedia optimize for online use including enhancing photographs, graphics, animation, video productions
• Develop engaging websites created with HTML5, CSS, content management systems, and Dreamweaver that are search engine efficient
• Demonstrate ability to use file transfer protocol, setup, configure, and manage remote hosting accounts, and an understanding of server-side and client-side web programming

**Music Emphasis, Associate in Arts Direct Transfer Agreement (AA-DTA)**

**Overview**

Complete your Associate in Arts Degree, Direct Transfer Agreement (AA-DTA) while exploring your love of music through this rich program of coursework in performance, practice, theory and appreciation.

**Sample Schedule**

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AA-DTA. The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

**Your personal educational plan will vary based on many factors including:**

• The quarter you begin
• How many classes/credits you plan to take in each quarter
• Your math and English placement
• If you have credits you have already taken and plan to transfer them
• The college you are interested in transferring to
• If you start in our Transitional Studies program

Sample Career Options

• Film composer
• Music educator
• Musician

Transfer and Degree Requirements

Students working toward their transfer degree typically take a variety of courses designed to fulfill the general requirements of most four-year colleges and universities. Students intending to transfer to a four-year college for further training in music are encouraged to work closely with their advisor and transfer institution to explore the requirements of the college they wish to attend after Peninsula. For example, most institutions require proficiency tests in music theory, performance, piano courses, and may have separate admission criteria, which may be based on grades, prerequisite coursework, test scores, and other considerations. Our sample schedule is designed to provide you with faculty recommended courses to complete your AA-DTA degree with an emphasis in music, but is not a major ready pathway for every institution.

Transfer Institution Information

Students must select credits from three distribution lists: Natural Sciences, Social Sciences, and Humanities. A specific course may be credited toward no more than one distribution requirement. A minimum of fifteen credits in two separate subject areas must be selected from each list. For Natural Sciences, at least five credits must be a lab. For Humanities, no more than five credits can be a Humanities-Performance course and no more than five credits may be applied in world languages at the 100 level.

Program Outcomes

Program outcomes are listed on the Area of Study webpage.

First Quarter

Meet with your advisor to talk about your long-term schedule, taking into account your transfer plans.

Natural Resources Certificate

Program Description
The Peninsula College Natural Resources Certificate prepares students for jobs that support and sustain the natural environment. Classes focus on the integration of science, technology, and sustainable practices for natural resources management. Classes emphasize forest ecology and management, geographic information system (GIS) and forest mapping, silviculture, water quality, stream habitat monitoring, timber harvesting, forest road management, restoration ecology, fisheries, river restoration, fire science, and wildlife habitat management. The program includes outdoor learning in forests and waterways, lab sciences, classroom seminars, online course modules, and internships in workplace settings.

Program Length: 3 Quarters
Program Code: NRCNAC45

Career Opportunities and Earnings
For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes

When the Natural Resources program is completed the student will be able to:

- Perform basic tasks to maintain and improve the quality of a forest and the natural environment
- Provide technical assistance regarding the conservation of soil, water, forests, or related natural resources
- Compile data pertaining to size, content, condition, and other characteristics of forest tracts
- Assist conservation scientists in managing, improving, and protecting rangelands and wildlife habitats
- Work in a team to develop solutions to managing natural resources

Program Prerequisites

Students entering this program should have good familiarity with computer software and hardware in the Windows or MAC environment. College-level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English, math, or applied math courses in this program. Students may need to complete prerequisite coursework.

Approximate Additional Costs

- Tuition and fees: $5,402.85 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  - First quarter (15 credits): $1,800.95
  - Second quarter (15 credits): $1,800.95
  - Third quarter (15 credits): $1,800.95

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

Natural Resources, Associate in Applied Science-Transfer (AAS-T) Degree

Program Description
The Peninsula College Natural Resources Associate in Applied Science-Transfer (AAS-T) Degree prepares students for jobs that support and sustain the natural environment. Classes focus on the integration of science, technology, and sustainable practices for natural resources management. Classes emphasize forest ecology and management, geographic information system (GIS) and forest mapping, silviculture, water quality, stream habitat monitoring, timber harvesting, forest road management, restoration ecology, fisheries, river restoration, fire science, and wildlife habitat management. The program includes outdoor learning in forests and waterways, lab sciences, classroom seminars, online course modules, and internships in workplace settings.

Program Length: 6 Quarters
Program Code: NRCNRAAS

Career Opportunities and Earnings
Potential career opportunities include:

- Forest and conservation technicians
- Forestry aide
- Forestry technician
- Natural resources technician
- Park ranger
- Resource technician
- Restoration technician
- Soil conservation technician
- Timber appraiser
- Timber management technician

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes
When the Natural Resources program is completed the student will be able to:

- Perform basic tasks to maintain and improve the quality of a forest and the natural environment

### Nursing Assistant Certificate

#### Program Description

This course studies the role of the nursing assistant, which includes basic nursing skills, emergency procedures, and laws and regulations affecting nursing assistants. The course consists of classroom, laboratory and clinical experiences needed to become a nursing assistant. After completing this course, students are eligible to take
the Washington State Certificate Exam, making them employable in many settings such as hospitals, clinics, skilled nursing facilities (long term care and rehab), and assisted living facilities. To meet the hours of education required by the state, attendance for all classes and clinicals is mandatory. This program is approved by the Nursing Care Quality Assurance Commission. Classes are held in the evenings for 6 weeks and there are also 40 required clinical hours which take place at clinical partner sites, generally over two weekends. There is a summer course that runs during the day for three consecutive weeks.

Students are required to provide their own transportation to clinical sites. Hours of class and clinical will be between the hours of 6am to 9pm depending on the rotation. Clinical sites are in both Port Angeles and Sequim.

Program Length: 6-8 Weeks
Program Code: NAANAC01

Potential Positions and Earning

The Peninsula College Nursing Assistant Certified (NAC) program is a state-approved training that consists of 54 hours of caregiving related academics and workplace skills, and 48 hours of practical experience under the supervision of a Registered Nurse.

The responsibilities of this position involve significant physical activities including standing, lifting (up to 60 pounds unassisted), bending, stooping, pushing, pulling, and twisting. All nursing home staff may be required to transfer residents, and will use lifting devices or work in teams for assisting resident/patient transfers.

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes

When this program is completed, the student will be able to:

- Apply skills and knowledge of high quality nursing assistant care, as a member of a long term care professional team
- Articulate accurate objective medical information verbally and in writing to other professional team members
- Demonstrate proficient assistance to a wide variety of residents in a safe, clean environment
- Create a care environment that encourages independence, while maintaining dignity, for each resident in their care
- Demonstrate competence with care assistance, and decision making
- Identify potential hazards and infectious agents to help with facility safety
- Demonstrate an understanding of the health care system
- Identify the facility policies and procedures and adhere with high self-expectations and standards
- Identify healthy care practices for themselves and their families, using the new skills learned in care giving

Special Features

Upon successful completion of this course, student will be eligible to take the written and practical nursing assistant exam to become certified.

- Receive a certification of completion
- Receive a certification in Healthcare Provider CPR
- Eligibility to take the National Nursing Assistant Certification Exam (NACES). Students who receive their certification and successfully pass the NACES exam are eligible for licensure in the state of Washington as a NAC and employment in various health care facilities.

Entrance Requirements
There are no prerequisite courses for this program, although students must be able to read, write, understand, and speak the English language. Students must also be physically able to perform the duties of the Nursing Assistant. These duties include, but are not limited to: lifting, moving, and transporting patients.

**Approximate Additional Costs**

Current tuition and fees for Washington resident, non-resident, and international students can be found on Peninsula College’s web site at pencol.edu or by contacting the registration office. Rates may increase annually, effective fall quarter.

- Books: $45
- Malpractice insurance: $15.62
- First Aid: $25
- Required immunizations: varies depending on vaccination status and insurance coverage, estimated $0-$1000
- Equipment (scrubs and watch): $60
- Washington State Patrol background check (submitted with application) watch.wsp.wa.gov/WATCH/Home/ Index: $12 (per name)
- Certification Testing and Fees: doh.wa.gov/licenses-permits-and-certificates/professions-new-renew-or-update/nursing-assistant
- Testing: credentia.com/test-takers/wa

**Required Vaccinations**

- MMR (Measles, Mumps & Rubella): Proof of receiving 2 doses of MMR (Live) OR proof of immunity via lab titer to Measles, Mumps & Rubella.
- Varicella (Chicken Pox): Proof of receiving 2 doses of varicella OR proof of immunity via lab titer to Varicella.
- TB Testing: Negative TB test within the last 12 months by Quantiferon Gold or two-step skin test (full skin test twice, at least two weeks apart). If student has history of past positive TB test, student must have a negative chest X-ray within 12 months and a negative symptom screen completed.
- Flu Vaccination: Proof of influenza vaccination is required for students in fall and winter quarter.
- Covid-19 Vaccination: Proof of completed series at least two weeks prior to start of the quarter enrolled is required. Either of the two shot mRNA (Pfizer or Moderna) series are strongly encouraged and preferred, but the one shot (Johnson and Johnson) vaccine will be accepted. Booster is not required at this time.
- Tdap (Tetanus, Diphtheria & Pertussis) Vaccination: All students must have documentation of their adult booster dose.
- Hepatitis B: It is highly encouraged for students to have the 3 dose Hepatitis B series and documented immunity by titer.

**Online Associate in Arts Direct Transfer Agreement (AA-DTA)**

**Overview**

Complete your Associate in Arts Degree, Direct Transfer Agreement (AA-DTA) fully online.

**Sample Schedule**
This Sample Schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the Associate in Arts Direct Transfer Agreement (AA-DTA). The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

Your personal Educational Plan will vary based on many factors including:

- The quarter you begin
- How many classes/credits you plan to take in each quarter
- Your Math and English placement
- If you have credits you have already taken and plan to transfer them
- The college you are interested in transferring to
- If you start in our Transitional Studies program

Transfer and Degree Requirements

Students working toward their transfer degree typically take a variety of courses designed to fulfill the general requirements of most four-year colleges and universities. Students intending to transfer to a four-year college for further study are encouraged to work closely with their advisor and transfer institution to explore the requirements of the college they wish to attend after Peninsula. Most institutions have separate admission criteria, which may be based on grades, prerequisite coursework, test scores, and other considerations. Our Sample Schedule is designed to provide you with faculty recommended courses to complete your Associate in Arts Direct Transfer Agreement (AA-DTA) degree, but is not a major ready pathway.

Transfer Institution Information

Students must select credits from three distribution lists: Natural Sciences, Social Sciences, and Humanities. A specific course may be credited toward no more than one distribution requirement. A minimum of fifteen credits in two separate subject areas must be selected from each list. For Natural Sciences, at least five credits must be a lab. For Humanities, no more than five credits can be a Humanities-Performance course and no more than five credits may be applied in world languages at the 100 level.

Online courses vary by quarter and there may be additional classes not listed in the sample schedule below. For a complete list of online classes, follow this link to the Class Search page.

Paralegal, Associate in Applied Science (AAS) Degree

Program Description

Paralegals assist lawyers by investigating facts, preparing legal documents, researching legal precedent, and conducting research to support a legal proceeding, to formulate a defense, or to initiate legal action. The Peninsula College Paralegal degree prepares students for employment as paralegals and legal assistants in all types of organizations, but most will work for law firms, corporate legal departments, and government agencies. Program offers practicum experiences and opportunity for service learning experiences with local employers.

Program Length: 6 Quarters
Program Code: LAPPAAPT

Career Opportunities and Earnings

There is a growing demand for paralegals. Graduates may find positions with a variety of companies and organizations in the public and private sectors. Wages often begin around $27.67 per hour.

For current employment and wage estimates, please visit and search for the relevant occupational term: [bls.gov/oes/](bls.gov/oes/).

Program Outcomes

- Investigate and gather the facts of a case
- Conduct research on relevant laws, regulations, and legal articles
- Organize and maintain documents in paper or electronic filing systems
- Gather and arrange evidence and other legal documents for attorney review and case preparation
- Write or summarize reports to help lawyers prepare for trials
- Draft correspondence and legal documents, such as contracts and mortgages
- Get affidavits and other formal statements that may be used as evidence in court
- Help lawyers during trials by handling exhibits, taking notes, or reviewing trial transcripts
- File exhibits, briefs, appeals and other legal documents with the court or opposing counsel
- Call clients, witnesses, lawyers, and outside vendors to schedule interviews, meetings, and depositions

Program Goals
• The Peninsula College Paralegal degree prepares students for paralegal and legal assistant jobs
• Courses are based on recommendations from local employers and industry trends
• The Peninsula College Paralegal degree is significantly more cost effective than most private and public schools

Program Prerequisites

Students entering this program should be familiar with computer software and hardware in the Windows or MAC environment. College-level skills in English and math (eligibility for courses numbered 100 or higher) are required before registering for the English, math, or applied math courses in this program. Students may need to complete prerequisite coursework.

Approximate Additional Costs

• AOS textbooks and online learning tools are purchased by subscription. Subscriptions can be purchased for one semester, one year, or two years. If a two-year subscription is purchased, the average cost per AOS class is $27.
• Software: Office 365 (free for PC students)

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn an AAS. The typical student schedule is based on entering the program during the fall quarter. Students may enter this program in any quarter.

Phlebotomy Certificate

Program Description

The Peninsula College Phlebotomy certificate is designed to prepare students for entry-level work in various healthcare settings. Medical Assistant-Phlebotomists are credentialed under RCW 18.360 perform capillary, venous, and arterial invasive procedures for blood withdrawal and other functions under the supervision of a health care provider.

MA-P credential holders may also perform CLIA-waived tests, moderate and high complexity tests with training, and electrocardiograms.

Application to the program is required. Applicants who plan to begin the program Fall Quarter must submit their application packet by 5:00 pm on June 1st of the preceding Spring Quarter.

Program Length: 3 Quarters
Program Code: PHLPHC45
Career Opportunities and Earnings

Graduates can expect to work mainly in hospitals, medical and diagnostic laboratories, blood donor centers, and doctor’s offices and other outpatient clinics. The profession is in high demand, with 17% growth projected from 2019-2029 by the Bureau of Labor Statistics. National certification may be required for employment in some states.

Potential positions include

- Phlebotomist
- Lab assistant
- Medical assistant-phlebotomist

Wages often begin around $19.89/hour or $41,380/year per the BLS. Phlebotomists with advanced skills and experience can earn up to $23.92/hour, or between $39,410 to $45,940/year in Washington State and the Pacific region.

For current employment and wage estimates, please visit and search for Phlebotomist: bls.gov/oes.

Program Outcomes

Upon completion of this program, the student will be able to:

- Function professionally in a legal and ethical manner as a Medical Assistant-Phlebotomist
- Use medical terminology correctly
- Effectively communicate with other healthcare team members, patients, and physicians
- Demonstrate proficiency with basic medical testing procedures
- Perform electrocardiograms accurately
- Follow laws and regulations regarding patient privacy and confidentiality
- Successfully perform capillary, venous, and arterial invasive procedures per protocols

Goals

- The program prepares students for phlebotomy jobs and a national phlebotomy credentialing exam
- The program teaches basic skills required for capillary, venous, and arterial blood withdrawal procedures
- The courses are based on recommendations from local employers and industry trends
- The Phlebotomy certificate is significantly more cost effective than most private and public schools

Program Prerequisites

Students entering this program should have good familiarity with computer software and hardware in the Windows or MAC environment. Placement test(s) will help determine placement level in math and English if not known. Previous coursework may also indicate placement level. Students will complete the Program's application process in spring or summer quarters for subsequent fall quarter entry; entry codes are required to register for all MED courses.

Approximate Additional Costs

- Books, uniforms, equipment, supplies and miscellaneous fees (per quarter): $150-$300
- Tuition and fees: $5,402.85 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  - First quarter (15 credits): $1,800.95
  - Second quarter (15 credits): $1,800.95
  - Third quarter (15 credits): $1,800.95

Sample Schedule
This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

**Political Science Emphasis, Associate in Arts Direct Transfer Agreement (AA-DTA)**

**Overview**
Complete your Associate in Arts Degree, Direct Transfer Agreement (AA-DTA) with an emphasis on Political Science, the study of government, politics, and policy. Students interested in domestic, international, or comparative systems of governance are well-suited for this pathway. It is the springboard for a variety of careers and interests.

**Sample Schedule**

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AA-DTA. The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

**Your personal educational plan will vary based on many factors including:**

- The quarter you begin
- How many classes/credits you plan to take in each quarter
- Your math and English placement
- If you have credits you have already taken and plan to transfer them
- The college you are interested in transferring to
- If you start in our Transitional Studies program

**Sample Career Options**

- Foreign service officer or diplomat
- Government official
- Lawyer
- Policy analyst
- Political scientist

**Transfer and Degree Requirements**

Students working toward their transfer degree typically take a variety of courses designed to fulfill the general requirements of most four-year colleges and universities. **Students intending to transfer to a four-year college for further study are encouraged to work closely with their advisor and transfer institution to explore the requirements of the college they wish to attend after Peninsula.** Most institutions have separate admission criteria, which may be based on grades, prerequisite coursework, test scores, and other considerations. Our sample schedule is designed to provide you with faculty recommended courses to complete your AA-DTA degree with an emphasis in political science, but is not a major ready pathway for every institution.

**Transfer Institution Information**

Students must select credits from three **distribution lists**: Natural Sciences, Social Sciences, and Humanities. A specific course may be credited toward no more than one distribution requirement. A minimum of fifteen credits in two separate subject areas must be selected from each list. For Natural Sciences, at least five credits must be a lab. For Humanities, no more than five credits can be a Humanities-Performance course and no more than five credits may be applied in world languages at the 100 level.

**Program Outcomes**

Program outcomes are listed on the Area of Study webpage.

Psychology Emphasis, Associate in Arts Direct Transfer Agreement (AA-DTA)

Overview

Complete your Associate in Arts Degree, Direct Transfer Agreement (AA-DTA) while exploring psychology, the science of human behavior. Psychology offers opportunities for students interested in counseling and clinical work as career paths, but also offers career pathways focused on studying the relationship between brain and behavior, how people make decisions and solve problems, and how people process information in their environments.

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AA-DTA. The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

Your personal educational plan will vary based on many factors including:

- The quarter you begin
- How many classes/credits you plan to take in each quarter
- Your math and English placement
- If you have credits you have already taken and plan to transfer them
- The college you are interested in transferring to
- If you start in our Transitional Studies program

Sample Career Options

- Clinical psychologist
- Cognitive scientist
- Counseling psychologist
- Human factors specialist
- School psychologist

Sociology Emphasis, Associate in Arts Direct Transfer Agreement (AA-DTA)

Overview

Complete your Associate in Arts Degree, Direct Transfer Agreement (AA-DTA) while exploring sociology. Sociology is the study of society, human social relationships, and institutions. Sociologists consider diverse subject matters ranging from crime to religion and from family to the state. They study how race, class, gender, and other factors shape outcomes. Sociology offers opportunities for students interested in a variety of career paths, especially those that seek to understand how social forces shape human behavior.

Sample Schedule

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the AA-DTA. The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

Your personal educational plan will vary based on many factors including:

- The quarter you begin
- How many classes/credits you plan to take in each quarter
- Your math and English placement
- If you have credits you have already taken and plan to transfer them
- The college you are interested in transferring to
- If you start in our Transitional Studies program

Sample Career Options

- Data or policy analyst
- Law enforcement
- Market researcher
- Non-profit leadership
- Social worker/case manager

Transfer and Degree Requirements

Students working toward their transfer degree typically take a variety of courses designed to fulfill the general requirements of most four-year colleges and universities. Students intending to transfer to a four-year college for further study are encouraged to work closely with their advisor and transfer institution to explore the
requirements of the college they wish to attend after Peninsula. Most institutions have separate admission
criteria, which may be based on grades, prerequisite coursework, test scores, and other considerations. Our
sample schedule is designed to provide you with faculty recommended courses to complete your AA-DTA
degree with an emphasis in sociology, but is not a major ready pathway for every institution.

Transfer Institution Information

Students must select credits from three distribution lists: Natural Sciences, Social Sciences, and Humanities. A
specific course may be credited toward no more than one distribution requirement. A minimum of fifteen
credits in two separate subject areas must be selected from each list. For Natural Sciences, at least five credits
must be a lab. For Humanities, no more than five credits can be a Humanities-Performance course and no more
than five credits may be applied in world languages at the 100 level.

Program Outcomes

Program outcomes are listed on the Area of Study webpage.

Tribal Management Specialization, Bachelor of Applied Science in Management

Program Description

The Tribal Management Specialization for the Bachelor of Applied Science (BAS) in Management degree builds on an existing two year degree, adding upper division coursework to complete a four-year degree. Applicants are accepted year-round. The program can be completed in a two or three-year track and online. Students can enter the program in the fall, winter, or spring.

This degree is designed to provide program graduates with the knowledge and skills needed to support Tribal governance and business management. The Bachelor’s curriculum includes a mix of required core management and general studies courses.

Program Code: BAMAMBAS

Career Opportunities and Earnings
Potential careers include:

- Cultural resource specialist
- FEMA (Federal Emergency Management Agency) cultural specialist
- Natural resources manager
- Tribal and Indigenous engagement program manager
- Tribal cultural specialist
- Tribal manager

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes

Program Outcomes

- Demonstrate ability to communicate effectively and use the language, tools, concepts and models of management applicable to the professional/technical discipline
- Demonstrate ability to apply critical thinking and knowledge in a field specific context
- Demonstrate an understanding of management roles and the nature of leadership
- Apply the principles and philosophy of management systems
- Analyze systems for planning and decision-making
- Prepare and complete cost control processes including the ability to establish a budget, prepare cost reports, and forecast expenditures
- Employ new and developing information technologies
- Acquire, organize, analyze, and interpret information and data to make informed, reasoned, equitable decisions
- Identify and describe human behavior in an organizational setting
- Identify and analyze human resource systems for employment, compensation and training
- Institute and facilitate team-based problem-solving environments
- Develop and articulate a statement of values or code of ethics
- Demonstrate a knowledge of the community and an understanding of issues related to diversity

Special Features

- Students in the BAS program have the advantage of a low faculty to student ratio.
- The BAS program does not currently have a waiting list.
- The BAS program curriculum is designed to prepare students for completing a master’s degree.

Program Prerequisites

Students entering this program should have basic knowledge of a computer and touch-typing skills. It is recommended that online students complete HUMDV 101. Writing classes are embedded in the program. Excel, Word, PowerPoint, and the use of email are tools BAS students will use throughout the program. Those who are not familiar with or comfortable using those programs should locate online, self-study resources or consider enrolling in courses offered by the college. Students may need to complete prerequisite coursework prior to full admittance to the program.

- Completion of a two-year degree or 90 transferrable credits with a minimum cumulative GPA of a 2.0 or higher
- 5 credits of ENGL& 101 with a GPA of 2.0 or higher

Approximate Additional Costs

- Request official transcripts from outside colleges (estimated): $20
- Books, supplies and miscellaneous fees: $2400
- Laptop computer: $1000
- Personal health insurance (recommended): $39- $190 per quarter
- Travel/Transportation: varies
Current tuition and fee information is published on the College website at pencol.edu or by calling the Student Services Office at (360) 417-6340.

Financial aid is available to all students who qualify. To learn more about these opportunities, visit pencol.edu/financial.

**Application Process**

Applications for admission are accepted year-round. Once accepted into the program, students may take courses fall, winter, or spring quarters. To learn more about the application process, visit pencol.edu/applying-program/bas-application-form.

Note: This schedule is based on full-time enrollment for two academic years. Students who enter the program mid-year will adjust their schedules accordingly.

Welding Technology Certificate

Program Description
This one year competency based program leads to a Certificate in Welding Technology and provides training for skills and related technical knowledge necessary for advancement in the metals industry. Instruction includes classroom study as well as extensive practice in the welding lab. Peninsula College welding students are trained to the American Welding Society (AWS) and Washington Association of Building Officials (WABO) structural codes.

Program Length: 3 Quarters
Program Code: WETWTC45

Career Opportunities and Earnings
Throughout Washington state there is an extremely high demand for welding technicians, with annual job openings for welders and fabricators and fitters. The advisory committee for this program emphasizes that someone with good welding skills is well prepared to compete for a living-wage welding job. The demand for welding technicians should remain strong over the next decade.

• Engineering technicians
• Fabricators
• Fitters
• Inspectors
• Plant maintenance personnel
• Sales and service representatives
• Supervisors
• Welders

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes
When this program is completed, the student will be able to:

• Weld all types of joints
• Perform oxyacetylene cutting
• Perform shielded metal arc, gas metal arc, and gas tungsten arc welding
• Apply workplace safety guidelines
• Use and apply welding terminology
• Read basic blueprints

Special Features

• In-house certification prepares students to take AWS certification examinations
• In addition to the AAS and one-year certificate, this program offers short-term certificates in welding skills
• The instructors of the Welding Technology program are certified welding educators
• Peninsula College is an approved AWS test facility. Persons interested in taking AWS examination(s) should contact the program coordinator for information
• Additional separate welding courses for persons not seeking the Welding Technology degree are available through this program, as is a preparatory course for the welding certification examination

Program Prerequisites
College-level skills in English and math (eligibility for courses numbered 100 or higher) are recommended before registering for the English and applied math courses required in this program. Students may need to complete prerequisite coursework. The placement test will help determine placement level if not known. Previous coursework may also indicate placement level.

**Approximate Additional Costs**

- Books, supplies and miscellaneous fees (per quarter): $250
- Tools/Equipment: $1,000
- AWS Certification Exam (optional) (per quarter): $225 (*Students may take up to three certification exams per quarter.*)
- Tuition and fees: $6,599.62 total based on 2024-25 WA resident tuition rates (additional fees may apply)
  - First quarter (18 credits): $2,029.58
  - Second quarter (20 credits): $2,285.02
  - Third quarter (20 credits): $2,285.02

**Sample Schedule**

This sample schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn a certificate. The typical student schedule is based on entering the program during the fall quarter, however some programs allow students to enter in the winter or spring as well. Since not all do, please confirm with an advisor whether this program must be started during a specific quarter or not.

**Welding Technology, Associate in Applied Science (AAS) Degree**

**Program Description**

This two year competency based program leads to an Associate in Applied Science (AAS) degree in Welding Technology and provides training for skills and related technical knowledge necessary for advancement in the metals industry. Instruction includes classroom study as well as extensive practice in the welding lab. Peninsula College welding students are trained to the American Welding Society (AWS) and Washington Association of Building Officials (WABO) structural codes.

Program Length: 7 Quarters  
Program Code: WETWTAPT

**Career Opportunities and Earnings**
Throughout Washington state there is an extremely high demand for welding technicians, with annual job openings for welders and fabricators and fitters. The advisory committee for this program emphasizes that someone with good welding skills is well prepared to compete for a living-wage welding job. The demand for welding technicians should remain strong over the next decade.

- Engineering technicians
- Fabricators
- Fitters
- Inspectors
- Plant maintenance personnel
- Sales and service representatives
- Supervisors
- Welders

For current employment and wage estimates, please visit and search for the relevant occupational term: bls.gov/oes.

Program Outcomes

When this program is completed, the student will be able to:

- Weld all types of joints
- Perform oxyacetylene cutting
- Perform shielded metal arc, gas metal arc, and gas tungsten arc welding
- Apply workplace safety guidelines
- Use and apply welding terminology
- Read basic blueprints
- Apply basic computational skills to practical applications
- Communicate in writing for a variety of purposes and audiences
- Work cooperatively and collaboratively with others
- Demonstrate competencies to succeed in the selected career pathway workplace

Special Features

- In-house certification prepares students to take AWS certification examinations
- In addition to the AAS and one-year certificate, this program offers short-term certificates in welding skills
- The instructors of the Welding Technology program are certified welding educators
- Peninsula College is an approved AWS test facility. Persons interested in taking AWS examination(s) should contact the program coordinator for information.
- Additional separate welding courses for persons not seeking the Welding Technology degree are available through this program, as is a preparatory course for the welding certification examination.

Program Prerequisites

College-level skills in English and math (eligibility for courses numbered 100 or higher) are recommended before registering for the English and applied math courses required in this program. Students may need to complete prerequisite coursework. The placement test will help determine placement level if not known. Previous coursework may also indicate placement level.

Approximate Additional Costs

- Books, supplies and miscellaneous fees (per quarter): $250

**Zero-Cost Associate in Arts Direct Transfer Agreement (AA-DTA)**

**Overview**

Complete your Associate in Arts Degree, Direct Transfer Agreement (AA-DTA) with zero-cost educational resources. Zero-cost means that courses do not require the student to purchase textbooks to fulfill the course.

**Sample Schedule**
This Sample Schedule is provided as a guide for a full-time student starting in fall quarter whose goal is to earn the Associate in Arts Direct Transfer Agreement (AA-DTA). The courses are designed with the appropriate number of credits to meet degree requirements and are organized in a recommended sequence. Please consult an advisor to schedule courses and develop a personalized educational plan.

Your personal Educational Plan will vary based on many factors including:

- The quarter you begin
- How many classes/credits you plan to take in each quarter
- Your Math and English placement
- If you have credits you have already taken and plan to transfer them
- The college you are interested in transferring to
- If you start in our Transitional Studies program

Transfer and Degree Requirements

Students working toward their transfer degree typically take a variety of courses designed to fulfill the general requirements of most four-year colleges and universities. Students intending to transfer to a four-year college for further study are encouraged to work closely with their advisor and transfer institution to explore the requirements of the college they wish to attend after Peninsula. Most institutions have separate admission criteria, which may be based on grades, prerequisite coursework, test scores, and other considerations. Our Sample Schedule is designed to provide you with faculty recommended courses to complete your Associate in Arts Direct Transfer Agreement (AA-DTA) degree, but is not a major ready pathway.

Transfer Institution Information

Students must select credits from three distribution lists: Natural Sciences, Social Sciences, and Humanities. A specific course may be credited toward no more than one distribution requirement. A minimum of fifteen credits in two separate subject areas must be selected from each list. For Natural Sciences, at least five credits must be a lab. For Humanities, no more than five credits can be a Humanities-Performance course and no more than five credits may be applied in world languages at the 100 level.

Zero cost courses vary by quarter. To ensure the course is offered as zero cost, follow this link to the Class Search page or use this guide to search.

### PSYC& 200 or PSYC 250

Credits: 5
Remaining Credits

Credits: 2-5

Complete sufficient college-level credits so that total credits earned are at least 90 credits. These remaining credits may include prerequisite for major courses, additional major coursework, Professional/Technical coursework, or specific general education or other university requirements, as approved by advisor. A maximum of 5 nonacademic electives may be accepted.

Remaining Credits

Credits: 10-15

Complete sufficient college-level credits so that total credits earned are at least 90 credits.
